FOREWORD

The continued demand for a former Cook Book, published some years ago and now out of print, was incentive to the Wimodausis Club to compile the present volume, containing the recipes used before, and many new ones. The furtherance of the Club's social service work is made possible by the co-operation of many friends, and warmest thanks are extended to those who have contributed to the success of this book.

Joy Logs and Pepper Plants

Dear Homemaker: Some one wrote a few days ago about how much the page meant to her and I felt right away that it applied to me exactly, and here I am not doing anything to keep it going. If every one was like me there would not be a page at all. I always have it with my afterdinner rest and the rest would certainly not be complete without it.

The letters lately have been splendid and so interesting.

I have made joy logs quite a few times and they are very easily made and are really worth while as they look so pretty burning in the fireplace. As to size I roll up the paper folded as it comes and make a roll about four or five inches thick and twelve or fourteen long. I use a six-gallon crock to soak them in, stand them on end and turn them two or three times, A good place t. dry them is on top o' the furnace, or behind the kitchen stove if you burn wood or coal. A dozen would take about three pounds of coarse salt and four pounds of bluestone in about three gallons of water.

The neighbor who has the little pepper tree can grow her own by planting the seeds when they are ripe. I'm not sure but I think she can save the plant by letting it rest in the cellar when the leaves begin to fall, and then plant it outside in the spring.

Some time ago some one wrote and signed her letter Qu Appelle Valley, and I am wondering what relation she is to me as I am

Qu Appelle.

Thank you, Qu Appelle, and I think we should quote what Zax wrote us about the

Joy Logs: They were very successful—are lovely, in fact, but I ruined a perfectly good galvanized iron tub in which I soaked them, and made a quite interesting pattern on the cement floor of the cellar. The point is that one should think twice before putting the rolls to dry on the top of the furnace, as one of your members suggested. Of course, I should have known better than use the said tub, but at least I did not do any other damage that mattered except the defunct tub.

SOUPS

"Of all appeals—although

I grant the power of pathos, and of gold,
Of beauty, flattery, threats, a shilling—no
Method's more sure at moments to take hold
Of the best feelings of mankind, which grow
More tender, as we every day behold,
Than that all-softening, overpowering knell,
The tocsin of the soul—the dinner bell."

-Byron.

SOUP STOCK

Miss G. A. Gooderham.

Use beef or veal shank, or a combination of the two. Wash, place in kettle, cover with cold water and simmer until the meat is thoroughly tender and falling from the bones. Skim occasionally during the cooking. Vegetables and seasonings may be added while cooking, or, to gain variety, strain liquid off bones and season as required with vegetables, savory sauces, etc. When the soup has cooled and jellied, the fat may be skimmed from the top and the upper portion of stock seasoned and served as consommé, while the lower portion, containing some sediment, may be used for vegetable soups, purées, etc.

SOUP FROM LEFT-OVERS

Mrs. H. M. Purser.

Never throw away bones, sauces or left-overs from cooked meat or vegetables. These covered with cold water amd simmered for hours will make excellent soup. Bacon rind adds to the flavor of almost any stock soup or purée and helps to produce a jelly.

BOUILLON

Let simmer 2 hours, then add vegetables and spices and simmer 3 hours longer. Strain into an earthen bowl and cool without covering. This stock will not jelly. When ready to use remove grease, season if necessary with salt and pepper and put into saucepan with 34 of a pound of minced lean meat and the white of an egg. Stir until it boils. Boil 5 minutes. Then fill the fowl with the minced chicken, stuffing the legs well and it will be just in shape as before the bones were removed. Now sew up where it has been cut and place in the pot in remainder of liquor to boil for one hour or longer if necessary. Next put sliced hard boiled eggs and parsley in bottom of oval dish about the size of chicken. Put chicken in and pour over it the jellied gelatine, which has been mixed with soup in which the chicken has been boiled. It must cover the chicken. The shells for salad puffs may be bought or may be made from bouchée recipe in pastry section. For filling, no salad is nicer than one made from chicken, cut with scissors, and tiny cubes of crisp celery. Capers or chopped olives add a piquant flavor. Use plenty of your favorite salad dressing, but mix it with the other ingredients at the last minute and with a light touch, for if you "mush" it the delicate crispness which distinguishes a good salad is lost.

Boil a few minutes, then mash gently with a potato masher and add 5 cups of sugar. Boil one minute after it comes to a boil, then bottle.

STEWED RHUBARB

Mrs. S. Cleaver.

Do not let your grocer sell you rhubarb that is not rosy and pretty. Cook a small quantity at a time, for it loses its flavor in standing. For one bunch of rhubarb, washed and cut into pieces of moderate size make a syrup of a cup of white sugar and half a cup of water. These quantities will necessarily vary according to your own taste and the sourness of the rhubarb. A little variety may be achieved by the addition of grated nutmeg or orange peel at this stage. Prepare the syrup in a broad bottomed kettle and when it comes to a boil drop the rhubarb in and watch it carefully, for about ten minutes, when it will be soft enough to remove from the fire. Cool in the same vessel to avoid breaking the pieces.

CANDIES

These candies, "they rob the Hybla bees, And leave them honeyless."

-SHAKESPEARE.

FONDANT

Miss Muriel Larkin.

3 cups granulated sugar 1 cup water 1/4 teaspoon cream of tartar

Stir the sugar, water and cream of tartar together and set over very slight heat until melted. Then place over full heat, and stir occasionally until it commences to boil. With a wet cloth wipe down the sides of saucepan repeatedly. Boil to 238 degrees F. or the soft ball degree. Remove from the fire and without jarring the syrup, pour on to a platter that has been rinsed with cold water. Do not scrape the saucepan or allow the last of the syrup to drip from it. When almost cold, stir with a wooden spatula until it turns white and creams. Scrape all the cream from the platter and put in a covered bowl, and allow to stand 24 hours to ripen. The fondant will then be ready for moulding, but is in better condition after several days, providing a dampened cloth is kept over the bowl, but which must not touch the fondant. In this manner it can be kept almost indefinitely, simply dampening the cloth every five or six days.

HOW TO DIP CANDIES

Mrs. George Dalton, Springfield, Mass.

The necessary utensils are wire dipping forks and small double boiler. Cut the chocolate into very small pieces and place in upper part of boiler, set in warm water, and stir occasionally while melting. It is most important not to let a drop of water into the chocolate. When the melted chocolate has cooled to about 90 degrees F. it is ready for use and should be kept at that temperature. Drop whatever is to be coated into the chocolate and with the fork push under, lift out and draw across the edge of pan, then drop on waxed paper.

PEPPERMINT FLATS

Mrs. George Dalton, Springfield, Mass.

Take desired quantity of fondant, flavor with peppermint, and if desired, color slightly with cochineal. Place in double boiler and allow to melt. Drop with teaspoon on waxed paper. These may be coated with sweet chocolate.

BITTER SWEETS

Miss Muriel Larkin.

Take the desired quantity of fondant, flavor with vanilla, and mix with chopped walnuts. Mould and drop on wax paper. Allow to stand over night and then dip in unsweetened chocolate.

CHOCOLATE FRUITS, NUTS AND MARSHMALLOWS

Use candied cherries and pineapple, blanched almonds, half walnuts, dates stuffed with walnuts, marshmallows that have been wiped free from powder. Cherries may be dipped two together, the pineapple cut in triangular pieces. Dip these in sweet chocolate.

CHERRY CREAMS

Flavor fondant with vanilla, roll a candied cherry in a small piece of fondant, drop on waxed paper and the following day, dip in sweet chocolate.

FRUIT LOAF

Take about $1\frac{1}{2}$ cups of fondant, flavor very slightly with vanilla then work in chopped walnuts, candied cherries, almonds and pineapple. Knead until about $\frac{3}{4}$ of an inch in thickness, and when set, cut into squares.

CHOCOLATE CARAMELS

2½ cups granulated sugar	$2\frac{1}{2}$ cups whole milk
½ cup butter	(not skimmed)
½ teaspoon cream of tartar	1 teaspoon vanilla
34 cup corn syrup	½ cup of unsweetened chocolate
, 1 1 0 1	broken in small pieces

Put the sugar, butter, cream of tartar, 1 cup of milk and corn syrup over the fire. Stir constantly. Allow to boil a few minutes. Then very gradually stir in the remainder of the milk, being very careful that mixture does not stop boiling while the milk is being added. Have ready 2 shallow pans well buttered, and when the syrup has boiled to 248 degrees F. remove from the fire, add the chocolate and vanilla, stir well in, and then turn into the pans. The mixture will require stirring every few moments while cooking. It is most important that the candy cools very quickly, as otherwise it will turn sugary. When nearly cold cut into squares. These squares may be dipped in sweet chocolate, and a pleasing variety may be made by adding chopped nuts to the mixture when stirring in the chocolate. The caramel may be tested by dropping in cold water, and when it forms a hard ball, the syrup is sufficiently cooked.

CREAMED GRAPES OR CHERRIES Miss Muriel Larkin.

Flavor fondant with vanilla. Cut grapes from bunch, leaving small stem, wipe carefully, leave cherries on stem. Roll a small piece of fondant, flatten on the palm of the hand, place fruit in centre, stem out, and carefully roll the fondant around, place on wax paper, and when the cream has hardened, place in paper cases.

Stir occasionally with a fork. Keep in a tin box.

Mrs. Eden, Barbados, B. W. I.

Take rind of two grapefruit, soak in cold water for 12 hours, changing water twice. Put in fresh water and boil until tender enough to pierce with a straw, then squeeze out all water from the rind. Boil a syrup of 3 gills of water and $1\frac{1}{2}$ pounds of sugar (3 pounds sugar to a pint of water for large rinds), put in the rind and simmer until the syrup is all taken up and the rind is clear. Then boil a candy syrup of $\frac{1}{2}$ pint water to $\frac{1}{2}$ pounds sugar and pour it hot on the rind. Cover closely and leave for a week or ten days, when it ought to be candied, then dry in the sun and it is ready for use. The rind should be cut in strips of desired size before soaking.

GLACÉ FRUITS AND NUTS

Mrs. Robt. Hume.

Boil 3 cups granulated sugar, I cup water, ½ teaspoon of cream of tartar to the hard crack stage of 310 degrees F., or testing in cold water when it becomes brittle and will snap and break. When the syrup is cooked it will be a light straw color. The saucepan containing the syrup must first be plunged into a basin of cold water, to stop the boiling instantly, and then set in a pan of boiling water to keep the syrup from hardening, which it will do very quickly. It is necessary to have an assistant in making glacé, and the work must be done very quickly. Have your assistant drop the fruits or nuts one at a time into the syrup, and with two forks which have been previously heated, lift out immediately and drop on buttered platters.

Cream Puffs

Dear Homemaker: In the Homemaker page of March 21, No. 941, I read of Kwen Kanazawa's cream puff troubles. I had intended writing her immediately, but, having not been able to get at it, I hasten to do so this evening, and I do hope I'm not too late to help her. I myself enjoy the Homemaker page and have derived much valuable information and help therefrom, and I do so much want to help her, for I had given up baking cream puffs, until just a few weeks ago after we had a demonstration at our institute meeting. Since then I've baked them twice, and, oh what lovely cream puffs. If Kween Kanazawa has given up in despair I would urge her to please try just once more.

Here's the recipe:
Boil ½ cup butter with 1 cup hot
water. Add 1 cup flour, and a pinch
of salt while boiling. (Dump it in all
at once, not by bits.) Stir till smooth,
remove from fire, beat in vigorously, 3
eggs, 1 at a time, until mixture is
smooth Drop a dessertspoonful on a
pan and bake in oven at 375 degrees.
You will notice that this recipe does
not call for setting the mixture in a
cool place before adding the egg. I
don't know whether that's what does
the trick or not, but I know they
'puff.'' Now, won't you please try
once more Kween Kanazawa and
please let me hear whether your
cream puffs puffed? Wishing you
luck.

THE MENU MAKER

"Always have lobster sauce with salmon, And put mint sauce your roasted lamb on. Veal cutlets dip in egg and bread crumbs; Fry till you see a brownish red come. Grate Gruyere cheese on macaroni, Make the top crisp but not too bony. In dressing salad mind this law, With two hard yolks use one that's raw. Roast veal with rich stock gravy serve, And pickled mushrooms, too, observe Roast pork, sans apple sauce, past doubt, Is "Hamlet" with the "Prince" left out. Your mutton chops with paper cover, And make them amber brown all over. Broil lightly your beefsteak—to fry it Argues contempt of Christian diet. To roast spring chickens is to spoil them. Just split them down the back and broil them. It gives true epicures the vapors To see boiled mutton without capers. Boiled turkey gourmands know, of course, Is exquisite with celery sauce. The cook deserves a hearty cuffing Who serves roast fowls with tasteless stuffing."

HELPFUL HINTS FOR THE HOME

When putting new peas on to boil add a small pinch of baking soda. This helps to keep them a nice green color.

A pinch of cream of tartar added to the boiling syrup for icing keeps it from getting sugary.

For thickening the gravy of chicken stew, or clear soup, try sago. It takes about 20 minutes to cook.

Put a piece of stale bread in cabbage when boiling. This will lessen the disagreeable odour which comes from the cabbage.

Make sauce for asparagus with same water with which it has been cooked.

Put a little alum in pickles when making. This will make the pickles crisp.

All old vegetables cook in cold water. All new vegetables cook in boiling water.

All vegetables grown underground salt after they are cooked. All vegetables grown above ground, salt before they are cooked.

Cranberries and snow apples combine well for jelly.

To make tender, put a little soda in vegetables.

In making jelly, boil juice 20 minutes, heat sugar in oven. Then stir into boiling juice. Boil all together five minutes.

In taking out iron rust, sprinkle lemon juice and salt over spots of rust, then hold over steam. Try spout of kettle for quick service.

Try putting a little alum in jelly which refuses to jell.

When in a hurry use a cup or bottle for rolling crackers into crumbs.

A good housekeeper suggests rolling pie crust or dough out on a clean sheet of brown or white paper. Then when baking is finished all can be gathered up and burnt. This saves a lot of cleaning.

When stewing meats put a perforated pie plate at bottom of pot to keep meat from sticking. These plates may be bought, but any tin plate can be used by simply punching holes in it.

Getting Full Nutrition out of FOOD

WCH, of course, depends upon the Cooking. But much also depends upon the Keeping. To get full nourishment out of meat, milk and butter, they must be fresh.

The butcher, grocer and milkman keep them on ice. The food is delivered to the housewife cold. If she puts it in an ice-box, well and good. If not the food will spoil on her hands unless the temperature is 50 degrees or below.

In a few hours the appetizing flavor is gone, and the longer perishable food is exposed to a higher temperature the more nourishment it loses.

The housewife who wants to feed the family right, keep them well nourished, cannot afford to be without ice at any season of the year. At all times it is imperative to keep the refrigerator well iced. Ice should be taken regularly.

"Unbreakable China"

might easily be another name for SMP Diamond or Pearl Kitchen Utensils. They are so dainty—and so easy to keep clean and shining—like china. SMP utensils are absolutely sanitary.

They are lined with porcelain, and porcelain does not tarnish, rust, corrode or stain. Neither does it taint nor flavor food which comes in contact with it.

SMP Diamond WARE

is really economical. It is very moderate in price and gives many years of satisfactory service.

Diamond Ware is blue and white outside, and all-white inside—with three coats of enamel.

Pearl Ware is a beautiful pearly grey mottle, with two coats of enamel.

Just try one piece of this dainty china-like kitchen ware. You'll be delighted with it.

You'll know it by the trade mark—SMP in the pointed shield.

It provides the cleanest form of cooking, too, no soot or smoke to blacken pans or mar kitchen walls, and little or no scouring is required.
