A GRAND BUYING OPPORTUNITY

THAT GIVES YOU MORE ADVANTAGES

EATON QUALITY merchandise at EATON prices—and a new EATON free delivery offer, whereby we prepay charges on all orders amounting to $10.00 and over in Ontario, Quebec and Maritime Provinces. Surely this is a welcome benefit in these days of higher cost of living—one that will be very good news indeed to our mail order customers. Our previous offer of free delivery on $25.00 orders has had great success, but in some cases many who would have gladly taken advantage found it inconvenient to make up this amount. Then also this quantity of goods invariably meant forwarding same by freight, and consequently some delay before reaching customer. Now these difficulties have been largely overcome. The greatly lessened amount to secure free delivery will enable many more, if not all of our customers to share in this additional saving on EATON merchandise, and then, in most instances, goods amounting to $10.00 will go forward by express (we however, reserve the right to send goods either way). Reason this out for yourself—look carefully through this catalogue of everyday requisites, for man, woman, and child—for the home and kindred needs. Think what an opportunity opens up to you, to save money in the spending, and all the goodness of EATON service unimpaired—same high quality—same quick service, and the same desire on our part to give the utmost satisfaction whenever and wherever possible.

The generally useful character of the Coats on this page places them in a class distinctly by themselves, for, no matter how extensive a wardrobe may be, it is never complete unless it contains a Rainproof or Dust Coat of some kind. With this in mind we have endeavored to place before our customers a big variety of reliable goods at very attractive prices.

The proper care of Rubberized Garments suggests that—Extremes of heat or cold should be avoided; do not fold the garment—hang it up when not in use; when wet, shake it out well, and hang it up dry. Note carefully the lengths, colors, etc., given with each description, and order accordingly—never forgetting to give style number, size and color preferred. Goods purchased and found unsuitable may be returned within ten days for exchange, or refund; all transportation charges being allowed.

A. number.

You can send deposits as often as you like and continue to charge your orders as long as you have money left; a statement will be sent you showing purchases and amounts at your credit.

**UNPROFITABLE MAIL SHIPMENTS**

There are hundreds of contingencies continually active to prevent the best seeds always giving satisfaction, such as sowing too deep, too shallow, in too wet or too dry soil; insects of all descriptions destroying the plants as soon as or before they appear; wet weather, cold weather, frosts, chemical changes in the seeds induced by temperature, etc. For the above reasons it is impracticable to guarantee seeds under all circumstances. How the Eaton Felt Mattress is made

All new cotton direct from the cotton plantations of the South.
The 54 in. Size Weighs 45 lbs.
1. After all seed is removed by the Ginning process it is pushed directly to the factory to be picked into fine downy flax.
2. These in turn are placed in felting machines, from which they come in large rolls of soft, luxurious, felted cotton.
3. Every treatment that mattress goes through is subject to the most rigid sanitary principles, which insures a pure mattress.
4. Each layer required for the mattress is cut from the large rolls, the exact size required, and placed in filling machines, from which it is transferred to a beautiful art satin case.
5. It is then transferred to the regulating tables, where the edges and corners are carefully trimmed, squared up and studded in place.
6. After this course it is taken to the tufting machines to be tufted, and thus forms a perfectly soft and durable mattress, built to maintain its shape, and on the most sanitary principles. This mattress will give the greatest degree of comfort as well as durability, being fully guaranteed; made in the following sizes:

If you cannot afford one of our better improved "Seamstress" models you will surely take advantage of the opportunity to purchase this one, which, because of the cabinet work is not so elaborate as the others, we can offer to you at a material reduction in price. In so far as sewing qualities are concerned, however, this Improved "Seamstress" is identical with the others, and will give you the best service for a lifetime.

The Improved "Seamstress" Sewing Head makes the double lock-stitch, and has many other valuable improvements, including the new self-regulating tension. The Stand is Ball-bearing. It runs easily and quietly, and is equipped with belt-retaining guard and polished steel platen.

A SPLENDID OVEN

Roomy and correctly proportioned, and is a perfect baker. It is ventilated to insure pure air, and is cemented on top to prevent overheating or "burning out up." Its baking qualities are unsurpassed. Fitted with a slide back inside, and a peddle door, cover and side shelf outside, the oven door is well balanced, and, the handle strong, and always cool.

THE MAIN TOP is fitted to allow for expansion and contraction without any danger of fire cracking. The plates are properly braced to prevent sagging. The covers are guaranteed not to warp or split from the heat, and are interchangeable, one sectional cover being included. The long centres are also non-warping.

**FOR BURNING WOOD DELIVERED IN QUEBEC AND MARITIME PROVINCES**

**THE CONSTRUCTION**

The Eaton Range is made of heavy rolled plate steel, and is accurately proportioned, lined with heavy firebricks, and supplied with the latest improved double grates well fitted. A special feature in connection with the grate is the double draft, which gives the fire a strong air feed from both ends of the grate, thus ensuring complete combustion of fuel, avoiding any possibility of a one-sided flame, when baking or cooking.

**THE RESERVOIR AND WARMING CLOSET**

The Reservoir is made of heavy copper, lined inside, and finished outside, in a similar manner to the grate. It holds ten gallons of water, and has a closely fitted black paper cover. The warming closet is made of best rolled sheet steel, and has a top door, and all edges, corners and handles nickel-plated. The length of the top shelf running up through the warming closet, as shown in cut, is sent out complete with each range, and the opening at top is a standard size for connecting with the usual stovepipe.

**OUR GUARANTEE**

WITH TILED BACK AND MIRRORED WARMING CLOSET

We guarantee this stove to bake perfectly and to be economical with fuel. After you have thoroughly tried it, if you are not perfectly satisfied in every way return the stove at our expense and we will refund your money.

It has a big square oven, size 20 ins., fitted with oven rack and drop oven in the stove above. This door forms a convenient shelf for putting out baking to examine or basting.

The Fire Box is deep and narrow when fitted for coal, which shape economises fuel and makes a good baking fire. The fire box is fitted with duplex grates lined around with fire brick. The draft to the fire enters from both ends of the fire box, thus giving each end a good supply; this also makes a fast even fire. SAVES FUEL

GRATES REMOVABLE WITHOUT DISTURBBING FIRE BRICK

THE CROWN HURON RANGE is made of cast iron carefully tempered to avoid warping, and is exceptionally durable when used with coal as the fuel. We have proven this range to be a good baker, and economical on fuel.

THE FIRE BOX is fitted with duplex grates, easily operated, and makes a clean, free fire. The fire box is lined with brick.

THE OVEN is square plan, fitted with an oven shelf and foot trip for opening door.

THE FLUES are so constructed as to force the smoke and gases to pass twice around the oven before entering the stove pipe. This feature saves fuel and heat.

THE TOP of the range is fitted with one reducing cover to fit different size pots; the balance of the covers are double, making them very durable.

THE TRIMMINGS All possible nickel trimmings are made removable, and with smooth surface, this makes them easy to clean. The trimmings are nicely arranged to give the range a very pleasing appearance.

THE FUEL The Crown Huron is constructed to burn wood, charcoal, coal or peat. A little, small quantity may be used for summer purposes, but the best results are from coal. Our guarantee covers this range as a coal burner.

For Warming Closets add $6.95 to any price.

IF YOU ARE NOT PLEASED IN EVERY WAY RETURN THE STOVE AND WE WILL REFUND YOUR MONEY.

THE RED HOT WARM AIR FURNACE

We have had this furnace constructed so as to give the greatest efficiency possible for the amount of fuel consumed. The general arrangement is of a box type which leaves plenty of pitch for the hot air pipes, making for fast service.

THE GRATES are the triangle rotary grates, and one of which may be removed and replaced without tearing down the furnace.

THE FIREPORT is made in two sections which saves the cracking caused by expansion and contractions, and in case of repairs, half the time.

THE RADIATOR is the most important feature of any furnace. This is made with one flue which starts at the feed door and does not allow the smoke or gases to escape until they have travelled completely around to the other side of the feed door. A kipple plate at the bottom of the radiator confines this heat the full depth of the radiator.

THE COMBUSTION CHAMBER has a separate pipe from the radiator making three steel surfaces in all, throwing heat into the chimney in addition to the cast top fire port.

DUST FLUE. A dust changer and flue are so arranged as to take the dust caused by burning the fire, into the smoke outlet.

GENERAL. This furnace is built to burn coal only, and has proven itself equal to the capacity as shown in our catalogue when the weather is zero. In order to assure you the greatest amount of heat for extreme weather allow 20 per cent. reserve for every degree that your temperature drops below zero.

INSTALLING. We do not install Furnace outside Toronto, and would recommend our customers to procure their hot air and smoke pipes locally, as conditions do not nearly enough resemble each other in the different houses to make standards possible.

SIZE REQUIRED. To ascertainment size of furnace required multiply the length of house in feet by the width in feet in feet and multiply this total by 1 1/2, if house is two story, and by 2 if it is three story. This will give you the number of Universal furnace casing, easily connected, save cutting, used for your home. This, when ordering, size of furnace to use.

DRILLED. If you wish your furnace drilled in order to connect it to the boiler add 1.00 to the price as shown in catalogue and write "drilled" when ordering.

PRICE WITH CASING DELIVERED IN QUEBEC $6.95.
PRICE WITHOUT CASING DELIVERED $5.95.

NOTE OUR LOW PRICES FOR SEWING CARPET

Sewing all carpets 36 cent yard, with an additional charge of 5c for each metre on bordered carpets.

In the case of heavy carpets, especially Axminster and Wilton, we recommend that bordered carpets be cut and sewn on the mat. It is done in this way: all surplus carpet at mitering and ends of widths (ordinarily turned under, making two thicknesses) is cut off and the edges oversewn or verged. When sewn together this makes the carpet or rug flat, it has no double thickness anywhere. The seams are made in this way the charge is 36 cent yard for sewing with $1.50 extra for rugs, size 10 ft. 6 in. x 12 feet and under, larger sizes in proportion.

Our Fur Department has this season excelled all previous efforts in obtaining a collection of reliable furs, made in styles which have the approval of fashion, and at prices only to be had where EATON purchasing power is used. We control more than the ordinary facilities in securing the best values offered in the world's fur markets in that we have our own offices in London, Paris, Berlin and other European cities, as well as maintaining a fully equipped factory in Toronto. Our reputation for the placing of large orders, and prompt cash payments, results in our being offered special inducements in the way of low prices to secure our trade. The best precaution to take in buying furs is to purchase from a reliable firm—one that lives up to its guarantee of goods right or your money back. Remember, when ordering furs from this Catalogue that T. EATON CO. stands back of every purchase to see that you get satisfactory goods for your money.

NEW MODELS IN FUR-TRIMMED COATS FOR WOMEN

Orders for these Coats should reach us before January 1st; as we do not carry a complete stock after that date.

Samples of the Cloths used may be had on request, but not of the fur trimmings. When ordering do not forget to state style number, size and color wanted.
Suit styles for this season are decidedly "cutaway," and this feature can be as extreme as one's own taste dictates, but the well-dressed woman will adopt some degree of this fashion in a length about 38 inches. Separate Veils are being shown, but the popular modification of this style note will be to have the effect, being attached to or part of the coat. These are made of a different material, and often in a contrasting shade. Skirts show slight draping in some styles, while the plain tailor-made will still be a favorite, the narrowness being overcome by foot pleats, or slashed hems, which can be left open or buttoned. The materials for Suits are very beautiful, consisting of Bedford Cords, plain and broad, Aubergines, Corduroys, Boucle Tweeds, Raines, and the very serviceable All-wool Serges. Separate Coats in heavy, rough materials, Boucle Tweeds, Plushes, Caraculs and Persianna Curl Cloths will be very fashionable, also plain, smooth cloths for more dressy occasions. Special interest should attach to this and the following pages for those wishing to see a carefully selected range of Women's, Misses' and Children's Ready-to-wear Garments, not extreme, freak styles, but those embodying the style features which will be adopted by dressers of good taste. While reading over these pages keep in mind that you get satisfaction for your money.

**Evening Wrap with Latest Trimming Effects**

The recent advent of draped effects has given free scope to the introduction of the classic model, and in no garment of women's attire can this very desirable and fashionable trend be so well displayed as in an Evening Wrap, such as is shown in the illustration. Unmistakably beautiful it is, made in fine Chiffon brocaded, 48 inches long, lined luxuriously with satin de Chine; the deep drop of the oriental shoulders, the hand-made fashioning ornament and piping of self material, all tend to the grace and refinement so pronounced in every line. The artistic draping, which is the strong characteristic of the garment, falling in graceful contour from the bust line, extends round to the back, which it encircles with three deep folds, the centre of which is held by a plastron ornament, same as appears on front. White Fox being the height of fashion for trimming; the same is used very effectively for the deep shawl collar, which adds so much charm and individuality to the garment. This wrap can be had in all evening shades, including Mahogany, Rose, Helio, Fawn, samples of which we are pleased to send when requested. Bust sizes 34, 36, 38 or 40. Style No. of this Wrap is 56-459. Price $57.50.

**Imported Novelty Style Tailor-Made Suit**

One of the fashionable novelties of the season is the Tailored Suit, produced in a combination of fabrics, the coat of one weave, the skirt in another. Such is portrayed here on the leading figure, showing the latest of these models imported from New York. The smart cutaway, semi-fitting Coat, cut 36 inches long, is made of a novelty Bedford Cord, lined with satin, the collar of black velvet, same as is used on back of cuffs, with jet buttons, a similar trimming appearing on back of coat in front effect. Coming fashion notes give much prominence to veils and veil effects, the attached vestee in the coat in this case being one of the most approved styles, made of material same as that in the skirt, and fastened with jet buttons, such as trim the coat. The skirt of black and white novelty check material, is cut in a very stylish two-piece model, gracefully trimmed at each side with a shaped fold button-trimmed, and which is a gathered heading in long draped effect, disappearing beneath the coat. The waist line at the back has a very stylish and effective finish in a short, dip-circle belt placed just above a group of shoulder tucks, which extend into fullness lower down. Skirt measures about 60 inches round the hem. Made in bust sizes 32, 34, 36, 38, 40 or 42. Coat in choice of Black or Navy. Skirt in Black and White only. Samples of the material used sent on request. Style No. of this Suit is 56-682. Price $25.00.

Insert the thumb but not the thumb into the glove and work the fingers in by rubbing them down as illustration shows. Then insert the thumb in the same manner, also the back and wrist by repeated gentle pulls; bring the two edge edges of the slit together and buttons. Never force the glove on or pull at the wrist. A little powder dusted into gloves will allow fingers to slip in more easily.

**BOYS’, GIRLS’ AND INFANTS’ HOSE**

"Multiplex" in Hosiery stands for what is best in texture and wearing qualities, better still, "Multiplex" Hosiery has stood the test, as thousands of our mail order customers can vouch for through actual experience; especially is this a

positive fact in the matter of hosiers for children. They are harder on stockings than grown-ups, and this has been thought out through the extra thickness being woven just at the points where the hardest wear comes. Being made of yarns that are selected for the wearing qualities, that will stand hard usage, and dyed with pure vegetable dyes, they are hygienic and stainless. See bottom of page for size guide when buying children’s hosiery.

Here's Grand Evidence of EATON Clothing Value

THIS SPLENDID WINTER OVERCOAT

44-200. It has been the pleasure of this store in the past to make many remarkable value offerings in clothing for men, but this fine overcoat does seem to eclipse anything we have heretofore been able to produce for like money. It is a wonderfully good coat. Furred, real and serviceable in coloring, stylishly cut, and with the stamp of EATON tailoring clearly discernible, single-breasted, houndstooth tweed, with the collar and lapel so made that the coat can be converted into a college miter, fastening close up to the throat. The material is a good serviceable English tweed, in the 58-gauge Winter Weight, and the immense quantity we took from a certain noted British mill is largely responsible for the low price on this coat. It is a rich dark brown cloth, in chevron pattern, toned up with a faint stripe of green. Length of coat 29 inches. Chest measure 34 to 44 inches, taken over the back, with coat off. THE "PEERLESS"

THE COAT IN THE CENTRE AT SETS A NEW VALUE RECORD

44-210. The price is only that of an ordinary cloth coat, yet this overcoat has a quilted lining and a good warm storm collar that looks fur. It is made from a black cheviot material that is counted a sturdy weave. It is cut a full 50 inches long, and is not skimped anywhere--either in materials or finish. In fact, it is a well-built garment, and you may count it a great, good fortune to be able to buy it for the money. Collar of genuine fur, shawl style. Barrel and loop fasteners. Knitted wool cuffs in sleeves. This coat is lined with padded and quilted Italian cloth, and should make a warm garment. Sizes 34 to 44-inch chest measure, taken over vest. Price **10.00**

12.95 CURL CLOTH BODY LINING

44-211. The overcoat pictured above is our "Peerless"--and you'll admit it is a wonderful value. Made of a Black Melton Cloth in so firm and sturdy a weave as to give 28 ounces to the yard. Aside from the genuine fur collar (a dark brown marmot, and in shawl style), the outstanding feature of this fine coat is its rubber sheeting interlining from neck to waist (a protection against wind and rain), and its warm curl cloth body lining. Leather shields over armholes; knitted wool wristlets in cuffs. Mohair frog and loop fasteners. Sizes 34 to 44-inch chest. Take measure over the vest, with coat off. Price **12.95**

HEAVY CHEVIOT, WITH QUILTED LINING

44-212. This overcoat features a very pleasing collar of "Newfoundland Seal." It is a very dark brown Seal skin, and is exceedingly rich and glossy. It suggests the making of a handsome coat for "best." The cloth is a Black Melton--fine and dressy. Warmed lined with quilted and wadded Italian cloth, and the sleeves provided with knitted wool cuffs. The coat is fashioned with ample fullness, and is 50 inches long. Finished with barrel and loop fasteners. Sizes 34 to 44-inch chest measure. Take measure over the vest, after removing coat **15.00**

But here it is—a notch collar of No. 1 pieced Persian lamb, on an easy-fitting double-breasted coat of black English Melton—for men and young men. Strong twilled Italian cloth body lining; barred and loop fasteners; knitted wind cuff in sleeves; leather shields over arm pits. BLUE AND BLACK SERGE SUIT FOR MEN

AN EXCELLENT VALUE

WHAT a world of difference there is in serges! And especially in inexpensive serges. The average ten-dollar serge is a dear buy at any price—it hasn't the body, nor the finish, nor the color. Here is one—our special English-woven serge—that combines quality and appearance to a really surprising degree. A serge that you never would place at ten dollars. It has a nice narrow twill and a good color.

The suit is a three-piece, single-breasted model, the coat in three-button style, with dressy lapels; and with single vent in back. Thoroughly well made, with collar falling close, and the shoulders properly built. Body lining of Italian cloth. Vest in the popular five-button style.

Sizes 36 to 44-inch chest (measuring over vest, with coat off); trousers 33 to 42-inch waist; and 34 inches longest leg.

INFORMATION THAT WILL HELP YOU WHEN ORDERING

EXPRESS SHIPMENTS

Be sure to give us the Express Office you want your goods shipped to, when ordering.

As a general rule the most profitable and satisfactory way to send orders weighing from 2 to 25 pounds is by express. The Express Companies give a prompt and reliable service.

UNPROFITABLE MAIL SHIPMENTS

There are quite a number of articles that are unprofitable to be sent by mail, such as Scribblers, Note-paper, Liquids in Bottles, etc. We should advise when ordering to make your shipment include enough other goods to enable the whole shipment to go by Express or Freight.

MAIL SHIPMENTS

Light goods and small orders weighing up to 30 lbs. may be sent by mail.

Unless your Order amounts to $10.00 be sure to send sufficient money extra to pay postage and any balance will be returned to you in cash when order is shipped.

The rate on Merchandise by Mail is 1e per 100 lbs., on books and printed matter 5c per ounce or 8l, allowing extra for packing. As the postage must be prepaid, if sufficient money is not allowed, it necessitates our omitting some of the goods to cover postage. See remarks on Express. The limit of weight by mail is 5 lbs. per parcel and the limit of size is 50 inches in length.

For 2c extra we will guarantee the safe delivery of each order of 50c or over if sent by mail, or replace the goods.

SUBSTITUTIONS AND OMissions

If the goods you order amount of stock, we will, unless you tell us not to, send similar goods of equal or better quality for the price allowed, you saving the privilege of returning the goods at our expense if they are not satisfactory.

When any of the goods you order are not in stock, and we expect to have them in a few days, we will ship your orders short of these goods with an explanation that they will be forwarded later, we paying any extra charges incurred.

Other omissions are caused by customers not allowing sufficient money for postage or charges where shipments have to be sent prepaid at customer's expense.

CUSTOMER'S PROTECTION. We want every man, woman and child who buys goods from us to receive the best possible service and treatment, and if you have any complaint whatever on the arrival of your goods, any delay, any damage, any shortage or any faults of any kind, bring them to our attention, and rest assured that they will be promptly and satisfactorily adjusted for you.

If any order you send to us does not reach you within a reasonable time, first make inquiry at Post Office or Railway, and if not there write us giving a description of goods ordered, also amount of money sent, if in Express Money or Post Office-Order, and give number of same. Also be sure to state what Post Office your order was sent from.

Always enquire at Railway Office before writing re delays of orders. Most orders are found to be on hand uncalled for.

IN CASE OF SHORTAGES, BEFORE WRITING US BE SURE TO EXAMINE THE PACKING CAREFULLY, AND TELL US THE NUMBER OF PARCELS OR PIECES RECEIVED, ALSO BE SURE TO RETURN THE BILLS.

ENQUIRIES ABOUT ORDERS

In case of shipments going by Express or Freight and of which you have not received advice from your agent, make enquiries from the agent before writing us.

Examine all orders carefully before accepting from Railway Co., and if damaged in any way have Agent make notation of damage on Freight or Express bill and return bill to us with your letter, or if upon receipt of goods you find anything wrong write us at once telling us plainly just what the trouble is, and in every case be sure to return the bill.

All claims should be made within 10 days after receipt of goods.

We do not enclose orders when received under separate cover. We do not make any alterations on your original order: all information must be enclosed in one envelope.

WE DO NOT HOLD ORDERS.

WE DO NOT PAY THE DIFFERENCE OF EXPRESS CHARGES ON FREE DELIVERY ORDERS WHEN GOODS WILL GO CHEAPER BY FREIGHT, AND WE ONLY PREPAY TO YOUR NEAREST RAILWAY STATION.

WE DO NOT PAY WHARFAGE OR INSURANCE CHARGES ON BOAT SHIPMENTS.

BE SURE TO ORDER EARLY

Although we have purchased heavily in all Catalogue lines in anticipation of increased business, and although it is always our endeavor to keep a complete stock of all lines, it frequently occurs that some are broken by unexpected demands for certain sizes. For this reason it is advisable to order early.

When Christmas goods are wanted, be sure to order well in advance of the Yule Tide Season so as to avoid the congestion in the Post Office, the Express Office and freight sheds that invariably occurs at that time.

REMEMBER

BEFORE SEALING YOUR ENVELOPE BE SURE : THAT YOUR NAME AND ADDRESS ARE PLAINLY WRITTEN.

THAT YOU HAVE GIVEN US CORRECT SHIPPING POINT.

THAT YOU HAVE GIVEN THE CORRECT CATALOGUE NUMBER.

THAT YOU HAVE GIVEN SIZE, COLOR, AND STYLE, WHERE THIS INFORMATION IS REQUIRED.

**A FINE SELECTION OF INTERESTING RING VALUES**

**FREE ENGRAVING**

All Signet Rings on this page will be engraved with an attractive monogram without extra charge, excepting 10-246 and 246, which cost 45 a letter extra, and would recommend only one letter because the engraving space is small.

**RING MEASUREMENT—THIS IS IMPORTANT**

1st—Measure around the base of the finger with a small piece of paper, having the edges straight and ends perfectly square. 2nd—Place the piece of paper on scale and measure from left to right. Always keep all the figures in view, if it is even with size 3 is wasted; if it is halfway between 3 and 6, size 4 is correct. 3rd—Never take the measure of your finger around the knuckle, if you do the ring will be much too large. 4th—Never overlap ends of paper when measuring, just let ends meet.

EATON SANITARY FELT

How the EATON Felt Mattress is made

All new cotton direct from the cotton plantations of the South.

The 54 in. Size Weighs 45 lbs.

After all seeds are removed by the Ginning process it is shipped direct to the factory to be picked into fine downy, fluffy fibers. These fibers are then placed in blending machines, from which it comes in large rolls of soft, luxurious, felted cotton. 

Every treatment that mattress goes through is subject to the most rigid sanitary principles, which insures a pure mattress.

Each layer of felt is cut from the warp, the exact size required, and placed in filling machines, from which it is transferred to a beautiful art case. It is then transferred to the regulating tables, where the edges and corners are carefully rimmed, squared up and stitched in place.

After this course it is taken to the tufting machines and finished, each tuft being exactly opposite, and the indentations made by the tufts of equal depth.

When this process has formed a perfectly soft and durable mattress, built to retain its shape, and on the most scientific sanitary principles. This mattress has the greatest degree of comfort as well as durability, being fully guaranteed made in the following sizes:

INSTRUCTIONS FOR CORRECTLY MEASURING CARPETS

Do not be too particular in taking measurements for carpets, especially so if they are to be bordered, as bordered carpets cannot be turned under, they should fit exactly. Draw a square of paper to be bordered, also of rooms or halls requiring more than one section. It is not necessary to draw a line, but give all the measurements along base exact to 1 inch, making all allowances of same, the length and width of room in center of flooring if any, and make sure that short measurements along base, etc., agree with the through measurements.

Draw a line across front room or window and you will have accurate base to measure from. Locate all doors and jogs and give width of each so we can sew on carpet or finishing as desired.

This is especially true in halls, where the front of rooms and walls vary the same, but even so, when the length and width of room has varied, we will be obliged to piece in 1 or 2 places unless you are willing to pay for a full width.

PRICES FOR SEWING CARPETS

wing all plain carpets, $5 per yard. Sewing all bordered carpets, 50 per yard. Hand-sewing Wool or Union carpets, 55 per yard.

The width of heavy carpets, especially Axminster and Wilton, we recommend that bordered carpets be cut on the flat.

The same is true in halls, where the front of rooms and walls vary the same, but even so, when the length and width of room has varied, we will be obliged to piece in 1 or 2 places unless you are willing to pay for a full width.

QUALITY FACTS IN OUR ENGINE CONSTRUCTION

COOLING SYSTEM.-Our engines are cooled by the open jacket and hopper system. This is the perfect type of water cooling. The heavy copper cylinder is used and is run full size. The engine is always kept at proper temperature. A small amount of calcium chloride in the cooling water is sometimes necessary, as it will prevent any kind of scale from being formed.

CYLINDER HEAD.-The inside offers a smooth finish for the piston head to charge against. No grime or dirt can stick to the cylinder head. The cylinder is kept perfectly clean. Cylinder heads are bored in a lathe, and this prevents the blowing out of the packing. Cylinder heads are bored in a lathe and this prevents the blowing out of the packing.

THE MIXER.—It is made of cast iron and steel, and is easy to remove. This type of mixing offers the best opportunity for the engineer to get the best results. It will be found that the engine will run best when the mixture is thoroughly mixed.

THE GOVERNOR.—Is a simple device and perfectly controlled. It allows the engine to run at a speed of 1500 revolutions per minute. The Governor is a device to turn for this purpose.

THE CRANK SHAFT.—Is dropped forged in a solid billet of high carbon steel. Turned and ground smooth, it is perfectly straight. Has wide webs and tiny bolts.

THE PISTON.—Lifted perfectly true. Has three lap joint rings, and is machined less than 10,000,000 revolutions per minute.

THE BEARINGS.—Are long and smooth with high test bearings.

NOTE THIS.—We can supply replacements for worn parts or repairs that you may need at any time. These are the most common parts that are needed for these engines, but we can supply them at once if wanted, and as near the cost of making them as possible. We carry parts in stock. This is a distinct advantage over engine owners.

Our engines can be used for a large number of small jobs, such as running cream separator, pumping water, washing machine, small grist mill, corn sheller, etc., for pumping purposes.

CONSTRUCTION

The frames of our new Separator enclose all wearing parts. The bowl casing is a part of this solid piece frame, and it is impossible for it to get racked out of true. The base is just high enough to allow of a sweeping underneath. The top cap lifts off, giving access to the top drive gear. All parts are readily accessible, yet enclosed, so that no dirt can get to the bearings. The top of the supply tank is only 3½ inches from the floor—just waist high. This allows milk to be poured into it without lifting, and makes it convenient to use the supply tank for washing the skimming device in. There are no protruding shelves, as your pails can be set on floor safe and solid. The bowl is just the right height, where your hands grasp it naturally without bending low. The finish is a rich red, and gives it a handsome appearance.

GEARINGS.—Accurately and perfectly cut. There are no frail parts to break or get out of order. THE PATENT NECK BEARING is made flexible by means of six finely tempered springs. A furnace that will do all we claim for it in winter weather. The Huron Red Hot Furnace is constructed on a scientifically proportioned basis, the object being to obtain complete and uniform heat and radiate it for use without any waste either of heat or fuel. It is connected with the combustion chamber, and has three large free radiating surfaces. All the products of combustion are compelled to travel entirely around the hot body of the radiator before entering the smoke outlet. The flue is horseshoe-shaped, and the air supply passes up through the radiator as well as around it, thus an unimpaired heat being maintained in the bottom of the flue, thus ensuring the equal heating of the bottom as well as the top of the radiator. This feature means that all the available units of heat are utilized. The radiator is made of a heavy sheet steel, with cup joints embedded in grey iron, top and bottom, which make it thoroughly gas-proof, and adds durability. It is easy of access for cleaning.

The furnace is provided with revolving triangular grates of the very latest pattern. Grate bars can be readily removed at any time. It is provided with a deep ash pit, distributor, and sector for the fire pot. These furnaces are quite large, and are therefore especially useful in low cellars. They are very easily mounted. Each furnace is supplied complete with poker, water pan, chain, pulley, regulator plate, shaker, smokeglove, damper, and fine brush. The Huron Red Hot Furnace is made in four sizes.

Satisfaction or your money back.

When necessary to make repairs or replace fire pot sections, this furnace does not have to be dismantled. All that is necessary is to shore up under the radiating pipe, remove the casing, and insert any parts required. It is a great saving in labor and time, and a feature that should not be overlooked when choosing a furnace, and as the fire pot is in two sections, either one can be replaced separately.

The Huron Red Hot Furnace is suitable for hard or soft coal. We do not sell wood-burning furnaces. The casing as quoted in the table of prices is 2-gauge tin. When required, we charge for such repairs, and the amount of any repairs must be agreed on before the repairs are made. When repairs are made, we quote both with and without casing to allow the man who does the installing to make his own casing if he so wishes. Casings supplied by us being made to fit the concave top for sand, warm air pipes must be taken off to the side. We do not sell smokegloves, or hot or cold-air pipes.
