GREETING

It is with a great deal of pleasure I issue my 1921 Price List. I have been too busy to get copy ready for an expensive catalogue, so as this price list is not so expensive I will try and give my customers the benefit, by giving them better value for their money than ever before. To my old customers I wish to thank them for their past orders, and to those who have not dealt with me before—I solicit a trial order, I am sure you will be pleased with the results. Trusting to be favored with your valued orders.

Yours very truly,
J. H. RUTHERFORD

Read what J.S.Martin, one of the best Poultry Breeders in America has to say of the birds bought from me.

Mr. J. H. Rutherford,

Incubators and Brooders

BROODER HATCHER. PRICE \$11.50

How to Hatch and Raise Chicks

EASIEST AND CHEAPEST WAY POSSIBLE.

THE CYCLE HATCHER

PRODUCES STRONG CHICKS AT LOWER COST THAN ANY OTHER INCUBATOR. PRICE \$10.00

The principle of this Incubator is simple. The lamp is in the centre and only has six inches to radiate heat to the farthest egg.

You adjust the regulator to open when the thermometer reads above 103.

This incubator requires no applied moisture as the current of fresh air passing through it carries enough. All that is necessary is to run it where it gets fresh air.

These 50 egg incubators are wonders; they certainly will hatch, and chicks are always

strong and vigorous. Beginners can run them from the start. They just need common sense and one gallon of oil to make the eggs hatch successfully.

Every home should have one to raise fresh meat and eggs for the table.

The Brooder Hatcher is a very popular machine. As you have a complete outfit for the beginner, in that you can hatch the chicks, and also brood them and thus take care of them the day they are hatched. You can brood a batch underneath and incubate eggs above at the same time.

These Cycle Incubators only hold 50 eggs, but it is the best system, even for plants where 200 or 300 egg capacity is required, as you can have several machines running and start one as soon as you collect 50 eggs, and then start a second one a little later, and so on.

Fresh eggs hatch better, and in saving up several hundred eggs some get stale and do not hatch so well.

Full directions with each machine.

THE RADIO HOVER

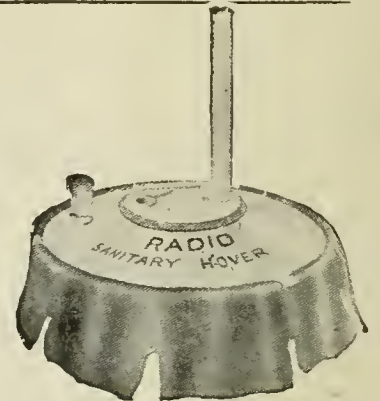

CLEAN, SAFE AND SERVICEABLE Small size, \$10.00, Large Size \$12.00

This Hover is made in two sizes. The 24-inch one will brood up to 75 chicks and the 30 inch one up to 150 chicks. It is constructed on a Central heat principal.

The Lamp is inside a galvanized compartment and no fumes can get at the chicks, nor can the chicks get near the flame.

Very little oil is required to run this Hover as the lamp is in the centre and the heat radiates all around.

The machine is built very strong, and is shipped fully equipped ready for use.

Earlton, Ont., March 3rd, 1920

J. H. Rutherford,
Dear Sir:-

Kindly send me price list of your eggs for hatching, last spring I bought a Tom Turkey from you. He is a grand bird.

Truly yours,
Mrs. W. A. Reid.

Mount Forest, March 10th, 1920

J. H. Rutherford,
Dear Sir:-

The bird arrived all O.K. and I must say that he is a dandy, much better than I expected. Would it be possible to buy a hen, not related to him. What is your price?

Yours respectfully,
Jas. R. Anderson.

Cypress River, Man., Dec. 22nd, 1920

Mr. Rutherford,
Dear Sir:-

I would like if you would send me the price of your Silver Campine hens, the Embden Gander I got from you proved to be a dandy bird, he won first prize at Cypress River Poultry Fair.

Yours truly,
Mrs. John J. Baker

Sioux Lookout, Ont. May 18th, 1920

Mr. J. H. Rutherford,
Dear Sir:-

The Cockerel arrived on the 17th and I must say that we are more than pleased with him, and the neighbours think he is the finest bird they have seen in this part of the country, thanking you for your trouble and wishing you success, I remain,

Geo. C. Herbert.
