

COMPLIMENTS OF

WARDEN KING & SON

TORONTO

MONTREAL,

WINNIPEG.

Over one hundred and fifty patents for Hot Water Boilers were taken out since the "DAISY" was put on the Market and every patentee thinks that his boiler will cause a revolution in heating; but when tested against the "DAISY" they sink to insignificance. Some have maintained a sickly existence for a few years and the remainder have been found unworkable.

The out-put of "DAISY'S" has increased every year, and 1893 is the banner season.
