(See Inside Back Cover)

This catalogue, and the extensive advertising done by us throughout the year covering the goods listed herein, are not designed to create direct buying relations between ourselves and the consumer.

Allcock, Laight and Westwood are manufacturers and distributors of the highest quality fishing tackle, guns, camp equipment and accessories.

Hundreds of dealers throughout the Dominion of Canada stock all our listed goods. We hope, by broadcasting this catalogue and advertising A. L. & W. and "Beaver Brand" tackle, to promote the interest of our dealers and to sell our goods.

Encourage your local dealer to carry the fullest and best line of sporting goods.

Ask your dealer to get for you the things you wish out of this catalogue.

If that is impossible, then write, wire or telephone us and if we can direct you to no dealer where you may inspect the goods we shall, of course, be delighted to serve you. Such orders must be accompanied by cash or money order. DO NOT SEND POSTAGE STAMPS FOR AMOUNTS EXCEEDING 50c.

It is obvious, however, that as manufacturers and distributors we are most desirous of having the whole of Canada served by as well-equipped a chain of local dealers as possible.

OWING TO THE ERATIC CONDITIONS OF THE MARKET, ALL PRICES IN THIS CATALOGUE ARE SUBJECT TO CHANCE WITHOUT NOTICE.

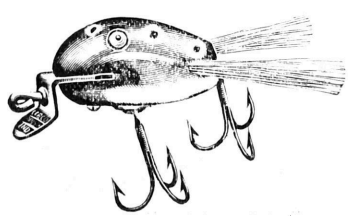
THE NEW MIDGET DING BAT

A "little brother" of the regular size 319 Series Ding Bat, just right in size and action for the light rod user and a fast acting smooth running lure especially suited for stream fishing and for small mouth bass. Has all the life and action of the regular Ding Bat and is amply strong for all ordinary fishing. Made in following finishes:

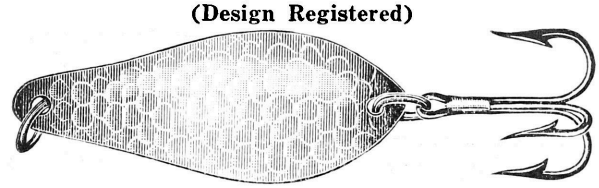
Natural Pikie Scale, Brown legs
Natural Perch Scale, Green Legs.



White Body, Red Head.
Frog Finish, Green Legs.

No. **320** ..... Each **.85**

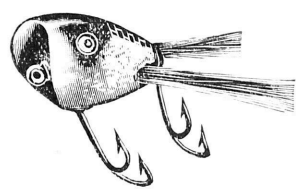
THE RIDEAU FLASH
(Design Registered)



A new bait introduced after lengthy test and proven fish getting ability. Is particularly attractive to fish by reason of the reflection of light from its numerous facets and from its alluring wabble. Best results can be obtained by slow retrieve, the slower the better, just sufficient speed to keep the bait about a foot or eighteen inches under the water, for pike and pickerel. Deeper of course for salmon trout. Size of blades 3¾". Mounted with size 4/0 treble hooks. Beautifully finished as follows:
Brass Grey Stripe; Copper Grey Stripe; Hand Pebbled Finishes; Silver; Old Gold.

No. **908** ..... Each **.75**

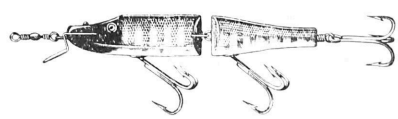
THE NEW SURFACE DING BAT



Use in a series of short jerks, and sudden spurts of movement alternated with plenty of lying idly quiet. Use this bait along the shallow shore lines and weed patches. Work it slowly and see the big bass go for it. Natural Pikie Scale, Brown Legs.

No. **318** ..... Each **.85**

THE JOINTED SNOOK PIKIE MINNOW



Shaped just like the regular Jointed Pikie No. 326, only it's a little larger and built very strong to withstand heavy fishing for Pike, Muskies, lake trout and all the varieties of lighter salt water fish—the construction is such that no strain comes on the body. Its metal, line to hook construction, makes it amply strong for any fish except the heavier salt water species. Made in the following finishes.

Colors:—Natural Pike, Scale Finish. Golden Shiner, Scale Finish.
Natural Perch, Scale Finish. Rainbow.
White and Red. Silver Flash, Scale Finish.

No. **329** ..... Each **$1.50**

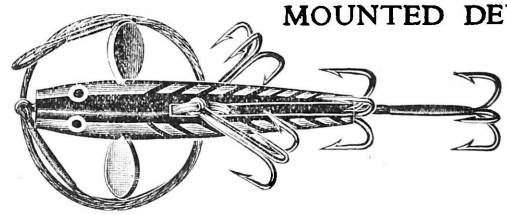
A. L. & W. RING MOUNTED DEVONS



Silver or Gold finish. Old anglers say the Devon is a deadly lure for Bass, Pickerel, Trout. In fact, most any kind of game fish. Best quality Metal Devons, of superior workmanship, mounted specially to suit all the requirements of the Canadian Angler. The 2-tail treble hooks are brazed together, making them rigid, which, along with bead above swivel, (preventing the mounting coming out of the metal body), makes it the only Devon which can be used for bait casting. Mounted with extra heavy hollow point Treble Hooks and Hercules Wire. Sewn one on card in individual box, in both silver and gold finish. No. **216**

A. L. & W. PEARL WABBLERS

Pearl Wabblers have always found a place in the wise angler's tackle-box. Why? Simply because: When hot, dry summer days persist we need fish and have to go deep to get them. The Pearl is one of the best lures to attract the lake trout from his apparent sleep. Mountings are highest quality nickel-plated—swivels, split rings and treble hooks; larger the size, larger the fish.

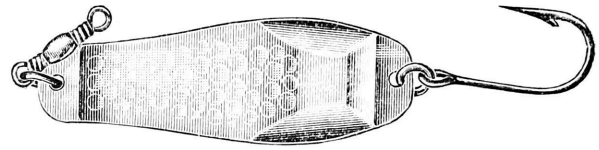
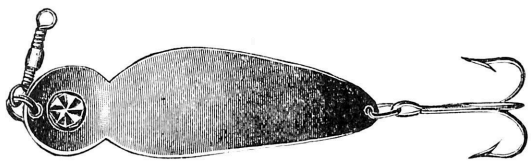
THE SHOEPACK WABBLER



Made of extra strong tempered nickel silver. This bait has been found very successful for taking large lake trout. The blade is six inches in length by 2¼" wide, with hammered surface. The large blade gives extra radiation attracting fish from a great distance. It is formed in a very unusual shape with various angles which gives it plenty of action such as required for this type of lure. Mounted with size 9/0 Siwash hook. .

No. **939**—Nickel Silver Finish ..... Each **.95**

A. L. & W. NEW "POP-EYE" WABBLER



A new bait used and introduced to us by a well-known Rideau Lakes Angler who had great success with same last year. Beautifully finished Nickel Plated blade, or highly polished brass. It is specially annealed permitting the concave shape of blade and the formation of the head at the top of the spoon. A very life-like eye is inserted in the head which proves very attractive when in use in the water. Can be used either as a spinner or wabbler by reversing the hook and swivel. Mounted with swivel and 4/0 Nickel Plated Treble Hook.

No. 927 ..... Each **.75**

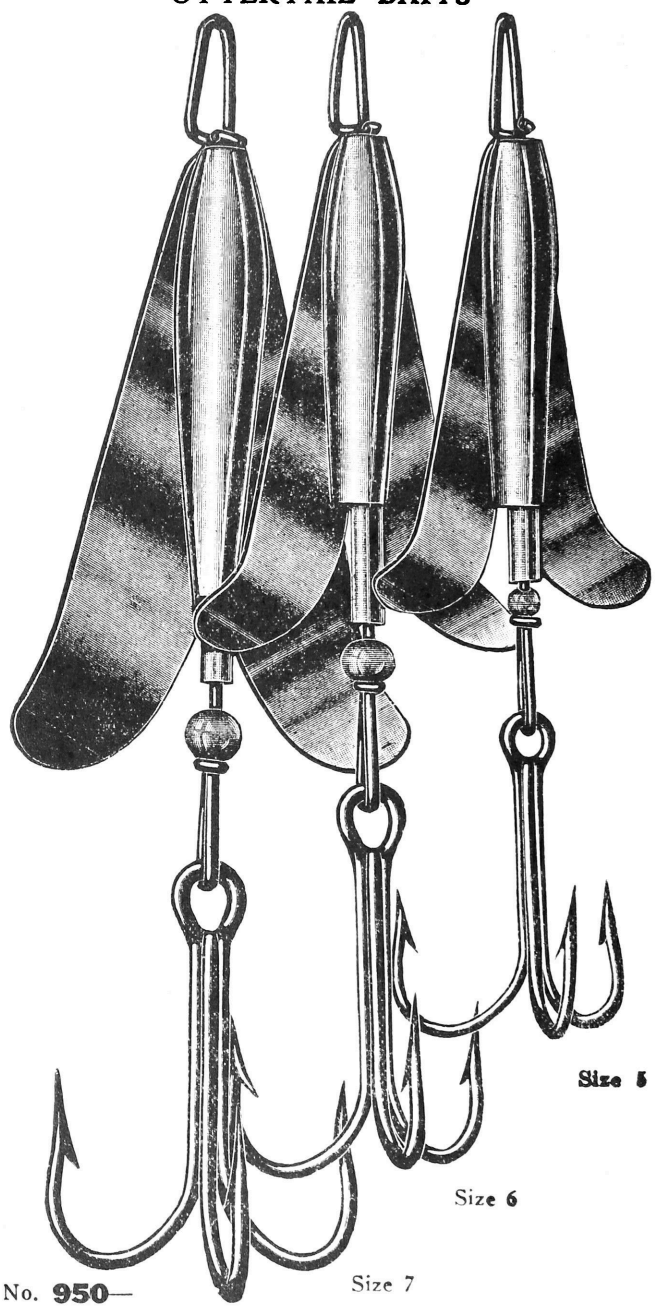
A. L. & W. GENUINE ENGLISH "OTTERTAIL BAITS"



No. **950**—

This is the finest quality Otter Bait made, and has long been the prime favorite throughout Canada. The blades are extra heavy copper, silver plated on one side, copper on the other. Heavy brass wire shank runs through a shaped and weighted copper tube, making the blades spin freely under all conditions. The shank has a spring snap loop at either end. Note the bellied copper tube through which shank runs. This is essential for the true action in the water of this bait and is accountable for its unfailing success. Insist on the A. L. & W. Otter.

A. L. & W. GREEN LOOP CASTS

Our Green Loop leaders carry our unqualified guarantee. For sixty years we have been one of the greatest importers of gut casts, and we know the source of the best Spanish gut and the finest tiers. Green Loop casts are made of the very first class of selecto Spanish silkworm gut and tied by the world's most expert tiers.

The gut is sorted by micrometer gauges to ensure absolute uniformity and roundness in the strands. The longest strands are employed, and before being tied, the strands are treated by a secret solution, which renders them tougher, more pliable and reduces the usual danger of splitting to the vanishing point.

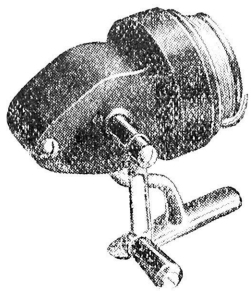
"THREAD LINE" FISHING "A REAL THRILL"

MILWARD "MAGNACAST" REEL



The MILWARD "MAGNACAST" Stationary Drum Reel has been produced to satisfy the demand for a light but strongly built reel with simple and foolproof mechanism and a streamline exterior. The line pick-up is automatic and is brought into operation directly the winding handle is revolved. Every turn of the winding handle produces three revolutions of the pick-up finger which, operating through silent bevel gears with a positive level wind mechanism, re-spools the line perfectly. The slipping clutch, easily adjustable to the weight of line used, is smooth working, and its operation is indicated by a light ratchet check mechanism.

THE "HARDY-WANLESS" RODS FOR "THREAD LINE" ANGLING

The rods are the "World's best" for this class of fishing and are a revelation of power combined with lightness. In casting the rods do the work, not the angler, because they are so perfectly balanced and attuned to the weight of line and bait that they give immediate response to a mere flick, which enables baits to be cast long distances, with great accurancy. 7'. To be used with No. 2 Altex Reel.

No. **4960** ..... Each **$30.00**

THE HARDY "ALTEX" REEL. Automatic Pick-up

Has a non-rotating line-drum, the axis of which is fixed in line with the direction in which the cast is to be made. This reel holds enough length of the stouter sizes of line to make it perfect for thread line fishing for salmon. It should be used with the "Hardy Wanless" 6 lb. Rod.

No. **3964** ..... Each **$32.50**

Hardy "CORO" Thread lines. For use with Altex Reel and Wanless Rod.

No. **3141**—1/0 100 yds. ..... Each **$5.00**

"PARACHUTE" FLIES—NEW IN CANADA THIS YEAR

(Patented in Canada and made by A. L. & W. under special license.)

Parachute Flies float through the air with the greatest of ease and always light on the water with point of hook down; dropping in the same manner as a parachute without any splash. Proven to be the most effective type of Dry Fly yet introduced and ardent Anglers from all over the Dominion advise us there is nothing to equal the "Parachute" for locating the "big ones." Fish just cannot resist these flies when they nestle down on the stream. Parachute Flies should not be used with a heavy cast or loops. Always attach fly to the end of your cast, and see that your cast has been well moistened before using. Stocked in the following patterns, Size 8 and 10 Hooks.

Red Rodger — Blue Teal — Blue Alder — Yellow Alder
Jungle Cock — Black Spider

A. L. & W. DEER HAIR NYMPHS

DEER Hair Nymphs are not just new, but they have only been on the market four years. A. L. & W. Co. were the first to produce these nymphs. We still have the honor of being the only maker of the translucent type. There are many imitations on the market.

One gentleman stated that we should not be allowed to sell these nymphs.

"Why!" he replied, "They will catch so many fish that there will soon be none left to catch!"

This gentleman was using the genuine A. L. & W. Translucent Nymphs. To use these properly you should only put on one Fly at the end of your cast. No loops or ends to create a spray. Then cast and allow to sink to the bottom; then start pulling up slowly, just as nymph when hatched at bottom will come to the surface.

"Oh, boy!" how the trout will hit.

KING EIDER FLY LINES

No. **3201**—"KING EIDER" ECONOMY LINE
Size 2—30 lbs.—20 yds. ..... Special Each **$3.25**

Made in England — 5 connected in Box

This line is made from the very finest of pure silk procurable. Solid square brail. It is then treated to 8 distinct dressings of oil under vacuum pressure, thoroughly impregnating and waterproofing every fibre, enabling it to float and giving it a life and durability unknown in any other line. Hand finished throughout, giving it smoothness from end to end, which makes it a perfect dry or wet fly line, satisfying the most exacting. It is also finding great favor among even bait casters on account of its perfect smoothness and free running qualities and endurance under long, heavy use. With proper treatment, these lines will last years. Green color.

A. L. & W. DEEP LAKE TWISTED WIRE TROLLING LINES

In deep trolling for Lake Trout, to get down where the big ones generally are requires the use of either a heavy sinker or a metal line. For a great many years lines of twisted linen and of braided silk were used with satisfaction for this fishing and they still are. However, we recommend our Deep Lake Trolling Line as much more suitable. It beats dragging a big sinker over the bottom, with constant risk of becoming lodged in rock fissures or snags.

We long ago commenced to supply trolling lines of wire, which would sink of their own weight. We gave both braided and twisted wire lines a great deal of attention, and finally developed the Deep Lake Trolling Wire.

One of these lines makes the use of a rod—and an appropriately light one—entirely practical and attractive. The fish has a better chance. The nearer you get him to the boat, the lighter the line, till there is no weight handicap for him at all. Not so with the sinker—unless he turns it loose for you by snagging it.

Try trolling with this line. The rewards are decidedly worth while.

HOW TO CARE FOR SILK LINE

After using a silk line always remove it from the reel, dry it thoroughly to prevent rot and decay. Be careful not to dry it in the hot sun as this will burn the life out of silk. See that the guides on your rod are not defective. Frayed and broken lines sometime result from guides which are cracked or chipped.

After heavy use, try the line foot by foot. Break off and throw away as much worn line as will not stand a slight pull.

MOSQUITO HEAD NETS

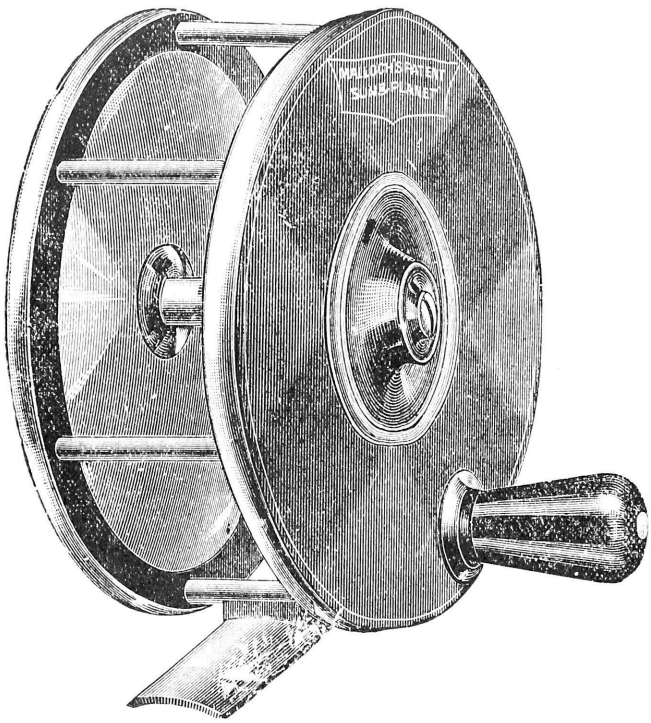
MALLOCH'S PATENT "SUN and PLANET" SALMON REEL



Entirely different in principle and construction.

The following special points make it superior to ordinary Reels:

1. The revolving plate and handle remain stationary when a fish is taking out line. In this it differs from every other Reel.
2. The hand of the Angler never requires to be removed from the handle while playing a fish.
3. By a slight pressure of the finger and thumb upon the handle, the run of the fish may be checked as much or as little as the Angler may desire.
4. Reel cannot over-run.
5. In Casting, the Reel is free to run in any position, and cannot be stopped by any obstacle coming in contact with the handle.
6. In trolling, Rods may rest in any position in the boat, as the handle, whether in contact with the bottom of the boat or anything else, cannot prevent the free play of the Reel.
7. The revolving plate and handle remain stationary when a fish is running; the strain upon the Reel and the tendency to shake the screws loose is avoided.

Ebonite nickel silver bound.

A. L. & W. REEL REPAIR SERVICE

VERY IMPORTANT

Before fishing with a new Reel please oil it thoroughly. A new or used reel should be oiled at least once a day with best quality Reel Oil. Grease with pure vaseline. In order to grease properly, unscrew cap on front plate and take out the spool. Never cast a multiplying Reel with the click on. We endeavour to give 100% service on all the Reels listed in our catalogue. The expense of taking down and rebuilding very cheap Level Winding Reels is high and often almost as much as buying a new Reel. We have prepared a list of principal Reel Parts required for repair of Reels which will enable our customers to effect their own repairs on these cheaper reels and eliminate mail charges both ways, also takedown and rebuilding charges. When ordering be sure and state Make or Name and Number of Reels for which parts are needed.

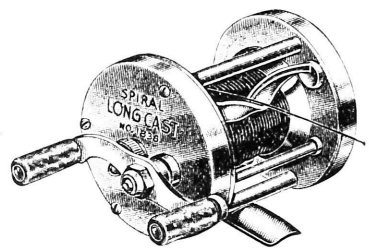
Spiral level wind. Anti-backlash handles. Quadruple multiplying. End cases and crank beautifully engraved. Most important gears hard chrome plated. End cases clear satin finish. Packed with fine suede bag, can of reel oil and combination wrench and screw driver.

No. 3848 LONG-CAST Each $10.00

THE SPIRAL WIND LONG-CAST FRESH WATER REEL

Capacity, 145 Yards, 15 Pound Test



A handsome reel, built to conform to all Spiral specifications of quality and workmanship. The frame is made of brass, heavily chrome plated. The Long Cast Reel is built to withstand hard service with very little attention required.

Features

Spiral Level Wind

Spiral shaft revolves with an oscillating motion forward and back through 2/3 of a revolution to 15 turns of the crank. The line follows the low point of the spiral and is laid smoothly the full width of the spool. In casting, the line blooms freely over the spiral shaft and there is no tendency to pile up and cause "birds' nests" or tangles, as is the case with reels where the line runs through a narrow line guide. An ideal level wind without the use of the numerous parts used in other level wind reels. A simple, sturdy, spiral shaft takes the place of the usual line guide, pawl and double thread shaft.

The Thumb Space

Provides a support for the thumb, and allows much more delicate control of the cast than is possible when the thumb is applied directly to the line on the spool. Backlashes are greatly reduced because there is no chance for the line to pile up under the thumb as it runs off the spool. The Thumb Space is only supplied on the Tru-Cast model.

Anti-backlash Handles

The Spiral Wind Anti-backlash Handles feel better and perform better. They are tear-drop shape and are fastened at the blunt end. Their action during the cast prevents over-running of the spool at the beginning of the cast and their stream-line shape helps to get longer casts. They are a great improvement over round handles.

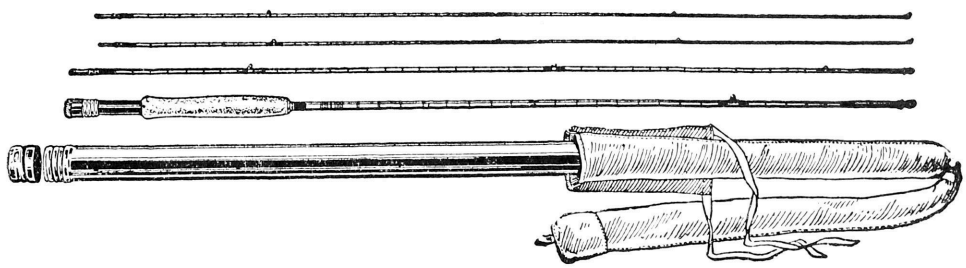
HARDY BROS. CELEBRATED PALAKONA SPLIT CANE FLY RODS



These rods are manufactured by the world's angling specialists. They are made singly, by hand, and every rod in each state of development during its manufacture goes through the most critical examination by experts. No ordinary bamboo can be compared with the "Palakona" bamboo, of which these rods are made. No rod-making material is harder, tougher or more springy. Weight for weight, it is superior to steel of equal area. Hence, the success of these rods in all European casting tournaments. This is the latest design in trout fly rods, and embodies all that is useful and practical. Most carefully balanced to fish either dry or wet fly, with great precision and delicacy, yet strong enough to kill either large trout or small salmon. The handle is cork, fitted with patent screw grip fitting, so that no part of the metal can touch the hand. The joints are "Suction" perfectly fitted. "Bridge" intermediate rings, with agate butt and tip.

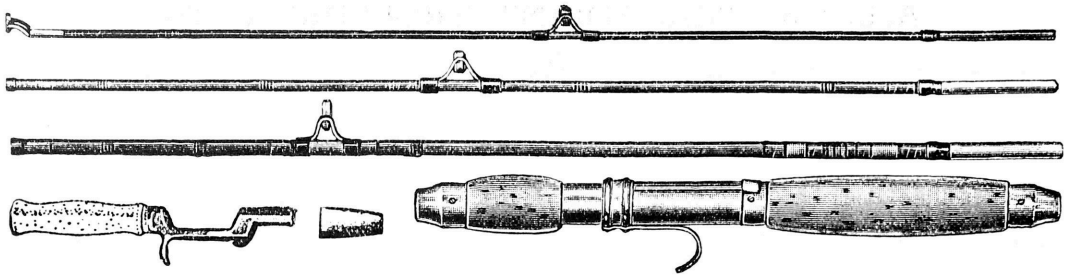
"STAG BRAND SILK BOUND STEEL RODS DE LUXE"



This is the very finest quality steel rod, solidly bound from end to end with pure silk, and fancy whipped at short intervals. Color, Green Base with Red, Black, whippings, This increases the strength of the rod from 50% to 100% and positively prevents buckling. The rod is then waterproofed with our own secret insulating fluid, which is thoroughly heat, cold and moisture resisting, giving lustre and finish to the rod which is really exquisite. The advantages of silk binding and waterproofing cannot be too highly appreciated, as it completely overcomes the danger from rust, which is the greatest enemy of steel rods.

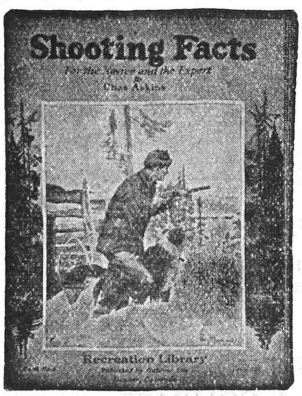
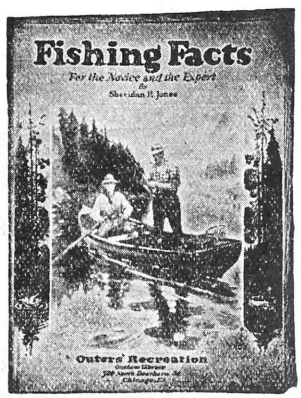
PRACTICAL OUTDOOR BOOKS

By the Best Authorities

.45 each





"The Outdoor Lover's Library" of handy pocket volumes (5 x 3 inches) on the eight subjects most dear to the lover of great outdoors. The authors are all outstanding authorities on their subject, and each book contains 60 or 70 pages of invaluable information and instruction, boiled down and concise. As interesting as a novel. Every devotee of the rod, gun or camp should possess this complete little outdoor library. A veritable encyclopedia, which is mighty pleasant to read.

BOOK 1—FISHING FACTS—By Sheridan R. Jones
The only handbook ever printed which summarizes fishing methods—what tackle to use, how to use it, where to find and how to catch the best-known fresh water fish.

BOOK 2—BAIT CASTING—By Sheridan R. Jones
Short-rod experts regard this book as the equal in value of most volumes costing $2.00, and it is planned to help the novice as well as the veteran bait-caster.

BOOK 3—FLY CASTING—By Sheridan R. Jones
A volume as practical as it is up-to-date. The most thorough presentation of long-rod tackle and the art of fly casting that has recently appeared.

BOOK 4—AUTO CAMPING FACTS—By F. E. Brimmer
A modern and practical volume on auto camping by that well-known authority, F. E. Brimmer. This book contains many valuable hints and is most helpful to both the beginner and old-timer.

BOOK 5—THE CAMPER'S MANUAL—By Horace Kephart
Written by the nationally-known authority, who has published more popular and successful books on camping and woodcraft than any other expert alive today.

BOOK 6—WING SHOOTING—By Chas. Askins

BOOK 7—Big Game HUNTING—By Maj. Townsent Whelen

BOOK 8—SHOOTING FACTS—By Chas. Askins

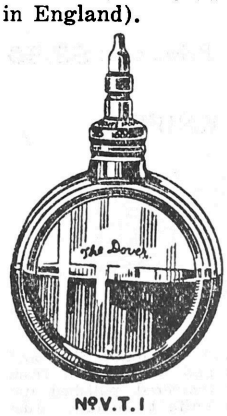
PARKER OILERS

PARKER CELLULOID OIL CAN

The Parker-Hale Valvespout Celluloid Oil Container (made in England).



(1) The stopper cannot be lost.
(2) It has a metalic valve which heremetically seals the outlet.
(3) A half-turn of the nozzle opens or closes it.
(4) It is more serviceable than any other type.
(5) It saves oil, time and temper.

It is strange that the world should have waited so long for such a simple yet practical and useful device. The mortality among oil cans that have lost their stoppers is prodigious and the loss of oil from unstoppered spouts and the loss of time cleaning up the consequent mess, is only too well known to oil users. Filled with high grade oil, which can be refilled when emptied. Size One oz.—2¼" diameter, ¾" thick.
