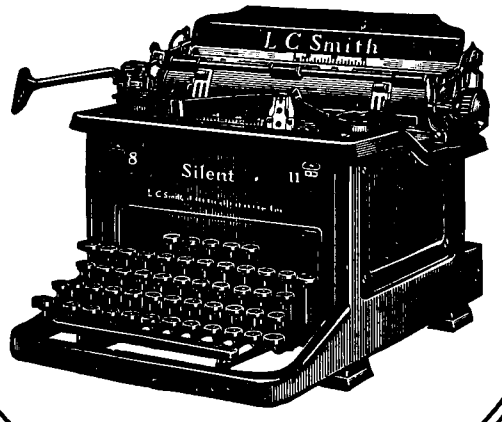
SILENCE *without* SACRIFICE



THE *Silent* L C Smith

The designers of the SILENT L C Smith did *not* trade efficiency for silence. All of the famous Smith features have been retained—easy, natural action; ball-bearing typebars; interchangeable platen; type-segment shift for writing capitals; half spacing. The SILENT SMITH does everything a typewriter is supposed to do—SILENTLY.

You will want to see this marvel of typewriter construction. Phone for free demonstration and allowance on old machine of any make.

RADIO

The New Miracle Models Come
Equipped with the New
Type Fully Guaranteed

Rogers Multi-Purpose
Metal *Spray* Tubes

Now, for the FIRST time, you can vary the selectivity or sensitivity of the radio to suit any condition or locality. Static or other noises are automatically reduced to a minimum without loss of tone. Bass or treble frequencies can be accented or modified as desired, according to type of programme. The De Luxe Model starts itself and stops itself at any fixed fraction of an hour. The dial signals you when stations are accurately tuned. The new-type speakers and baffling result in a richness, purity and depth of tone never before equalled—and the tone is automatically controlled to insure absolute fidelity at either soft or loud volume! All the radio progress of the past five years combined cannot approach in effect the advancements introduced into these new 1935 **Rogers Models.** To see—to hear—to compare—is to convince that here is the radio of the future—ready today.

We specialize in Secretarial and Accountancy Courses—Pitman or Gregg Shorthand.

Pitman's Phonetic Journal, New York, says: "Mr. L. A. Claffey is one of the most eminent authorities in America today on the theory and practice of shorthand." This furnishes the reason why our graduates are not guessers: Their superior training is recognized wherever they go, and they always command the highest salaries.

We enjoy the confidence of the business public, and consequently experience little difficulty in placing our students in suitable positions when qualified.

Westinghouse

Dual-Automatic REFRIGERATOR

AN OPEN LETTER

TO REFRIGERATOR BUYERS:—

Do you know the right questions to ask when you are buying an an electric refrigerator?

We ask this question because we know that the great majority of refrigerators are sold to people who are buying for the first time and do not know what factors to consider before putting down their money.

To assist you in making your decision we suggest that you make sure of the following points before you invest in an electric refrigerator:

1. Is the refrigerator manufactured by a firm with a background of experience in the electrical industry?
2. Is the manufacturer well established, or is he likely to disappear leaving you with an "orphan" product to service?
3. Is it an assembled job or entirely manufactured by one firm?
4. Is the mechanism automatically protected from abnormal power and operating conditions?
5. If trouble occurs will the mechanism automatically return to normal operation, or is it necessary to replace a fuse or reset by hand?
6. Is the mechanism hermetically sealed or does it depend on gaskets and stuffing boxes to maintain a gas-tight seal?
7. Is the mechanism of the refrigerator guaranteed for five years?
8. Is the cabinet of all steel construction or sheet metal on a wood frame?

These are just a few of the more important points. There are many others—some as important—some less important, but all worth investigating before you buy. We are in a position to recommend such an investigation on your part because we handle the Westinghouse Dual-Automatic Refrigerator and it is a pleasure for us to answer any questions or supply any information regarding this product. Whether you are considering the purchase of a refrigerator or not, we extend an invitation to you to come into our showrooms for a demonstration.

Yours very truly,

A REAL GUARANTEE

So confident is Westinghouse of the never-failing dependability of the Dual-Automatic refrigerator that every standard model carries a FIVE-YEAR Guarantee on the sealed-in mechanism. This is the pledge of a manufacturer who is sure of his product.
