Dear Sir.

We ask your attention to the opclased documents, which should be sufficient to give you confidence in the superior and reliable character of our undertaking, and we also enclose as references the many of our, Subscribers. We have scarcely missed receiving the support of any one of position or means in the country; and although many had already subscribed to a work of inferior promise (which has never yet come out), the character of our publication is so highly wouched for, and its Maps are so superior and so much more numerous, and its size so much greater, that they have given us their support without hexitation. On our Topographical Maps the characters of every Town in the Dominion (whether a small Town, or with a Telegraph or Money Order Office, or Bank) is shown, and the DISTANCES MARKED TO NEAREST RAILWAY STATION, AND ALSO BETWEEN EVERY TOWN AND TOWN—a thing herefore unattempted in Map-making, and only to be obtained through our use of the Government Post Office Department Surveys.

It is the first Allas of the ENTIRE Dominion of Canada, on a uniform scale, ever published; and by the system we have adopted of publishing the Geological Maps and all others referring to special subjects in separate series from the Geographical, we are enabled to represent upon the latter, roads, rivers, towns and all such matter, with unusual clearness.

The scale adopted is many times larger than is usual, thereby extending into SEVERAL pages the delineation of a Pravince which, in an ordinary Allas, would occupy less than one. Of the 200 pages, three-fourths will be occupied by the Maps, and the accompanying letterpress and statistics will be corrected by the most eminent local authorities of the several Provinces.

Our Geological Maps are expensive and complete, and on the original scale of the Government Surveys; in fact, from the original plates. The "Timber Land Maps" fill a vount long felt by those interested in lands. The "Map of Manitoba" is the most correct and recent one in existence; and in every respect, the promises of our Prospectus will not only be fulfilled, but exceeded.

As a work for reference it should be in every library and school, and on the desk of every Merchant who desires to see a craditable Atlas of Canada given to the public. It is almost impossible to give you an idea of its scope and excellencia in a circular; but we trust to the array of names shown to you, to wouch for the UNIVERSAL opinion in favour of its value. In expense of construction, variety of Maps, and artistic engraving and colouring, nothing equal to it has ever been altempted on this Continent, and we confidently ask for your subscription.

Respectfully yours,

WALKER & MILES.
