Introductory

THIS little book is not intended to be a compendium of general information, but, believe us, it does contain a lot of facts and figures that should be of interest to any individual, business firm or corporation really desirous of learning the shortest cut to comfort and satisfaction where Canvas Goods, Campers' Equipment, etc., are the objects of consideration.

If we have a hobby—and who should not?—it's in making "Turner" goods just a little better than similar lines procured elsewhere. This, however, is easy in a factory such as ours where ideal conditions of lighting, heating, sanitation, and, we may add, good fellowship prevail in a marked degree, thereby ensuring the most hearty co-operation on the part of the employees. To them a little extra reinforcing, or otherwise improving the goods seems immaterial so long as it goes by way of adding to the already high reputation of our products.

The wisdom of our established policy of buying our raw materials early, thereby minimizing the possibility of failure in making prompt delivery, is each season becoming more pronounced.

Acquaint yourselves with such household terms as "Standard Weatherproof," the name by which our best Tent and Tarpaulin materials are known; "Prairie Brand," a quality less expensive but as good as the price we ask; 5/T, our trade mark as applied to Horse Clothing, Robes, etc.

We are prepared to make up to specifications anything in Canvas goods, but for our catalogue we have eliminated all the frills and non-essentials and show only lines for which there is a big demand. If, therefore, you should require anything in the Canvas goods line not shown here, we would be pleased to have an opportunity of quoting prices.

Yours for *quality* goods,

J. J. TURNER & SONS, LIMITED

**SPECIAL
STANDARD WEATHERPROOF
DUCK**

For a number of years we conducted tests of the various Ducks manufactured by the different Mills without finding anything to suit our particular trade. This led us to take the matter up with one of the largest Mills with a view to having them construct Duck to our specifications. As a result of this we are offering to the Public to-day our *Standard Weatherproof Duck* from which we manufacture our "A" Quality Tents and Awnings. You will find this Duck woven close enough to be waterproof and porous enough to dry rapidly without mildewing. These qualities will be found in the lightest to the heaviest weights. Insist, therefore, on getting *Standard Weatherproof Duck* if you want the best.

There is a demand for a cheaper line of goods, which we are meeting with a lower grade material manufactured under the name of *Prairie Brand*. This is a good competition line, weighing full weight in all weights from 6 to 12 ounce without any dressing or size, being therefore all cotton. If then your trade does not demand our highest grade Tents, we recommend our *Prairie Brand*, which we believe will give splendid satisfaction at the prices quoted.

TERMS

All goods are sold f.o.b. Peterborough.

Customers without commercial rating must send money with order, otherwise goods will be forwarded Express C.O.D., we paying for the return of the money, or if by freight, Bill of Lading will be attached to draft.

Packing extra at cost.

All quotations are without engagement and subject to strikes, and other contingencies beyond our control.

Our responsibility ceases when we deliver the goods in good order to the transportation companies.

STORE AWNINGS

We make our Store Awnings of different weights of *White Standard Weatherproof Duck*, and best 8 oz. stripes, the colours of which are warranted fast, and will not run. Our awning Frames are of best iron, well enamelled, and with perfect fitting joints.

Attachments to buildings are made with Brackets having two ears between which the Extension arms operate. The pulleys are all galvanized and swivel-eyed, to give to every conceivable position. The Ropes are pure long thread Cotton of proper thickness.

No expense is spared to make our Awnings what we claim for them, as near perfection as possible.

Some of our Patent Roller Awnings in use

PATENT GEAR ROLLER AWNINGS

Recent years have done much towards perfecting Roller Awnings, and we to-day offer our customers an Awning which is up-to-date and as near perfection as it seems possible to obtain. Our Roller Awnings roll up close to the building and do away with the baggy appearance that

the ordinary Awning presents, which is so objectionable. It does not interfere with the light when rolled up and has no ropes to draw the cloth into the pulleys and cut the Awning. They can be made with ends or wings as well as the Rope Pulley Awning. By a simple device the ends are lapped under and roll up with the Awning without being detached. These Awnings can be made 100 ft. long so as to work perfectly and with ease. They can be raised or lowered to any angle and when rolled up are almost as secure from storms and dirt as if they were inside the building. A Roller Awning will

Centre Support

outlive Rope Pulley Awnings two or three seasons. Our Patent Gearing parts and fixtures are far superior to any other style or kind by reason of their simplicity and durability. Our Centre Supports for the Roller (in lengths where supports are required) are so constructed that they will not cut the cloth and will aid in every way the rolling and unrolling of the Awning. We furnish no delicate parts that will break or get out of order. Our fixtures are easily and quickly placed in position and can be taken down or put up again by simply screwing or unscrewing one single bolt. We will be pleased to give you a quotation on your requirements.

J.J. TURNER & SONS, LIMITED

PATENT GEAR ROLLER AWNINGS

For prices see page 13

SECTIONS OF OUR ROLLER AWNINGS

We present two cuts showing how we manufacture Roller Awnings with ends either attached or loose. In the case of the attached ends, they are made to draw in, so as to roll up with the top. In order to roll up these ends, it is necessary to unsnap them from the wall, draw them in and roll them up. When lowering the Awning the ends will drop out into place and require to be snapped again at the wall. To offset this work of fastening and unfastening the ends every time the Awning is rolled up or down, we make Roller Awnings with loose ends which are fastened permanently at the top under the roller, at the wall, and at the front rod, so all that is required in rolling this style of Awning up, is to take out the handle, adjust it on the box and wind the Awning up or down. Customers can have their Awnings built either way, and both work very satisfactorily.

Plan showing how the ends draw in

Loose End
Fig. 1

Attached End
Fig. 2

ROPE PULL ROLLER AWNINGS

We manufacture two styles of Roller Awnings, either of which works well and can be raised or lowered to any position without difficulty.

Our Rope Pull Roller Awning is fitted with $3\frac{1}{2}$ in. round wood roller, well spliced, having a metal spool at the end, around which the rope works to manipulate the Awning.

We build Roller Awnings so that the ends can be folded in when the Awning is being rolled up. By our method of attaching the ends to top of Awning, there are no spaces through which the sun or rain can enter. (See cut, page 10.)

We can also make Roller Awnings with loose ends if preferred by our customers. Some like one kind, some prefer the other kind. Both work well. (See cut, page 10.)

All our Awnings are reinforced where extra strength is required.

All Rollers over 17 feet in length have a centre support to prevent roller from sagging.

For prices of this style of Awning see page 13

See Prices for Lettering on Page 20

Try our Special Standard Weatherproof Duck

It Always Satisfies

ORDINARY PULLEY AWNINGS

These Awnings are more or less in demand owing to their low price. We continue to make these Awnings superior to any other maker, and are constantly making improvements which add to the wear and working of this particular style. To those who are looking for a low-priced Awning, we recommend this style. Fit and workmanship are always guaranteed.

We have a simple device (*see cut above*) for feeding the ropes through the pulleys, which prevents the cloth from getting into the pulleys and tearing, besides making the Awning easier to raise and lower.

For prices, *see instructions below*.

Prices of Complete Awnings and Covers

In order to arrive at the price of any Awning Cover, you will be guided by instructions on page 13. If the price of a frame only is required, *see instructions on page 13*.

The price of an Awning Complete is computed by merely adding the price of the cover to that of the frame for any awning in question.

DIRECTIONS FOR MEASUREMENTS

Give distance from 1 to 4
 " " " 1 " 2
 " " " 2 " 3
 " " " 3 " 4

Give distance from "top where Awning hooks on" down to the sidewalk.

Does "top, where Awning hooks on," stand out over pillars Nos. 1, 2, 3 and 4?

If so, how much?

Does "top" set back?

If so, how much?

Are pillars Nos. 1, 2, 3 and 4 wood, brick, stone or iron?

For Roller Awnings we Require the Following Additional Information Besides the Above

How many arms do you want on Awning?

State if End Curtains are wanted. If only one, which side? (Standing and facing the building.)

State if Ends are to be Attached to Awning, *as per Fig. 2, Page 10*, showing Ends, or Separate *as per Fig. 1, page 10*.

NOTICE:—Always state definitely if measure from 1 to 4 is as per diagram, or if it is full length of roller. The Operating Roller is always 9 inches longer than the Awning, and allowance must be made for this in the length.

How high do you want scallop piece on Awning to be from sidewalk?

State weight of White Duck required.

If striped Awning, say what color stripe, all of which are 8 oz.

Do you want same lettered, if so, give particulars. (For sample, *see page 20.*)

DIRECTIONS FOR MEASURING FOR NEW AWNING *Covers Only*

Give distance from 1 to 2
 " " " 2 " 3
 " " " 3 " 4
 " " " pillar to pillar.

Be sure and give distance from centre to centre of pillars.

Give length of Arms separately.

Give length of Irons on wall separately.

Give distances between Irons where X is shown on wall, commencing at XX at left hand facing store.

How much do Irons on wall project beyond the top where Awning fastens?

How much do they set back from top where Awning fastens?

Is Awning Cover required for "Ordinary Pulley Awning" or for "Roller Awning"?

Is Front Bar wood or iron?

State weight of Duck required.

If Striped Awning is wanted, say what color stripe.

Do you want same lettered, if so, give particulars.? (For sample, see page 20.)

Should there be anything you do not understand regarding directions for Measurements, kindly write us concerning same. We will look after you promptly.

Showing Awnings and Curtains on Private Residence

Hotel "Quinte," Belleville, Ont., one of Canada's Finest Equipped Hotels

MESSRS. J. J. TURNER & SONS, Peterborough, Ont.

BELLEVILLE, ONT., June 22, 1908.

Gentlemen,—I have great pleasure in writing to thank you for the way you have fulfilled your contract for supplying the awnings for Hotel Quinte. Owing to the very limited time I gave you I was afraid that you might have difficulty in filling the order; but I must say that although I have bought a good many sets of awnings, these appear to be the best, both as regards material and workmanship, that I have ever seen. Wishing you continued success, I remain,

Yours very truly,

JAS. V. JENKINS, *per G.*

WINDOW AWNINGS

It is generally conceded that Window Awnings add greatly to the appearances of Residences, Hotels and Offices, besides being the means of keeping the place cool and comfortable. They are made up in either White or Striped Duck. Our Striped Duck is personally selected in the best markets, care being taken to choose only the prettiest patterns, consistent with wearing qualities. Our range is large and varied enough to please the most fastidious.

We have a new device for attaching Window Awnings to the Frames, one which will appeal to our customers for its efficiency and neatness. Instead of using hooks or screw eyes, which injure the window frames more or less, and when the Awnings are off leave an unsightly row of hooks, we use a small malleable piece with a brass thumb screw, which allows the Awning

to be put up or taken down instantly by simply partly unscrewing the thumb screw at each end.

This attachment also carries the pulleys, making a strong, substantial job.

This is another evidence of our up-to-date methods of manufacture. If you desire your awnings equipped with this attachment add 50c to each awning.

For prices, see page 13

WINDOW AWNINGS—*Continued*

We can fit to perfection any style of window, round, square or oval tops, cutting them to set and fit like a glove. All makers cannot guarantee this. If new attachment style is required, add 50c. to regular prices.

Directions for measuring Window Awnings

1. What style of window frame. (*See cut, page 17.*)
2. Width of frame between brick, making allowance for Awning frame to clear brick when pulled up.
3. Depth from top of frame to sill.
4. If window is not square, give, besides above measurements, depth at side where frame commences to circle, down to sill.

WINDOW AWNING

PALMITO LAWN TENT

PORCH CURTAIN

BALCONY AWNINGS

The demand for Balcony Awnings is increasing every year, and we make a special study to cut these the requisite depth to give the maximum of protection, and at the same time the best possible appearance. They are made of either White or Striped Duck of best quality. We import all our Striped Duck from foreign markets and personally select same.

For prices of these Awnings, see page 13

Directions for measuring Balcony Awnings

1. Give width of entire space you desire to cover.
2. Give extension required.
3. Give height of railing.
4. Give height from floor of balcony to where Awning will attach at top.
5. State whether Awning Irons will attach to wood, brick, stone or iron.
6. State if top where Awning will be attached is level with place where Awning frame attaches.
7. If not level, what is the difference.

PORCH CURTAINS

We beg to draw the attention of customers to our different styles of Porch Curtains. We make these Curtains to slide backward and forward on an iron rod, with bottom scalloped and bound with wool binding, any color. These Curtains sell at \$1.65 per yard, in any color stripe, all complete. To compute the number of yards in Curtain we tabulate the following table of widths:

One width material.....	2 ft. 6 in.
Two widths material.....	5 ft.
Three widths material.....	7 ft. 6 in.
Four widths material.....	10 ft.
Five widths material.....	12 ft. 6 in.

By determining the height you desire the Curtain to be, the cost is easily computed.

We also make Adjustable Porch Curtains which are mounted on a roller at the top, so as to roll up to any height, with an iron rod in the bottom 4 in. up, to weight the Curtain down, enough cloth being left to allow for a scalloped vallance. These Curtains sell for \$1.75 per yard, all complete. In computing price, 9 in. extra must be allowed for turn on roller. Example: If you wish to have the Curtain 7 ft. 6 in. deep, you must figure on 8 ft. 3 in. The same widths as given above apply to these Curtains. See illustrations above.

J.J. TURNER & SONS, LIMITED

LETTERING

Lettering on Awnings forms one of the most attractive methods of advertising at a small cost. To letter the top of an ordinary Awning would cost say, \$5.00. This amount spread over 4 or 5 years (the approximate life of an Awning cover) would only represent an outlay of about \$1.00 per year. Surely this is so cheap that no one can afford to be without it. Lettering on ends and front curtains of Awnings in proportion. No order is too large for this department and no order is too small to receive our best attention. *Give us a trial.*

R. S. Shannon—Crossed Flags in Colors on top of Awning.....	\$10.00
Front Curtain.....	1.50
Preston Bros—Top Lettered in Script Letters.....	5.00
Front Curtain.....	2.00
Safe Sat. Store—Top Lettered with name and Flags in colors.....	12.50
A. M. Laidlaw—Top Lettered in Script Letters.....	4.00
J. Birks—Top Lettered in Block Letters.....	5.00
Front Curtain.....	2.00
Chisholm & Mackenzie—Top in large Roman Type.....	5.00
Front Curtain.....	1.50

DISPLAY SIGNS

We do all sorts of lettering for display signs for any purpose. This department is very complete, being looked after by men of artistic ability.

We make plain and fancy signs on canvas, wood, glass or iron, in fact any and every kind at reasonable prices.

We make a specialty of **Gold Wood Letter Signs** for Banks, Stores, Offices, etc. *Designs and prices on application.*

Flies for Tents are only Shipped When Specially Ordered

They are a good thing to have as they save the Tent, and are a double protection against heavy rain and snow, and also keep the interior of the Tent cooler in Summer and warmer in Winter.

SODCLOTHS

For Square Wall Tents—*Extra Quality*

Sodcloths, 7c per running foot extra. By adding the length to the width of the Tent and multiplying by two, you will be able to arrive at the number of running feet of Sodcloth required. Example: Tent 10 × 12 would be 22 ft., adding length and width together, and this multiplied by 2, would make 44 ft. of Sodcloth, at 7c, equal to \$3.08.

SQUARE WALL TENTS

Flies for Tents are only shipped when specially ordered.

SODCLOTHS

"Prairie Brand"

Sodcloths, 7c per running foot extra. By adding the length to the width of the tent and multiplying by two you will be able to arrive at the number of running feet of Sodcloth required. Example: Tent, 10 × 12, would be 22 ft., adding length and width together, and this multiplied by 2, would make 44 ft. of Sodcloth, at 7c, \$3.08.

When ordering give Number and Weight of Duck required.

For Tent Window and Ventilator, see page 29.

For Asbestos Stove Pipe Rings, see page 70.

Above prices include Silk Sodcloths.

For Mosquito Doors see page 33.

To meet the fresh air requirements of the always poorly ventilated canvas camping tent, we make a Tent Window and Ventilator that will fit into the wall of any tent and allow ventilation and observation.

This Tent Window and Ventilator is rain, storm and mosquito proof and can be put in or taken out instantly. It has a curtain which insures privacy.

These Tent Windows are practically indestructible, and can be placed in the wall of any tent, old or new.

The accompanying cut shows the window out, hanging by the straps. The mosquito bar is made of copper screen and is indestructible. The pocket at the bottom forces the water outside when it rains, thus making it absolutely wind and rain proof. To attach, simply cut an opening in the wall of the Tent, and sew in the canvas frame. The window can be detached or left hanging when not in use. Price \$4.40.

SILK—EGYPTIAN OR PYRAMID STYLE

Fortitude	With Double Awnings	12×12	80.25

MOSQUITO NETTING DOORS AND TENTS

Square Wall Tents shown on Page 21 & 23, Lumbermen's Tents, Page 26 and Silk Tents, Page 29, can be fitted with our Mosquito Netting Doors, which are made full enough to permit of their being rolled up entirely out of the way when not required, and long enough to allow a lap on the ground to prevent anything getting underneath. Prices can be computed by adding height of tent to height of wall and multiplying by half width of tent, thus getting area of door in square feet. We quote these doors at 15c per square ft.

We can also supply Inside Tents made of Mosquito Netting which will fasten to the ridge pole and corners of Tent to support them when in use. These tents are made with full front to permit of their being rolled up out of the way if not required, and walls are cut deep enough to allow a lap on the ground. Prices can be computed at 50 per cent of Square Wall Tents on Page 21, using 7 oz. Duck as a basis.

GARAGE TENTS

With the general use of Automobiles has come the demand for a portable Garage, which can be erected on short notice and moved about from place to place as required. We have anticipated the trade, and are showing a Cut of a Garage Tent, which we have tried out and found entirely satisfactory. These Tents can be used with or without a floor, but the preference would be to floor the Tent, which our quotations do not include. The Framework of the Tent is made of black iron pipe of sufficient size to give the strength required and make the Tent perfectly rigid. In event of not quoting exactly on your requirements we will be pleased to give quotations on any specifications submitted to us.

PRICE LIST

Brown Watertite Duck, complete with pipe frame.....	\$300.00
12-oz. White Duck, complete with pipe frame.....	230.00
10-oz. Khaki Duck, Complete with pipe frame.....	245.00

Dimensions: Length 14 ft., width 10 ft., height 14 ft., height of wall 8 ft.

J.J. TURNER & SONS, LIMITED

GROUND CLOTH

Ground Cloths are found to be useful articles and add much to the comfort of tent life. They not only keep out insects and dampness, but are a help to keeping the tent clean, as they can be swept off similar to a carpet in a house. Made from 8 oz. White Duck. Price, 14 cents per square foot.

Guys, Block and Tackle Equipment included in prices for Poles and Pegs.

HOSPITAL TENT

We manufacture a Special Hospital Tent, size outside, 15 ft. x 30 ft.

The tent is a double tent all through, the inner tent being 14 ft. x 29 ft., and is attached to outer tent by snaps.

The walls are 6 ft. high and provision is made for stove pipes and ventilation. Outer tent is 10 oz. duck, inner tent, 8 oz. duck, height in centre 12 ft., supported by double ridge poles.

This Hospital tent has been thoroughly tested in the New Ontario district during an epidemic, all through the Winter, and found to be comfortable with one good stove.

We have supplied these Hospital Tents to the Dominion, Ontario and British Columbia Governments, and to the Cleveland, Ohio, Board of Health.

Municipalities are now using these tents for the treatment of diphtheria and other contagious diseases which require isolation, the tent being moved about as occasion demands.

Owing to the manner in which this tent is constructed, it is by far the coolest tent we build for Summer and warmest for Winter. For camping purposes the door can be made to open up on either side, at a small additional cost.

PRICE

With poles, guy ropes and double tent, f.o.b. cars, Peterborough, \$400.00.

Larger or smaller sizes made to order.

CONSUMPTIVE HOSPITAL TENT
or "Ideal" Camping Tent

One of the evidences of our keeping in touch with the times, is to be found in the fact that we are building a tent entirely adapted to the new school of thought and treatment of consumptives.

For every tuberculosis victim in Chicago, Dr. W. A. Evans wrote the following prescription: "Build an open shack in a nearby vacant lot and live in it. If you have a backyard, buy a tent and lock your bedroom door. Live out of doors. If the weather is below zero, keep a hot water bag at your feet."—*Toronto World*.

This tent is made with double roof, or double roof and walls as ordered, and all tents are fitted with wooden doors, which open and shut on a jamb, in the same manner as a house door would open and shut. The window frames are of wood with glass of different sizes as per order.

The doors and window frames are attached in a most simple manner, entirely our own thought and idea, and can be taken out in a short space of time. The walls are made to roll up in Summer so that the pure air can be enjoyed without the burning heat of the sun. Leather straps support the walls when rolled up. The ventilation for Winter is good and receives special attention. We have perfected our windows and doors so that the glass part lifts out readily, leaving a wire screen in the outside which permits a perfect ventilation without admitting the troublesome flies and mosquitos. We color this tent green at a small additional cost. This color has the advantage that it tempers the light filtering through the material, relieving the eyes from the glare of white material. While we list this tent as an Hospital Tent, it makes an ideal family tent for camping.

Prices furnished on application.

COTTAGE TENT

This cut is a reproduction of a photograph of our Exhibit at The Canadian National Exhibition, Toronto, and which secured the "Highest Award" in competition with other makers.

The dimensions of this particular tent are as follows:

Outside Fly, 30 x 30 ft.

Inside Tent, 20 x 20 ft.

The outside Tent or Fly being 5 ft. wider than the inner Tent, provides a Veranda 5 ft. wide all the way round. The inside Tent is divided into a sitting and dining-room on one side and three bedrooms on the opposite side, all opening on a hallway 5 ft. wide, which extends from front to rear through the centre of tent.

This Tent is fitted with our specially designed wooden doors, fitted with glass half way down, similar to a house door, a door being placed at each end of the hallway.

The bedrooms are each fitted with one of our specially designed windows which are so constructed that the window can be opened for ventilating purposes, leaving a wire screen which excludes flies and mosquitoes. The Sitting-room and Dining-room are also fitted with windows of a similar kind.

This style of Tent makes an ideal Summer home, being thoroughly waterproof and is so constructed as to withstand any storm.

If desired all the partitions can be drawn back against the walls, making one large room.

This Tent is very suitable for hospital work, being bright and cheerful, permitting patients to enjoy the sunlight on bright days and opportunity to see outside through the windows on dark or stormy days.

If required, walls can be furnished for outside Tent, and made to roll up and down.

This Tent is constructed with 10 oz. Duck Fly, and 8 oz. inside Tent.

Prices on application.

COTTAGE TENT

No. 2

We again present to our Customers a cut of a Family Tent designed to give comfort and stability, and losing nothing in Tent appearance. This Tent is manufactured of Fancy Duplex Stripe, and is an ideal camping house. Our detachable doors and windows are used with good effect, and the tent, which is divided into four bedrooms and a living room, is not dependent on the centre of the Tent for light, but obtains light from the windows in each room. The size of this particular Tent is 15 x 25, allowing for four bedrooms $7\frac{1}{2} \times 7\frac{1}{2}$, and a living room 10 x 15. The fly extends 3 feet all around the outside of these measurements, making it 21 x 31. This we make in many sizes and from both fancy stripes and white Duck.

Prices on application.

HOUSE TENT

The size of this Tent is 15 x 20 inside, with Fly 20 x 25, which allows for 2½ ft. Veranda all round the four sides. The Tent is supported with two Centre Poles and a number of side poles 6 ft. 6 in. long. There is a door in the front, half wood and half glass, which opens and shuts the same as any door in a house. There is also a door of a similar kind in the back. The tent has four patent windows with wire netting in each. A portion of the back Veranda has been partitioned off to form an outside Kitchen and Dining Room. The Fly is made of 10 oz. *Standard Weatherproof Duck*, while the inside Tent is made from 8 oz. *Standard Weatherproof Duck*. The inside Tent divides into four rooms with Green Silk Curtains for divisions.

Prices on application.

RENTING OF TENTS

We are prepared to supply entire outfits for the equipment of camping parties. Our large experience in this line enables us to provide such articles as afford a maximum of comfort and convenience in as little weight as possible:

Write or wire for estimates. State whether it is intended to have a moving or a stationary camp; nature of country, whether rocky, rough or flat; duration of camp; number in party; ladies, gentlemen; if a cook will be taken or if party do their own cooking.

Rent computed from the time goods leave our premises until returned.

CUT NO. C 365

MOSQUITO CANOPY

We here show a handy little device for adding to the comfort of those who sleep out of doors either in tents, or balconies, or in hammocks under trees. One can obtain a great deal of comfort out of doors if proper provision is made to keep the flies and mosquitoes away. This Canopy was designed for that purpose, and folds up into a small compact form. The galvanized frame which supports the top is collapsible and rolls up into a small parcel. The Canopy is suspended by a small cord from the ridge-pole of the tent or to the branch of a tree, and can be raised or lowered as desired.

Price.....\$5.20 each

MOSQUITO TENTS

	Width	Length	Height	Price
1 man	2½ ft.	× 7½ ft.	× 3 ft.	drill roof \$6.20
2 men	5 ft.	× 7½ ft.	× 3 ft.	drill roof 9.45
4 men	7½ ft.	× 7½ ft.	× 3 ft.	drill roof 12.70

These Tents are made with square tops, and finished with ropes in the corners to be used outside if required. Or they can be attached to the inside of Duck Tents in event of requiring to use them inside. They are finished with a Drill Sod Cloth to tuck under bedding.

CAMP STOVES

**“DAWSON”
CAMP STOVE**

NESTABLE

“CLIPPER” CAMP STOVE

SHEET IRON

When setting up for use, unbolt the legs and reverse them (feet downwards).

Size	Pipe Hole	Size of Pot Hole	Weight	Price
Small, 24 in.	5 in.	$8\frac{1}{4}$ in.	12 lbs.	\$6.75
Large, 30 in.	5 in.	$8\frac{1}{4}$ in.	18 lbs.	7.40

Prices include five lengths of telescope pipes.

SURVEYORS' CAMP COOK STOVE

Two Holes with Oven, made of heavy Sheet Steel, including five lengths of Telescopic Pipes, \$26.90 each.

CAMP TABLES

Turners' Folding Camp Tables. Strong, convenient and portable, Turner's Folding Tables, like all our other goods, are the very best, and the most convenient tables made, the legs folding up so that the tables can be packed in a small space. Size 24 x 36 in.. Price, \$49.00 doz.

UMBRELLA TABLE

No. 7.—This Table is all made of hard wood with top 2 ft. 3 in. wide and 3 ft. long, and is finished with filler and varnished. It will comfortably seat four persons. There are no separate parts to either top or legs. The table when folded encloses legs and holds them, and in this way the whole table packs so closely as to defy breakage. In use, it is very strong and rigid, and is guaranteed to support 300 pounds. Size folded, 3 ft. long by 5 x 7 in. Weight, 16 lbs. Price, \$9.85 each.

We make a Shelf to go under this Table, which folds up and is very strong. Shelves, extra, \$2.05 each.

UMBRELLA CHAIRS

No. 3.—This Chair may be folded and carried as easily as an umbrella. It is strong enough for the heaviest man, being guaranteed to maintain a weight of 300 lbs., and comfortable for all, adjusting itself perfectly to the body and affording a better rest than any other chair made. Seat made of fine quality of fancy ticking, fast colors, lined with duck. Size folded, 3 feet long by 3 inches square. Weight, 4½ pounds. Price, \$5.25 each.

TURNERS' FOLDING LAWN SETTEES

These Settees are made of hardwood, spring seat, and are just the thing for lawns. Although they are nicely finished, they are moderate in price. The bodies are finished in vermilion and the seats in oil, and the entire settee is covered with a good coat of varnish.

No. 58,	3 ft. 6 in. long.....	\$4.20 each
"	58½, 4 ft. 6 in. "	5.00 "
"	58x, 5 ft. "	three sets legs..... 6.10 "

TURNERS' FOLDING CAMP STOOL

This Stool, when folded, is 2 ft. long by 2½ inches square. Weight 2 pounds.

It is strong enough to support 300 pounds or more; makes a very comfortable seat. The seat is of heavy brown duck, reinforced and tacked at the corners; the legs are fastened to a malleable iron centre piece with rivets, and each leg rests on a metal shoulder, one on each side, which will absolutely prevent splitting or breaking.

Price.....\$1.45 each

FOLDING FLAT SEAT CHAIR

No. 107.—The cut represents a new Chair and, like our other lines, it folds easily and compactly. It is exceedingly strong and very comfortable, and is adapted to outdoor use as exposure to weather cannot injure it. It is nicely finished with filler and varnished, and folds more compactly than any similar chair manufactured. A dozen of these chairs folded occupy a space of 36 inches long by 16 inches wide, by 20 inches high. The folding device is new. Weight, 7 lbs.

Price.....\$2.85 each

TURNERS' HOTEL COT

Turners' Hotel and Camp Cot. This cot folds up in a very small space.....\$ 5.25 each

Turners' Folding Double Camp Bed, the best, strongest and cheapest made. (*See cut on page 58*)..... 21.50 each

Single Wool Mattress..... 4.30 each

INSTITUTION IRON COT

This is indeed a very neat Cot for house or camp use, and is the particular cot adapted for use in our Hospital Tent. The legs fold nicely under the bed, so that it can be stored away very handily when not in use. It is fully guaranteed.

Height, 25 in., width, 2 ft. 6 in., White Enamel.....\$11.75 each

We have a wooden frame Wire Cot, very similar to above.... 4.00 each

“SAMSON” FOLDING CAMP BED

In its construction, this Bed is a marvel of skill. Opened, it is a full length, easy, elastic and comfortable Bed; and folded, it is a snug package only 3 feet long, and weighs 15 lbs. It is equally useful for the camp, lawn, piazza or house.

This Bed is covered with an extra good quality of 12 oz. brown duck. Can be furnished in same quality white duck. It is easily and quickly opened and folded, and stands firmly on the floor, and adjusts itself to uneven ground when necessary. This Bed is furnished with a duck fold, easily convertible into a comfortable pillow.

Dimensions:

Opened: 6 ft. 6 in. long, 2 ft. 3 in. wide, 14 in. high.

Folded: 3 ft. long, 4 in. thick, 5 in. wide.

Price.....\$ 9.85 each

COMBINATION COT AND LITTER

We desire to call attention to our new Combination Cot and Litter, or Stretcher, which is a first-class Folding Cot, and the best Litter made.

In construction it has some of the features of our House Cot and Camp Bed. It has no separate parts; can be quickly and easily folded. Its extreme length is 7 feet; the duck part is 6 feet 2 inches. Folded, it is 7 feet long by about 4 inches square. Guaranteed to support 600 pounds, and, when adjusted, not to close when used as a litter. The duck used is 12 oz. Army Duck, colored olive drab. When desired with Cover of 14 oz. rubbered duck, thoroughly waterproof, the price will be \$3.90 extra.

Price.....\$10.35 each

TURNERS' FOLDING DOUBLE CAMP BED

This Bed will carry 600 lbs. It folds up very small and snug, being one of the best portable double Beds on the market. Top made of heavy No. 6 Sail Duck.

Price.....\$21.50 each.

TURNERS' HAMMOCK FRAME

This is one of the best Hammock Frames in the market and the price is within reach of all. It is simple in construction and can be

easily put up and taken down by removing a bolt from each end. It will support a weight of five hundred pounds. The frame is made of the best hardwood and is nicely painted in different colors and varnished; hooks for the Hammock are attached to the frame.

Price.....\$10.60 each
Fancy Canopy for same..... 17.00 each

COAL SACKS

We manufacture Coal Sacks, standard sizes, to carry 100 lbs. of hard coal.

For years our Coal Bags have stood the test, and we are determined to make them up to the standard that will retain for them the reputation they already carry. *Write for prices.*

FEED BAGS

These we manufacture in two Grades. Our No. 1 Bag is made from 8 oz. Duck, with brass ventilators back and front, and fitted with wooden bottom. Good straps.

Price.....\$18.00 dozen

Our No. 2 Bag is made from 12 oz. Duck with double bottom and sides. Brass ventilators back and front; a very superior bag.

Price.....\$30.00 dozen

Neither of these Bags should be confused with some lower priced Bags that are on the market. They are of much better quality, and will give much greater satisfaction.

MAIL BAGS

Made from Brown "Watertite" Duck, of strong quality, leather bound with loops, strap and lock.

No. 1—15 x 24 inches.....\$5.75 each
 No. 2—15 x 30 inches..... 6.25 each
 No. 3—18 x 36 inches..... 8.00 each

The No. 3 Bag is an exceedingly strongly built bag, made from an extra stout quality of Brown "Watertite" Duck, strongly reinforced with leather.

SNOWSHOE HARNESS

A simple, yet handy arrangement for fastening on Snowshoes.
Made of Chrome Leather.....\$10.75 doz. pair

“PETERBOROUGH” TOBOGGANS

Special Indian Models (2 Grades)

GRADE No. 1.—Built of the best grade of maple, straight grained and free from defects. Their peculiar shape is especially a strong feature. The head is bent on a long curve, so that it will raise easily when it strikes a log or other obstruction. The sides of the head are tapered, so that when it strikes a tree it will glance off without smashing the hood. The width is 14 inches wide at the front, tapering to 12 inches at the back. This allows the toboggan to move easily in its own track in the snow. In thickness it is about one-half inch near the front, tapering to one-quarter inch at the back, allowing the toboggan to bend easily, and still be very strong.

GRADE No. 2.—We can also supply a second-grade toboggan of the same first-class maple, but built of five parallel strips instead of three tapered boards. It is a first class toboggan in every respect, but has not quite so much work put on it in tapering the strips.

Insist that the name “PETERBOROUGH” is stamped on the hood of your Toboggan.

OUR SPECIAL INDIAN MODEL TOBOGGAN

(Described above)

Will your Toboggan Stand this Test ?

THE "SPORT" TOBOGGAN

These are made of seven $\frac{3}{8}$ inch thick birch slats, all equal in thickness, perfectly clear, and thoroughly seasoned. The slats are screwed to cross-bars from the underneath side of toboggans, nicely finished, giving this toboggan an absolutely smooth surface for sliding either on soft or hardened snow. We have replaced the side dowels by $\frac{7}{16}$ in. cotton rope of the best quality, which renders the toboggans very flexible. The body of the toboggan is entirely oiled and the hood is oiled and varnished.

Width of the toboggan, $17\frac{1}{2}$ inches. Weight per lineal foot, $2\frac{1}{4}$ lbs.

Length	3 ft.	4 ft.	5 ft.	6 ft.	7 ft.	8 ft.
Price	\$3.15	\$4.20	\$5.25	\$6.35	\$7.40	\$8.45

PIANO COVERS

We manufacture Duck Covers, Flannelette Lined, for covering over pianos when being delivered, etc. These are almost a necessity in the piano business, as they save many a scratch and bruise which a piano is liable to get, besides protecting it in wet weather. We letter them with your name and business without extra charge. This makes a good advertisement when pianos are being delivered.

 Sizes 48 to 58 in Plain White, Blue, Brown or Striped Duck..... \$11.00 each

Give width of seat, out to out flare, when ordering.

CANOES

The following pages give in concise form, facts about the Canoes we build. It is not necessary to describe at length the methods of construction or process of building. Our work in this department has always been satisfactory as evidenced by the steady increase in trade which we have enjoyed from year to year. The many lines referred to in this catalogue enable one to make a selection according to their needs and requirements. Where anything different is required we invite correspondence and would be pleased to place at the disposal of our customers, our experience and endeavor to help them in making a selection best suited to their purpose. The same remarks which we applied to the manufacture of our Tents in the opening pages of our catalogue, apply to this line of manufacture and we are always endeavoring to keep abreast of the times. When possible we try to carry some stock on hand, but the demand for canoes has been so great of recent years, that the demand is larger than the output. We always endeavor, however, to ship promptly and to this fact we attribute much of our success. We show a cut of a cross section of our No. 22 Canoe, which is flat on the bottom and very steady. It is a very popular general purpose canoe.

Our canoes are built of the very best materials, well seasoned and properly constructed, so that our customers may rely on always getting a first-class article. We solicit a trial order.

CANOES EXTRA DEPTH

For each additional inch, painted Basswood or Cedar, \$1.00.

Varnished Basswood or Cedar, \$1.50.

Longitudinal Cedar strip or freight, \$2.00.

Canoes painted any color to suit purchaser.

Canoes painted white or with stripe, extra.

Names painted on canoes and paddles, extra.

FREIGHT CANOES

These Canoes are made of Basswood or Cedar and were first built for use in the Klondyke country, and we have frequently been told by those who have used them that they are the most satisfactory Canoes there. They are much used by prospectors and surveyors who speak in the highest terms of them.

These Canoes are made either the regular rib and batten style with boards or of longitudinal strips as desired. Made of longitudinal strips they are the strongest and most serviceable Freight Canoes in the market.

These Canoes are largely used by prospectors in the mining districts of Canada and South Africa, and are also much used by surveyors for taking supplies to their camps.

515	18	46	17	141.00	162.50	187.50

Prices include one pair of oars and rudder when required.

These lapstreak boats are suitable for use with outboard or detachable motor, and make a very satisfactory boat for this particular purpose.

CANOE SKIFFS

To combine the lightness of the canoe in handling with the easy method of rowing instead of paddling, strikes many as an ideal of comfort in boating. For such we fit any of our larger canoe models for rowing, with seats instead of thwarts. While our Basswood Canoe Skiff is as good as any Basswood boat can be, and with care will last for years, still we recommend the Cedar Rib and Cedar Board and Cedar Strip styles in preference. We can supply them in any of our regular sizes, from sixteen feet to twenty feet long.

No.	Length	Beam	Depth	Painted Basswood	Varnished Basswood	Longitudinal Cedar Strip Varnished
	Feet	Inches	Inches			
367	17	37	14	\$104.50	\$124.50	\$149.40

606	17	35	13	75	106.00
608	18	37	13	85	113.00

These canoes are made with two Cane Seats.

SPONSON CANOES

The Sponsons are the Air Chambers built along the sides of the Canoe. This makes a Canoe that is almost impossible to upset. Around summer resorts, for the use of children, and where every precaution is desired we recommend this style of Canoe. Sponsons can be built on any Canvas Canoe. We carry the Sponson Canoe in stock in No. 604 size, at \$147.50.

CANVAS COVERED FREIGHT CANOES

The Freight Canoes are all built with hardwood outside gunwales and long decks. The last four sizes on the list have inside gunwales as an extra reinforcement.

Keels on Canvas Canoes, \$2.50 extra.

OUTBOARD MOTOR BOAT

Boat and Equipment
Ready for Motor
\$169.00

No. 417. 17 ft. long, 4 ft. beam, depth at stern 20 in., depth amidships 16 in. This boat is built of selected cedar, longitudinal strip construction with the ribs 3 in. from centre to centre, copper fastened. It has two rowing seats, 12 in. wide. These seats are fitted with removable back rests. There is a seat in the bow and the special seat in the stern with locker and drawer underneath. The equipment consists of one pair of oars and rowlocks and one foot brace. This boat is built with a heavy oak transom, well reinforced and is an ideal boat for the outboard motor.

Price.....\$169.00

No. 416. This boat is 16 ft. long, 46 in. beam, 16 in. deep. The construction is the same as No. 417, i.e., cedar planking, longitudinal strip construction with ribs 3 in. centres. This boat is iron fastened, painted outside and varnished inside. The two rowing seats are 9½ in. wide. The bow and stern seats are the same as in the other boat. The back rests for the centre seats are not included except as extras. The equipment consists of one pair of oars and foot brace. Stock colors, red and green.

Price.....\$132.00

Boats fitted with back rests, \$6.75 extra.

FREIGHT, PACKING AND SHIPPING

The freight on canoes and skiffs is based on the first-class rate. On one canoe or skiff and on two canoes or skiffs crated together the charge is $3\frac{1}{2}$ times the first-class rate, actual weight; on three canoes crated together the charge is 3 times the first-class rate, actual weight.

The rate for canoes to points in the United States is four times first-class rate.

The duty at present on canoes entering the United States is 15 per cent. ad valorem.

Ocean rate is calculated by measurement.

In shipping to European countries, we can nest the first seven canoes in our list, this means that these canoes will fit one inside the other. We remove the decks and thwarts, which are put in with screws, and mark them so that they can be easily fitted in their places.

Our prices do not include crating or burlaping, prices of which are as follows:

Crating one canoe.....	\$1.00 to \$ 5.00
Crating a nest of canoes.....	\$5.00 to \$15.00
Burlaping each canoe.....	\$1.50

We will flush finish any of the painted canoes for \$5.00 extra. This means that the nail heads will be covered with putty, which makes the finish perfectly smooth. A flush finish makes a handsome canoe for the club house.

Two paddles go with each canoe.

OUR TERMS

On all canoes and skiffs built to order, a deposit of 25 per cent must accompany the order.

DINGHY SAILS

We make a specialty of Dinghy Sails made from Boat Drill and Egyptian Sail Silk. In this department we employ only skilled mechanics who are thoroughly conversant with their trade.

Our prices will be found most reasonable for the class of work we turn out. We shall be pleased to give quotations on any size desired.

We manufacture Launch Curtains and Vallances from Best Duplex Stripes in various colors. Send us specifications of your requirements and give us a chance to quote you. Waterproof Motor Boat Covers, Spray Hoods, Auto Tops.

We solicit a trial order

In ordering Sails, give the following Measurements: Hoist, Gaff Leach Main Boom, Throat to Clue, Peak to Tack. Say if to allow for stretch.

Having had over thirty-seven years' experience in fitting out vessels, a perfect fit is guaranteed.

YACHT AND BOAT SAILS

Of any Dimension, Made to Order

We also make a good Lateen Sail for open canoes, made of strong cotton with straight spars and made to hook on mast: No. 1, 45 feet, \$12.00; No. 2, 35 feet, \$10.80; No. 3, 25 feet, \$9.90.

We can make any kind or style of sail to order. Balance Lug, Sprit, Leg of Mutton, etc. Prices given on application.

LEE BOARDS

Lee Boards add materially to the pleasure of sailing, making it possible to run up in the eye of the wind, and reach points impossible without their use, in the absence of a keel on the bottom of the boat.

Our Lee Boards are made of Sheet Steel, and are so arranged that they do not require to be detached when running ashore or going over rocks or other obstructions under water. They hook on under gunwhale without injury to the boat or canoe. Price, per pair, \$7.00.

When ordering
give beam at widest
part, and state width
of Gunwale Strip.

CUSHIONS

Cork filled, made from best Striped Duck. These are very bouyant and are very handy in a boat in case of accident.

Often we have on hand Steam Yachts, Sailing Yachts, Row Boats, Canoes, that have been used for a short time, and which we can sell cheap. Write us if you require anything in this line.

Curved Back Rests, per dozen, \$12.65

LAUNCH CUSHIONS

We have added an Upholstery Department to our Factory, which is in charge of a competent man who gives his entire attention to Cushion and Special Mattress Orders.

We are ready to quote on all kinds of Cushions, from the ordinary Brown, Red and Stripe Ducks, to the better lines of Plush and Leather.

The Tufted Lazy Back shown above is furnished on oak boards and covered with artificial leather at \$2.45 per square foot. The use of the lazy back in motor boats is coming into general favor.

We can supply the tufted artificial leather to fit your own boards at \$1.95 per square foot.

Cushions are made regularly with two inch boxing and stiff corded welt edges, closely buttoned in Diamond pattern, and made **reversible unless otherwise ordered**.

IN ORDERING—Pattern must show exact size and shape of seat for which cushion is intended, we allowing for all seams and taking up necessary to fit, and the pattern should be plainly marked to show top and position in boat. Any deflection for wheel, levers or anything which might interfere with cushion, must be plainly marked or cut out.

Patterns should be cut from light weight, tough paper, and mailed in a compact roll.

Extra thick cushions will be charged for extra to cover actual cost of additional material and labor required.

FRESH AIR WHILE YOU SLEEP

The Home Treatment of Tuberculosis with the Walsh Window Tent

The Walsh Window Tent can be made adjustable to any window and any bed. The regular size fits windows from twenty-four to forty inches wide, but with no extra charge can be made to fit any window.

Nothing to screw on; no nails.

The tent is as secure in the frame as the sash itself. It cannot be pulled out, and can be taken in or taken out instantly by tightening a set screw; can be moved from one window to another of different widths.

The tent may be folded up and slipped under the bed when not in use.

The side of the bed is placed up to the window, and if not convenient to have the head of the bed opposite the window, you may sleep with your head at the foot of the bed, or if you use a cot it can come over the head of the cot on to the pillow.

The tent comes in over the side of the bed, down over the pillow, and you slip your head through the elastic hole in the detachable washable skirt and breathe the outside air.

Two persons may sleep in the same bed while only one is in the tent. The Tent allows you to move freely about on your pillow in any direction. You can talk to persons in the room through the celluloid window. An advance over sleeping on an outside porch or any tent in cold weather.

How Am I Protected From Drafts and Chillings?

If the weather is cold throw over the tent a heavy comforter, so that it will hang down around the tent, and can be tucked under the top of the pillow.

When the wind blows hard raise the wind break, which is shown at the bottom of the frame. This breaks the force of the wind by partially closing the opening, but allows free ventilation.

If it snows or rains, let down the outside awning by loosening a cord while you lie in bed.

By means of these three devices you can sleep in the tent when the wind is blowing hard and the temperature is below zero.

Why Use the Tent and not Open the Windows?

It is not the steady cold weather that is hard to combat, but changeable weather is dangerous and gives us colds and pneumonia.

You may go to bed with the windows up and the outside temperature fairly warm, and have bed coverings accordingly, yet before morning it may be blowing and freezing cold. It is these sudden changes that kill.

With the Walsh Window Tent you can regulate the heat of the room and keep your body in a Summer temperature all night, while your head, which is toughened to changes and variations, can be covered by the folds of the detachable skirt, a hood or any suitable covering.

The head only is in the tent, and you are breathing the outside air, fresh with every breath.

FRESH AIR WHILE THEY SLEEP

Gives Business and Professional Men More Energy, a Clearer Brain and Prevents Nervous Prostration

It is during the day that the work of the body is done and at night our senses rest and the repair shop of the tissues gets to work. The food is worked over, the muscles are built up and the brain cells restored and refilled. This is the time they need oxygen, fresh air and lots of it. If the supply is limited and improper oxidation takes place, disease and sickness, such as consumption, bronchitis, anæmia, and nervous troubles in many forms, get their start. Absolutely pure air is essential to highest vitality and health, and it cannot be had inside the four walls of any room. While very cold air may be breathed, the body surface must be kept warm.

In the Walsh Window Tent the energy that in a cold room would go to fight the cold is saved and stored away to increase weight and vitality.

The benefit from cold air is received by its coming in contact with the face and being breathed. It stimulates deeper and longer respiration.

Fresh, cold air breathing allays sweating and weakness, promotes good sleep and helps the appetite. Cold fresh air clears the complexion, enriches the blood and prevents consumption.

Why You Should Use The Walsh Window Tent

Because it protects from chills and colds, and you get fresh air with every breath. It protects you and the room from insects, frost, wind and rain.

It is hygienic, and the detachable skirt is easily washed or disinfected.

Because it will save the price of itself in fuel in one year, and with no inconvenience you get up in a warm room.

It can be had at a very small expense, compared with change of climate or other methods.

SANITARY BACK REST

An actual necessity for the comfort and convenience of those confined to the bed. Takes the place of pillows, which not only heat the body, but are easily displaced.

The frame is made of hardwood, finished in the natural color; covering is of a fine quality of ducking which can be quickly removed, laundered and replaced.

Price.....\$5.25

Adjustable to any angle. Folds flat when not in use.

FLAGS AND BANNERS

We call customers' attention to the superior quality of our goods, our bunting being the best we can buy. We have found from experience that a bunting has to be woven to suit the requirements of different climates, so that what might be the best in one part of the world is not the best for other parts of the world, owing to different climatic conditions. Our bunting is woven open enough to permit of it floating easily in very light winds, while it is strong enough to withstand any weather suitable for flag flying. The life of a flag can be enlarged by following a very simple rule, which is never to allow the flag to remain up all night collecting the dew, which softens the wool and allows it to whip out in the morning breeze before the flag is dried out, and the wool is soft. It should be put up at sunrise and then taken down at sunset, always. By following this simple treatise, the flag will give you much better service. All our flags are made with double inlaid seams, and we make a perfect flag, officially correct. Our prices are right. Workmanship first-class.

ALL FLAGS GUARANTEED THE CORRECT SIZES AND SHAPES
PRICE LIST OF BUNTING FLAGS; ALL MADE, NOT PRINTED

Made from the very best English All-Wool Bunting, in the best possible manner. All flags made on the premises.

FIVE-POINT FLAG BRACKET

This is probably one of the most convenient little attachments yet devised for decorating purposes. It can be attached to the window-sill or any other convenient place, and from it can be displayed at an appropriate angle, five small flags on sticks with sufficient space between them to make a very effective display. These are largely used by hotels, stores, factories, public buildings, etc., for displaying a series of small flags from every window. As the flags can be easily and quickly placed in position or removed, it affords an opportunity for an attractive display at a very small cost. The flags which are used in these can be purchased at a nominal figure and will last indefinitely when these brackets are used.

Price 40c each

THE INEEDA FLAG STAFF BRACKET

(Patented Nov. 13, 1900)

“Adopted as the Standard for the Army.”

Officially tagged and sealed by the Quartermaster's Department as being the most suitable Bracket for supporting small flag poles.

Are you showing your colors or have you delayed from having no suitable place to fasten your pole? An INEEDA will solve your problem. Being adjustable to nearly four hundred

different positions, it can be fastened to any surface and still give your pole the desired angle. No need of carpenter or blacksmith. Get an INEEDA and four screws and put it up yourself in a jiffy. More sightly and convenient than halliards fastened to a tree which generally break at just the time they are wanted. Whether window-sill, piazza roof, or side of the house—whether horizontal, vertical, or at any angle—the INEEDA will fit the place and occupy but little space.

Tag of the Q. M. Dept., U.S.A.

Reverse side of Tag showing Seal

attached to the house. Made in four sizes—each bracket has cleat for halliards and is heavily galvanized. Look for the name, INEEDA.

Price for $1\frac{1}{4}$ in. pole \$2.00 each
 “ $1\frac{1}{2}$ “ “ \$2.65 “

Price for $1\frac{3}{4}$ in. pole \$3.30 each
 “ 2 “ “ \$4.00 “

STATIONARY FLAG STAFF BRACKET

This can be quickly attached to the window-sill, balcony railing, verandah post, or side of the house and left there permanently, so that when occasion demands the use of your flag, it can be quickly dropped into this neat receptacle, which is constructed to display the flag at a proper angle. Without the use of any tools, the flag can be easily removed until again required. This means a big saving in flags, in addition to the great convenience in displaying.

Bracket for pole, $\frac{3}{4}$ " diameter.....	\$ 3.00 per doz.
Bracket for pole, 1" diameter.....	6.75 per doz.
Bracket for pole, $1\frac{1}{4}$ " diameter.....	8.95 per doz.

Bracket for pole, 2" diameter.....	19.80 per doz.

FLAG STAFFS

We illustrate herewith a line of Flag Staffs which we are offering, to be used in conjunction with the brackets shown in this catalogue. They are made from good clear Georgia pine, with ornament at top, and wax finished. We supply them in three lengths at prices quoted.

Flag Staff, 8' in length.....	\$1.15 each
Flag Staff, 10' in length.....	1.50 each
Flag Staff, 12' in length.....	1.90 each

FIVE-POINT FLAG STAFF BRACKET

This cut shows how the Five-point Flag Staff Bracket, illustrated on page 91, is intended to be used.

We make flags of all nations, and will be pleased to quote prices.

DESIGNS FOR HONOR ROLLS

We here show a few reproductions of various styles of Honor Rolls, the product of our Sign Department, which we have made up for numerous churches, lodges and societies throughout Canada, in memory of their members who volunteered for service with the Canadian Forces at the front.

In our Sign Department we have a number of artists of extraordinary ability, and the ideas here shown are entirely of our own origin.

These Shields are made of galvanized steel throughout, well constructed and are moulded with a rounded face so as to make them very effective. They are not only cheaper than brass, but are, indeed, more attractive, and do not require cleaning to keep them in condition.

HONOR ROLL No. 1

This measures about 32 inches wide by 34 inches high. The Flags are reproduced in their original colors as well as the Maple Leaves and Beaver shown at the bottom of the shield. The two larger shields are finished in dull black, while the two inner shields are in deep blue. All lettering is in solid 22 kt. Gold Leaf, guaranteed not to tarnish. It is fitted with lugs for attaching to the wall.

HONOR ROLL No. 2

This measures about 24 inches wide by 36 inches high. The Beaver and Maple Leaves are done in their natural colors. The outside edge of the shield, that is all space shown outside the line around the names, is finished in a bottle green, while the background on which the names are written is a solid black. The ribbon running across the design, on which appears the words "Roll of Honor," is done in Gold and lettering in black. The balance of the lettering is in 22 kt. Gold Leaf, guaranteed not to tarnish. It is fitted with lugs for attaching to wall.

HCNOR ROLL No. 3

This measures about 24 inches wide by 36 inches high. The Flags and Coat of Arms shown at the top of the shield, as well as the Beaver and Maple Leaves shown at the bottom, are in natural colors. The background on which the names are written is in dull satin finish Royal Blue, while the rest of the shield is finished in a gloss finish of the same color. The combination is indeed beautiful.

Prices and Designs on application

Honor Rolls may be Supplied in Solid Oak—Any Finish—if Desired

MEMORIAL FLAGS

During, and since the conclusion of the war, our flag department has done a large trade with many of our leading colleges, churches, factories and societies in specially designed memorial flags.

Furnish us with particulars as to number of enlistments, number of those who made the supreme sacrifice, emblem or crest to be incorporated into the design and we will submit design with special quotation on what is required.

NOTICE BOARDS

We make a specialty of Church Notice Boards. These we usually letter in Gold on galvanized steel. The one produced here is mounted on a solid oak frame. We would be pleased to quote prices on anything along this line that may be required, and invite correspondence.

HORSE BLANKETS

We manufacture many different lines of Horse Blankets from
Canvas, Jute, Kersey and Woollen Cloths

We make a specialty of Blankets suitable for Lumbermen's and Contractors' use. Our range consists of over 100 different kinds, so that we can supply blankets from the very lowest qualities to the very highest grades. Heretofore we have catalogued by numbers the different styles of Blankets we manufacture, but owing to adding new lines from time to time, and the very extensive range which we manufacture, it is almost an impossibility to list these in a satisfactory way. If, therefore, you should be open for supplies of this nature, we will be pleased to quote prices and submit samples if necessary.

ROBES

We desire to draw our customers' attention to our line of imitation Buffalo Robes, which are equal to the best Robes on the market, and in some cases superior to other makes. Our robes are made in two colors, either Black or brown, curly woollen cloth, which is well woven into the back so that it will not pull out. This style of robe is preferable in many ways to a Skin Robe. They are more easily dried when wet, and are better wind breakers and warmer than the majority of Skin Robes on the market. They are made with a Rubber Interlining and lined with Black or Green Imitation Persian Lamb Cloth, which pre-

sents a nice appearance and looks warm and comfortable. Our robes are trimmed with two rows of Wool Pinking, and as stated above, are equal to, if not superior, to any lines on the market. We make these robes in two qualities, so as to suit all classes of customers, so that if you do not want to pay the price for an A1 article, we can give you a second grade at a cheaper price. Both grades, however, are made in the same manner, the difference being in the weight of the outside cover and the linings.

“PRESERVO”

For Waterproofing Tents, Tarpaulins, Horse Covers and Horse Blankets

“PRESERVO” is not a mere coating whose value is gone after a little wear, but is a compound which completely saturates every fibre of the fabric. Its preservative gums penetrate and seal up the fibres and thus prevent decay until the canvas is completely worn out. And the wearing out process is a long one where “PRESERVO” is used.

It is made in any color desired

“PRESERVO” may be obtained in almost any color desired, but long experience has shown that for farm use the Buff Neutral or the Brown are most satisfactory and they are the colors we recommend.

When applied according to the directions given on next page, “PRESERVO” will cover 90 to 100 square feet on all such canvas as would be used around the farm.

Tents treated with “Preservo”
are absolutely rain-proof

**“Beating the Rain to it—“Preservo” Laughs at the Elements
“Preservo” is easy to apply**

In addition to these advantages, “PRESERVO” is easy to apply in hot weather or cold. Ice will not adhere to it. A cover treated with “PRESERVO” resists fire to an amazing degree. “PRESERVO” is safe to use at all times, prevents spontaneous combustion and the action of acids, alkalies and salts.

For the elevator canvas on Binders

Illustration shows torn piece of canvas. If “Preservo” is used it is impossible for moisture to soak through the exposed cotton fibre because “Preservo” protects every yarn

Platform (or table) and elevator canvases on binders should be treated as shown herewith:

These canvases should be used for a few days before treating, so that all ordinary shrinkage will have been completed. Then dry them well!

Remove top of can and stir “PRESERVO” thoroughly.

1 Gallon covers 90 to 100 square feet.

J.J. TURNER & SONS, LIMITED

"PRESERVO"

Covers old or new if they're "Preserved," you needn't worry about your Stacks
—They'll be safe

OUR GUARANTEE

"PRESERVO," applied according to directions, and on canvas which has not been treated previously with anything but "PRESERVO," is guaranteed as follows:

It will completely waterproof any sound fabric of reasonably close weave, regardless of the fabric's weight.

It will absolutely prevent injury to the fabric from any form of decay or mildew.

It will keep the canvas soft and pliable under all circumstances, and at any time of year.

It will double the life of the canvas!

GENERAL DIRECTIONS FOR THE USE OF "PRESERVO"

Have the fabric bone dry!

For successful application "PRESERVO" MUST be thoroughly mixed.

Cut out the top of the can and thoroughly stir the contents before and during application.

In cold weather if "PRESERVO" is too thick or dries too slowly, it may be thinned with a little Turmoline or Naptha.

"PRESERVO" should be applied to canvas as follows: painting with ordinary paint brush or with a four-knot roofer's brush.

For very small pieces the ordinary painting method is most economical but where a number of large pieces are to be treated such as stack covers, etc., the following method is advisable.

Place three or four of the articles on top of each other and with an ordinary galvanized sprinkling pot with mouth of spout pierced at the end, sprinkle top of canvas with "PRESERVO," smoothly and evenly.

PRICE, \$2.70 PER GALLON

While this is being done by one man, have another man follow close behind with a long-handled, four-knot roofer's brush.

Let this brush be dry, and be used simply to rub the "PRESERVO" thoroughly into the canvas. When the top piece is completed, remove the same and hang up to dry. Perform the same operation on every piece until the lot is completed.

If properly done you will find this makes an excellent job in effect and in appearance, and practically eliminates waste, for the surplus from the top canvas goes right through into the piece below.
