FIRE ALARM TELEGRAPH

DIRECTIONS TO GIVE AN ALARM.

Upon what may appear as correct information of a fire near your signal box, break the glass, unlock the signal box door and pull the brass hook, on the inside door all the way down (once only) and let it go. If you are within hearing distance of the fire alarm bells or gongs, and do not hear the alarm sound in less than fifteen seconds, go to the next nearest box to the fire and do as before directed. The hook should not be pulled while the alarm is being sounded from some other box, nor before the expiration of at least thirty seconds after the alarm has ceased. No alarm should be given for a chinmey only on fire, and no box should be pulled more than once for the same fire, except by an officer of the Fire Department

Never open the box or touch the hook except in case of fire.

To give an alarm from a box with a Keyless door, turn the handle to the right, open the door and pull the hook down (once only) and let it go.

Never give an alarm except from the box nearest the fire, unless you have first ascertained that the box nearest the fire will not work

Do not try to take the Key out of the door as it is "locked in" and cannot be taken out without a relief key.
