WHY WE ADVERTISE A.L.&W. "BEAVER BRAND" TACKLE

This catalogue, and the extensive advertising done by us throughout the year covering the goods listed herein, are not designed to create direct buying relations between ourselves and the consumer.

Allcock, Laight and Westwood are manufacturers and distributors of the highest quality fishing tackle, guns, camp equipment and accessories.

Hundreds of dealers throughout the Dominion of Canada stock all our listed goods. We hope, by broadcasting this catalogue and advertising A. L. & W. and "Beaver Brand" tackle, to promote the interest of our dealers and to sell our goods.

See the Goods You Buy

Encourage your local dealer to carry the fullest and best line of sporting goods.

Ask your dealer to get for you the things you wish out of this catalogue.

If that is impossible, then write, wire or telephone us and if we can direct you to no dealers where you may inspect the goods we shall, of course, be delighted to serve you. Such orders must be accompanied by cash or money order. DO NOT SEND POSTAGE STAMPS FOR AMOUNTS EXCEEDING 50c.

It is obvious, however, that as manufacturers and distributors we are most desirous of having the whole of Canada served by as well-equipped a chain of local dealers as possible.

All Prices in this Catalogue are strictly net retail prices.

GENUINE CREEK CHUB BAITS

MANUFACTURED IN CANADA BY

THE ALLCOCK, LAIGHT & WESTWOOD Co., Limited.

The Jointed Pikie Minnow No. 326

Each, **$1.50**

This new Jointed Pikie has a beautiful wiggling movement, flexible and sinuous, which we believe makes it a still better fish getter than our Famous Pikie Minnow. It is a very easy caster, and we guarantee it to be a great killer. Length, 4¼ in. Weight, ¾ oz. In following finishes:

326-0 Natural Pike, Scale Finish.
326-1 Natural Perch, Scale Finish.
326-2 White with Red Head.
326-3 Silver Shiner, Scale Finish.
326-4 Golden Shiner, Scale Finish.
326-8 Rainbow.
326-18 Silver Flash.

The New Baby Jointed Pikie Minnow. No. 334

Each, **$1.50**

Weight, ⅛ oz. **Length of body, 2¾ in.**

This peppy little wiggler is about the size of the live bait generally used, and comes closer than any lure we know of to represent a live minnow in a hurry to get away. We have found it a deadly killer in rivers and lakes, especially in the new silver flash finish, which so closely imitates the Silver Shiner Minnow. Made in the following finishes:

334-0 Natural Pike, Scale Finish.
334-1 Natural Perch, Scale Finish.
334-2 White with Red Head.
334-4 Golden Shiner, Scale Finish.
334-8 Rainbow.
334-18 Silver Flash.

The Famous Pikie Minnow. No. 337

Each, **$1.25**

This New Nature Lure so closely imitates the pike minnow in shape, color and movement that the combativeness of the bass is aroused and they strike it to kill. There's nothing like it on the market, and its big wiggle, unique shape and color make it a great bass killer.

Gives best results when reeled slow, but does not revolve if reeled fast. It's a near-surface wiggler, or by turning up the screw-eye a few turns and reversing the mouthpiece you have a surface splatter.

Our usual guarantee on this bait is satisfaction in every respect, or money refunded. The Pikie minnow delivers the bass, and you cannot afford to be without it. Length of body, 4½ inches. Weight, ¾ oz. In following finishes:

337-0 Natural Pike, Scale Finish.
337-1 Natural Perch, Scale Finish.
337-2 White with Red Head.
337-3 Silver Shiner, Scale Finish.
337-4 Golden Shiner, Scale Finish.
337-8 Rainbow.
337-18 Silver Flash.

Genuine Luminous Pikie. No. 343

The PIKIE is now furnished in a real luminous silver flash finish and out-pikies the Pikie.

No. 343 ..... Each, **$1.50**

The Baby Pikie Minnow. No. 338

Each, **$1.25**

The Baby Pikie is made exactly like the famous Pikie Minnow, except it is smaller size, and is in answer to the demand for a smaller bait of this popular type of lure, which has been making the record catches of game fish in every part of the country. It has a wicked wiggle and all the good qualities of the larger lure. A light, strong killer. Length of body, 3¼ inches. Weight, ½ oz. In following finishes:

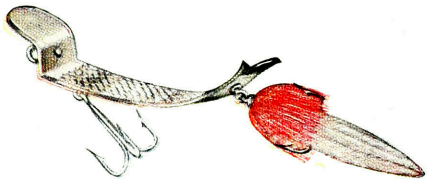

338-0 Natural Pike, Scale Finish.
338-1 Natural Perch, Scale Finish.
338-2 White with Red Head.
338-4 Golden Shiner, Scale Finish.
338-8 Rainbow.
338-18 Silver Flash.

THE ALLCOCK, LAIGHT & WESTWOOD Co., Limited.

The Wiggling Spoon
No. 340

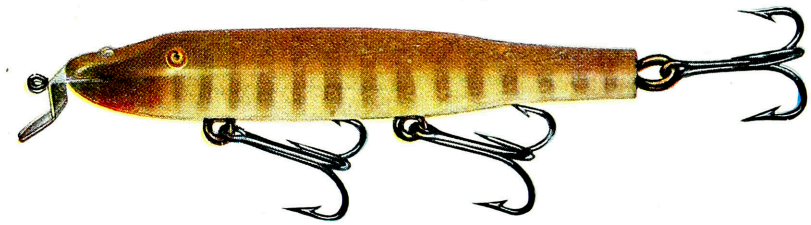

Each, **$1.25**

This spoon is made of heavy brass, with an exceptionally good nickel finish, is stamped with large scale finish which is the same on top and bottom. The big thing about this spoon is that, no matter how fast it is pulled through the water, it never revolves and twists the line. It has a very fast wiggling movement, the same movement from side to side that has given our wooden lures their reputation. The two treble hooks attached with swivels to the body insure hooking of the fish when the bait is struck. Is made with upward slanting plane at the head, so that by reeling fast the lure will come very close to the surface and, if reeled very fast, will come to the surface. Casts very easy. Bass like it and Pike and Pickerel eat it up. Wiggles a pork rind something awful. Length of body, 2¼ inches. Weight, ¾ oz.

S1 With Feather Treble.
S2 With Pork Rind Hook.

The Husky Pike Minnow
No. 336

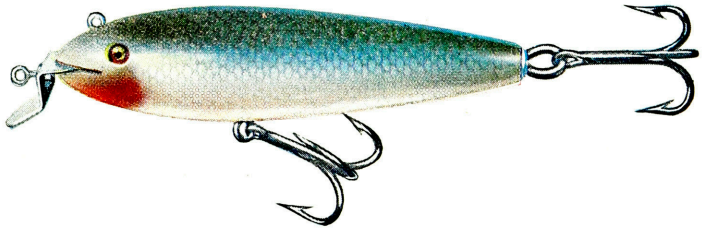

Each, **$1.75**

The champion of all big fish getters. A large, strong, graceful lure that has all the fish-fooling features of our Famous Pikie Minnow. The Huskie Pikie has already established an enviable reputation for taking BIG FISH. Equally effective when cast or trolled. Length of body, 6 inches. Weight, 1½ oz. In following finishes:

336-0 Natural Pike, Scale Finish.
336-1 Natural Perch, Scale Finish.
336-2 White with Red Head.
336-4 Golden Shiner, Scale Finish.
336-8 Rainbow.
336-18 Silver Flash.

No. 321 Same as above, but jointed....Each $2.00

The Husky Musky
No. 335

Each, **$1.75**

Th Husky Musky bait is for Musky fishing. Has large, strong hooks and exceptionally large screw eyes. Made large, and yet light enough to cast. When reeled slowly it kicks up an awful fuss on the surface. Has big wiggle below surface. Will catch more Muskies and large fish. Length of body, 5 inches. Weight, 1½ oz. In following finishes:

335-0 Natural Chub, Scale Finish.
335-1 Natural Perch, Scale Finish.
335-2 White with Red Head.
335-7 Natural Mullett (Illustrated).

The Baby Chub Wiggler
No. 331

Each, **$1.25**

The little brother of the Creek Chub Wiggler has all the features of the larger bait, except that it does not run quite so deep and has a faster wiggle. A wonderful bait for small mouth bass. Length of body, 2¾ inches. Weight, ½ oz. In the following finishes:

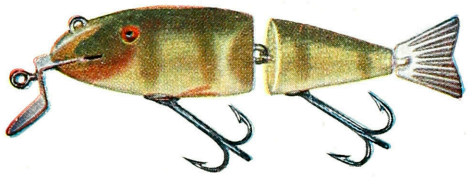

331-0 Natural Chub.
331-1 Natural Perch, Scale Finish.
331-2 White with Red Head.
331-3 Silver Shiner, Scale Finish.
331-4 Golden Shiner, Scale Finish.
331-7 Natural Mullet, Scale Finish.
331-8 Rainbow.
331-18 Silver Flash.

The New Wiggle Fish
No. 327

Each, **$1.50**

The Aristocrat of all Wigglers. All Creek Chub nature lures are noted for their wonderful movements, but in this new double-jointed lure with its wagging fluted, nickel tail and patented mouthpiece, there is a fast, flexible, swimming movement not found in any other lure. As its name indicates, the New Wiggle Fish looks like a fish, swims like a fish, floats, dives and wiggles its way along just below the surface—or deeper if pulled faster. A guaranteed getter of Bass, Pickerel, Pike and Muskies. Length of body, 3½ inches. Weight, ¾ oz. In the following finishes:

327-0 Natural Chub Red Side, Scale Finish.
327-1 Natural Perch, Scale Finish.
327-2 White with Red Head.
327-3 Silver Shiner, Scale Finish.
327-4 Golden Shiner, Scale Finish.
327-7 Natural Mullet, Scale Finish.
327-8 Rainbow.
327-18 Silver Flash.

The Creek Chub Wiggler
No. 330

Each, **$1.25**

The Creek Chub has always been considered the king of live baits. Fishermen go miles to get them. It is not natural to conclude that the Creek Chub Wiggler, so near in appearance and movement to the Creek Chub Minnow, will catch more fish day for day and place for place than just a plug? It has been proven that this is a fact, and we know you will come to the same conclusion after trying out the Creek Chub Wiggler. The removable, reversible wiggler in this bait supersedes the spinner. It's a Wiggler, Wobbler, Splatter. For surface, near surface and deep. Does not revolve. Length of body, 3½ inches. Weight, slightly under one ounce. In the following finishes:

330-0 Natural Chub, Scale Finish.
330-1 Natural Perch, Scale Finish.
330-2 White with Red Head.
330-3 Silver Shiner, Scale Finish.
330-4 Golden Shiner, Scale Finish.
330-7 Natural Mullet, Scale Finish.
330-8 Rainbow.
330-18 Silver Flash.

The Baby Wiggle Fish
No. 328

Each, **$1.50**

With the same flashy movement as its larger namesake, the Baby Wiggle Fish has but one treble hook—all that is necessary because of the size of the lure and the placing of the hook. If desired, it will be furnished with single or double hook when so ordered. And, like its Big Brother, it's a wiggling, wicked killer of all kinds of game fish. Length of body, 2½ inches. Weight, ½ oz. In the following finishes:

328-0 Natural Chub Red Side, Scale Finish.
328-1 Natural Perch, Scale Finish.
328-2 White with Red Head.
328-3 Silver Shiner, Scale Finish.
328-4 Golden Shiner, Scale Finish.
328-7 Natural Mullet, Scale Finish.
328-8 Rainbow.
328-18 Silver Flash.

The De Luxe Wagtail Chub
No. 333

Each, **$1.25**

A bait which apparently swims with its tail. Looks like a live minnow, swims like one and is a real fish getter. It's the last word in the making of artificial minnows; nothing like it on the market. Has a nickel-plated tail which swings back and forth as the bait travels through the water, and the flash of the nickel makes a more attractive lure. Body two and three-quarter inches long, weight one-half ounce. Guaranteed satisfactory in every respect. This is the bait for stream fishing, because it does not snag, has flashy tail and is right size. Convertible—surface, near surface or deep. Length of body, 2¾ inches. In following finishes:

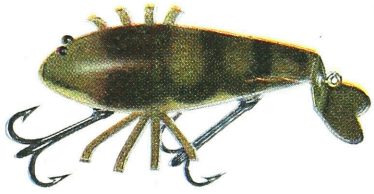

333-0 Natural Chub, Scale Finish.
333-1 Natural Perch, Scale Finish.
333-2 White with Red Head.
333-3 Silver Shiner, Scale Finish.
333-4 Golden Shiner, Scale Finish.
333-7 Natural Mullet, Scale Finish.
333-8 Rainbow.
333-18 Silver Flash.

The Crawdad—Natural Crawfish No. 317

Each, $1.25

Natural shaped body and tail, black bead eyes, rubber legs, bronze hooks, movement backwards, same as a crab. Wiggle mostly in tail. Floats until started. Only bait without nickel plate. Tail guards hooks from snags and bottom. Casts like a bullet. Length of body, 2¾ inches. Weight, ¾ oz. Illustration is Natural Crab. Made in the following Finishes:

Natural Crab
Albino White and Red
Tan
River Peeler

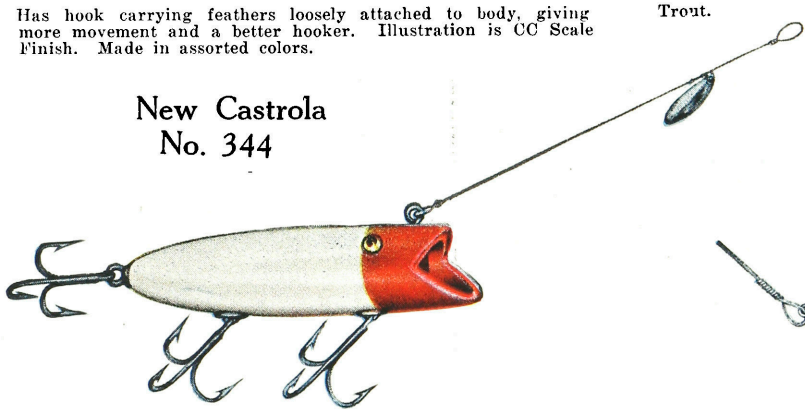

Fly Rod Flexible Floating Feather Minnow. No. 345

Each, 90¢.

Has hook carrying feathers loosely attached to body, giving more movement and a better hooker. Illustration is CC Scale Finish. Made in assorted colors.

New Castrola No. 344

No. 344 ..... **Each, $1.25**

There is a whale of a thrill coming to the fishermen casting this new lure up alongside of lily pads, reeds or weeds! It accurately represents a live minnow chasing a fly—hither and thither—up and down— and sideways—with the most erratic, puzzling, teasing motion you ever saw! Reel it fast—then slow—then a little jerk—and the antics this baby cuts up will tease the wariest old he bass into an excited rush and vicious strike! There's nothing else like it! A guaranteed fish getter! Supplied in the following finishes:

344-0 Natural Chub Scale
344-1 Natural Perch Scale
344-2 White Red Head
344-4 Golden Shiner Scale

Midget Pikie No. 339

Each, $1.00

This little rascal wiggles like the dickens and is especially for the caster who use ilght tackle and for stream fishing. Floats when cast and is made strong enough to hold big fish. Length 2¾ inches. Weight, ¼ oz. Supplied in following finishes.

Natural Pike Scale Finish
Natural Perch Scale Finish
White with Red Head

Fly Rod Pikie No. 346

Each, 80¢.

Our famous Pikie Minnow has the reputation of getting the most fish and these little darting, wobbling Pikies carry on. Hooks reversible. Natural Pike Finish. Length, 1¼ inches for Trout.

Weedless Frog No. 319

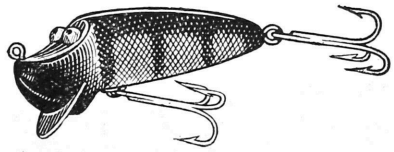

Each, $1.25

Takes the place of a live frog and, being absolutely weedless, can be cast into the weeds and lilypads with safety and effectiveness. Front planes cause an aggravating ripple when drawn through the water. Hooks are in best position for receiving strikes. Has small hook for attaching pork rind. Just the bait for bad places and dark nights. Length of body 2", weight ¾ oz. Made in the following finishes:

Weed Bug, Yellow Body, Green Wings
Weed Chunk, White Body, Red Eyes
Weed Frog, Meadow Frog Colors

The New Creek Chub "RIVER RUSTLER"

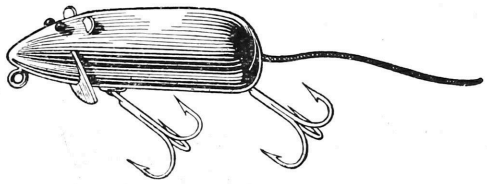

This little lure will have a particular appeal to the average fisherman as it has a number of advantages not found in other lures. It is rather small and the ⅝ oz. weight will suit the man who likes a light lure, yet its compact shape makes it a very easy caster. It is perfectly adapted to River Fishing yet it works equally well in lakes. It runs deep enough to make it suitable for underwater use and yet shallow enough to be used over the underwater weeds and close in shore. The erratic side to side dart, together with the continuous wiggle, which characterizes this bait makes it an irresistible fish getter and its saucy, impudent look appeals to the eye of every fisherman. Length of body 2⅝ in. Weight ⅝ oz. Made in the following finishes:

Natural Pike, scale finish. **Golden Shiner, scale finish.**
Natural Perch, scale finish.
White with Red Head. **Silver Flash.**

No. 342 ..... Each **$1.25**

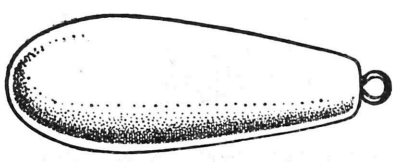

The "LUCKY MOUSE" No. 323

Each **$1.25**

Positively the most life-like imitation of a swimming mouse ever produced; in size, appearance and action it is perfect; strictly a top-water lure. Slow reeling gives it every appearance of a mouse and when retrieved at a moderately fast speed, produces a churning effect in the water due to a vacuum or spray being produced by water striking the ears. By elevating the rod tip and twitching the lure along, it gives the effect of a small mouse frantically struggling to rise from the surface. A bait for bass! Body is of wood with pyralin plane and ears, and bead eyes. The two treble hooks are so placed as to make it a very good hooker and they cannot become entangled; the braided fabric tail adds to naturalness. Length, 2½ inches. Weight, ⅝ oz. Natural Mouse Color.

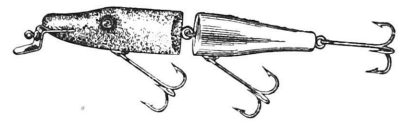

Plug Tournament CASTING WEIGHT

Official size and type Casting Weight used in plug tournaments by the National Association of Scientific Angling Clubs. Made of wood with white enamel finish. Weight, ⅝ ounce. Length, 3 inches.

..... Each **45¢**

The New "PICKEREL PIKIE"

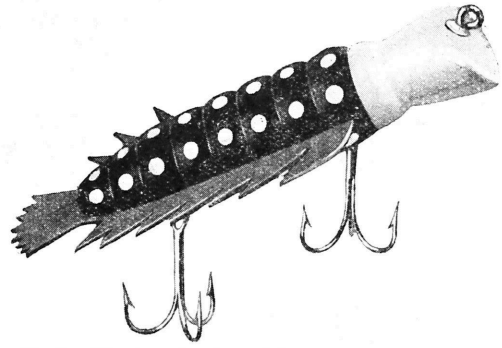

Made especially for taking Pickerel and Pike — and does it —

Made in the same size as our famous Jointed Pike No. 326, but the front half of the body is a solid mass of glittering silvery flakes more attractive and brighter than a spoon and the tail red or yellow imitates a fly. Has all the advantages of the old spoon and fly combination plus the sure hooking qualities of the wooden plug. Unlike the spoon it casts easily and can be used without fear of twisting the line. Runs a little deeper than the regular Pikie and does not float. All the Pike family, Muskellunge, Pickerel and Pike take a slam at this, they can't seem to leave it alone; it's the greatest combination ever made for these fish. Made in two color tails. Length 4¼":

Silver Glitter with Yellow Tail.
Silver Glitter with Red Tail.

No. 329 ..... Each **$1.50**

STRIKE-MASTER HELGRAMITE

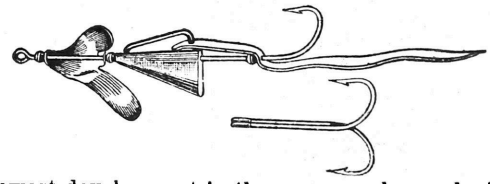

Again Strike-Master leads with the first wooden lure of its kind on the market. This bait is an accurate reproduction of a hellgramite. An under-water lure, which floats when not in motion. For Bass, Pike and Pickerel. A killer!

Color: White with Red Head.

No. 401—Length, 3¾"; Weight, ¾ oz. ..... Price **$1.50**

The WIGL-Y-RIND No. 316

Nickel Finish. **Weight ⅝ oz.**

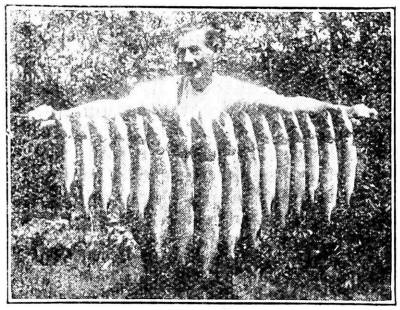

The newest development in the ever popular pork rind lure and beyond doubt the most attractive lure of this kind on the market.

The body of the lure is a weighted shell, highly nickeled and polished. The single hook is rigid and of the conventional type. It can be removed easily and quickly and loose double hooks (furnished) substituted, or the body and spinner can be used with any standard buck-tail or streamer fly. The ease of application of the rind and its security is an exclusive feature of this lure. Its big slow-motion in place of the usual flutter and the size and shape of the spinner aid in preventing fouling in the weeds. Uses any standard pork rind. Single and double hooks interchangeable, making two lures for the price of one.

No. 354 ..... Each **$1.65**

FISH-ORENO (Guaranteed)

(Illustration Approx. ½ Actual Size)

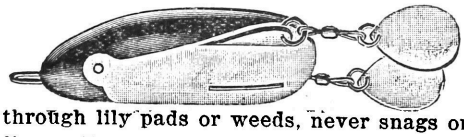

The Fish-Oreno is an innovation constructed along similar lines to our famous Bass-Oreno. It has a highly polished nickel head plate which sinks the bait at the approximate rate of 2 feet per second to any desired depth, where when retrieved, it performs in an erratic, wobbling, quivering, zig-zag fashion so enticing to game fish.

RH—White body, red head. P—Pike finish. SF—Scale finish. Y—Yellow body with black spots and stripe. CS—Copper scale finish.

No. 351 ..... Each **$1.75**

Celebrated FENNER Weedless Casting Bait

An absolutely weedless bait that can be safely passed through lily pads or weeds, never snags or tangles its own line. Drawn through the water imitates the wabbling motion of a fat chub minnow. Hooks fully sheathed on body of bait, but so sensitive that they spring out like a tiger's claw on being touched by lips of a fish. Body of bait is indestructible pyralin, mechanism of non-corrosive and rustproof, quite fool proof. Color red and white. Nickel plated swivelled spinner.

No. 400 ..... Each **$2.00**

CLASSIC Minnow

The latest Al. Foss Spinner. Nickel plated, weight ⅝ oz., size of hook 3/0, dressed with colored Bucktail hair and is detachable. Casts right to the spot like a bullet. Hook rides upright and cannot turn over. The Dixie Wiggler solves the weed problem by providing a spinner that cuts its way through the weeds, making a clear passage for the hook, which is in a clear open position for effectively hooking the striking fish. When retrieving the pull on the line is strong enough to keep it taut at all times.

No. 749 ..... Each **$1.50**

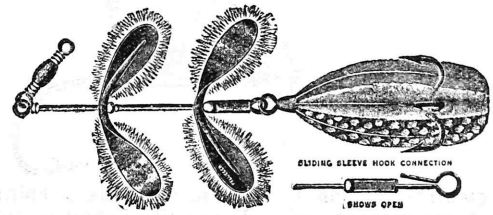

A. L. & W. "RIVER SHANNON" Twin Spinner

This famous lure is the one to win the small mouth out of fairly deep water as well as out of the shallows and pockets. It is thoroughly weedless. Being weighted, it casts fine and far. And it will sink to any depth desired, unlike many casting baits. The twin spinners are set so as to spin and wabble agitatedly on either side of the bright feathers. Hook size, 4/0 sneck. Fly colors, red, yellow or red and white. Also Natural Bucktail.

A. L. & W. ORIGINAL JUNE BUG

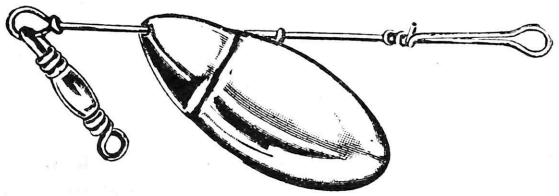

Equally effective for Bait Casting, Fly Casting or Trolling, the June Bug is so well known and generally popular that it needs no introduction to the Canadian angler. Bass, Pickerel, Pike, Lunge and Trout all fall victim to its lure. The spoon is shaped to resemble a bug or beetle. The nose is heavily plated with genuine 22-carat gold, and the body is highly polished nickel. The hollow side is enamelled blood red to resemble underneath the wings of a bug. The spoon is mounted on strong piano wire shank and held at exact angle for spinning by means of a heavy brace securely fastened to hollow side of spoon, insuring very free spinning at all speeds and adapting the bait for effective bait casting. A. L. & W. June Bugs are mounted in a variety of styles for all kinds of angling, and take all kinds of game fish under any and all water and weather conditions. The spoon is made in two sizes: Large, 1 9/16" x 13/16"; Small size, 15/16" x ½".

A. L. & W. LITTLE WONDER SPINNER

—Patent Applied for—

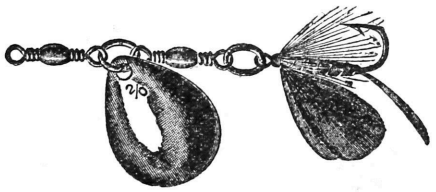

A. L. & W.'s latest and greatest contribution to a long list of successful and popular baits involving a new principle which is distinctly unique. Two aerial spinner wings are mounted or imposed upon a hollow half ball of thin copper highly polished on outside, and polished nickel on the inside. Mounted on stout piano wire shank and fitted with interchangeable hooks, fly or bucktail, according to choice, as illustrated. The bait is very light and spins very freely at any speed. In action the hollow half ball causes a vacuum throwing a spray behind and around the fly giving the bait a lifelike appearance, quite different from any other bait, and infinitely more attractive to game fish. Has proved most effective for salmon and large trout and a deadly lure for bass, pickerel, pike and lunge.
Has created a sensation wherever used during the past two years and is the most talked about bait for the present season.

Furnished in four combinations as follows:

No. 785—Mounted with interchangeable single hook for use with pork rind or live bait ..... Each **.50**

A. L. & W. NEAR GOLD WABBLER

A bait of exceptional merit for Lake Trout, Pickerel, Pike and Musky. It does not revolve, but has a quickly gliding, half turning motion, and has the appearance of a minnow darting quickly away from a pursuing fish. Its extraordinary success is often attributed to its peculiar lifelike motion. Supplied in "near gold", resembling genuine 24 carat gold, which positively will not tarnish; also in highly polished nickel. Extra heavy treble hooks, brass swivel and coppered steel split rings. Length 3¼". Treble hook size 4/0.

STEWART'S SURECATCH. NO. 905

A first-rate bait, used with live minnow, as illustrated, for deep trolling for Lake Trout. Has the sliding, lifelike motion of a real herring in combination with a live minnow, which actually lives when properly attached to safety pin hooks. To insure freedom of action to the minnow, the safety pin should be passed just underneath the skin of the minnow, when it will live indefinitely and impart a good lively action to the bait, making it practically irresistible to Lake Trout, etc. Length of spoon 3¼", nickel one side, copper the other. Extra strong nickel-plated treble hook and safety pin hooks.

STEWART SPOONS

This is a splendid bait of proven ability to kill fish of all kinds. Its peculiar shape, cupped at both ends, gives it a wonderful gliding motion in the water, exactly imitating a fish swimming. This bait is no new experiment; it has retained its well-earned reputation over many years. The smaller size, 1¾", is an excellent casting lure for use with fly rod in fast waters. Spoons stamped from heavy brass, finished silver and copper. Brass swivel and single salmon hook, or if desired, two hooks mounted in ice tongue fashion. **No. 903.**

THE NEW "TELFORD" TROLL

This bait revolves without commotion through the water in a sliding stealthy fashion, which proves irresistible to game fish. It has a great feature in that the least touch of a fish is felt instantly. Where fish are much hunted, this unusual bait, with its lack of commotion and resistance to the water, is a killer of educated fish. Georgian Bay enthusiasts proclaim it the greatest and most successful bait ever produced for the largest fish in these waters.

A. L. & W. Genuine English "OTTERTAIL BAITS"

This is the finest quality Otter Bait made and has long been the prime favorite throughout Canada. The blades are extra heavy copper, silver plated on one side, copper on the other. Heavy brass wire shank runs through a shaped and weighted copper tube, making the blades spin freely under all conditions. The shank has a spring snap loop at either end. Note the bellied copper tube through which shank runs. This is essential for the true action in the water of this bait and is accountable for its unfailing success. Insist on the A. L. & W. Otter. A. L. & W. SPOON BAITS

With Patented Non-Fouling Lug

Made in our own factory

After many years' practical experience in both the use and manufacture of spoon baits, we have contrived and patented a simple device which has actually revolutionized spoons for modern bait casting as well as trolling. This device is called the integral reinforced lug. Not only does it prevent the spoon from breaking from the shank, which has always been the great weakness in spoon baits, but the spoon is absolutely prevented from flopping over, fouling or getting tangled in the shank or the hooks. And it spins more freely, being held in the spinning position when in the water.

All bait casters know the virtue of spoons. Because of the defects of the old type of spoons when flung by the casting rod, many anglers had to abandon favorites that have proved mighty killers. This new patent A. L. & W. device, obtainable in all the favorite patterns, simply puts the old spoon bait in the forefront of the great casting lures.

Examine one of the A. L. & W. spoons at your earliest opportunity.

A. L. & W. BEAVER BRAND STAG BAIT—SINGLE

With Patent Reinforced Integral Lug. Upper Half Nickel-plated, Lower Half Genuine 22 Carat Gold-plated.

This is perhaps the most justly famous spoon bait ever designed. It is still the greatest Musky bait made. In its smaller sizes, it annually accounts for far more than its share of bass, both small and large-mouth. With its gleaming silver blade, gold cap and bright scarlet lining and wisp of colored feathers over the treble hooks, it is known wherever men cast or troll.

Equipped with the new patented lug which converts it into the perfect bait-casting lure, the Stag bait, single, double or in combination, is the basis of every angler's tackle collection.

Because of the hard use we know these baits will get, we manufacture them in our own factory in the strongest manner possible, nickel plating the blade, the lower cap washed in heavy 22 carat gold plate, and the shanks and hooks of specially tested material.

A. L. & W. Seal School Spinner

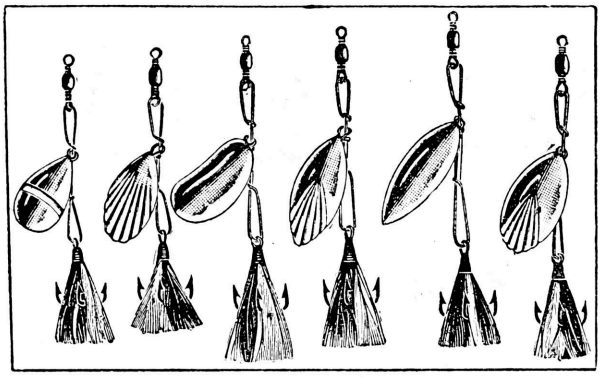

A new and distinctly novel bait for which phenomenal claims are advanced by anglers. It consists of three large and four smaller light - weight spoons mounted at intervals of 2 to 3 inches apart on a long trace, with large red beads in between. The trace is jointed with a swivel between each spoon.

There is a snap fastening at one end, to which a wire or gut snelled hook baited with worm or minnow is attached, and when trolled the bait is an exact representation of a school of various sized minnows darting through the water in a zig-zag path. This is irresistible to game fish, especially lake trout, and large catches have been frequently reported.

Spoons are finished all polished brass. The large Head Spoons are 3½" long, and the Tail Spoon 2¼" long.

A. L. & W. GREENLOOP CASTS

Registered Trade Mark

For Salmon, Trout, Bass

Our Green Loop leaders carry our unqualified guarantee. For sixty years we have been one of the greatest importers of gut casts, and we know the source of the best Spanish gut and the finest tiers. Green Loop casts are made of the very first class of selecto Spanish silkworm gut and tied by the world's most expert tiers.

The gut is sorted by micrometer gauges to ensure absolute uniformity and roundness in the strands. The longest strands are employed, and before being tied, the strands are treated by a secret soiution, which renders them tougher, more pliable and reduces the usual danger of splitting to the vanishing point.

Furnished in all weight of level and standard tapers, as follows:—

A. L. & W. DEER HAIR NYMPHS

Of all the underwater insects which trout feed on, the most numerous are the larvae or nymphs of the May Flies, Stone Flies, Dragon Flies, and Damsel Flies.

A. L. & W. take considerable pride in their introduction of the A. L. & W. Nymph Series, which are exact imitations of the larvae or nymphs mentioned above. By a special process, that rare translucency so peculiar to these nymphs has been attained. Special shaped hooks and genuine deer hair are used in their manufacture. They are the most remarkable imitation of the aquatic larvae yet achieved. Supplied in five patterns, illustrated and listed below.

These Nymphs should be fished as wet flies. Allow nymph to sink, then draw through the water in short erratic jerks with rod tip.

DAMSELFLY NYMPH, for fishing where there are weeds, amongst which the damselfly larvae cling. Made in Size 10 only.

DRAGONFLY NYMPH, a course, fat fly, representing the sluggish nymph of the "darning needle" and fitted for almost every type of water. Sizes 6 and 8 only.

SMALL MAYFLY NYMPH, sometimes better than the larger nymph of the same design. Made in Size 12 only.

LARGE MAYFLY NYMPH, representing the larger species of mayfly, a wonderful fly for still pools and ponds. Made in Size 8 only.

STONEFLY NYMPH, of deer hair, tied with translucent brown silk of a special manufacture. This fly is for gravelly stretches. Made in Size 10 only.

No. 1628—A. L. & W. TRANSLUCENT NYMPHS.....Per dozen **$2.00**

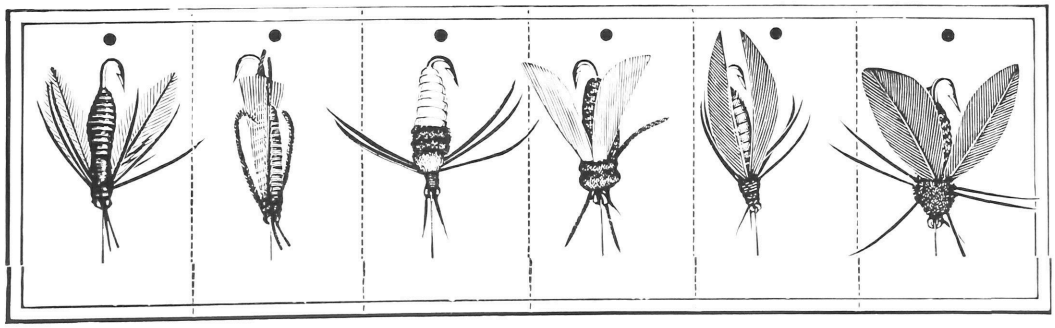

Sample half dozen, assorted, $1.00

These nymphs are made true to life in size and appearance, and are, therefore, only tied on the size of hook mentioned.

A 20-lb. catch—one day's limit for two anglers, all caught on A. L. & W. Deer Hair Nymphs.

A. L. & W. NATURE FLIES

Flying Ant	Yellow Jacket	Rock Worm	Bumble Bee	Red Tip Hopper	Grey Moth

These nature flies are a distinct innovation in the art of fly tying, and have proved most successful all over Canada. They are exact lifelike and life size reproductions of these tempting insects and quite irresistible to trout. Made from highest quality materials throughout. Sproat hooks, size 8, to 5" gut. Nothing quite so lifelike has ever been produced before.

A. L. & W. Selected Six

Because Canadian scientists have not yet given the angling fraternity a study of our trout stream insects, we have always been dependent upon European patterns of flies except for some adaptations of those English and Scotch flies by Americans.
A. L. & W., after years of experience and collating the experience of their thousands of clients, have brought out a selected six flies of their own design which embody all the best features of color and shape in the most killing flies used in Canadian waters.
They are pictured on the bottom row in the color plate above, and will at once capture the fancy of the experienced trout fisher. Made of moth-proofed material of the strongest sort to withstand Canadian conditions. Size 6, 8, 10, 12.

A. L. & W. Magic Dry Fly Oil

This is a wonderful greaseless preparation for Dry Flies. Flies can be treated in the usual way on the stream, but its great merit is that flies may be dipped at home and allowed to dry after which they are absolutely waterproof and will float impervious to the action of the water much longer than when treated with ordinary fly oil.

A. L. & W. BARBLESS HOOKS

Of the famed Jamison design, these hooks were tried out by Dr. Henry Van Dyke on a long fishing trip both for salmon and trout in New Brunswick, and fishing with nothing else, he declared them absolutely as secure in their hold as the barbed hook. Yet the barbless nature of the hooks permit the angler to drop back an undersized fish, or a fish he does not want to keep without even touching the fish with a finger.

Thousands of Canadian anglers are already devoted to these barbless hooks and they are hailed as one of the greatest steps in conservation since the first fish law was enacted. Sizes 4-12.

A. L. & W. "Perfection" Waterproof Black Silk Casting Line. No. 3100

This is the line we recommend when a man says:

"I want the best bait casting line made!"

Of No. 1 selected Japan silk, hard braided and waterproofed, smooth and swift on and off the reel, the Perfection is guaranteed to give the most critical sportsman complete satisfaction. Years of experimenting have resulted in this line which will withstand the severe strain of the hundreds of casts a day the average angler makes, the friction and tension, and yet keep its shape and suppleness and hardness to the end. On account of its hard-wearing qualities, the 12-lb. test is especially recommended for those expert casters who demand a very light weight, free running, waterproof line.

Packed 50 yards on a spool, 100 yards connected in box, with a handsome blue and silver label, it looks the aristocrat of lines that it really is. Supplied in the following sizes:

12 lb. test—Per 50 yd. spool	**$2.50**
18 lb. test—Per 50 yd. spool	**3.00**
24 lb. test—Per 50 yd. spool	**3.50**

36 lb. test—Per 50 yd. spool	**4.50**
42 lb. test—Per 50 yd. spool	**5.00**

Mr. ———— writes: "Send we another A. L. & W. Perfection Line, 12-lb. test. The last one I purchased from you has given me longer service than any line I have ever previously used, and it casts beautifully."

A. L. & W. "Black Wonder" Waterproof Silk Baitcasting Lines

In waterproof silk casting lines our Black Wonder stands unchallenged. Made from finest quality No. 1 Japanese silk. It is a superb casting line. Hard braided, small in size, but with great tensile strength; it will hold the biggest fish without trouble. Casts beautifully; runs off the reel smoothly without burning. Is especially good for waters which are in any degree alkali, as the waterproofing, which is our own secret solution, protects the line against the action of the water and prolongs its life. We stand behind this line with the strongest guarantee as to material and workmanship, and recommend it in the highest terms. Put up in 25-yard spool, 4 connected in box.

Celebrated HALFORD Tapered Trout Lines

These lines are made from the best silk, in 30-yard lengths, double tapered for fly fishing, being made incomparable for dry fly work. They are made in four thicknesses to suit different actions of rods, and are dressed exactly according to Mr. Halford's description of them in his work on Dry Fly Fishing, being dressed under the air pump and polished, thus bringing them up to a fine "roundness" and polish, although being a square solid plaited line. The dressing is not so liable to chip off as in other lines, and when occasionally rubbed down with deer fat, they will keep as soft and supple as a line need be, besides being excellent floaters. With care they will last five or six seasons. **No. 3320—30 yards—**

"STAG" BRAND SILK BOUND STEEL RODS DE LUXE

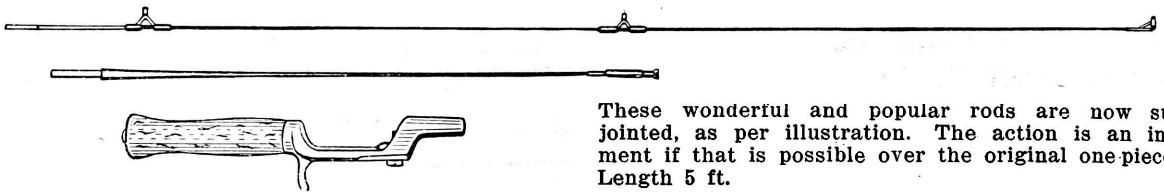

This is the very finest quality steel rod, solidly bound from end to end with pure silk, and fancy whipped at short intervals. Colors: Rich golden base with red whipping and olive green with black and red whipping. This increases the strength of the rod from 50% to 100% and positively prevents buckling. The rod is then waterproofed with our own secret insulating fluid, which is thoroughly heat, cold and moisture resisting, giving lustre and finish to the rod which is really exquisite. The advantages of silk binding and waterproofing cannot be too highly appreciated, as it completely overcomes the danger from rust, which is the greatest enemy of steel rods.

THE BLAKE'S ROD'S STORY

The late W. H. Blake, Esq., a member of the Blake family prominent in the political history of Canada, may be said to be the finest angler Canada has yet produced.
He wrote two very beautiful books on angling, "Brown Waters" and "In a Fishing Country," the former being truly described as the classic of angling in Canada.
Mr. Blake was one of the Allcock, Laight & Westwood's most distinguished customers. In return for what this firm was ever able to do for him, he rendered Allcock, Laight & Westwood invaluable assistance in developing Canadian tackle out of his very vast experience of fishing both in Canada and England.
Dissatisfied with the rods that were suitable for fly fishing in other waters, Mr. Blake gave to us the specifications of a rod which would, in his opinion, be the ideal rod for fly fishing for trout in Canada. He wanted a rod that was light, yet powerful enough to throw the somewhat larger flies and stout gut leaders which the streams and lakes of Canada demand. In co-operation with our rod makers—we are the only manufacturers of high-grade split cane rods in Canada—he worked out the specifications of taper, balance and winding to the last degree of efficiency.
And the Blake rod—still recommended by us as the finest we can offer—is the result.

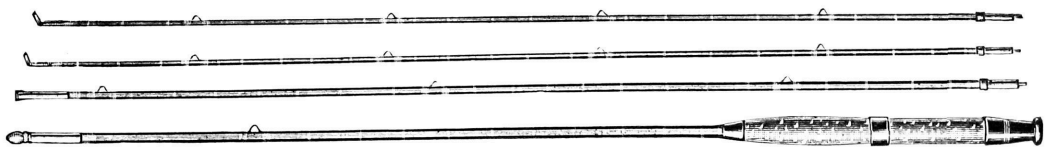

A rod of delicate action, yet powerful and accurate. Capable of great distance and has killed fish all the way up to a 15-lb. salmon. It is hand built from the very finest split cane. Six-section construction, very carefully selected and matched. The tough outer fibres of the cane are preserved, not scraped off, as they provide the real staying power and come-back to the rod. Length 9 ft. 3 joints and extra tip, solid cork handle, universal reel seat to securely accommodate any reel, bronzed reel bands, bronzed suction watertight reinforced ferrules. Standard nickel steel bridge rings throughout, or with agate rear guide and top. Whipped closely with maroon silk and finished with the very highest grade of varnish and polished to a perfect waterproof surface. Weight about 5 oz. Contained in heavy cloth partitioned bag in aluminium and leather case. Suitable for wet or dry fly. Fully guaranteed. Greatly improved for 1930

HARDY BROS.' CELEBRATED PALAKONA SPLIT CANE FLY RODS

DE LUXE FLY ROD

These rods are manufactured by the world's angling specialists. They are made singly, by hand, and every rod in each state of development during its manufacture goes through the most critical examination by experts. No ordinary bamboo can be compared with the "Palakona" bamboo, of which these rods are made. No rod-making material is harder, tougher or more springy. Weight for weight, it is superior to steel of equal area. Hence, the success of these rods in all European casting tournaments. This is the latest design in trout fly rods, and embodies all that is useful and practical. Most carefully balanced to fish either dry or wet fly, with great precision and delicacy, yet strong enough to kill either large trout or small salmon. The handle is cork, fitted with patent screw grip fitting, so that no part of the metal can touch the hand. The joints are "Suction" perfectly fitted. "Bridge" intermediate rings, with agate butt and tip.

Weights, about	5 to 5½ oz.	5¼ to 6 ozs.
Lengths	9 ft.	9½ ft.

NOTE.—Tips made to order for any style of Split Cane, Greenheart or Lancewood Rod, at reasonablee prices.

THE CARE OF RODS

It is important after a day's fishing that the rod should be taken to pieces, carefully cleaned and placed with its case; not left outside against a wall or tree (as is generally done in every camp), for the damp atmosphere and rain to act upon its timber and ferrules. A rod carefully used will last a lifetime, whereas, if its owner is careless, it will get out of condition, become warped, and eventually lose its suppleness and power. As a last word of advice, never put a rod in a damp bag.

PUTTING RODS AWAY FOR THE WINTER

After the season's fishing is over, look over your rods. If the ferrules need to be tightened, wood needs varnishing, etc., do it or send them to us at once, and next spring your rods will be ready. Put your rods in a room where there is no heat (steam heated rooms will loosen all the ferrules), and hang up the joints separately by short pieces of wire or strings, which have been tied to the smaller ends of the joints

WALTER HAGEN INTERNATIONAL COMPACT IRONS

With the ever increasing popularity of golf, concentrated effort has been made to offer the player every possible aid to a more enjoyable game. Logically enough the steel shaft—next came matched sets—and NOW, "Compact Blade" irons, an exclusive Walter Hagen creation. For nearly two years Walter Hagen and his staff of experts, realizing the advantages of more compact blades, have been building Hagen irons with the compact blade idea uppermost. This has been one of the reasons for the prompt recognition of Walter Hagen matched irons by so many leading professionals when they first made their appearance. A majority of the outstanding stars of American golf are using these Walter Hagen "Compact Blade" matched irons and using them to win championships. Recent major events won with Hagen "Compact Blade" irons include the Western Open, first and second; the Great Lakes Open. They were used by five of the first seven in the Oregon $6,000 Open, including the winner; won first and second in the Hawaiian $6,000 Open; won the Berkeley $4,000 Open; were used by six of the first eight in the Pasadena $4,000 Open, including the winner; and, in the Los Angeles $10,000 Open, Hagen clubs were used by three of the first four, including the winner, also by twelve of the twenty-four prize winners in the $25,000 Agua Caliente Open.

THE MATCHED SET IS HERE TO STAY

The day of the one club player is past. A matched set of related, harmonized and properly graduated irons makes every club in your bag a favorite. Not only must there be proper graduation of loft for any lie or distance but each club must be built and balanced in perfect harmony in length, in weight, in balance and even in feel. This gives your game uniformity. You play no favorites, and perform with one club as well as with another. They must be built, graded and registered so that duplication is possible—so that a matched set once acquired can always be maintained in its original entity irrespective of loss or breakage.

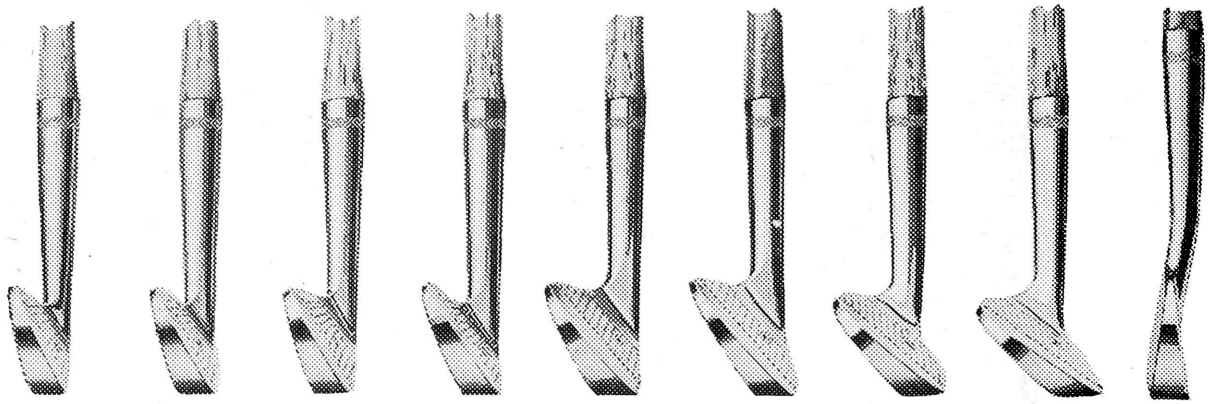

All A. L. & W. "Crown," "De Luxe," "Fairway," and Special Irons are built to meet this very essential requirement. Every Iron is part of a matched set, irrespective of whether it is purchased as an individual club or in a complete set.

It is no longer necessary to buy orphans when purchasing individual clubs.

START ACCUMULATING A MATCHED SET

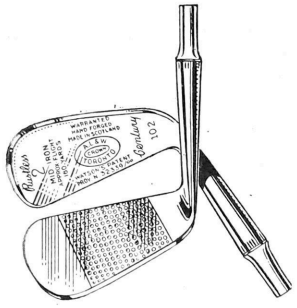

by purchasing any of the following A. L. & W. Models, viz.: "Crown", "De Luxe", "Fairway", or "Special"—all described below and designed to meet all requirements and all pocketbooks.

FINE SHOT GUNS

OUR selection of world-famous imported shotguns includes many outstanding makers, such as W. W. Greener; Alfred Davis, London; Cogswell and Harrison, London; Midland Gun Co., Birmingham; Aug. Francotte, of Liege, and many others.

These guns are all hand made by master gun makers, each piece individual in design, engraving, etc.

The shooting qualities of these guns are of the highest order, patterns being most perfect with maximum penetration.

Finish and engraving are of the fine old London type; stocks are oiled finished for durability.

All these finer guns are Government tested for strength and safety. The actions are so constructed that it is not unusual for guns of this type to be in one family for many years, being handed down from one generation to the next.

Our gun department is most willing to help you with your gun problems, and should you require other information, we would be glad to have you write us.

A. L. & W.
IMPERIAL
Model 1930 Improved Long Range Gun

There is little wonder why this arm has caused so much favorable comment in the gun world. Its quality, design and workmanship are of the highest order, being strengthened at all vital parts, including heavy double lugs and extension rib, square Greener cross-bolt, side barrel lugs, flat water table, etc. These considerably strengthen the gun and at the same time give the shooter the greatest security; although this gun is exceedingly strong it is not cumbersome. Sharp angles have been rounded and worked down to a nicety.

Fifteen Vital Improvements in the Model 1930 Imperial Shot Gun

No. 1 and 2.—Special heavy double locking lugs, usually supplied only on expensive guns.
No. 3.—Flat table breech for strength and ease of cleaning.
No. 4.—Side Lugs—Prevent wearing of locking bolts, through eliminating side vibrations.
No. 5.—Square Greener Cross-Bolt for the well fitting breech.
No. 6.—Rugged extractors plan or automatic.
No. 7.—Greener extension rib lock.
No. 8.—Mottled top rib.
No. 9.—Well fitting, nicely finished top lever.
No. 10.—Automatic safety.
No. 11.—Correctly designed triggers.
No. 12.—Long type trigger guard with beautiful engraving; see cut showing under side of gun.
No. 13.—Short hinge breech beautifully engraved with hunting scene.
No. 14.—Push down fore-end, as used only on expensive guns, fine hand-checkered fore-end and stock.
No. 15.—Finish: Blued, highly polished.

Smoothness of operation—Has been brought about by fine fitting and polishing of parts. These guns are assembled only by Master Gunsmiths.

Great Precision and Long Range—Due to nickel steel barrels, lugs, ribs, etc., being clamped and welded in one piece, and to the special bore with Progressive Cone Type Choke, gas pressure is increased at the correct time to give you many extra yards, having a 2¾" chamber for long range shells; clean kills can be made consistently at 60 to 80 yards.

Strength—Is built with a special view to resist the most powerful smokeless powders, and has been given proof test No. 4 by the Belgian Government at Liege. This test is the heaviest given to any gun regardless of price. Government proof certificate attached to each gun.

Style—The style and balance could hardly be improved upon. The graceful walnut stock and fore-end beautifully checkered, the smart clean-cut engravings around the breech add to its generally fine appearance, the balance is perfect and found only in expensive European guns.

Specifications—12 Gauge, 30" barrels, left full choke, right modified choke, 2¾" chambers for extra long range shells, walnut stock checkered, length of stock about 14½, drop of stock at heel 2¾ to 3". Weight about 7¼ lbs. 16 Gauge, 28" barrels. Weight, 7 lb. 20 Gauge, 28" barrels. Weight about 6¾ lbs.

No. 10069—12, 16 or 20 Gauge ..... Price each **$40.00**

No. 10069E—12 Gauge only with Automatic Ejectors ..... Price each **$60.00**

Diana Breech

DAVIS
Hi-Power Long Range
DUCK GUN

Long Range Duck Gun, chambered for 3" shells. Will kill ducks at 80 yards.
With Diana Breech as illustrated.

Made only in 12 Gauge, 30 or 32" barrels. Specially chambered for 3" shells with bore and choke designed for long range shooting. Weight 7½ to 8 lbs.
While this gun is specially chambered to take the 3" shell, the shorter length of shell for shorter range can be used equally as well.
The Davis Hi-Power Gun is guaranteed to shoot 80% of the shot in a 30" circle at 40 yards, and has a killing range of 80 yards.
This gun will kill water-fowl consistently at 60 to 80 yards. Built specially for strength and hard duty at long range.
Penetration with No. 6 chilled shot, 3/16" at 60 yards and 1/8" at 80 yards.
This gun is made of the best materials and finished in excellent style and workmanship, comparing favorably with guns for which double the money is asked.
The Diana or Reinforced Breech (see illustration above) consists of sleeve fitted over the breech of the barrels the full length of the shells, which increases the strength very materially where strength is most required. The barrel lug and breech is all in one forging, which assures a perfect fit of the barrel lug and prevents the gun from ever shooting loose.
Stock. High grade polished walnut with pistol grip and fore-end finely checkered, length 14"; 2¾ to 3" drop.

ITHACA GUNS

THE NEW ITHACA double is of entirely new design embodying the most popular features of the best guns of America and Europe together with original features.

THE NEW ITHACA double has three separate safety indicators: First, the "S" seen in front of the safety button when the button is in safety position; second, a red spot back of the safety slide, indicating danger when the safety device is off; third, two indicator pins, which project out of and above the frame when the gun is cocked, each indicator disappearing when its barrel is fired.

The bolt fastening is the popular rotary bolt of American origin.

The forearm fastening is the D. & E. snap fastening used for the past several years on Ithaca one barrel trap guns and for many years on the expensive European double guns.

The bolt and top lever trip may be operated with one's thumb as on the later model Ithaca one barrel trap gun.

The lock mechanism is a new application of the unbreakable and fast coil main spring to a rugged unbreakable hammer and sear which retains the lock speed which has made Ithacas win the world over.

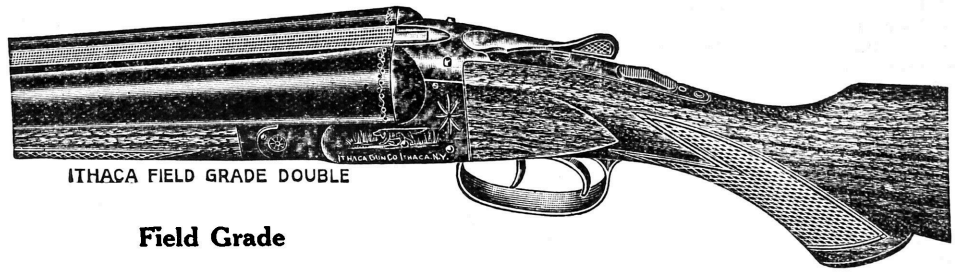

Everything on this new Ithaca from muzzle to butt plate is new and the gun is designed to eliminate useless material and weight.

Buy an Ithaca and play safe.

THE NEW ITHACA FIELD GUN, the least expensive gun that can be guaranteed. It will last a lifetime.

Barrels—Smokeless powder steel, proof-tested with a double powder load.

Stock and Forend—Black walnut, oil finished, hand checkered, solid where stock joins the frame to prevent splitting, full pistol grip.

PARKER

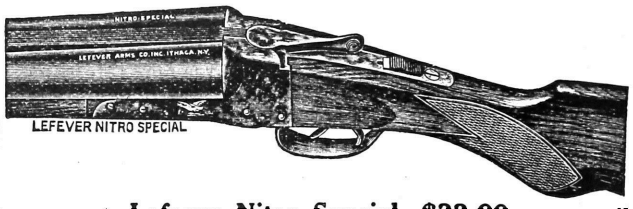

The Old Reliable Parker Gun

What is a Hand Made gun?
If a gunsmith takes a piece of steel and proceeds to hand forge it into the semblance of a gun frame, then makes the myriad of machine cuts necessary to get this important part in readiness for fitting, this frame could be considered a hand-made product.
If he made all the component parts of the action in like manner, secured proper materials for barrels and went ahead with the many intricate operations of drilling, turning, assembling and boring, if he then took his prepared parts and filed, scraped and laboriously fitted them together, he would have built a hand made gun.
The proceeding operations are entirely possible, but the time and expense would be prohibitive except to the very wealthy sportsman, to whom time and money are no object, and the gun would be no better for having been so made.
Parker Brothers' high grade guns are hand made products, except that instead of slowly and imperfectly producing the component parts by hand, they are carefully prepared for the fitters by means of the most accurate of jigs, fixtures and gauges. When finally machined, proper allowances for fitting are left so that the fitter has a sufficient amount of material to work upon, and the action parts, barrels, etc., will be as accurately fitted as if he had previously prepared them himself.
Guns so built, can, in no manner, be called machine made. The parts are prepared by machinery much more accurately than would be possible in any other manner, and since proper allowances are made, the fitter is enabled to produce a gun with every joint perfectly fitted, and actions working smoothly. In short, he has built a **Hand Made Gun.** 12 Gauge, 30" barrels, left full choke, right modified. Weight about 7½ lbs., stock about 14" long, drop about 2¾".

LEFEVER

Lefever Nitro Special, $33.00

It's a 1,000 to 1 shot that you have not seen a Lefever Nitro Special Gun with a broken lock, because it stands use and misuse. It's a satisfaction to tell a hunter, "Here's a Lefever Double Gun and I never heard of a Lefever breaking down." The Lefever Nitro Special has non-breakable coil springs, the stock is securely fastened to the frame with a draw bolt running up through the grip of the stock to the frame, and the top snap may be tripped by simply pressing down with your thumb on trip pin which comes up through the face of the frame.
This Lefever Nitro Special Double can be furnished with the following standard specifications and no other specifications can be supplied. 12 Ga., 30", about 7½ lbs., 20 Ga. 26", about 6¼ lbs., 16 Ga. 28", about 6¾ lbs.
All stocks will be as near standard as we can make them and these standard stock specifications are—14 inches long with 2-7/8 inches drop at the heel. Every gun will be proof tested with an extreme load. The lock on this gun was designed by the best gun maker in America. Gunsmiths the country over say it is the best designed lock ever put on a gun. The first lock was snapped over 77,000 times, the first Lefever Nitro Special Double Gun was fired about 10,000 times without a break.
A Lefever Gun won the World's Championship at the Olympic Games in London. The name Lefever on a gun has stood for service and durability for more than fifty (50) years. About one-third of all the double hammerless guns sold in America are Lefevers.
Left barrel full choke, right modified, 12-16 or 20 gauge.

1930 MODEL LEFEVER DOUBLE BARREL TRAP AND FIELD GUN

(Ventilated Rib)

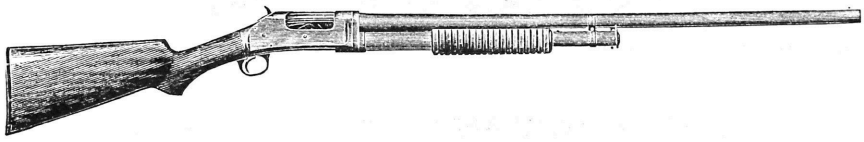

LEFEVER DOUBLE BARREL TRAP WITH VENTILATED RIB, BEAVERTAIL FOREARM, RECOIL PAD, AND IVORY SIGHTS.

While this gun is designed especially for trap and water fowl shooting, it is an all around gun for trap and field use. It has all the desirable features of the Lefever Nitro Special Double with the very best designed elevated ventilated rib to prevent heat waves interfering with accurate shooting, a modern beaver-tail forearm to protect the hand from coming in contact with the barrel, which gets hot from rapid firing, the very best ivory front and rear sights to assist in correctly lining up the gun and a high class soft rubber recoil pad. The lock, bolt and safety device are of the same rugged design and construction as are used in the Lefever Nitro Special double gun. Specifications are 12 gauge 30 inch barrels, both barrels bored to make a close even full choke pattern, weight about 8 lbs., length of stock, including soft rubber recoil pad, 14½ inches, drop at heel 1⅞ inches, at cone 1½ inches. This is another standardized Lefever, it cannot be furnished with any other specifications, that's why it sells with all extras for the small price quoted.

REPEATING SHOT GUNS

MODEL 12 STANDARD GRADE SHOT GUN

Winchester Hammerless Repeating Shot Gun—Model 12

12, 16 or 20 Gauge, 6 Shots

The Winchester Model 12 is a six shot, slide action, hammerless, take-down repeating shotgun made in 12, 16 and 20 gauge. On account of its nickel steel construction, safety, strength, lightness and balance, ease and sureness of its operation, the beauty of its lines and its mechanically correct design, the Model 12 has been pronounced by experts "The Perfect Repeater."

Model 12 Shotguns in all three gauges are close, hard shooters. Winchester shotguns have always been famous for their excellent shooting qualities, and Model 12 shotguns are fully up to the high Winchester standard.

The take-down system used on this gun permits the removal of the barrel from the receiver by a quarter turn. When taken down, the stock and action of the gun remain in one piece and the barrel, magazine and action slide in another. The action slide and handle are held forward by friction, so that in putting the gun together no attention need be given to this detail. When the gun is taken apart the barrel may be cleaned from either end.

12 gauge 30 or 32 inch full choke barrels.
16 gauge 28 inch full choke barrels.
20 gauge 26 inch full choke barrels.

MODEL 12 TOURNAMENT GUN. 12 Gauge Only

Model 12 Tournament Grade Shot Gun

With Raised Matted Rib

Winchester Model 12 Tournament grade gun has a 30 inch, full choke, nickel steel barrel, with solid raised matted rib, chambered for 2¾ inch shells and bored to shoot a close, even pattern. All barrels are tested and none are sent out which will not make a good pattern.

The stock is made of handsome grain, selected walnut, and has a well shaped straight grip, which is checked; and a rubber butt plate. It has a rich oil finish, making it not only beautiful, but serviceable. The length of stock is 14 inches, the drop at comb 1½ inches and at heel 1¾ inches. The stock is shaped with great care and will be found to fit the average shooter's physical requirements. The action slide handle is of walnut, selected, finished and checked to match the stock.

No. 10141 .....Price each **$100.00**

Model 12, Ventilated Rib, Trap Grade

TAKE-DOWN ONLY 12 Gauge Only, 6 Shots

The widely popular Winchester Model 12 Shotgun is also made with a scientifically designed ventilated top rib that affords the shooter the most complete protection from heat waves in sighting and gives a clear, steady path of vision to the target. The rib and barrel are made with sliding connections so that they can expand and contract independently and neither can warp the other by heat expansion.

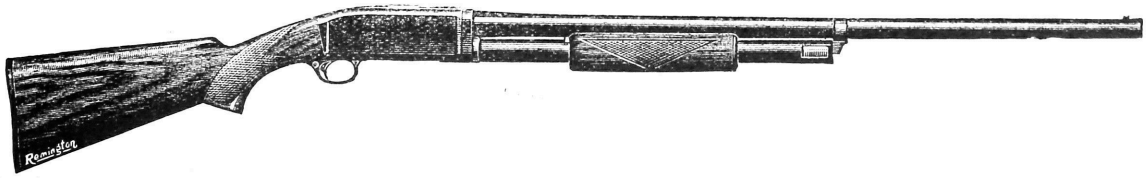

The barrel is made of nickel steel, chambered for 2¾ inch shells, and is furnished in a 30 inch length only. The standard stocks are the same as those furnished in the corresponding grades of the Model 12. The Standard are: Length of pull, 14 inches; drop at comb, 1⅝ inches and drop at heel, 1⅞ inches. Changes desired in Trap grade stocks can be secured without extra cost as these are hand made.

Every stock for the Ventilated Rib Shotgun is fitted with a soft rubber recoil pad.

Unless otherwise specified, all barrels will be furnished full choked, and are 30 inches long.

REMINGTON NEW MODEL 29 SHOTGUNS

The Remington New Model 29 is a six-shot repeating shot-gun. Its beauty of design—clean-cut and graceful lines—its hard shooting qualities and its smooth operation have made it very popular for field and trap shooting.
Receiver is one solid piece—no openings at top or sides—preventing dirt, snow, rain or other foreign substances entering mechanism—giving full protection to the shooter. Shells are loaded and ejected from the bottom of the receiver. The action is smooth and easy.
Specifications:—Remington steel 30" full choke barrel, top of receiver matted. American walnut stock and fore-end. Half pistol grip stock, regular dimensions 13¾ inches long, 2¾ inches drop at heel, 1⅝ inches drop at comb. Magazine holds five shells which with one in the chamber give a capacity of six shots without reloading. Weight about 7½ pounds. Length over all, 49 inches and length taken down, 30 inches.
32-inch barrel to special order only. No extra charge. No. 10152.....Price each **$65.00**

SAVAGE REPEATING SHOT GUNS

The Model 28 Savage Repeating Shotgun combines Savage precision of manufacture, graceful outlines and positive operation with the latest improvements in shotgun construction.
The action is hammerless and all moving parts are enclosed in a solid breech. The breech bolt is locked solidly in rear wall of receiver by the most improved method of breech bolt locking design. By removing screw in rear of trigger guard, entire action may be removed without tools.
Safety is located on top tang of receiver similar to double barrel shotguns and will be found most convenient for all hunting conditions. Action bar latch is located in forward part of trigger guard, giving the shooter entire control of the functioning of the gun with hand in firing position.
The stock on the standard grades is furnished with full pistol grip of Savage design that gives the gun the fine balance and hang in shooting position characteristic of all Savage Arms.
The shooting qualities of the Model 28 Savage Shotgun have been the source of high compliment from its users. The barrel steel is of special formula best adapted to shotgun boring and choking and has made this arm outstanding for its hard-hitting, uniform patterns both in the field and trap shooting.

LEFEVER SINGLE BARREL GUNS New Long Range Lefever Single Field and Trap Gun

LEFEVER SINGLE BARREL LONG RANGE FIELD AND TRAP GUN

12, 16 or 20 Gauge.

The only inexpensive *hammerless* single barrel breech loading shotgun with an automatic safety device such as used on expensive double guns, and an automatic ejector which kicks the shell out when the gun is opened. This new member of the Lefever family is as shapely as ANY $1,000.00 gun; it has a genuine black walnut stock with full pistol grip hand checkered, hard rubber grip cap and butt plate.

The forearm wood is black walnut hand checkered and, like the walnut stock, highly finished with Duco. This forearm is the trap gun type which fills the hand and keeps the hand off the barrel. The forearm may be snapped on or off with one hand and the barrel quickly taken off the stock and frame.

The stock length is approximately 14 inches, the drop about 2⅞ inches. Gauges, lengths and weights are: 20 gauge, 28 inch about 6 lbs., 16 gauge 28 inch about 6¼ lbs., 12 gauge 30 inch about 7 pounds, and *every barrel is proof tested with an excessive load* to make doubly sure it has the necessary material and strength to be safe for ANY standard factory load.

Every Lefever single is carefully choke bored to give the closest, hardest long range pattern. The Lefever is a standardized gun, and must remain standardized in order that it may remain an inexpensive, a SAFE and durable gun. No specifications other than those mentioned can be furnished. No. 10161 ....Price each **$19.00**

LEFEVER SINGLE HAMMERLESS TRAP GUN

Lefever Single Trap Gun

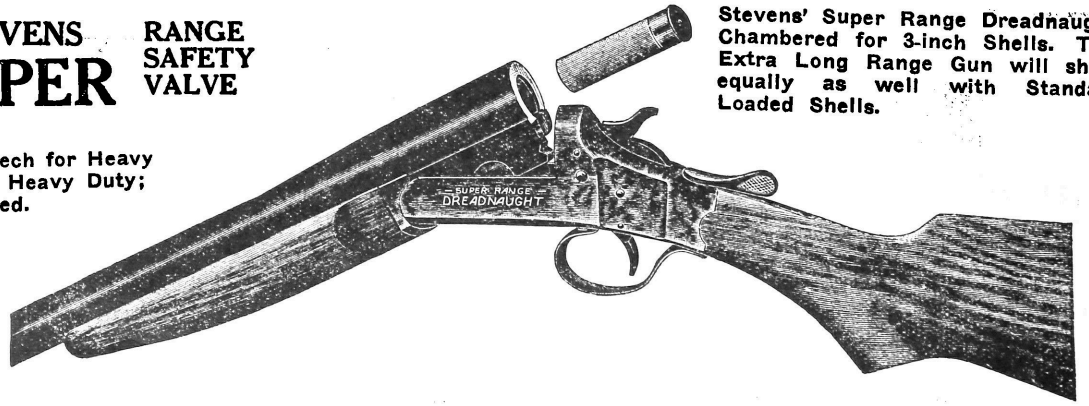

Here is the new Lefever single barrel hammesless trap gun with ejector, elevated ventilated rib, soft rubber recoil pad, ivory front and rear sights, a trap gun forearm which keeps the hand off the barrel and the thick, fat cone experienced trap shooters demand. The specifications are 12 gauge 32 inch with a black walnut stock having the most popular trap specifications, which are approximately 14½ inches long, a drop at the heel of 1⅞ inches, drop at cone 1½ inches, full pistol grip and a weight of about 8 pounds.

This new Lefever is and must remain a standardized gun; it cannot be furnished with any other specifications. This gun is about one-third the price of any other complete *hammerless* single barrel trap gun.

SAVAGE PLAY RIFLES

Harmless

The Right Toys for the Hard-to-please Age

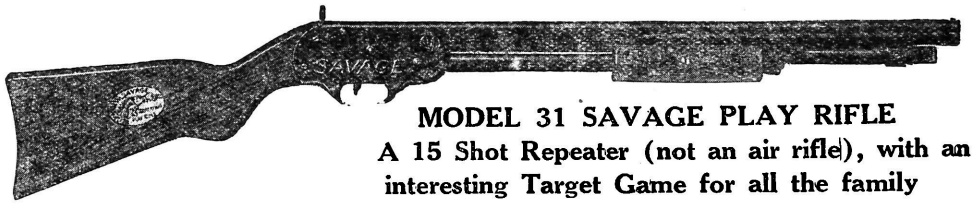

NATURAL WAY TO BUILD CHARACTER

Safe, Sturdy, Easy to Operate—Savage Play Guns are perfect gifts for any time of the year. In thousands of homes they have become necessary parts of the youngsters' daily life. Just get a first-hand inspection of one—judge its features yourself. You will agree with us that there is no more attractive toy made.

Indoors or out they like to play these games—they're in the making now—those youngsters. And there is no finer moulder of sportsmanship and manliness; no more logical developer of hand and eye, than a Savage Play Gun.

The safety feature of each of these toy rifles will impress you—it was the first thing Savage insisted upon in manufacturing them. Ease of operation is the next important element, and the four-year-old will have no trouble in working his play gun. Each is built strongly and simply—yet is light enough for children to "tote" around at will.

A marvelous toy—an inspirer of many games, indoors and out—and aid in character building.

SAVAGE HIGH POWER SPORTING RIFLES. MODEL 99

This is the famous repeating rifle that first introduced the hammerless, solid breech design and rotary type of magazine. Its popularity in every hunting field is immense—for it embodies all the technical superiority and mechanical perfection of tested Savage methods.
Extra safety is built into the Model 99 mechanism. The breech bolt has an unusually large locking area, wedging solidly against the receiver. The cycle of operation is quick and positive—permitting easy firing from the shoulder. All Savage Model 99 rifles are made with barrels of "Hi-Pressure" steel, especially adapted to modern smokeless powder cartridges. And sportsmen around the world know the Savage reputation for careful, accurate rifling and chambering.
The present models now more fully meet the needs of the sportsman than ever before; for a new barrel has been designed to give maximum ballistic efficiency of cartridges and improved balance. Larger forearms, new finish of metal parts, and many other refinements have been added.

Savage Model 99-K
300 Calibre

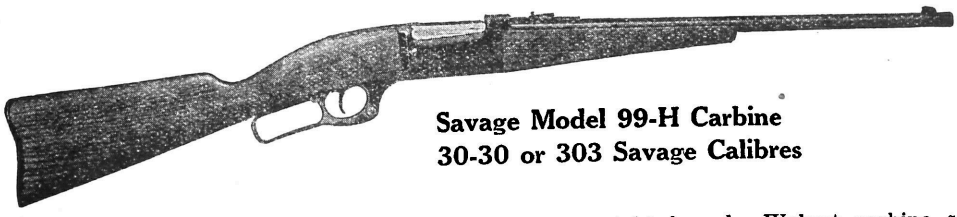

Savage Model 99-G
250-3000 300 or 30-30 Calibres

Model 99K. The outstanding high power rifles of today are Savage Model 99, Styles K and G. They are the most popular rifles and selected by sportsmen who want a moderate weight rifle uniting fine finish with extreme efficiency. Especially adapted to high concentration cartridges because of the exceptional strength and safety of the action, these rifles are ideal for any American game shooting.
The Model 99-K is the finest finished rifle and is a beautiful specimen of high class rifle making. The checkering and engraving are unusually rich and make the rifle an appealing possession to the discriminating sportsman.
This rifle makes the finest type of Presentation rifle.
Model 99-K. Takedown. Same specifications as Model 99-G with following refinements: Selected American Walnut stock and forearm, special fancy hand checkering on forearm, panels and grip. Receiver and barrel artistically engraved. Action carefully fitted and stoned. Lyman rear peep sight, folding middle sight and white metal bead front sight. Calibre, 300 with 24" barrels.

No. 10235—Savage 99-G. 250-3000, 300 or 30-30 Cal. ..... Price each **$61.50**

Savage Model 99-H Carbine
30-30 or 303 Savage Calibres

MODEL 99-H CARBINE. Solid Frame. 20-inch special medium weight barrel. Walnut carbine stock and forearm. Steel butt plate. Weight 6½ pounds.
The Savage Carbine has been designed for men who want a compact, sturdy, well balanced rifle to be carried on the saddle or in the thick timbered country, that is light and fast in action, but packs a blow powerful enough for any big game.
Note its clean cut line, not an extra ounce of weight anywhere, yet it holds firm and steady. Its barrel is made of the same "Hi-Pressure" steel as all other Savage Model 99 barrels and is rifled in the exacting Savage way. These features combine in making this rifle admirably adapted for guides, trappers and others desiring a sturdy, solid frame rifle for rough service at a low price.

No. 10241 ..... Price each **$47.00**

SAVAGE RIFLES

High Power Model 99.

Model 99, Style A

Calibres: Style A. .30-30, .303 and .300.

The Model 99-A Solid Frame Rifle is the original design through which the fame of the Savage Model 99 was developed. The 24 inch barrel in all calibres, the rifle butt plate and straight stock appeals to the sportsman who prefers the longer barrels for assistance in steady, accurate aim, improved cartridge ballistics and reduced recoil. Weight about 7¼ pounds.

Model 99. Style F

Calibres: 30-30 or .303 Savage, with 22 inch barrel, .300 cal. with 24 inch barrel.
The style F is the featherweight model, so called, because the shorter barrel and straight stock with shotgun butt plate makes a quick handling, easy-to-carry rifle, chambered for the most powerful cartridges. Weight about 7 lbs.

No. 10233—Model 99-F ..... Price each **$55.50**

22 Calibre
SAVAGE MODEL 19
N.R.A. Match Rifle

Model 19. .22 Calibre Repeating Bolt Action Rifle. 25 inch barrel. Action obtains half cock on opening stroke, full cock on closing stroke. Both operations by caming movements reduce cocking effort to minimum. Caming action of bolt on opening stroke gives strong primary extraction. Full military stock, oil finished, pistol grip, bands and swivel for sling straps. Aperture rear sight, with windage and elevation adjustments and Marine Corps Type front sight. Five shot detachable box magazine. Chambered for .22 long rifle cartridges. Weight 7 pounds.
Marksmen will find this model particularly adaptable to firing from the various standard positions incorporated in matches of the National Rifle Association. It is a carefully designed instrument of precision, representing as far as practicable a concensus of opinion of the world's finest small bore rifle experts. It is the rifle used by sharpshooters as an understudy to a military rifle and cannot be excelled for accurate shooting qualities by any other small bore rifle.

SAVAGE SUPER-SPORTER

The Most Amazing Rifle Value of the Age.

A big game rifle that sportsmen have craved for years—embodying many features heretofore found only in expensive imported rifles. Chambered for such outstanding cartridges as the famous .30-06 Springfield and .30-30, 250-3000 and .300 Savage, the Sporter Rifle is a quality arm at a remarkably low price.

Locking lugs are set in the walls of the heavy receiver behind magazine. This absence of lugs back of the chamber allows the magazine to feed cartridges directly into the chamber, and consequently the bolt handle has about one inch less backward travel than with lugs on forward end of bolt locking behind chamber. For this reason, the Super-Sporter is easily operated without removing from the shoulder.

The bolt is completely housed in against dirt, snow, etc. The ignition is exceptionally rapid, the firing pin having a ⅜ inch stroke. Another feature is the hunter's ability to insert a fresh magazine while the bolt is closed and a loaded cartridge is in the chamber.

Note the influence of military experts in the grip and butt stock with high comb. The popular British type forestock makes for finer balance and ease in sighting. The barrel is a new design with raised ramp front sight base—the steel of standard grade Government specifications. Model 45 follows the specifications of Model 40, having in addition a new No. 40 Lyman peep sight and folding middle sight, made especially for this rifle.

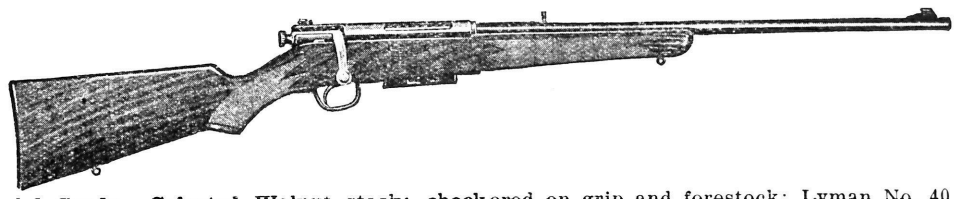

Model 40. Standard Grade. Adjustable flat top open rear sight; white metal bead base front sight. Screw eyes for sling strap.

Calibres: .30-30 and .250-3000 Savage with 22 inch barrel. .300 Savage and .30-'06 Springfield with 24 inch barrel.

No. 10243—Model 40 ..... Price each **$42.85**

No. 10245A—Extra Magazines ..... Price each **2.00**

No. 10525—Lyman Rear Peep Sight, No. 40. Fitted to rifle ..... Price each **6.50**

Model 45. Special Grade. Selected Walnut stock; checkered on grip and forestock; Lyman No. 40 rear peep sight with elevation and wind-gauge adjustments, folding leaf middle sight. Screw eyes for sling strap.

Calibres: Same as Model 40.

Specifications: Bolt action, solid frame repeating rifle. Tapered round barrel with raised ramp front sight base. One piece Walnut stock with pistol grip and British type forestock, rubbed varnish finish; corrugated steel butt plate. Five shots, detachable magazine, 4 shot capacity. Weight about 7½ pounds.

For quality of materials used, excellence of workmanship, and moderate price, the Super-Sporter equals the best of commercial arms. The technical staff of the Savage Arms Corporation has put the sum of its many years of experience into turning out this fine rifle—and the hunter who owns one will find years of true service built into it. For the heavy timber, mountain country—for your next hunting trip, go Super-Sporter equipped.

Genuine Mauser Rifles

The original Mauser Magazine Sporting Rifle, manufactured by Mauser at Oberndorff-on-Neckar, Germany

Possesses the well-known genuine Mauser repeating action clip-loading system, specially adapted to sporting purposes.

It is furnished with all the latest up-to-date Mauser improvements, such as the automatic cocking arrangement, and flange on the bolt plug to guard the shooter's face against any escaping powder gases in the event of a defective cartridge case.

Since in the genuine Mauser rifle there is no detachable bolthead, the locking lugs are consequently solid with the bolt. It is, therefore, impossible to fire the rifle with the bolthead missing, and equally so unless the lugs are properly seated in their respective recesses. The same degree of safety is hardly possible in other systems, where the bolthead carrying lugs are detachable.

Weight. The genuine Mauser sporting rifle weighs about 7½ lbs., is a sporting weapon of considerable ballistic properties, as may be judged from the particulars of firing tests of which details are given further on.

The Magazine, holding five cartridges, is situated beneath the action; it is filled from above by means of the original Mauser charger, and receives the cartridges in zigzag order. At the bottom the magazine is closed by a plate which is flush with the stock, and prevents the admission of moisture, impurities, and other foreign matter. The loading or insertion of single cartridges can easily be effected by hand, either with or without the charger. Single cartridges have only to be placed on the platform and pressed into the magazine. The magazine may thus be replenished to its full capacity at any time and at a minimum expenditure of time and trouble.

Genuine Mannlicher Rifle
30-06 Calibre

The Mannlicher Repeating Sporting Rifle weighs about 6¾ pounds, measurement over all about 45 inches. Double set trigger. Stock and forearm are of one piece fine selected French walnut. Half pistol grip, finely checkered. The magazine holds five cartridges, which may be inserted with clip or singly by hand. Six shots after inserting a shell in the barrel when magazine is filled. An essential of these rifles is the revolving cartridge magazine, which works as carrier and feeder with a cylindrical chamber. This is the only rifle of this style than can be loaded with clip, or singly by hand, as desired. The revolver magazine has various advantages over all other actions. The cartridges lie side by side in separate beds and do not touch each other. The balance of the gun is not changed, as with rifles having magazines that carry cartridges one ahead of the other. All danger from jamming of cartridges when entering the chamber of the barrel is entirely removed, as the cartridges are carried on the exact level with and into the chamber, and not on a slant as with other constructions. Cartridges can be removed from magazine by simply pressing a small spring, unloading in an instant. The whole action is very simple, and can be taken apart and reassembled without tools.

The Mannlicher Featherweight Rifle is made with or without telescopic sights. The telescope is most up-to-date, and can be detached and attached at will. When attached the open sights of the rifle can be used as readily as the telescope.

The workmanship and finish is of the highest order, and far superior to the ordinary machine made rifle, and above all, absolutely accurate.

SAVAGE SPORTER RIFLE

Model 23-A, .22 Long Rifle Calibre.

In these rifles Savage leadership in firearms design and skilled workmanship is again exemplified. The "man's size" stock and barrel has made this arm particularly adaptable for hunting purposes. No other model rifle in recent years has so appealed to the sportsman as a perfect sporting arm at a moderate price.
In accuracy of rifling, in the strong smooth fitting together of working parts, Savage has given the utmost of engineering skill and experience.
The design of stock is the result of long experimenting. The shape of the forestock, the curve and location of pistol grip and dimensions of comb will be found ideal for steady off-hand shooting and brings the arm into perfect balance. The swift easy bolt action, interchangeable box magazine allowing additional loaded magazines to be carried on a day's hunt and quickly inserted if necessary—the marvelous accuracy of barrel and full size of stock has made this arm the ideal small game hunting rifle.

.22 Calibre Repeating Bolt Action Rifle. 23 inch round barrel. One piece stock and forearm of American Walnut, full curve pistol grip, finished in rubbed varnish. Sights are Rocky Mountain knife blade front and flat top elevator adjustment rear, of sturdy construction. Safety at rear of receiver can be operated by hand in firing position. Five shot detachable box type magazine. Chambered for .22 long rifle cartridge. Weight 6 pounds.
The Savage Model 23-A Sporter has the same barrel and action as the famous Savage Model 19 N. R. A. Match rifle. This exceptionally accurate barrel and mechanism so appealed to the small bore rifle experts that a special Sporter stock was designed for hunting purposes.
Those sportsmen who desire to use the .22 calibre cartridge for shooting squirrels, woodchucks, rabbits, coons, muskrats, and other small game valued for fur, or to be exterminated as pests, will find the Model 23-A Sporter to be an ideal small game rifle.

SAVAGE REPEATING RIFLE

1929 Model.

Model 29. .22 Calibre, Takedown, Repeating, Hammerless, Slide Forearm Action. 24 in. octagonal barrel with gold metal bead front sight and adjustable flat top sporting rear sight. Full pistol grip. American Walnut stock, with hard rubber butt plate. Chambered to shoot without adjustment .22 calibre short, long, or long rifle, rim-fire cartridges. Magazine capacity 20 short, 17 long or 15 long rifle cartridges. Weight about 5½ pounds.
Extremely smooth, the action of the new Model 29 rifle is easy to operate. The solid breech, solid top and side ejection encloses all the moving parts within the receiver. The graceful outlines characteristic of Savage arms is increased in the Model 29 rifle by the introduction of an action slide handle as long and well shaped as a regular forearm.
The combination of many unusual features in the design of this rifle, such as the long forearm, full pistol grip stock and long barrel, have been blended with a simple, sturdy action in producing a rifle acclaimed by firearm experts.

22 AUTOMATIC

Remington Model 24.

The new Remington Model 24, is the first autoloading rifle to successfully handle Long Rifle Smokeless or Lesmok Cartridges.

The Model 24 has the hammerless, solid breech construction, preventing dirt, rain or twigs from entering the action which construction gives the arm a very pleasing appearance. The cartridges may be fired as fast as desired, by pulling the trigger for each shot. The recoil ejects the fired shell, loads the rifle, making it ready for the next shot.

The safety is of the cross-bolt type conveniently located in front portion of trigger guard for operation with trigger finger.

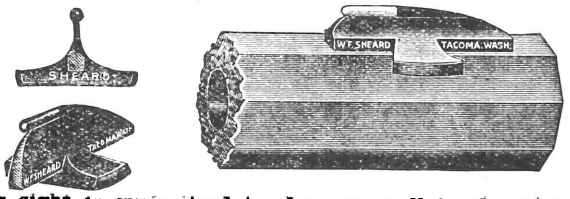

The strong, interrupted thread system of take-down insures the rigid alignment of barrel with receiver when assembled. The barrel may be removed instantly without the use of tools, and permits the cleaning of the barrel from the breech in the proper manner. The action is simple and strong and easily taken apart for cleaning.

SPECIFICATIONS: 19-inch Remington steel, round barrel, half pistol grip stock of American walnut, fitted with steel butt plate. Chambered to take the .22 long rifle cartridge only. Magazine holds ten .22 long rifle. Sights regularly furnished; rear sight with screw adjustment or elevation and white metal bead front sight; top of receiver is matted. Length over all, 37 inches. Note.—When ordering rifle sights, be sure to give maker's name, model, calibre and length of barrel of the rifle for which the sight is to be used.

SIGHTING AND AIMING A RIFLE

How to Aim.

Most shooters agree that in using open sights, the proper method is to line up the front sight so that the top of it will be level with the top of the notch in the rear sight, and, of course, in the centre. Some shooters believe that the tip or bead of the front sight should be held just under the bull's eye, or the object aimed at, while others, who obtain equally good results, hold the front sight directly where they wish the bullet to hit.

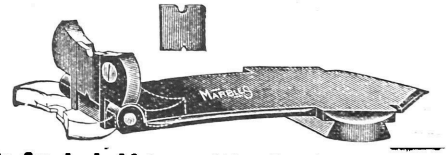

Both methods are equally good, but ADOPT ONE AND STICK TO IT. It is a mistake to draw the bead down so that the top is just visible to the bottom of the notch, as with this imperfect view the natural blurring of the sight will cause the front sight to disappear. Look at the bull's eye and let the sights take care of themselves,

How to Adjust Sights.

A purchaser of any new rifle should test it out himself, before taking it on a trip, adjusting the sights for his own particular purpose. If the shots group too high, lower the rear sight, if too low, raise the rear sight. If to the right, move rear sight to the left (or the front sight to the right); if to the left, move the rear sight to the right (or the front sight to the left) until the rifle places the group at the proper point.

MARBLE'S ADJUSTABLE LEAF SIGHT

Made to Fit American Standard Rifles.

The leaf is firmly held in position by the spring of the long flat part when either up or down, and can be instantly put in either position. When folded down it permits a free use of peep and front sights.

The notch-piece is held at elevation desired by the screw at its side, and is also reversible. The "V" shaped notch is for use with Rocky Mountain Front Sight. The half-round notch is for use with Bead Front Sights.

In addition to its utility as a middlesight it serves as a check to detect any deviation in the alignment of the other sights.

Mention model and calibre when ordering.

No. 10535 ..... Price each **$1.60**

LYMAN REAR PEEP SIGHTS

This Type of Sight Has Real Advantages.

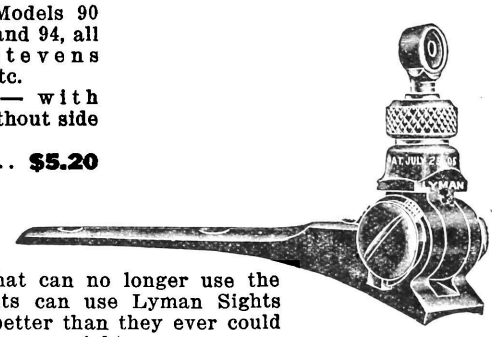

It is easily attached to rifle and readily adjusted for shooting at various distances.

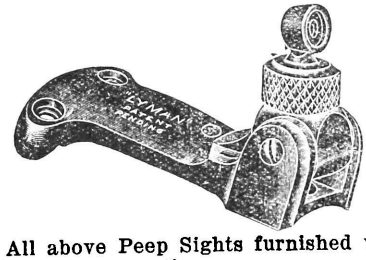

Almost instantaneous aim can be taken, for the object is sighted as quickly as if only the front sight were used.

The Lyman Rear Sight cannot shut out the view of the front sight, nor the object to be aimed at; while with any other rear sight the chief difficulty in aiming is to bring the sights and object quickly into line without interfering with the view of the front sight or object. It eliminates the problem of drawing fine or coarse bead with attendant lack of concentration on the object fired at or result to be accomplished.

For Win. Models 90 and 06, 92 and 94, all calibres, Stevens Favorite, etc.
No. 10523 — with disc but without side lock.
Price each.. $5.20

Old eyes that can no longer use the crotch sights can use Lyman Sights and shoot better than they ever could with the common sight.
Both eyes can be used as well as one eye, and it is a hundred-fold easier to shoot moving objects, running or flying.
Made to fit practically all American sporting rifles, but differ slightly in form and attachments.
For Savage Model 99. All Calibres.
No. 10524—With disc and side lock. Price each.. **$5.75**

For Remington Models 12, 14, 24 and 25, all calibres.

Bi-Color Front for Single Guns.

FOR SINGLE BARREL SHOTGUNS ONLY

No. 10543 — Bi-color Front Sight for Single Barrel Shotguns, complete with tap and wrench **$1.40**
(Packed one in an envelope)

MARBLE'S SHOTGUN SIGHTS

Bi-color Front for Double Guns.

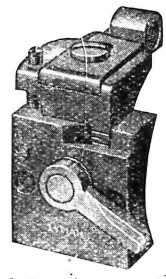

Ivory Rear Sight and Reamer for Double Guns.

The chief and great advantage of the "Bi-Color" sight is that it will not break off as very often happens with an all-ivory sight. It can be seen in any light.
The Rear Sight should be placed at about the centre of the barrels, or from 12 to 16 inches from the muzzle sight, according to the length of gun and shooter's eyesight—never more than 18 inches. The rear sight keeps one from aiming too close to the gun rib, which prevents a clear view of the bird and causes under shooting. Good alignment cannot be secured without a rear sight.

LYMAN ADJUSTABLE RECEIVER SIGHTS

No. 40 and 45 Lyman Sights for Savage Models 23A, 23B, 23C, New Model 40 and 45, Winchester Model 56.
The No. 40 and 45 are Sights which have proven their worth with many sportsmen. They are adjustable for windage and elevation; the ordinary Tang Sight cannot be fitted to these Rifles which are all drilled and threaded to take the above sight, with the exception of old Model 23A, B or C. Tap and Drill for these Rifles supplied at small extra cost. In mounting this sight a slight cut is made to let the base of the sight into the wood of the stock, so that the base is directly against the metal of the receiver and flush with the stock. This protects it from possible damage and permits the rifle to slip in and out of the gun case easily. Anyone can easily attach the sight in a few minutes.

For Savage Models 23A, B or C.

MARBLE'S ANTI-RUST ROPES

For Shotguns and Rifles

When saturated with oil these "ropes" exclude all air and moisture and make it impossible for the barrels to rust or become pitted. They are longer than the barrel and larger than the bore. This insures a constant pressure of oil against the entire circumference of the bore. One oiling will last for a year.

Quantities of Oil Needed to Saturate Marble's Anti-Rust Ropes

A 12-gauge rope needs 3½ to 4 ounces. A 30 calibre rope needs two-thirds of an ounce.

To saturate—Place rope in a receptacle and pour on oil until rope refuses to absorb any more (a 12-gauge rope will hold 7 to 8 ounces) then wring out as dry as possible. As much oil will remain in the rope as stated.

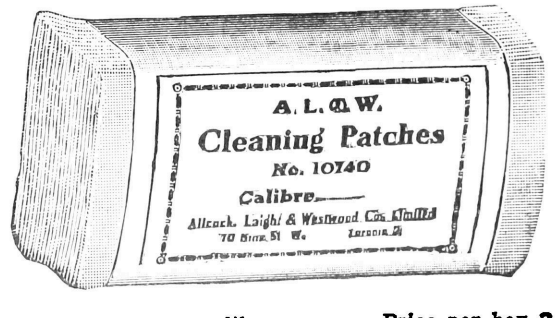

From this information anyone can figure out the quantity of oil to purchase to saturate any size rope.

For shot guns, 12, 16 or 20 gauge; for rifles, state calibre.

GUN CLEANING MATERIALS

MARBLE'S JOINTED BRASS RIFLE ROD

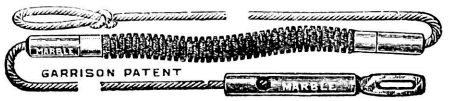

Cut below shows steel connection. Roller-Bearing swivel shown above.

See that Steel Connection!

The view of joint shows size of rod for .30 calibre and larger rifles. Note the size—which gives needed strength. It will not break off in the rifle. It is as rigid as a one-piece rod—and stays so.
The swivel is a steel roller bearing—at the end of rod—where it will prevent unscrewing of joints. This accurately fitted bearing withstands hard pulls and thrusts.
The handle projects beyond ferrule and prevents marring of muzzle.
Made in 30″ length.
Furnished with jagged and slotted tips, packed in cloth bag.

No. 10555—.28 calibre and up .....Price each **1.40**

MARBLE'S FIELD CLEANER

The cleaner is the same as Marble's Rifle Cleaner. The loop can be put over some projection, the weight dropped through the barrel and held in one hand, while with the other the gun is moved back and forth. This saves much time and labor in cleaning bad spots.
Made for all calibres of rifles. In ordering give make and calibre of rifle for which you desire to use the cleaner.

No. 10558 .....Price each **$1.25**

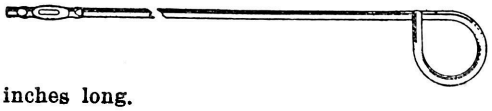

MARBLE'S RIFLE CLEANER

The sections are made of a number of discs cut from softest brass gauze. They are separated by small fibre discs and strung on a spirally-bent spring-tempered steel wire.
The sections are smaller than the bore of rifle or revolver, therefore the spiral core forces only one part of each section against the bore, with the result that the cleaner must follow the twist—reach into every angle of the rifling and rapidly remove all lead, copper, rust or powder residue.
When sections become worn on one side they can be turned.
When ordering give calibre and make of rifle. Will fit all rifle cleaning rods listed in this catalogue.

WINCHESTER RIFLE CLEANING ROD

For Rifles of .30 Calibre or Larger.

The defects and weaknesses of jointed rods in general were carefully considered and overcome in designing the Winchester Steel Rifle Cleaning Rod. With the exception of the handle, which is wood, this rod is made entirely of steel. It has three sections, three different tips, and a swivel handle which allows the rod to revolve as it takes the rifling in the barrel when in use without twisting in the hand or unscrewing at the joints. The rod has a long bearing in the handle that rests on a steel base, which takes the strain off the swivel pin and gives practically the same effect as ball bearing. Being made of steel throughout and having specially designed joints, this rod is practically as rigid, substantial, and lasting as a solid rod. The joints have a long slow screw and a large and long dowel bearing almost the full size of the rod.
This not only makes a strong and stiff joint without any play to it, but also tends to prevent the joints unscrewing when the rod is in use. The rod is 44 inches in length; but, as the sections are interchangeable, it can be shortened by using two or even one section. The head tip has a flat surface and crowned edge, and can be used for calibrating barrels with a lead slug, as well as for cleaning purposes. The slotted tip has a large opening which permits the use of a good-sized piece of cloth for cleaning or wiping. The third tip is made to accommodate a universal rifle brush, or any brush having the same thread. This rod is suitable for use in rifles of .30 calibre or larger, and will be found highly satisfactory in every way. Riflemen who have tested it pronounce it the most substantial and practical jointed rod ever offered. The rod is packed in a cloth bag.

No. 10666 .....Price each **$2.50**

MARBLE'S SHOTGUN CLEANER

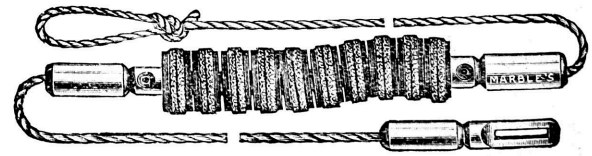

Made to Fit All Standard Rods.

The sections are made of discs cut from softest brass gauze. They are separated by fibre discs and strung on a spirally-bent spring-tempered steel wire.
The sections are smaller than the bore, therefore the spiral core forces only one part of each section against the bore and gives equal pressure from chamber to choke. When sections become worn on one side they can be turned. Cleaner lasts a lifetime.

MARBLE'S NITRO-SOLVENT OIL

In New Containers

3 oz. can displaces 2 oz. bottle

3 oz. can

6 oz. can

A solvent is combined with a lubricant and other ingredients to make an oil that will dissolve and remove powder residue and leave the barrel and works lubricated.

Marble's Nitro-Solvent Oil should be used alone—no other oil is necessary when the cleaning is finished.

It stops corrosive action by neutralizing the acids of the residue before or after they have penetrated the steel.

It removes and prevents rust. Contains no acid. Will not congeal. Cleans and polishes varnished finishes.

Because of the solvent properties the oil does not dry up quickly and will not gum. This makes it a perfect lubricant for reels, motors and light machines.

Recoil Pads, Game Calls and Decoy Ducks

THE HAWKINS' RECOIL PAD

Saves Your Shoulder
Improves your Score

Used exclusively by world famous shooters, such as Mark Arie, Frank Hughes, Sam Sharman, Walter Warren, Fred Etchen, Frank Troeh and many other shooters of known ability.

Regardless of how well you shoot, you will improve your scores if you attach a Hawkins Recoil Pad, the pad that has proven its superior merits the world over.

Being made of soft, pliable red rubber, shooters having the most sensitive shoulders can shoot continuous heavy loads without unpleasant effects. This also applies to users of high powered rifles, many rifle men appreciate the relief they have experienced after attaching the Hawkins Recoil Pad.

The truss formation between the two walls forces the gun to move straight back and not up or down when pressure is brought upon it. That is the reason the Hawkins Recoil Pad never bruises the cheek or irritates the shoulder in the least.

The Hawkins Recoil Pad, 1⅛" thick, is now made from our new moulds, and has the rounded top vulcanized to a black hard rubber base.

12 gauge size, 5½" long.

16 or 20 gauge size, 5" long, also used for high power rifles.

SLING STRAPS

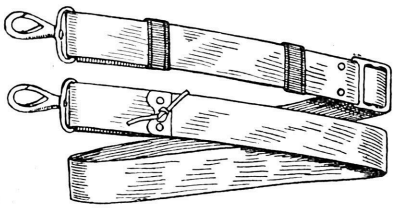

A Sling Strap is a very necessary part of a hunter's equipment. Few people buy rifle covers without slings, but think of the advantage of being able to throw your rifle over your shoulder, leaving hands free to light your pipe, shove aside brush that may be in your way, or dozens of little things that require two hands. With this handy sling you need never lay your rifle down to get misplaced, thereby causing many anxious moments.

The Handy Sling is IDEAL FOR HUNTERS AND TRAPPERS.

Make Your Camping Trip Safe

Accidents will happen on the most carefully planned hike or camping expedition.

Campers, hikers and sportsmen in general are at all times exposed to countless cuts, scratches and bruises incidental to outdoor life.

These small injuries which at first seem trivial, may develop into serious illness if not properly cared for.

The wise and experienced hiker or camper is the one who prepares for an emergency beforehand.

Insure yourself against serious injury by including a first-aid kit in your equipment. With first-aid protection minor accidents are made harmless, major accidents relieved.

The first-aid kits listed below are especially suited to the needs of the outdoor enthusiasts, as they are very compact and light in weight, yet contain sufficient material for the dressing of ordinary wounds.

CAMP-HUNTING AND SCOUT AXES, ETC.

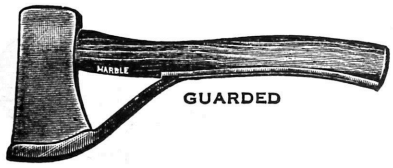

MARBLE'S SAFETY AXES

Are large enough to fell a tree and small enough to carry in a pocket. A perfect axe for "blazing," clearing a trail, setting a tent, and as necessary in the woods as a gun or knife. The standard axe for Boy Scouts. A necessity for the auto tourist, and safely carried anywhere in a car. The nickel-plated, spring-hinged guard is lined with lead and folds into the handle. The blade is made of tool steel, carefully tempered and sharpened. The handles are drop forged steel, nickel-plated, and never break. The side plates are of rubber. The wooden handles are of selected hickory, with nickel-plated guard and receiver.

Weight 20 ounces. Length 11 inches. Solid steel blade, 2⅝ x 4 inches.

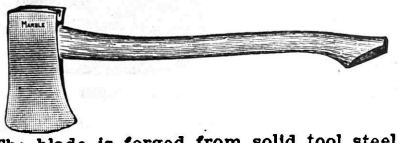

No. 13180.....Price each $3.70

A. L. & W. PERFECT AXE

Handle Construction
Leather Washer

The A. L. & W. Hunter's and Camper's Axe is guaranteed by free replacement that the thin, light, tempered steel handle and genuine leather grip will never break or loosen. The edge, face and claw have no superior. This axe is made of one piece, forged and tempered steel head and handle. Eight reasons why it is superior:

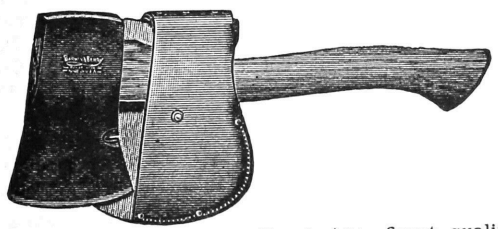

1. The head cannot come loose.
2. Handle will not break or split.
3. Side blows, pulling or splitting do not harm them.
4. They are well balanced.
5. Thin handle for close quarters.
6. Comfortable "Lifetime" leather grip.
7. Always some length for measuring.
8. Thin blade makes grinding easy.

The handle is made of leather washers one on top of the other, similar to hunting knife construction.
Width of blade 3 x 1¾ inches at head. Length of blade 5 inches. Size of head ¾ x 1¾ inches. Length over all 13 inches. Complete with heavy leather sheath.

American Ready-Lite Lamps and Lanterns

Instant Lighting—No Generating

The new American Ready-Lite lamps and lanterns mark the greatest advancement which has ever been made in gasoline lighting appliances. New design, new beauty, new features, new conveniences, new safety make them incomparably superior to anything which has preceded them.

American Ready-Lites light instantly. Open the valve—light them just as you would light gas—without generating. A new carburizing device mixes atomized gasoline and air in correct proportions to form a perfect gas for lighting. No generating, no preheating of any kind. You can't do it wrong because the regulating and cleaning valve, an exclusive American feature, automatically keeps the intake orifice clean and admits just the correct amount of fuel for perfect lighting.

Automatic Tip Cleaner.

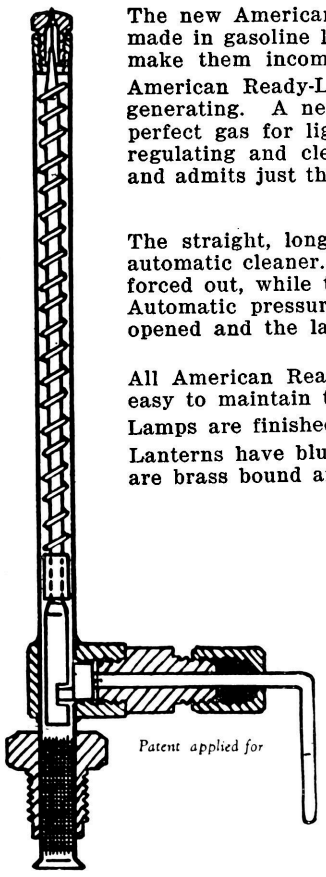

The straight, long life American Ready-Lite generator has been further improved by the addition of an automatic cleaner. By means of this device carbon and other deposits in the gas orifice are broken up and forced out, while the lamp is burning and without interfering with the light.
Automatic pressure release permits the air to escape and prevents flooding if the gasoline supply valve is opened and the lamp not lighted.

Built-in Pump.

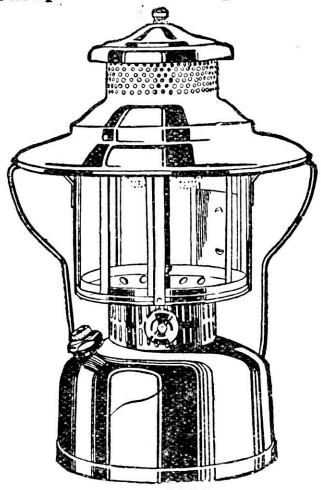

All American Ready-Lite lamps and lanterns have hand operated filled plug and built-in pump, making it easy to maintain the best working pressure.

Lamps are finished in attractive lacquer colors and come with heat resisting Monax glass shades.

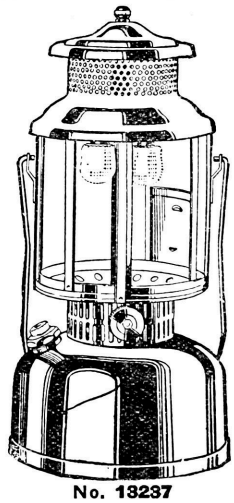

Lanterns have blue vitreous enamel tops and the fount is finished in durable blue lacquer. Mica chimneys are brass bound and rust-proof. Other exposed metal parts are cadmium plated and rust-proof.

STONEBRIDGE FOLDING LANTERN

The new Stonebridge Folding Lantern, an old friend in new clothes, supplies the light that never fails. Yes, its only one candle power, but you would be surprised what a lot of light this is when your other lights go out. Electricity fails when it is most needed. Batteries wear out without warning, wires are short circuited and then you would give anything for a dependable light.

For camping, automobiling or in the home a good dependable emergency light is as essential as any other necessities of life.

The new Stonebridge weighs only 23 ounces and, when folded, will go in a coat pocket. It is easily put together and there are no loose parts. It takes a candle of almost any size.

It lends a feeling of confidence to motorists who have had trouble at night with their ignition system. It is safe to use on boats and in camp, for there is no oil to catch on fire. The candle burns brightly in the strongest wind or storm, and throws out ample light for over three hours.

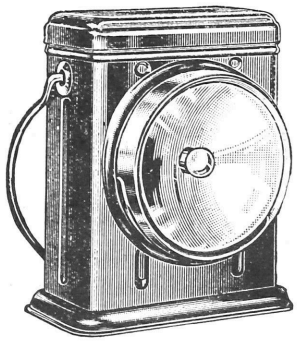

Lamp folded, 4¾ x 7½ x ¾ inches thick.

Lamp upright, 4 x 4¼ x 10 inches high (handle not included-.

Ideal for canoe trips, prospecting, etc., etc.

CAMP COOKING OUTFITS

Solid Aluminum Handles Excepted.

THE PERFECT COOKING OUTFIT

Outdoor Cooking Should be a Pleasure.

The experienced guide likes to cook. A lifetime in the open has taught him the art of handling utensils over an open fire. His outdoor "kitchen" is operated as efficiently as another man would conduct his business. His utensils—the tools of his craft—are nested, packed, used and cleansed . . . admirably. You can have a better outdoor kitchen than any guide has ever used. This Camp Cooking Outfit has been designed and assembled to provide every lover of outdoor life with kitchen-craft equal, if not superior, to that of the most experienced guide. The utensils comprising the Camp Cooking Outfit are made of heavy gauge aluminum, and will withstand the severe service of the camp. The entire set is extremely strong, will not dent easily, no solder or seams to melt over the hottest fire, and it is always sanitary. As a camp cooking outfit requires compactness and close nesting for convenience in carrying, this outfit fits snugly into a strong canvas case, not over 10½ inches high and 10½ inches in diameter—built to carry packed out of sight at the end of the canoe, motor boat, or in the automobile. It is ideal for the man who packs and carries, requiring a complete cooking outfit at a minimum weight.

This Outfit makes cooking a pleasure rather than one of the tedious annoyances of your vacation. It's the outfit you will carry always on your week-end or vacation outings.
The knives and forks are of hand-forged steel, nickel-plated, and will keep their edge. All utensils are full capacity.

No. 13430 ..... Price each **$14.00**

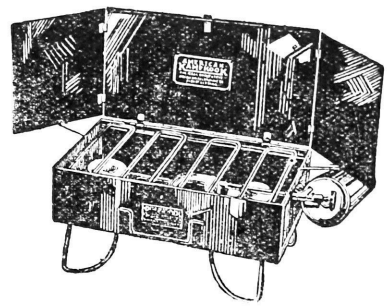

THE first American Gasoline camp stove was built in 1911. Constantly improved from time to time, Kampkook has kept pace with the rapidly growing popularity of motor camping, and is used by more campers than all other camp stoves combined. It is everywhere recognized as the favorite camp stove. It has several patented features which can be had in no other stove.

Kampkook provides for camp life all the convenience, cleanliness and comfort of the kitchen range. In camp or on the road, it is always ready instantly for any cooking job. Because of its easy, sure method of generation, it lights quickly in any weather. Only the master burner must be generated. When lighted, it produces gas for the other burners, which are turned on or off as wanted, just like city gas.

Kampkook does not require special fuel. It makes and burns its own gas from any good motor gasoline, producing a flame equal to city gas in heat and speed, and entirely free of smoke and soot. Kampkook is built substantially to stand the hard knocks to which camp equipment is subjected. Burners are bolted firmly to the case; no complicated adjustments, nothing to get out of order. Children can operate Kampkook.

Kampkook fuel tanks are of exceptionally large capacity, holding sufficient fuel for several days' service. They are detachable for convenient filling, a patented feature. If tank burns dry, it is unnecessary to take the hot stove to the fuel supply. Just remove the tank, leaving stove and utensils undisturbed. Kampkook tanks have built-in funnel, built-in brass air pumps in Nos. 7, 8 and 10. Generator is rigidly attached to tank; no possibility of leaks. The tank is always cool, always safe. Kampkook burners spread the fire evenly under the utensils; they do not burn out, nor will they clog if food boils over.

KAMPKOOK No. 3

Most compact size. Has two burners, 8x14½ inch cooking top, unbreakable steel grate, folding wind shield which may also be used as a back shelf. Coppered tank with built-in funnel holds one quart, three hours' supply for both burners. Olive drab baked enamel finish. Folds to 3½x8x14½ inches. Weight, 9 lbs.

No. 13425 ..... Price each **$7.50**

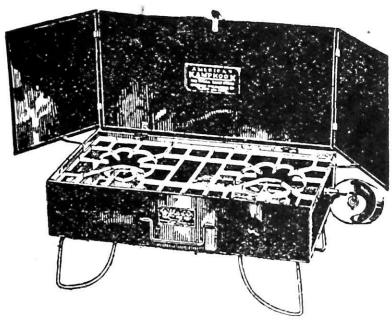

Kampkooks are the most practical camp stove.

All American Kampkooks are equipped with permanently attached, folding wind-shield, providing ample protection against adverse weather conditions. The wind-shield is adjustable, permitting the use of utensils of various sizes. May be turned back on a level with cooking top, making a convenient shelf—a patented feature. Built-in control valves are integral parts of stove and cannot be lost. They are always cool and comfortable to handle. Sturdy steel legs lock in position automatically and support the stove rigidly; for travelling, they fold and lock inside the case.

Kampkook is the safest camp fire for every occasion, everywhere. In fact, its use is permitted and recommended where open camp fires are prohibited. Kamphook is used extensively as a tent and cottage heater.

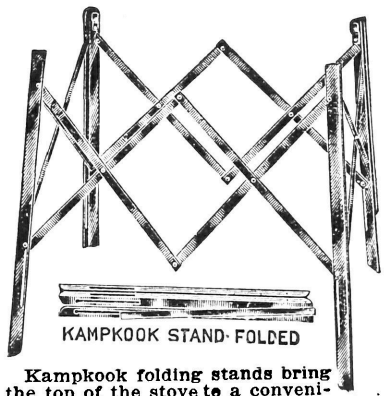

Kampkook folds and carries like a miniature suit case. No separate pieces to mislay or lose, no projections to break—it's all inside. Beautifully finished in special Kampkook olive-drab baked enamel.

KAMPKOOK No. 7.

Has two burners, 19x10 inch cooking surface, folding wind-shield which may also be used as a back shelf. Two quart coppered tank, with built-in pump and tunnel, holds six hours' fuel supply for both burners. Olive drab baked enamel finish. Folds to 4¼x 10½x-9½ inches. Weight, 15 lbs.

Genuine Primus Stove

With Combination Roarer and Silent Burner

Take Down, Packs in Small Space

For tourists and travellers who enjoy outdoor life, the Primus Stove has become an indispensable article of equipment.

In order to satisfy a steadily increasing demand for a fine stove suitable for travelling and camping out purposes, the Primus Company have constructed a special stove, shown above, which can be taken to pieces to make the stove as convenient and easily carried as possible.

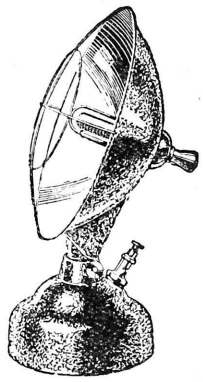

It is provided with burners of a specially simple and solid construction, and can be made to roar or to burn silently according to wish. The burners consist of a simple, straight vaporizing tube, and a brass gauze which is placed within the tube, the object of which is to catch any impurities that may happen to be in the gasoline or coal oil. This gauze can easily be taken out to be cleaned. All the parts can be taken to pieces and can easily be replaced by new ones when necessary. They are carried in stock or can be procured quickly for you at all times.

This stove is packed in cardboard box complete with top ring, burner plate, silencer, Primus lighter, wrench, cleaning needles, tank plug to prevent gasoline from draining from tank when stove is taken down for carrying. Made of solid brass, highly polished, except legs, which are made of galvanized steel rod.

Tank holds about 2 pints, sufficient fuel for about five hours burning with normal flame. Full height when set up 8", width about 7", depth 3½". Size when packed, 3¾ x 8 x 8 inches.

THE NEW PORTABLE GASOLINE GAS HEATER

In every climate and in every season of the year, there are times when physical comfort requires additional warmth. Cool mornings and evenings, damp, chilly days demand artificial heat. No heater so admirably meets this demand as does the American Readyglo.

Think of the comfort which the Readyglo brings to the summer cabin, the camp, and numerous other places where a small auxiliary portable heater is needed.

MAKES ITS OWN GAS

Lights With A Match.

This heater like the other well-known American appliances it makes its own gas from any good grade of untreated gasoline. It lights with common matches, no other generating required. It is simple and easy to light and operate.

WELL-BUILT—PLEASING DESIGN

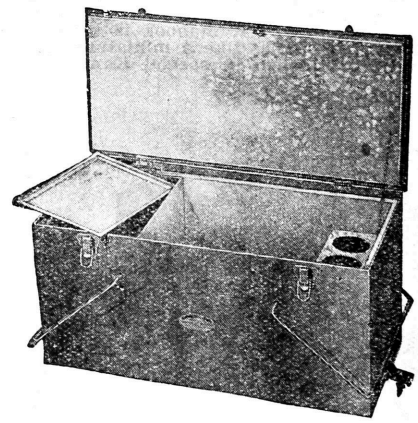

The Readyglo is of pleasing design and attractive appearance. The fuel fount is drawn from heavy gauge, special alloy coated, rust resisting Armco iron. It has hand operated filler plug with built-in pump in single unit construction. The reflector is aluminum, polished on the inside. The heating element, a new development, is a special, high heat resisting metal alloy. The Readyglo is beautifully finished in green and black crackle lacquer to harmonize with the color scheme and furnishings of any room.

ADJUSTABLE REFLECTOR.

The Readyglo reflector and heating element are adjustable, permitting concentration of heat just where it is wanted. The diameter of the fount is 8½ inches and its fuel capacity is about three pints. Readyglo will burn 15 to 18 hours with one filling—45 to 50 hours' service with one gallon of gasoline. The height is 19½ inches and the reflector is 14 inches in diameter. Weight, 6 pounds.

NEW ALADDIN FIELD JUG

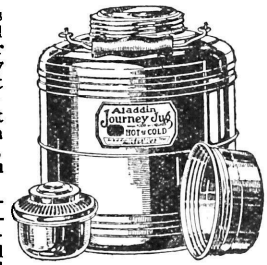

The new Aladdin Field Jug represents the very maximum in quality at a surprisingly low cost. It incorporates all the vital features that make for a highly efficient, large capacity thermal container, and has refinements not found in many jars of much higher price. The Aladdin Field Jug will render a lifetime of service and is well finished throughout.

Gallon size only, with vitrified porcelain-like white glazed inner, sealed to a two-piece drawn steel outer jacket; high efficiency insulation; equipped with sanitary mushroom aluminum stopper and low polished aluminum cover.

Brewster green baked-on enamel finish.

No. 13373 ..... Price each **$2.75**

The Aladdin Journey Jug answers the need for a large capacity food and liquid thermal container in a far greater degree than represented by its price. Not a single feature that goes to make a substantial, long-lived, durable, well-finished product has been overlooked. A comparison of the details of its construction, given below, will readily show you why it is the popular choice.

The Aladdin Journey Jug is of one-gallon capacity; has hand-size opening; vitrified porcelain-like, white-glazed container. Famous patented Aladdin neck-seal joining inner and outer jacket of lead-coated steel forms a permanent leak-proof and germ-proof union between them. Unusually high in efficiency. Has sanitary glass stopper and heavy, full-size polished aluminum cup-cap.

SPRING CAMP COT, STEEL FRAME

Side-springs make a cot as comfortable as your own bed.

The latch assures rigidity, prevents sagging and takes up stretch.

Self-locking bracket automatically locks legs to frame.

WITH SPRINGS LIKE A SPRING BED

This One-Piece Cot is made with springs like your own bed. Uses the same helical springs that are found in a good spring bed, but with this difference: The springs, instead of being on the ends, are on the sides—14 springs on each side.

You can put up this new Cot in a jiffy. Simply unfold it and straighten the legs. Special **locking brackets** automatically lock the legs to the frame, thereby making the most rigid cot built.

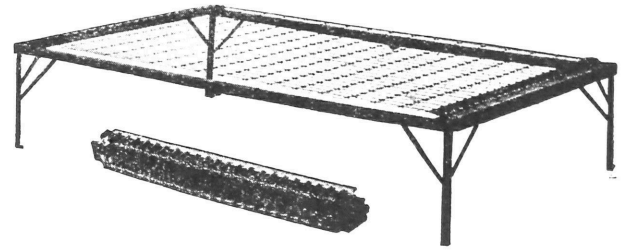

Frames are made of selected, specially analysed steel tubing, which assures you of a strong, rigid and durable Cot.

SPECIFICATIONS

Beautiful maroon enameled steel frame with helical side springs and locking-latch on each pair of legs. Brown, extra heavy, special weave duck top. Opened: 6 ft. 4 in long. Original width 26 in., stretching to 27 in. Folded: 38 in. long, 5 in. sq. Weight: 19 lbs.

STEEL TENT POLES AND PEGS

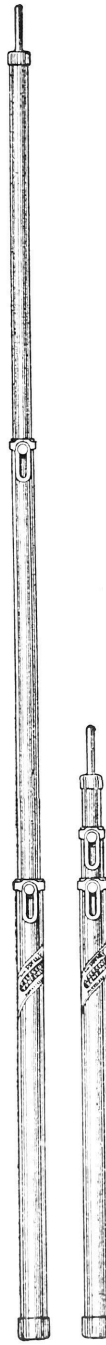

PREMAX PARKERIZED STEEL TENT STAKES AND TELESCOPING POLES

PREMAX Telescoping Uprights and Ridges are sturdy, rust-proof steel tent poles made out of sections of heavy tubing that all collapse into one piece about four feet long when not in use. No other type of pole takes up so little space in the outfit, yet the close-fitting, tubular sections extend out to a rigid full size length when erected. Saves time and space when packing up.

When setting up tent on uneven ground, exclusive PREMAX Locking Device allows pole to be instantly adjusted to any desired length, thereby permitting a tightly drawn and neat tent under all conditions. This feature will also take care of any stretch in canvas that may occur after tent is placed in service.

Parkerized for real protection against rust and then finished in attractive coat of olive drab lacquer. Neat, simple, and the type of equipment that will stand up a long time in all kinds of weather or usage.

PREMAX Steel Tent Stakes in use for 25 years—simple construction—broad reinforced head for easy driving that won't flatten out or spread from repeated hammering and driving. Designed to drive quickly in any kind of ground. Will hold firmly and pull easily.

Parkerized for rust-proofness! Take up less room than wooden stakes—much stronger and just about as light in weight.

For real service and convenience, get PREMAX Parkerized Steel Equipment this season!

The Perfect Tent.

Airo Cushions, Mattresses, Etc.

Now Made in Canada

AIR FOR CUSHIONS AND MATTRESSES

Air is everywhere, costs nothing, never sags or rots. Is very elastic, best shock absorber known and weighs nothing. A sanitary filler for cushions, pillows, mattresses, and is being adopted rapidly.

The Airo Construction

Any Air Cushion or Mattress

Is somewhat comfortable; however, it was not until the invention of K. & W. Airo construction and patented process that maximum comfort was obtained.

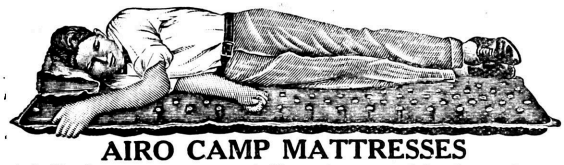

The "old-style" air cushion is only an air bag, varying in size, shape and thickness. To carry one's weight, it must be inflated as hard as the filler in a stuffed cushion—high air pressure. It tends to roll, tip, tremble, etc., as there is no tied-in-series of internal air cells.

An elastic rubber sheet runs horizontally (as shown by the white line). The dimples are vulcanized to this in a zigzag manner—are not opposite each other. The air passes around the edges. Notice how the elastic web separates the layers of air pockets and reinforces the sides.

This web ties the cells together, pulling some on all of the cells, hence little air is required, resulting in the balloon low air pressure principle—adjustable to any weight or degree of comfort.

Note the tufted effect and how the tufts work independently of each other, fitting the body scientifically—distributing the pressure perfectly. The tufts are always soft, as the internal bridgework carries the strain. The dimples insure circulation of air.

AIRO products are not cemented together, but vulcanized throughout in the open steam, like the best inner tubes. Made of Selected Virgin Rubber in our own factory. All items easily inflated, quickly deflated; pack into small space. Whenever cloth is used, it is always coated on the inside with a heavy layer of rubber.

AIRO CAMP MATTRESSES

Camp comfort depends chiefly on a good bed—and a good bed depends chiefly on the mattress. You can now have perfect rest and sleep in any camp—in any climate—on any cot or on the ground—if you have an AIRO camping mattress. Cot not necessary.

Here is the approved solution to camping's biggest problem. Here is a mattress light in weight and easily carried, wonderfully soft and comfortable, that guarantees you a dry, warm bed and a good night's rest—any time and anywhere.

No. 13805—26½ x 74 ..... Price each **$22.50**

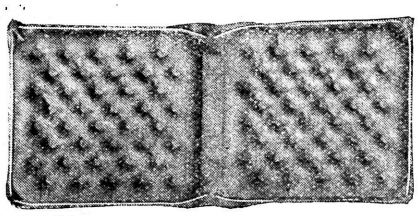

SLEEPWELL CAMP MATTRESSES

SLEEP-WELLS are built of the same material, same rubberized khaki cloth as AIRO mattresses; however, SLEEP-WELLS have no bridgework nor air cells, but perdendicular rubber partitions only, thus costing less to make.

The partitions are not sewed nor cemented to the top and bottom, but the mattress is made by the same process as the AIRO mattress—cured in the open steam—vulcanized throughout into one piece.

No. 13810—Canoe mattress, 25 x 48" .. Price each **$13.50**
No. 13812—Regular mattress, 25 x 73" Price each **$17.50**

AIRO BOAT CUSHIONS

Wonderfully comfortable for rowboats and motor boats and as a canoe cushion. Useful to kneel on when paddling.

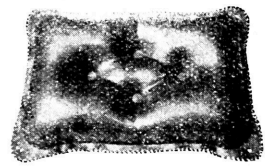

Is made of Jean cloth, other side dark grey rubber.

Is made with two-separate-air-chambers with a hinge between. Has a "strong" life-line running around the edge of the cushion at all points. Life-line can be detached—cushion used elsewhere later.

Either size cushion will support two or three people according to conditions, combining safety with comfort when on the water. 13" x 31" (inflated).

No. 13818 ..... Price each **$6.50**

AIRO CAMP PILLOW

An ideal pillow for the perfect AIRO mattress; soft and fluffy. Light, comfortable, easily carried. Can be used as a cushion to provide a soft, dry seat. Affords support to the back when motoring. Vulcanized throughout.

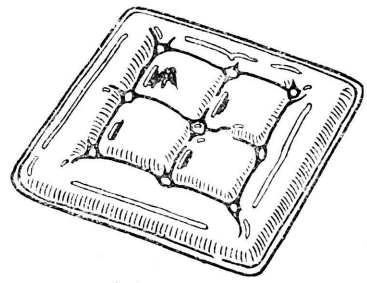

Is 10" x 14"—3" thick (inflated). A tie-hole in each corner. Dark Grey Rubber one side, corduroy reserve side.

No. 13820 ..... Price each **$2.50**

Dark grey rubber one side, khaki jean reverse side.

No. 13821 ..... Price each **$2.00**

KUMFY SEAT CUSHION

A pure rubber general utility cushion. The tufting permits less inflation with a greater amount of comfort and service than in the ordinary inflated cushion. Splendid for boating, camping, motoring and as a household and sports cushion. Green and rose colors. Easily inflated with the mouth; when deflated can be carried in the pocket.

No. 13825 ..... Price each **$1.50**

SPONGE CUSHION OR KNEELING PAD

No. 13828 .. Price each **.50**

JEM SWIMMING FLOATS

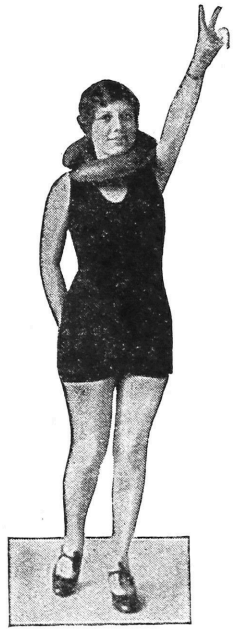

Easily and quickly inflated—ready in a jiffy. One valve for all air chambers. This insures equalized air pressure—an important feature. The new boat shape does not retard the swimmer, but cuts through the water like a canoe.

Made in two sizes. One as shown, adult size, has three pontoons or air chambers. The junior size has two pontoons only. Both are very attractive. Will not wrinkle and are most durable, vulcanized throughout, equipped with strong web belt for fastening to body.

No. 13830—2 cell junior .... Price per pair **$1.50**

No. 13832—3 cell adult .... Price per pair **$1.75**

JEM SWIMMING COLLAR

This is a practical life preserver. Worn around the neck, inspires confidence in anyone learning to swim. Allows perfect freedom of arms at all times. Is safe for both children and adults. Provides safety for boat racing, fishing, etc., without hindrance.

Has a large air-chamber and will float anyone in an upright position and keep the mouth out of water. One valve, is quickly inflated and ties on securely in a moment. Outside measurements, 12 x 13" diameter, when inflated.

No. 13834 ..... Price each **$2.50**

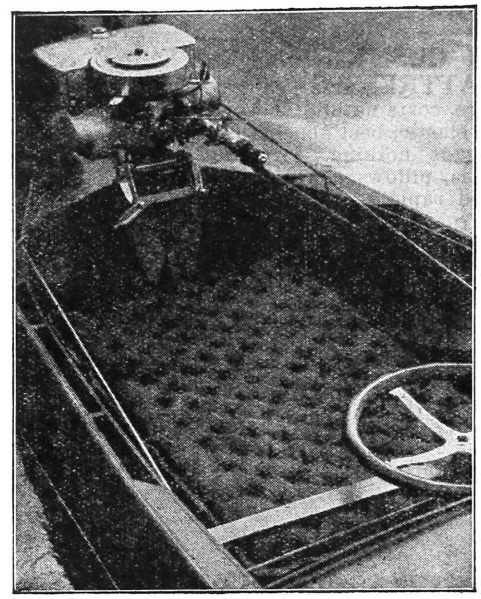

JEM SWIMMING WINGS

A specially large sized pure rubber swimming wing, easily inflated. Will support any weight and stay up indefinitely. Rubber valve is completely concealed when wings are inflated; size, 31 inches long x 9 inches across wings; colors, green and rose.

No. 13840 .....Price pair **$1.50**

AIRO RACING BOAT MATTRESS

Miss Helen Hentschel, America's Champion Woman Outboard Racer, took with her to the German Races this Boat and Mattress "AIRO" Mattresses permit drivers to concentrate on their driving.

AIRO cushions and mattresses are ideal for boats. The cross-web air-cell construction absorbs shocks and prevents "bouncing" more effectively than any-other-construction.

"AIROS" make boat racing safer and a real pleasure. Are washable, light and fold very small.

A noted Boat Racer, says: "I used your Racing Boat Mattress in several races and am very well pleased with it. I did not experience any 'sore spots' as I did before I received this Mattress. I won the Special Race and I can place my success to nothing but the comfort that I received from your Mattress."

The consistent winners use Airo Mattresses.

No. 13815—26½" x 36" ..... Price each **$13.50**

No. 13816—21½" x 36" ..... Price each **11.50**

WHOOPEE BALL

A pure rubber sports ball. 9½" in diameter deflated; can be inflated to 14 inches. Made in bright green and rose colors. The edge is pinked and vulcanized for ¼ inch making the ball specially strong. Snappy lithographed decoration on each side. A dandy water or beach ball. Rubber valve is folded into ball completely upon inflation, is secure and out of the way, and requires no tieing or cap.

No. 13845.....Price each **$1.00**

SWIMMING DUCK

Just great for the kiddies and bouyant enough for grown-ups. Made in the shape of a duck with two air chambers joined at head and tail. Can be quickly inflated without the use of a pump. For children this may be worn under arms and does not interfere with swimming movements. 26 inches long. Made of pure rubber, in rose or green. Seams are vulcanized, not cemented or sewn and cannot rip.

Goodrich Hi-Press Outing Boots

Famous for Strength, Lightness and Long Wear

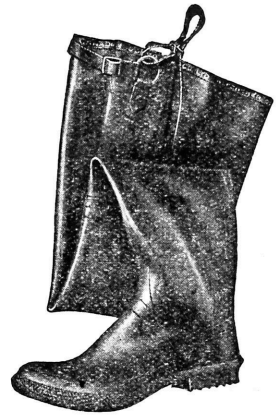

Lightness and toughness, to a degree never before thought possible in this class of footwear, are the outstanding characteristics of these famous boots.

It is the exclusively Goodrich Hi-Press method of vulcanization which makes them so strong and light, yet exceptionally durable—and with their ability to withstand knocks, bumps and all varieties of hard wear, so handsome appearance, fine, snug-fitting qualities and down-right solid comfort.

Both Canadian and American sports have long known and appreciated the comfort and long-wearing economy of these splendid boots.

There's a style to suit the whim or needs of any outdoorsman.

Litentuf

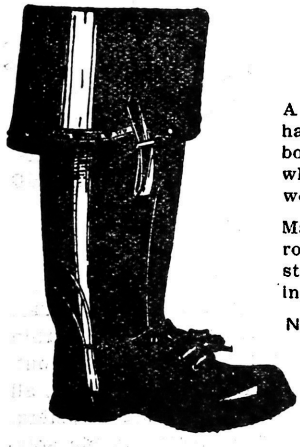

(Shown to the left)

Litentuf is the name—and light and tough they are. Built especially for sportsmen—men who want a tough, watertight boot that can be carried when it is not being worn.

The whole boot is flexible—not merely the top—and it can be folded up into a handy roll.

A black gum thigh boot, equipped with thigh strap; ideal for angling or hunting where the footing is marshy or where shallow streams must be crossed. Will give the utmost in service under severe conditions

No. **14043** ..... Price per pair **$10.00**

The Bangor

(Shown above)

A strong, sturdy, snug-fitting and handsome boot with brown gum bottom and chrome tan leather top which will not break or harden in wet or cold weather.

Made with rolled or solid heel and rolled edge sole. Be sure to state style of heel desired when ordering.

Du Bois Hunting Boot

(Shown to the right)

This Goodrich boot is all rubber. This means dry feet, dry legs and comfort, even when your game trail leads through fallen dew, soaked leaves and underbrush or through marshland.

A wonderful boot of typical Goodrich quality—tough, pliant, snug-lacing and true-fitting. It has a solid heel, thick anti-skid sole and is well reinforced at points of greatest wear.

No. **14035**—15 ins. high .... Per pair **$8.50**

The Trout King

(Shown above)

A new and greatly improved boot for anglers and duck hunters. Being exceptionally light and very flexible it rolls into a small, compact bundle for easy carrying.

Its laced instep prevents heel chafing or pulling off in mire, the invisible heel lift gives foot comfort, the flexible, corrugated sole, sure-footedness, while the removable felt insole protects the foot against stone bruises.

A further improvement is a calf strap to take half the weight off the thigh strap.

A boot designed for long, efficient service and tireless comfort.

No. **14045**.....Price per pair **$10.00**

The Stalker

(Shown to the left)

Those who prefer the mocassin or shoe pack type of boot will like the Stalker. Being an all rubber boot, it is thoroughly waterproof and it has other features that make it outstandingly different.

For instance, a built-in arch support assures foot comfort, while the corrugated sole with its special cleat arrangement gives absolute sure-footedness.

The Stalker is well reinforced at all points of wear and as a high-grade hunting boot is in a class by itself.

No. **14037**.....Price per pair **$8.50**

PALMER'S SKOWHEGAN PASTE

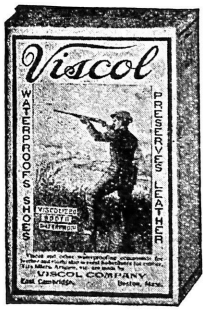

Care of Footwear.

Never place your footwear, especially oil tan, too near the fire, as the heat will quickly burn the life out of the leather. To keep your footwear soft and pliable, clean and dry slowly. After drying, give a good application of oil or grease. This, besides softening, helps to make your footwear waterproof.

Our Skowhegan Waterproof Paste can't be equalled for this purpose, as it is a scientific preparation and a real leather food. Good for all leather goods. Put up in neat 5 oz. tins with full directions.

P A K B A K—The New Hunting Coat

It is no longer necessary to wish for more pockets, and especially for bigger pockets, when out hunting and you need a big pocket badly. It is no longer necessary to tie together with a stout cord the game killed in a day's hunt and carry it back home or to camp draped around the neck and shoulders like a horse collar. That's out of date.

The easiest and best way is to carry the game in the big roomy pocket of the "PAKBAK" coat. Put the game in the pocket as fast as you bag it. Then it's out of the way—and your hands and arms are always free.

Your load never becomes burdensome because it is carried low and rides the back easily.

The "PAKBAK" coat was designed to meet the great need for such a spacious pocket.

The idea is so sensible, so practical and so useful that telling sportsmen about it seems to be all that is necessary to arouse their interest and desire to wear a "PAKBAK" coat. The illustrations shown tell the whole story.

No. 14418—Sizes 38 to 48 ..... Price each **$15.00**

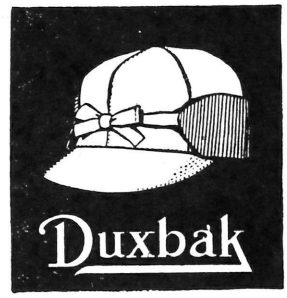

Duxbak Cloth is treated by a rainproofing process and is as near water-repellent as any cotton or woollen cloth can be made without the use of rubber, but it is not absolutely waterproof. Rubber and oilskins are waterproof but prevent the escape of bodily heat and moisture and are therefore injurious to health. Duxbak Cloth is sufficiently porous to allow perfect ventilation; it is, therefore, comfortable and sanitary and a perfect protection from inclement weather.

Duxbak Cape Cap

Especially desirable for duck blinds and other exposed, cold and windy places; has corduroy lined cape, 8 inches deep, shaped to fit down over coat collar and ties under chin, protecting neck and ears.

Sizes 6¾ to 7⅞.

No. 14432 Price each **$3.00**

DUXBAK FISHING COAT

A strike! A fight! And gone are all thoughts of everything except the desire to outgame and outthink Mr. Fish at the end of the line. What of the equipment so carefully stowed away in pockets—matches, lunch, shoes, bait and what will you have? They're all safe if you are the man who wears this Duxbak Wading Coat for stream fishing, for it hangs high and dry, has seven convenient pockets beside the Pakbak and is made hip length for wading and for small game and bird hunters. A short model that does not swing or flop in making quick shots, but fits close to the body. The most practical general fishing coat. Sizes 38 to 48.

WHAT IS ROOMAK?

ROOMAK is an all-British preparation, (the invention of a Government Analyst), which, when applied to fabrics, renders them rainproof. Its application in no way alters the appearance of the article, except that it cleans it and it can be applied by anyone. ROOMAK gives every fibre a waterproof coating and folding or creasing has no ill effect on its efficiency. Every article treated with ROOMAK must last longer as DAMP CANNOT LIVE WITH ROOMAK and treated articles dry very much quicker.

For the Sportsman:

Apply ROOMAK to your Golf Bag, Cap, Shoes and Clothing.

All outdoor Sportsmen will find that the application of ROOMAK will not only rainproof their kit but preserve it, and ROOMAK will make an instant appeal to all those who realize the comfort of being able to eliminate damp from their wearing apparel.

Household size, sufficient to make 1 pint of ROOMAK.

A. L. & W. LOIPE BINDING

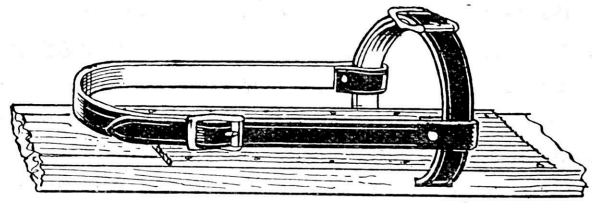

This is the very best imported Ski binding or harness, being used by all larger clubs in Canada. It is by far the most popular binding on the market today.
It has a completely new arrangement for adjusting plates through screws, being eccentrically placed in round discs, whereby the plates can be adjusted in a moment with a screw-driver without having to drill new holes in the skis.
Loipe Ski Binding has an inner moveable iron lug which follows the movement of the sole while in motion and thereby prevents wear of the sole. Affixed to the moveable lug is a patented steel flange which holds the sole firmly against the Ski, rendering a toe strap unnecessary, and which also follows the movement of the sole so that any tendency to destroy the footwear is avoided.
It has been tried by Norway's best Skiers in long distance competitions during the past two winters and has proven very satisfactory.
This harness may be used on regular mortised slot Skis, simply by filling slot with a piece of hardwood.

It is with justifiable pride that we publish this our 37th Catalogue after completing 75 years of continuous service to Canadian and in fact international sportsmen. So interwoven have become the traditions of sport in Canada with this institution that to-day sporting equipment of quality and the name "A. L. & W." have become synonymous.

The A. L. & W. Annual Catalogue has come to be the recognized handbook on Canadian sport. In its compilation no effort has been spared to make its arrangement as convenient and interesting as possible. The Fishing Tackle section is arranged in alphabetical order. Sixteen pages of beautiful color plates illustrate Baits, Flies and lines of especial interest and the Golf, Tennis and Badminton Section is in sepia brown.

With the ever increasing love of the great outdoors by Canadians this "greatest and oldest sporting goods house in the Dominion" recognizes the responsibility which has come with its heritage, and while this catalogue, compiled for ready reference and for the assistance of those at a distance only shows part of our stock, it carries with it a cordial invitation to pay us a personal visit.
