Royal Mail Steamships.

Sailing between **Quebec and Liverpool** in Summer, and **Portland, Me., Halifax and Liverpool** in Winter.

These Steamers are all of the highest class, full powered, and Clyde built in water tight compartments, and are commanded by men of large experience and thoroughly acquainted with the route.

The salons, state rooms, music room, smoking room, and bath rooms, are amidships, where but little motion is felt, and are handsomely and luxuriously furnished.

The route via the St. Lawrence is the most pleasant and comfortable for intending travellers, three days of it being spent in the comparatively smooth waters of the River and Gulf, with their magnificent scenery.

Rates of passage from Quebec or Portland: Cabin, \$50.00 to \$80.00, according to steamer and accommodation; second cabin, \$30.00. Steerage at lowest rates.

PERMANENT EXHIBITION OF MANUFACTURES.

63, 65, 67, 69 FRONT ST. WEST,

OPPOSITE QUEEN'S HOTEL.

Some of the advantages likely to accrue to manufacturers exhibiting may be briefly summed up as follows:—

1. The Exhibition will be free to all, and open throughout the year.
2. It will afford all the advantages of a Toronto branch establishment at a very moderate cost.
3. Exhibits will be seen by large numbers of business men who would not be apt to visit a private branch office, unless on special business.
4. The Exhibition will be extensively advertised and made very attractive, and as almost every variety of machinery and manufactured goods will be on view, under the same roof, it will certainly become an important mercantile exchange.
5. Competent salesmen will be in charge for the purpose of explaining the merits of each exhibit to interested visitors.
6. Exhibitors can either appoint us selling agents, or have their own representatives in charge. In the former case, every endeavor will be made to establish a profitable trade.
7. Exhibitors can have printed on their office stationery, "When in Toronto call and see samples of our goods at Permanent Exhibition of Manufactures." This may afford prospective purchasers an opportunity of personally inspecting goods, who might not otherwise visit outside towns for that purpose.
8. Machinery can be shown in motion, as shafting and power will be provided.
9. Office and lavatory accommodation, and sanitary conveniences, will be provided for the convenience of exhibitors and their agents.
10. Telegraph Office, News Depot, etc., etc., will be in the building.

Maguire's Patent Flushing and Self-Cleansing Trap.

The above cut represents an outside and inside view of Maguire's Patent Anti-Zymotic Trap, which has the great advantage over other traps of having the inlet higher than the outlet, and the outlet arranged so as to be at the level of sewer diameter of the sewer pipe, thereby providing for thorough flushing, and preventing any back-wash from the sewer entering the trap. The hand hole over the outlet will allow the drain to sewer to be readily cleaned out, and is intended to provide for direct over-head sewer ventilation.

The above traps can be seen in use at numerous places throughout the city on application to the above named.

Universities), is managed by a board of Trustees
appointed jointly by the county and town coun-
cils. In cities the trustees are all appointed by
the city council, except where there is only one
school in the county. The head master must be
a graduate of a British or Colonial University,
and obtain a certificate of fitness from the Edu-
cation Department. Besides fees, local rates or
contributions to the extent of the Government
grant must be raised.

An extra grant is provided for masters taking
