Distance from floor to top edge of shelf from A to B.ft.....in.

Distance from front edge of shelf to center of counter, from C to D.....ft.....in

Distance from floor to ceiling.....ft.....in.

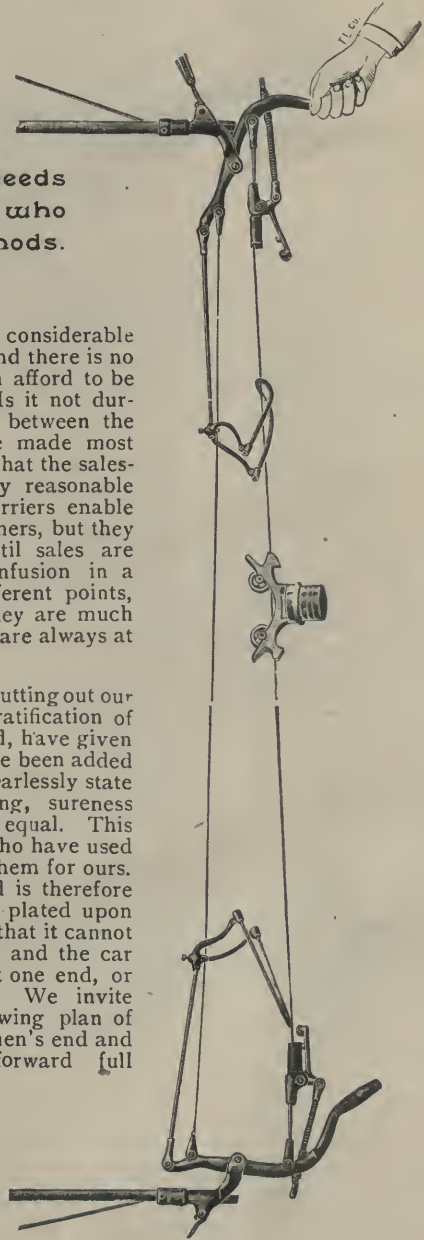

The "PARAGON" CASH CARRIER

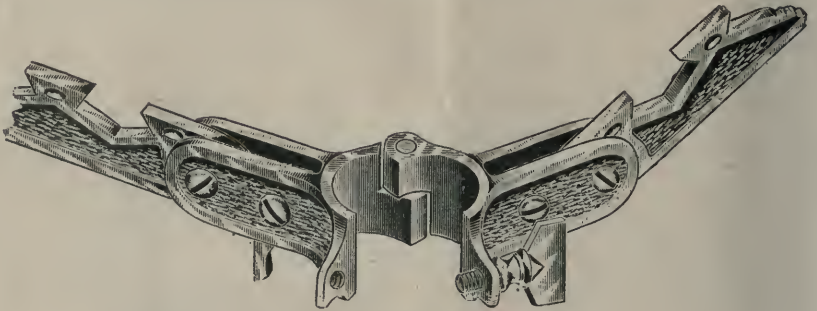

The merchant who succeeds
now-a-days is the one who
pursues up-to-date methods.

There are few merchants doing any considerable business who do not employ a cashier, and there is no merchant who employs a cashier who can afford to be without good and efficient Cash Carriers. Is it not during the busiest periods that communication between the salesmen and the cash office have to be made most frequently? Is it not during these periods that the salesman's time is most valuable? Surely any reasonable person will admit this. Not only do the Carriers enable the salesmen to more rapidly serve customers, but they permit them to remain with customers until sales are perfected. They avoid crowding and confusion in a store; may be used simultaneously from different points, and save miles of steps on a busy day. They are much cheaper and quicker than cash boys, and are always at hand to do their work.

It is about eight years since we began putting out our Paragon Carrier, and we now have the gratification of knowing that our machines, wherever used, have given excellent service. Some improvements have been added as time and use have suggested, and we fearlessly state that, for durability, smoothness of working, sureness and general efficiency, our Carrier has no equal. This statement can be substantiated by those who have used other Carriers and have finally abandoned them for ours. Our machine is compact, has few parts, and is therefore simple in construction. It is fully nickel plated upon solid brass, and handsomely polished, so that it cannot rust or discolor. The Carrier is reversible, and the car may be sent and returned by the operator at one end, or both, as will be understood from cut. We invite inspection. Send us a pencil sketch showing plan of your store with stations located at salesmen's end and position of cash office, and we will forward full particulars.

Time and money are wasted by
salesmen running to and from
the cash office. Our Carrier
will do it more rapidly and
with greater accuracy while
customers are being served.

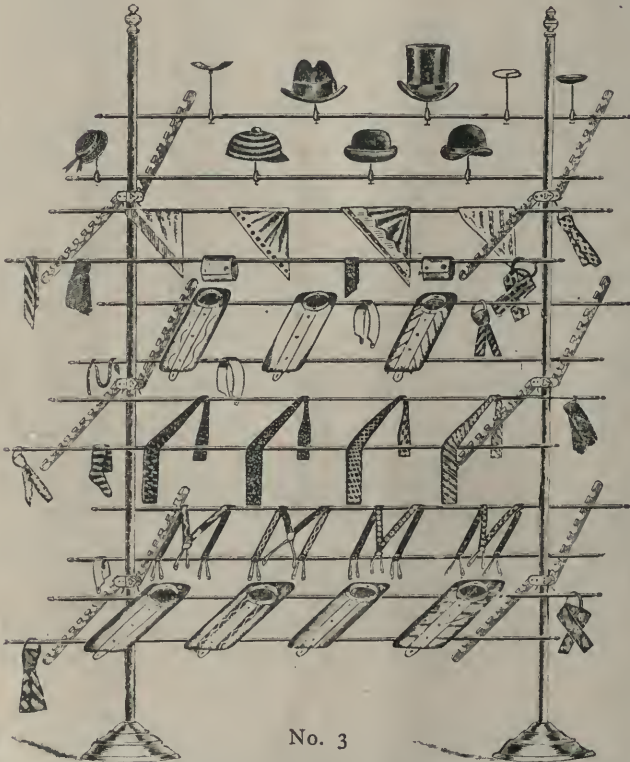

New Hinge Arm Coupling

Strongest, neatest and best bracket made.

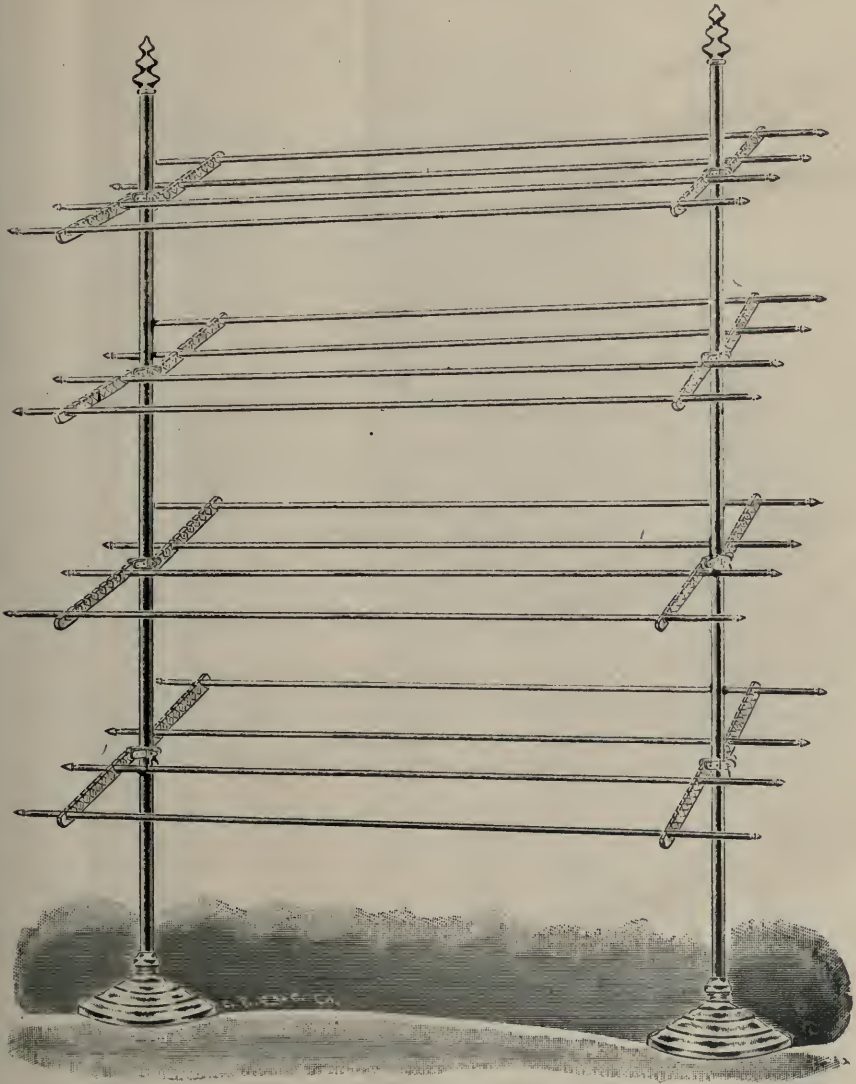

No trouble to adjust, simply raise by the finger to any point desired, no sett screws.

The above shows an enlarged view of our Hinged Arm Coupling, by the use of which the arms can be taken off or put on the standard without sliding over the end, used on all our fixtures.
