SPECTACLES:

WHEN TO WEAR THEM.

We cannot overrate the value of spectacles when properly adjusted for they preserve to us one of the most valuable and exalted of our senses, and enable us to pursue our avocations, whether of pleasure or duty, with ease and comfort; so that when we find that the eyesight is beginning to fail in any particular, we should lose no time in consulting the optician, in order to receive that assistance which it is in his power to give.

The first symptom of the change in the eye inducing long sight is, that we are obliged to remove every object to a greater distance from the eye before we can see it distinctly. Thus in perusing a newspaper or any small print, we are sometimes obliged to hold it nearly at arms length before distinct vision is produced; whereas in healthy vision we should have been able to bring about the same result at a distance of twelve inches from the eye. Although we may see the type quite clearly under these circumstances, it is a system that is highly detrimental to the eyesight, and should on no account be persevered in, as it will ultimately increase the failure of the eye, and oblige the optician to use much stronger glasses before a remedy can be applied than if assistance had been sought at an earlier stage of the disorder; whereas it not unfrequently happens, that those who take to spectacles in time are after a while enabled to lay them aside and to see objects with the unassisted eye as clearly as before their use.

Another sign of the decline of sight is when we are obliged to hold the candle between the book or paper and the eye before perfect distinctness can be attained; this causes a contraction of the pupil necessary to our perfect appreciation of objects. Now nothing can be more injurious to the sight than this habit, for the strain thrown on the eye by so much light in such close proximity will eventually dull the perception of the visual organs.

Immediately an individual discovers that the above applies to his own sight, he should without delay seek the assistance of glasses, and if care be taken in the selection, he will be entirely relieved from the inconvenience. Many persons find from the above defect that it is more difficult to read at night than in daytime; such persons ought to be provided with two pairs of spectacles, the one to be used by candle light, being rather stronger in power than that in use in the daytime.

One unmistakable indication that we require spectacles is, that on reading a book or newspaper the letters appear after a short time confused and run one into the other, appearing double and treble, and convey the idea of the eye having a veil or mist before it. The eyes from this cause become so fatigued, that it is found necessary to be continually closing the lids, and to relieve them by looking frequently at different objects, or by stimulating them by friction. If we neglect the means we have at our disposal to correct this distressing state of vision, we shall assuredly suffer for it at no very distant period, and eventually be obliged to use glasses of a much greater power than if we had taken to them in time, to the permanent injury of the sight, and in some instances to its partial loss.

We have just received direct from France, a large addition to our stock; it is now complete in almost every quality. We shall spare no pains to meet the wants of our patrons in this line. In the selection of Spectacles, it requires the greatest care and attention, and should not be performed hurriedly nor without due consideration of the circumstances of the case. The old plan of trying on a number of glasses is most injurious, as the eye becoming fatigued refuses to perform its functions properly, so that eventually we find that after testing the powers of a quantity of different spectacles, we not unfrequently decide upon a sight that is neither suitable to the case under treatment, not comfortable to the wearer, when used quietly at home. We are enabled by knowledge of the business and practice to obviate this injurious practice.—We can generally select Specks. that will suit at once, after asking a few questions, and in no case (unless the eye is diseased,) do we require to have parties try them on sufficiently to affect the eye.

Our Stock comprises in part as follows :—

IN CONVEX FOR LONG SIGHT.

ELECTRO GOODS.

A Word to those who use Electro Forks and Spoons.

Perhaps there is no goods, used to the same extent, that there is so much deception practiced in selling, as in Electro Plated goods, and at the same time it is in the power of any person to tell the quality or the thickness of the Silver at the first sight by simply understanding the marks.

In the first place, there are very few makers that we have confidence in their goods, being as marked. We have had an experience of twenty years, and we give decided preference to Wm. Hutton & Son; their mark is W. H. & S., with a letter on the back of the Spoon to indicate the thickness of the Silver, which runs as follows:—A., B., C. and D.; A. being the heaviest plate, and D. the lightest; the "C." quality has been chiefly sold in Canada, until lately there has not been anything better kept in stock; A. never being imported unless ordered. We have sold Hutton's "C." quality, which we know have been in constant use, for the last six years--the silver has not worn through in any part; therefore we can with all confidence, recommend their goods to our customers. B's. and A's. will of course wear much longer, being thicker plate. Parties having the "A." Fork or Spoon of this make, and take the same care of them that they would of silver, they would last a life time; they only cost one fifth the price, and if they should wear through in eighteen or twenty years, they can be replated for a trifle, and then they would be quite new again. We import the above goods direct from the makers in Sheffield, therefore we are enabled to compete with any establishment in Canada.

Our Stock comprises, namely:—In A., B. and C. Forks, Spoons, Butter-knives, Fish Slices, &c.; Tea Setts in great variety; Coffee Urns; Water Kettles; Salvers; Cake and Fruit Baskets; Egg Stands; Cruet Stands; Sterling Silver Spoons.

OXYGENATED BITTERS, A SURE CURE FOR DYSPEPSIA,

AND DEBILITY OF THE SYSTEM.—CONTAINING NO ALCOHOL.

And especially adapted to the Cure of these Complaints, in all their various forms, such as Pain in the Stomach, Heartburn, Habitual Costiveness, Oppression after Eating, Acid Eructations, Sick Headache, Loss of Appetite, Jaundice, Piles, Night Sweats, Coldness of the Extremities, Flatulency, Nervous Debility, Female Obstructions, Distention of the Stomach and Bowels, Dizziness, Pain in the Side, Torpor of the Liver, Water-Brash, Weakness of the Limbs, Debility caused by Fevers, Climate influence or Old Age, and all Diseases having their origin in Imperfect Digestion, or a Deranged condition of the Stomach.

It is also an excellent remedy, and not surpassed by any Medicine known, for all the peculiarities of

FEMALE COMPLAINTS,

Being free from every injurious property, and perfectly safe at all times. Its soothing and restorative TONIC POWER is the secret of its great efficacy in all cases of **GENERAL DEBILITY.**

The tone and energy imparted to the Stomach by this medicine, fortifies the system against infectious diseases, and exposure to changes of climate; it is, in fact, an indispensible *Travelling Companion.*

The Oxygenated Bitters contain nothing which can intoxicate; and the medicine has no similarity whatever to the various alcoholic mixtures, disguised as "Bitters," being purely a medicinal compound, in which are combined the most valuable remedial agents, and a peculiar oxygenated property hitherto unknown, but highly efficacious in all complaints arising from weakness and derangement, or prostration of the stomach and system generally. It is a mild and agreeable tonic, removing all disagreeable symptoms, and assisting Nature in her efforts to restore the impaired powers of the system. Numerous letters in possession of the Proprietors from those who have been cured or greatly benefited by this medicine, can be seen on application, and pamphlets sent by mail to any part of the United States.

DIVISION OF PROFITS.

The first Division of the Company's Profits took place as at 25th May, 1854, when a Bonus at the rate of £2 per cent. per annum on all Policies effected in the Participation Scheme of the Company was declared, as shewn in the following Table, the examples being Policies of £1,000 :—

" 1854	1000	20	1020

The additions to Policies of larger or smaller amount sare in the same proportion.

Those who do not wish to add the amount of the Bonus to the sum assured, are permitted to take the value of the addition in a present sum.

The next Investigation and Division of Profits will be made in 1859, and Quinquennially thereafter.

From the wide basis on which the Company has been established, from the extensive field of business which it is cultivating, and from the success which has attended its operations, the Directors look forward to large future Profits, available to their Policy-holders ; and they do not think they over-estimate the advantages of the Company, in stating that no Office affords so many facilities, and at the same time holds out the prospect of so much advantage to Assurers.

This Company also grants assurances on the following plan ; Half the Annual Premium will be received for the first seven years ; the remaining half, with interest, being chargeable as a debt on the policy, (without security,) to be paid off when convenient, or at the option of the assured, to be deducted at settlement of claims.

Prospectuses and full information regarding the Company, may be had on application to

WILSON & WRIGHT, Proprietors.

IT IS A FIXED FACT!—CONSUMPTION CAN BE CURED!

SIR JAMES CLARK, Physician to Queen Victoria, and one of the most learned and skilful men of the age, in his "Treatise" on Consumption, says: "That Pulmonary Consumption admits of a cure, is no longer a matter of doubt; it has been clearly demonstrated by the researches of Laennec and other modern pathologists." DR. CARSWELL, who investigated such matters probably as thoroughly as any man, says; "Pathological Anatomy has, perhaps, never afforded more conclusive evidence in proof of the curability of a disease than it has in that of tubercular phthisis," (pulmonary consumption.)

THE REMEDY WHICH WE OFFER,

DR. WISTAR'S BALSAM OF WILD CHERRY,

Has cured thousands of cases of Consumption of the Lungs, Liver Complaints, Coughs, Colds, Asthma, Croup, Bronchitis, Whooping Cough, Influenza, &c., many of them, after every known remedy had failed to reach the disease.

We can present a mass of evidence in proof of our assertion, that **cannot be discredited.** DR BOYDEN, a Physician in Maine, says:—"I have recommended the use of **Dr. Wistar's Balsam of Wild Cherry** for diseases of the Lungs for two years past, and many bottles to my knowledge have been used by my patients, all with beneficial results. In two cases, where it was thought Confirmed Consumption had taken place, the Wild Cherry effected a cure." The following letter from Rev. HENRY WOOD, of Concord, N. H., formerly Editor of the *Congregationalist*, and late Minister to Bayroot, Syria, is one among the mass of testimonials as to the merits of the Balsam:

CONCORD, N. H., March 2.

Mr. S. W. Fowle:—Dear Sir,—Two years ago, a sudden and violent attack upon my lungs confined me to my bed for several weeks; and when I recovered I was so much oppressed by difficulty of breathing, that I was unable to sleep or rest upon a bed at night. The suffering was extreme, and judging from the inefficacy of the remedies used, I supposed the disease incurable. Being persuaded to try a bottle of WISTAR'S BALSAM OF WILD CHERRY, without the least confidence in its efficacy, I found the difficulty almost entirely removed before one bottle was used up. Having a moral aversion to medicine, and seldom using it in any form, sympathy with my fellow-sufferers induces me to make this public statement, and recommend the article to others similarly afflicted. Yours, &c., HENRY WOOD.

FIFTY THOUSAND PERSONS die annually in England of CONSUMPTION! In the New England States, the proportion is one to four or five. The mere fact that such a disease is ever curable, attested by such unimpeachable authority, should inspire hope, and reanimate failing courage in the heart of every sufferer from this disease. ☞ This Balsam has been prepared by S. W. FOWLE & Co., Boston, for the last 15 years, from the original recipe of Dr. MILAR, and has always the *written* signature of "*I. BUTTS*," on the wrapper.☜—None other genuine. PREFACE.

THE PUBLISHER, in presenting this, his second volume of the HAMILTON DIRECTORY, to the public, does not deem it necessary to say much by way of preface.

In the first volume, something was said with reference to numbering the houses, and it was hoped that ere this publication would be issued, all the houses on the principal streets would be properly numbered for the convenience of the public. The publisher would just say, that no pains has been spared by him to bring about this desirable object. The City Council has been petitioned by a large number of the most influential men of the City, but to no purpose.

Much difficulty has been experienced in collecting and arranging a list of over 8,000 names, and it will not be strange, if some will look for their names, and not find them. Especially true is this, since some positively *refused* to give the necessary information. Some errors may have arisen in transcribing the names and preparing them for the press. In order to avoid such errors, if any there be appearing in the list, the Publisher kept the people advised, by advertisements' that the manuscript would be open at his office, for inspection and correction. Some have called upon him, and to these he would take this opportunity of expressing his thanks.

He is much indebted to MR. HASKINS, City Engineer, for his gratuitous assistance in the preparation of the Map which appears in this book. Mr. H. kindly placed at his disposal, the Ward Maps of recent surveys, from which this Map has been, in part, taken.

The thanks of the Publisher are due to the public, who, by subscriptions and advertisements, have so liberally patronized his work. He feels gratified to know that the present volume is far superior to the former in every respect. The information it contains with reference to the City and Province, is more extended. The Map of the City will prove a valuable assistant to any one wishing to learn the locality of the streets. The Classified List, following the List of Residences, is an addition of no small account. The public, he hopes, will be better satisfied with the second, than with the first volume. Further improvements will be sought after in future editions.

*** Since this work was commenced, the Governor General has caused a dissolution of Parliament, and ordered a new Election. Consequently, the List of Members of the Legislative Assembly on Page 41, is not a List of the Members of the existing Assembly. On Page 291, will be found a List of the Acting Assembly, so far as could be ascertained, up to the time of completing this work.

INTRODUCTION.

HAMILTON.

HAMILTON is situated on the south-western shore of Burlington Bay, occupying a beautiful elevation of land, gradually inclined from the water to the base of the Mountain, a distance of nearly two miles. It is regularly laid out—the streets broad, and crossing each other at right angles. Much care is taken, in laying out new streets, to have them direct, broad and ornamented. A few years ago, and the ground now occupied by stately edifices, costly dwellings and elegant churches, was a quiet, rural scene. A few years earlier, and no sound broke the stillness of the air, save the crackling of falling boughs, and the rustling of leaves. Where now promenade the devotees of fashion in their gay attire, the wild red man quietly roved, and yearly proclaimed himself "Monarch of the Wood." Civilization waved her wand over the plain, the forests disappeared, mansions have taken the place of huts, and elegance and magnificence flourish everywhere. Prosperity attends all the enterprises of our citizens, and we promise to be the first City of Western Canada.

The population of the City is about 27,500, nearly two-thirds of which have been added during the last seven years. In 1850, it numbered about 10,300. Consider that this increase is accompanied by a corresponding increase of wealth and commerce, and we can safely say, few towns have had an equally rapid growth.

That the value of Real Estate and Personal Property has kept pace with our Commercial growth, the following table clearly shows :—

DESCRIPTION OF STREETS.—Of over one hundred and fifty streets that intersect our beautiful city, very few can be described in this brief notice.

King Street, has long been the chief street of the city. It runs through the entire limits, from East to West. Our most magnificent trading houses are located on this street, the retail shops occupying the north side, and principally wholesale the other. The great trade of the city is carried on here, and many of the stores are of the finest and richest class. The buildings of this street are almost entirely of brick or stone, and very many of them are of the highest style of architecture. The Bank of British North America, is a beautifully finished, spacious, and substantial building. Among the most extensive wholesale establishments fronting on this street, may be mentioned those of Kerr, Brown & Co., D. McInnes & Co., and Buchanan, Harris & Co. These buildings are prominent and imposing structures. The Anglo-American hotel, in the Eastern part of the street, overlooks all surrounding structures, and is among that class of buildings that always attract the attention of the stranger. Some elegant private residences adorn the different portions of the street. If the original design of the inhabitants had been carried out, this street would have surpassed in extent and beauty any other street of any city in Western Canada; and, in fact, it is doubtful if there be more than one street in North America that would have equalled it.* It was, originally, the design of the inhabitants that the width of King Street, throughout its entire length, should be what it is at James Street. Imagine what a street, two or three miles in length, would be in such a city. Contrast it with the narrow, dismal, winding alleys of Montreal, New York, or Boston, and you have the modern enterprise of the 19th century side by side with the limited, sluggish spirit of the past.

James Street, crossing King at right angles, and extending from the bay on the North to the mountain on the South, a distance of nearly two miles, is second in importance to King. It is adorned by the finest specimens of architecture in the city. Among these may be mentioned the Mechanics' Institute, Post Office, Royal Hotel, Bank of Upper Canada, R. Juson & Co. Hardware building, Canada Life Assurance Company buildings, and St. Andrew's Church. This street has risen rapidly in importance until it has become one of the first business streets in the city. Some of the most extensive dry goods, and hardware establish-

ments are located on this street; and the retail shops present very imposing and attractive appearances. The only street that rivals James, in a business point of view, is King, but James has facilities for growth which can never be removed, and it will probably continue to advance in importance as the city advances in wealth and commerce. In the vicinity of the mountain are many elegant private residences, with tastefully, and richly ornamented grounds.

John Street, East of, and parallel to James, and extending from the bay to the mountain, is sufficiently broad and central to become one of our first streets. It is one of the principal thoroughfares which pour into the city the vast resources of the surrounding country. It contains a number of elegant residences, two or three churches, one of which, the Church of the Ascension, is an ornament of the city. On this street stands one of the most imposing and expensive structures in Western Canada, the wholesale house of D. McInnes & Co. On a rise of ground at the northern terminus of this street stands the old Custom House, a brick building of some note in former years. It has its southern terminus in a well-paved winding road up the mountain side. The stranger visiting Hamilton will not fail to ascend the mountain by this road; for, from any point of it, he can obtain a better view of the city and bay, and surrounding country, than from any other position. Besides, on this ascending street are located some of our finest residences, and most beautiful grounds.

McNab Street, West of, and parallel to James, has latterly come into distinction. Its proximity to James Street, to the Market, and to the depot of the Great Western Railway, has given it its present importance. Some large wholesale establishments are located on it in the vicinity of the Royal Hotel. Several churches are located in different parts of this street, some of which are ornamental and indicative of the growing taste and enterprise of the citizens. Its extent is nearly equal to that of James.

York Street, forming with James an angle of about sixty degrees, runs in a Westerly direction from James to Dundurn, the late residence of Sir Allan Napier Macnab. It owes its importance to its being the only highway thoroughfare between the city and the Northern and North Western portions of the surrounding country. At its Western terminus lie the beautiful grounds of Burlington Cemetery. The residences of some of our wealthiest citizens are scattered along this street.

Main Street, extending from East to West through the entire city, parallel to King, and next South, is broad and central. It is already a street of much importance, containing many eligible and beautiful sites for private residences.

Hughson and *Catharine Streets* are among the most important running North and South from the bay to the mountain.

Few cities furnish to men of wealth and taste so desirable sites for private residences. The slope of the mountain side is adorned with costly dwellings, which have sprung up as if by magic, and they furnish quiet retreats for the man of business and toil. Men have grown rich in the traffic of our youthful city, and have sought retirement here. This slope commands a delightful view of the busy city below, and the blue waters of the bay and lake beyond. Here is our "Fifth Avenue," and far superior is it to the famous gathering place of the millionaires of New York city. *Their* prospect is limited to massive walls and paved streets, while *we* look upon a beautiful country and bright waters.

Public Buildings.—Attention has been called, briefly, to some of the most prominent public buildings in the city. Some of these deserve a more lengthy notice, as representing the taste, the enterprise, and refinement of our citizens, in the midst of a rapid and almost unprecedented advancement. It is usually the case

in cities of rapid growth, that comfort, convenience, and beauty of architecture receive but little attention. These are left for the second or third generation who inherit the wealth of their ancestors. But in our city, taste, refinement, regard to health and convenience have kept pace with its growth.

The *Church of the Ascension*, situated on John Street, is built of Hamilton stone. Its architecture is beautiful, and structure massive. It belongs to our ornaments, and its spire, now in course of completion, renders it the most prominent feature of the Southern portion of the city.

St. Andrew's Church, situated on Upper James Street, lately erected, is a magnificent structure. Its spire is built of Ohio sandstone, an excellent building stone, soft and easily worked into any form. It is, by far, the most ornamental of our churches. Cost, probably, $40,000.

Two new churches, about to be completed, on McNab Street, are ornamental and costly. One of these is brick, erected by the *United Presbyterians*. The other is of stone, owned by the *Free Church*. Cost of each, about $30,000.

On James Street are quite a number of costly buildings, already briefly noticed. Among these we would call especial attention to the *Canada Life Assurance Company* building, South of King. It is built of Hamilton stone, and highly ornamental. Near this, and a little Northward, is the large Hardware establishment of R. Juson & Co.—a building of Hamilton stone, and an ornament to the city. On this street are the buildings of the Royal Hotel, erected by Thomas Davidson, Esq., at an expense of not less than $100,000. This magnificent pile is a worthy exhibition of artizanship and taste. The first story is occupied chiefly by dry goods stores and offices, richly finished.

On the corner of John and King Streets is the wholesale warehouse of *D. McInnes & Co.*, a building of Ohio sandstone, erected at a cost of $120,000 or $130,000. There are few superior buildings in Canada. It is five stories in height, including the basement, and has a front on King Street of 60 feet, and on John Street of 130 feet.

The *Anglo-American Hotel*, on King Street East, is one of the most imposing structures in Western Canada. It is built of brick, five stories in height, and has a frontage on King Street of about 130 feet.

The new *Market Buildings*, which are soon to be erected, will not be surpassed by any similar structures in Canada. They will have a front on four different streets,—Merrick, James, York and McNab. Judging from the plans adopted by the City Council, they will be the pride of the city.

We learn that the Government intends soon to erect a Custom House worthy of our growing city.

The residence of Sir Allan Napier Macnab, called Dundurn, in the Western portion of the city, is a pleasant location, and will furnish a delightful home for the unfortunate deaf and dumb, for which, it is said, the Government is negotiating.

Our *System of Free Schools* shows that our citizens appreciate the true foundation of prosperity. It has been pronounced, without exception, the best, and under the best supervision of any in the Province. No money is spared to render it all that can be desired.

MANUFACTURES.—The manufactures of Hamilton have a degree of importance which few cities in Canada can claim. We refer especially to the factories of D. C. Gunn, and Joseph Flint, Esqs., and those of the Great Western Railway.

The saw factory of Joseph Flint, in the Eastern portion of the city, is the only one of significance in the Provinces. We clip the following notice of it from the *Christian Advocate* of Dec. 23, 1857: "With the exception of a small business in Montreal, this is the only Saw Factory in Canada. It has been established a

little more than two years, and has been under the superintendence of Mr. Ward, a very experienced workman. Mr. Flint, the proprietor, has recently taken up his residence here, and it is his intention to greatly enlarge and extend the business. The establishment gives employment to about 30 men, and turns out, annually, from $40,000 to $50,000 worth of work. Every description of Saw is manufactured here, from the large circular, measuring in circumference 18 feet, to the smallest, 9 inches; and from the large cross-cut, to the smallest hand-saw. The principal portion of the work is performed by machinery, the whole of which is driven by an engine of 50 horse power, the largest in the city. There are about 50 varieties of punches or dies used, for as many different kinds of saws. The material is of the best English Cast Steel. It comes in plates of proper thickness, and after being cut to the size required, the machinery is set in motion, and as rapidly as the workman can keep his piece of plate moving, the punch cuts out the teeth. The saw is then taken to a large furnace, where it undergoes the process of tempering; it is then dipped in a composition, which serves to make it hard and elastic. After it has been straightened on an anvil, it is ground and polished by machinery, and is then ready for the finishing department. Here it is filed, and by a slight stroke of the hammer, every other tooth is inverted—it is then ready for the market."

The Hamilton *Spectator* has a brief notice of Mr. Gunn's Locomotive and Steam Engine Manufactory, which we take the liberty to copy. "The works have now been running steadily for sixteen months successfully, and have turned out first class small stationary steam engines, and locomotives second to none in use in this country. Two large first class freight engines, of Hamilton manufacture, are on the Great Western Railway, five first class passenger engines are on the Grand Trunk Railway, two more are finished, and will go to the same road in a few days; there are four more in a forward state of construction, for the same company, and material is on hand for the construction of several more. The establishment keeps from one hundred to one hundred and fifty men and boys, mechanics and laborers, in constant employ, and is capable of working double that number."

The manufactures of the Great Western Railway Company extend to everything connected with their running apparatus. Every class of cars, and, in fact, *all* the cars they use, from the lumber platform to the moving palace, which accommodates 60 persons, are manufactured here. Stand on the eminence overlooking the shops and warehouses of this company, extending half a mile along the line of railway, and if you can imagine yourself looking from the same position five years earlier, you will realize what wonderful changes energy and enterprise can produce. Five years ago, and where now stand these busy workshops, the waters of the bay slept in quiet. On a summer evening we have stood on the uplifted banks, and looked upon the beautiful scenery. The soft sky, bending to embrace the mighty hills, gently whispered the lesson we oft have learned from such scenes. The gentle slumbers of the bright waters were unbroken, save by the paddle of some eager fisherman. No fancy or dream, however wild, could have painted the scene we now gaze upon. The waters have been pushed back to make way for solid earth. Massive walls have risen up, that echo to the click, click, click of a thousand wheels. The quiet of the scene has been changed to a constant din, and confused rattling of wheels, and puffing of steam engines, and screaming of locomotives. Man, with his wealth and his mighty mind, has been here and converted the scene. We cannot weary the reader with detailed accounts of the several factories, and the method of manufacturing, but will leave him to gratify his curiosity by visiting the grounds, and surveying for himself the extensive works.

The Great Western Railway has done very much for the growth of our city. It has added to our commerce, to our wealth, and to our manufactures. We have more than doubled our population during the five years of the railroad's

existence. Our manufactures have indefinitely increased, and our commerce has received an impetus to which it will ever answer. The Great Western Railway has done more for Hamilton than any other one enterprise could possibly have done ; and, in fact, more than all other circumstances combined, if we except the natural advantages of her position. It is a source of prosperity which can never run dry. It is a great vein, which is constantly pouring a current of life into the heart, from all parts of the system. Its impulses to our trade are sound and healthy.

Hamilton is destined to be the most important city of Canada West. Add to its already superior advantages, the commerce of the Southern Railroad, with its heart in our midst, and the proposed ship canal from Lake Huron to Lake Ontario ; and, with sunshine and rain, "seed-time and harvest," to the western hills and plains, no competition can prevent our presenting a worthy object of admiration and emulation.

Piano-Forte Manufactory,

KING STREET, HAMILTON.

JOHN KNOTT,

(FROM COLLARD & COLLARD, ENGLAND,)

Respectfully informs the Citizens of Hamilton and the surrounding country that after upwards of twenty years' experience in London, he is enabled to manufacture the most approved Pianofortes, with all the latest improvements, at a considerable less cost than those imported into Canada, and for durability, power, brilliancy of tone, and elasticity of touch, not to be surpassed. All instruments manufactured are warranted of the best workmanship, a good sound serviceable Piano, and kept in tune within the city limits one year, FREE OF CHARGE. All instruments full compass; a six octave Piano for the performance of the compositions of the modern composers is useless. Pianofortes tuned and thoroughly repaired, and old ones taken in exchange.

The following testimonial of Messrs. Collard & Collard, (the most extensive manufacturers in the world,) J. K. feels a pleasure in showing, and he trusts is a sufficient guarantee to the public to secure a good Piano.

TESTIMONIAL.

Oval Road, Regent's Park, London, Oct. 31, 1856.

I know Mr. John Knott, and have great pleasure in recommending him as an ingenious and experienced workman, and I should look upon it as a great advantage should any of my instruments, wanting adjustment or repairing, fall into the hands of a man so thoroughly capable as I consider him to be. A SYNOPSIS

OF THE

PUBLIC BY-LAWS OF THE CITY OF HAMILTON.

RULES *to Regulate the Proceedings in the City Council of the City of Hamilton*

Adopted January 28, 1856

1. That the regular meetings of the Council shall be held on each alternate Monday, at half-past three o'clock, P.M., and if at that hour there is not a Quorum present, the Mayor may take the Chair and adjourn, with the consent of the majority then present.

2. That whenever a meeting may be required for special business, it shall be called by his Worship the Mayor, at such times as he may deem requisite, or, at the request of any five members of the Council, the Clerk shall summon the Meeting, and it shall not be competent to consider or decide upon any matter at a Special Meeting, unless such matter has been fully explained in the notice calling the Meeting.

3. That as soon as a Quorum is assembled the Chair shall be taken, and the proceedings of the Meeting commenced by the Clerk reading the minutes of the last Regular and any intermediate Special Meetings.

4. That whenever an adjournment takes place in consequence of there not being a Quorum present, the names of the members present shall be inserted in the Records of the Council.

5. That the Mayor shall preserve order and decorum, and decide upon questions of order, subject to an appeal to the Council, and shall state the rule applicable to the case, if required.

6. That the business of the Council shall be taken up in the following order:—

1st. Presentation of Petitions and Memorials by members in their places.

2nd. The reading of the same by the Clerk or the member presenting them.

3rd. The presentation of Reports from the Standing Committees, according to seniority, and Special Committees, according to date of appointment.

4th. The Third Reading of By-Laws.

5th. The reference of Memorials and Petitions, by the Mayor or presiding officer, to their appropriate Committee, without motion.

6th. The consideration of the Reports of the Standing and Special Committees *in the order in which they were presented*, unless with the unanimous consent of the members present.

7th. The First Reading of By-Laws.

8th. The consideration of any business of which notice had been given on a previous evening.

9th. The Second Reading of By-Laws, and their consideration in Committee of the Whole.

Notices, in writing, of intention to introduce any measure or resolution, may be given at any time during the evening, and shall always be entered on the order of the day.

7. That no specific appropriation or other business of moment shall be determined upon until it has been reported upon by the appropriate Committee, unless it may appear that the Committee has neglected to fulfil its duty.

8. That every motion or resolution shall be in writing, and read by the mover (who alone may make introductory remarks thereon,) and when duly moved and seconded, and stated by the Mayor or presiding officer, shall be open for consideration.

9. After a resolution has been duly stated, it shall be deemed to be in possession of the Council, but it may be withdrawn at any time, with the sanction of the Council.

10. When any resolution is under consideration, no motion shall be received unless to adjourn, to lay on the table, the previous question, to postpone, to refer, or to amend, which shall have precedence in the order in which they are arranged, the first and third of which shall be decided without debate.

11. When any member desires to speak, he shall rise in his place and address his remarks to the Mayor, or presiding officer, confine himself to the question, and avoid personality. Should more than one member rise at once, the Mayor or presiding officer shall determine who is entitled to the floor.

12. No member, other than the one proposing a question or motion, (who shall be permitted to reply,) shall speak more than once without the leave of the Council, except in explanation of a material part of his remarks, which may have been misconceived, but then he is not to introduce new matter.

13. The Mayor or any member may call a member to order while speaking, when the debate shall be suspended, and the member shall not speak until the point of order be determined, unless to appeal from the decision of the Chair. All appeals shall be decided without debate.

14. Every member present when a question is put shall vote thereon, unless the Council shall excuse him, or unless he be personally interested in the question, in which case he shall not be obliged to vote.

15. When the Mayor or presiding officer is putting a question, no member shall walk out of, or across the House, or when a member is speaking shall any other members hold discourse which may interrupt him, nor pass between him and the Chair.

16. That any member of the Council may of right require the question or motion in discussion to be read for his information at any period of the debate, but not so as to interrupt a member speaking.

17. That upon a division in the Council, the names of those who vote for, and those who vote against the question shall be entered upon the Minutes.

18. A motion to adjourn shall always be in order, and need not be in writing.

19. That any proposed By-Law be introduced by a motion for leave, specifying the title of the By-Law, or a motion for a Committee to bring it in, or by a report of a Committee.

20. That any proposed By-Law shall receive three several readings, but not more than two on the same evening, unless with the unanimous consent of the members present. The Clerk shall certify the reading and the time on the back of the By-Law.

21. Any member presenting Memorials or other papers addressed to the Council shall be accountable that they do not contain improper or impertinent matter, and no Memorial or other paper shall be read unless endorsed by the member presenting it.

22. That the mover of a Special Committee shall be Chairman of the same, and whenever any Measure is referred to a Committee the introducer of the Measure shall be a member of the Committee instructed to consider it.

23. Whenever it shall be moved and resolved that the Council go into Committee of the Whole upon any question, the Mayor or presiding officer shall leave the Chair, and appoint a Chairman of the Committee, who shall report their proceedings to the Mayor or presiding officer on his resuming the Chair. The Rules

of the Council shall be observed in the Committee of the Whole, except the rules relating to the yeas and nays, and limiting the number of times of speaking.

24. That a motion in Committee, to rise and Report the Question, shall be decided without debate, and need not be in writing.

25. That the Standing Committees shall be as follows:—1st, on Finance; 2nd, on Fire and Water; 3rd, Board of Works; 4th, Markets and Market Block; 5th, Police; 6th, Grievance; 7th, Hospital and Cemetery. Each to consist of five members.

26. No money appropriation shall be finally acted upon by the Council until it shall have been referred to the Standing Committee on Finance, and no money shall be paid by the Chamberlain until ordered by the Council, and such order signed by the Chairman of the Finance Committee, or, in case of his absence, by the Mayor or presiding officer.

27. When a blank is to be filled, the question shall be first taken on the highest sum or number, and on the longest time proposed.

28. After any question, except one of indefinite postponement, has been decided, one member, who voted in the majority, may, at the same time, or at a subsequent meeting, move for a reconsideration thereof, but no discussion of the main question shall be allowed unless reconsidered, nor shall any question be reconsidered more than once.

29. That any one or more of these rules may be at any time temporarily suspended, with the consent of two-thirds of the members present.

30. That the members of the Council shall take their places in the following order:—The members for St. George's Ward to occupy the table in the centre; those for St. Lawrence the Easterly portion of the Northern table; those for St. Mary's, the Westerly portion of the same; those for St. Patrick's, the Easterly portion of the Southern table; those for St. Andrew's, the Westerly portion of the same. Members may exchange seats by mutual consent.

31. That all Chairmen of Standing Committees shall keep minutes of their proceedings in a book to be furnished for that purpose by the Clerk, such book to be left with the Clerk at the expiration of office.

That no person shall exercise the trade of a Butcher within the said City without being previously licensed by the Mayor so to do, who is hereby authorized to issue such license under the City Seal; and any person selling meat by the carcase or quarter, or in less quantities than quarters, shall be deemed a Butcher for the purposes of this By-Law, and that the duty on such license shall be at the rate of five shillings per year, and all licenses shall expire on the first day of June or the first day of December in each year, and that no persons, except Butchers, shall sell in less quantities than by the quarter.

That from and after the passing of this By-Law no person shall bring into, or leave about the Market, any hides, offal, or any refuse or animal or vegetable matter that might occasion nuisance.

That no person shall buy any article of provision, food or produce in the said City, on which the Market Fees are hereby required to be paid, for the purpose of re-selling the same, or any part thereof, until after twelve o'clock, noon; nor shall any person forestall or engross any of the aforesaid articles of provision, food or produce within this City, until after that hour.

That no person shall expose, or offer for sale within the City, any tainted or unwholesome meat, poultry, fish, or articles of food, and that it shall be the duty of the Clerk of the Market to inspect all meats and other articles of provision so exposed for sale, and if any such meat or other articles of food shall be found so exposed for sale, to prosecute the offender, and to inform the Mayor, or one of the Aldermen or Councillors, of any such tainted or unwholesome meat or other articles of food found within the City. And that it shall be lawful for him, under the direction of the Mayor, or any one of the Aldermen or Councillors, to seize and destroy all such tainted or unwholesome meat, poultry, fish, or other articles of food so found, whether the same has been exposed for sale or not.

That each stall shall be numbered before it is sold, and shall be known by such number.

And that no person leaving a stall or standing in any of the Markets of the City, shall underlet or assign it, or place or leave any one in the same under pretence of taking charge thereof, without the consent of the City Council, and any such act shall be a forfeiture of all interest such person had therein, and it shall be the duty of each Butcher to keep his stall in a clean and sweet state; and that no Butcher shall expose for sale any meat, except in his stall, subject, however, to the approval or consent of the Market Committee for the time being.

That it shall and may be lawful for the Chamberlain of the City to issue a warrant, and for such purpose to use the City Seal, directed to any one of the City Constables, to seize any Butchers' meat in any Market Stall for the arrears of rent for such Market Stall, and in case such rent shall not be paid within six hours after such seizure, and notice thereof in writing put up in three places in the Market, specifying the meat seized, the cause thereof, and the time the same will be offered for sale; such Constable shall sell such meat, or so much thereof as will satisfy the said rent, to the highest bidder. *Provided always*, that it shall not be lawful for the meat of a subsequent lessee of a stall to be seized for the arrears of rent of a previous tenant. thereof.

That no butcher, huckster or grocer shall, on any pretence, directly or indirectly, purchase or contract for, or cause to be purchased or contracted for, any kind of meat, provender, provisions or produce before the hour of twelve o'clock, noon, of any day, in the City or Markets.

That no butcher or other person shall keep any dog or bitch in or about the Markets or places designed for the sale of meat.

That it shall be lawful for farmers and butchers to sell meat by the quarter or in greater quantity in the Market grounds after the first day of June, 1856.

That whenever any butcher has obtained permission from the City Council to sell meat elsewhere than in the Market, such butcher shall pay for such permit five shillings per annum, to the Clerk of the City Council, at his office, and such butcher shall be liable to all the provisions of this By-Law and for the payment of any fines that may be imposed on him for his violation of the same.

That the Market shall be opened every morning (Sundays excepted,) by the Clerk of the Market, at six o'clock, between the first day of March and the first day of November, and at seven o'clock during the rest of the year, and shut at four o'clock every evening all the year round, except Saturdays, when the Markets shall be kept open till nine o'clock, P. M.

That all hay and straw, brought to the City and exposed for sale, shall be brought near the Hay Scales, and the persons bringing the same shall place their wagons, or other vehicles, in such place and order as the Clerk of the Market shall direct.

That it shall be the duty of the said Inspector to make a registry of all the weights and measures inspected and examined by him, in which he shall state the name of the owner or owners of the same, and the street in which they reside, and whether such weights and measures are according to the standard of this Province, and to deliver a copy of such registry to the Clerk of the City Council every half

Health Promoted and Life Prolonged

BY THE USE OF

BRIGGS'

INDIAN VEGETABLE LIFE PILLS.

In offering this wonderfully efficacious remedy to the public, the proprietor does not consider it necessary to enter into any tedious or uncalled for explanation. A medicine so eminently qualified to sound its own praise, requires but few words to be spoken in its behalf. He deems it expedient, however, to say a few words in reference to the composition and effects of

The Indian Vegetable Life Pills.

Among the many valuable discoveries of the nineteenth century in chemical and medical science, there is none that promises to confer greater benefits on mankind than that of the separation of the active qualities or virtues of vegetable substances from their inert or noxious ingredients. The principles of this great discovery have been applied by the proprietor to the production of his invaluable Pills. Prepared as they are from the active principles of Plants, (known for their healing qualities to the red man of the west,) selected with care from the garden of nature, and combined together into a harmonious whole, with a due regard to their several therapeutic properties, under the directions of one of the most eminent of living physicians, they may challenge competition from all the medicines of the day. The proprietor is aware that the quantity of trash that has been palmed off on the public of late, under the comprehensive name of Pills, has almost made that word an abomination; but he is assured that one fair trial is all that is necessary to convince any unprejudiced person that Briggs' Life Pills are an honorable exception, and he hopes that they and a few others may yet redeem the name of Pills from its present disgrace. He has the warrant of experience to justify him in claiming for them the following properties

1. They are always certain in their action.
2. They are mild and painless in their operation.
3. They are speedy in their cure.
4. They are suited to both sexes and all ages.
5. They contain no mineral poison.
6. They do not gripe or violently purge.
7. They require no confinement or change of diet.

The great majority of the pills of the day are nothing but a combination of drastic purgatives, with some mineral alterative, such as calomel, &c., and their use for any length of time is extremely dangerous. Their action is almost entirely confined to moving the bowels, and in some cases of course this produces temporary relief.—But the Indian Vegetable Life Pills proceed at once to the fountain head of life—the blood, and by their searching and cleansing properties purify that vital stream, which, then freed from its impurities, courses through the body with renewed vigor, stimulating and invigorating all the impaired functions of life. In fact their effects are magical, and it is no stretch of imagination to call them Life Pills.

Let all who read this bear in mind that a pure state of the blood is imperatively necessary to health, and that health is one of the greatest of earthly blessings, with-

out which wealth and honors are but burdens, and beauty cannot long exist; and let them be warned in time to procure this reliable remedy, and save themselves from, perhaps, years of sickness and suffering.

The peculiar action of this medicine upon the system, it is unnecessary here to explain, nor would the limits of this article suffice, but a few of the complaints in whose cure it is effectual may here be mentioned. And first let it be understood that it is not put forward as a universal panacea, a cure for "all the ills that flesh is heir to," but simply for those that arise from a morbid state of the Stomach, Liver and Bowels, and for the alleviation of those that have their origin in an impure condition of the blood. Among the first class are Indigestion, Billious or Sick Headache, Nausea, Heart-burn, or acidity of the Stomach, Liver Complaint, Billious Fevers, Jaundice, Bowel Complaints, Costiveness, Colics, Dysentry, Piles, etc., etc. And it is an effective adjunct to other remedies in Ague, Skin Diseases, Debility, Inflamation Rheumatism, Scrofula and kindred diseases It is also particularly recommended for use during that unhealthy state of the blood, consequent on a change of temperature and other causes, which occurs in the spring of the year, etc. It may likewise be used, to create a good appetite, as a dinner pill.

As the use of the Pills in all these cases must be regulated by the nature of the complaint and the severity of the attack, the discretion of the patient must be exercised to adapt the quantity to his requirements. But they have this advantage, being of a purely vegetable nature, namely, that they are neither dangerous nor hurtful in almost any reasonable quantity.

As a guide, to the quantity to be used, the subjoined Directions, in several cases, of common occurrence are given.

For a mild physic, or sick headache arising from a disordered stomach, take from 2 to 4 pills, according to age and constitution. For a strong physic, obstinate constipation, or severe cold with headache and soreness of the body, 3 to 5 pills may be taken. For habitual costiveness, dyspepsia, jaundice, etc., take 2 or 3 pills every day, till cured. For piles, take small and frequent doses, to keep the bowels open and the stools easy. For worms, take large and frequent doses. In all other cases a moderate dose of 3 pills will generally suffice. A full motion of the bowels must always be produced, if one dose is not sufficient a second must be taken.

CAUTION.—Be careful to observe that there are other Life Pills beside these whose efficacy is by no means so certain.

Purchase no other but Briggs' Indian Vegetable Life Pills, with the written signature of G. C. Briggs' on the wrapper of each box, and you may rest satisfied that your money is well expended. Each box contains 30 Pills, and they are sold by all Druggists and Country Dealers throughout the United States and the British Provinces of North America.

BRIGGS' CELEBRATED BLACK OIL,

The greatest remedy of the age for all diseases of Horses and Cattle, and for the outward application to many complaints of the human system.

The horse is one of the noblest of the brute creation, his sagacity, docility, patience and industry, seem to have been bestowed on him by his creator to make him at once the servant and humble friend of man. And callous indeed, and deaf to the call of humanity, is the man who can see so noble an animal suffer pangs which it cannot itself assuage, without doing all in his power to relieve them.—There are numerous remedies already in the market for the cure of those diseases to which horses and cattle are peculiarly liable, but how few of them really afford any permanent relief. The proprietor of the above valuable liniment dealing to a large extent in this class of remedies, and observing with daily increasing pain and disappointment their innumerable failures, was led to investigate the cause. He has come to the conclusion that a want of practical knowledge on the part of the manufacturer, is one of the chief causes. He finds that in most cases the poorest description of drugs are mixed together without the slightest regard to their uniformity of

action, that in fact they are just a few established remedies thrown together without judgment, and often with a positively neutralizing effect on each other. He was therefore induced to put before the public an article that should avoid these errors and prove in every respect reliable. He recollected that some time ago a friend of his gave him a receipt for a flesh wound on his horse, which he said had been found in the pocket of a Surgeon of the United States Army during the Mexican war, and was called the "Soldier's friend." He experimented and improved on the original receipt, and after several years of study and practical application of his own knowledge of horse flesh, he has produced a liniment that is unrivalled, and that in its remarkable effects exceeds even his own sanguine anticipations. This remedy has been in use by himself and his friends for several years, for two of which it has been before the public, and he can safely assert that he has never known or heard of a single case of failure where it has been judiciously and properly used. Testimonials of its virtue could be presented to any extent if it were deemed necessary or expedient, as all who have been benefited are willing to publish its effects; but the proprietor takes into consideration the fact that testimonials can be procured for any medicine, and that they are no test of its worth. He therefore prefers to let the sale of this medicine depend on its own intrinsic merits, satisfied that if tried once it will be tried again and again, and trusting that all who have experienced its beneficial results on their horses or cattle will recommend it to their neighbors and friends.—These facts are candidly presented to the proprietors of live stock, whether farmers, livery stable keepers, stage proprietors, carters, or the public in general, and they may rely with certainty on its curing the following diseases:—Spavin, Windgalls, Callous, Sprains, Bruises, Sandcrack, Cramp, Poll Evil, Flesh Wounds, Lameness, Mange, Swellings, Foundered and Contracted Feet, Scratches, Cracked Heels, Sweeney, Set Fast, Contracted Muscles, Fistulas, Ringbone, etc., and on the human subject it is applied with great success in Sprains, Rheumatism, Corns, Frost Bites, Old Sores, Chapped Hands, Chilblains, etc. Special directions accompany each bottle, which, to place it within the reach of all is retailed at the low charge of a quarter of a dollar.

DR. E. A. HOPE'S MAGNETIC OINTMENT.

To all afflicted with Rheumatism, Gout Inflammations, Sore Eyes, Sore Lips, Chapped Hands, Burns, Bruises, Sprains, Chilblains, Piles, Ulcerated Sores, Salt Rheum, Scrofula and Scald Head, and in fact all skin diseases, we bring immediate relief.

The skin fulfils an important duty in the human economy, it is the great scavenger of the system. It is a delicate membraneous covering overlying the more soft and sensitive parts of the human body, and is pierced by innumerable small openings, called pores. So numerous and so fine are these openings that they cannot be perceived by the naked eye, and it is said that several thousand may be covered by a single grain of sand. Their use is to remove from the system all the waste and injurious matter that is formed, and they do this firstly in the form of vapour called insensibly perspiration, and secondly, under the influence of heat, in the form of the liquid called sweat. The quantity of matter thus carried off through the pores is equal to more than one half of that which is taken into the stomach. Keeping these facts in view, it will easily be seen how important it is that this exhalation should not be obstructed, and that the skin should be kept in a healthy state. In a diseased state of the skin, the pores become filled and obstructed with dirt and impurities, the waste and imperfect matter of the blood is not carried off, but circulates through the system, and hence many diseases are originated. How needful is it then that something should be found to restore the skin to its pristine health, and

thereby give new tone and vigor to this important organ. This is the effect of Hope's Magnetic Ointment and the whole secret of its unparalleled success in the above complaints. For the cure of Burns, Scalds, Bruises, Sprains, and in all cases of accident, where some good emollient salve is needed, it will be found to surpass all its competitors. It should therefore be kept in every household ready for use, as accidents, such as burns, &c., are of frequent occurrences.

It cannot be expected that every impurity can be removed from the system through the skin, there are other passages provided by nature, the principal of these are the bowels, and therefore this ointment will always be found most beneficial in its effect when accompanied by something that will gently move and regulate them, for which purpose Brigg's Life Pills are highly recommended.

Directions for use accompany each bottle, and a few testimonials from among the numbers that the Doctor has received, will be found attached.

GREAT PULMONARY REMEDY.

DR. WISTAR'S

PULMONIC SYRUP OF WILD CHERRY AND HOARHOUND.

Consumption, that hydra-headed monster, that annually, in this changeable climate, sweeps away more of our inhabitants than any other single disease, has its origin most frequently in very slight causes. A simple cold or slight tickling cough are the first symptoms of a complaint that lays hundreds of our blooming young men and women in an untimely grave. How important then to procure a remedy for these early stages of the disease, and thus check it in its growth, and prevent it from increasing to that stage when no earthly remedy shall avail. The great number of preparations that are now in the market, designed for this purpose, would almost seem to forbid the introduction of another, but the proprietor feels convinced that this particular preparation possess merits greater than any other article of the kind, valuable as many of them no doubt are. The experience of many years has but added to its great reputation, and proved that it is the most efficacious remedial agent in the cure of all pulmonary diseases.

It is prepared with great care from the active principle of the bark of the Wild Cherry, extracted by a peculiarly delicate chemical process, and combined with the virtues of the well known herb hoarhound and other valuable medicinal plants, and every part and property has been carefully adjusted by experiment, to obtain the best effect that can be produced on the lungs and air passages. In all cases of deeply seated consumption the aid of a physician is of course necessary, but for the relief and cure of Colds, Coughs, Asthma, Croup, Whooping Cough, Hoarseness, Bronchitis, etc., Wistar's Pulmonary Syrup will be found most efficacious.

It is Prepared only by Dr. WISTAR, New York.

A FEW WORDS

TO THE PUBLIC.

HEALTH, the great desideratum, obtains when all the functions are natural and easy ; any deviation from this, is disease. The true system of curing disease consists in closely watching and assisting Nature in carrying out her own indications. Nature is always true to herself, and invariably makes an effort, more or less powerful, to sustain her own integrity. It is clearly the Physician's duty as the handmaid of Nature, to remove obstructions as far as possible, and exhibit such medicines as have a tendency to accomplish that, at which Nature is already aiming. As Physicians, we should thoroughly understand the primary and secondary effects of medicinal agents upon the Human Economy. We should become intimately acquainted with Human Physiology and Pathology, with diseases and their causes, so that by close observation and correct reasoning therefrom, we may be enabled to sustain and assist Nature, in accordance with her own indications. In this, is contained, the chief part of Medical knowledge, and the true scientific principle of the Healing Art. When we have thus become learned of Nature, and only then can we hope to render the THEORY AND PRACTICE OF MEDICINE, pre-eminently beneficial to mankind.
