OLDRIDGE'S BALM OF COLUMBIA,

An Important Chemical Discovery, made by JOHN OLDRIDGE, by the Power of Chemistry.

The grand desideratum of preventing the hair from falling off, and restoring hair on bald places.

By frequent use it will prevent baldness even to old age.

It rapidly made its way over the European Continent, from the plan adopted by Mr. OLDRIDGE of *gratuitously supplying the Balm to all applicants*. It soon obtained a reputation, the value of which is known and acknowledged in every civilized land.

In A.D. 1824, the Balm of Columbia was introduced into London by Messrs. OLDRIDGE and it has gained a name surpassing all others for its restorative properties, its rich perfumes, its unlimited patronage, and, above all, its being free from any injurious ingredients.

The further advantages of the Balm of Columbia may be summed up in its freeing the hair from scurf, producing a beautiful *gloss and curl*, preventing it from premature greyness, and its excellent adaptation to the nursery, which should never be without it.

Price 3s. 6d., 6s., and 11s., per Bottle.

Sold Wholesale and Retail by the Proprietors.
