(Described on back)

VULCAN No. A-968 S-E

Semi-Enamel Box Cabinet Range

A BEAUTIFULLY designed and finished gas range. The white enamel finish is sanitary and easy to clean. The black and white contrast and the sparkling nickel will add to the appearance of any kitchen.

But beauty is only one of many superior features. It has a spacious cooking top, 36" high, "the Comfort Height," fitted with four top burners (three regular, one giant) and a simmering burner. A handy storage shelf is provided beneath the burners for pots and utensils.

The oven is large. It is fitted with patented baffles that insure even heat distribution and better baking.

The large and efficient broiler is equipped with a deep enamel broiler pan. The oven and broiler linings and bottoms are finished with baked aluminum.

The **VULCAN** Semi-Enamel Box Cabinet Gas Range will meet every requirement of the particular housewife who wants beauty and superior cooking qualities combined.

The illustration shows a "left oven." Can be supplied with a "right oven" if preferred.
