REGISTER,
FOR
1829,
BEING FIRST AFTER LEAP YEAR.

MONTREAL:
PRINTED BY ROBERT ARMOUR,
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY FOR THE DISTRICT
, OF MONTREAL,
AND PUBLISHED BY H. H. CUNNINGHAM.

1828.

PREFACE.

IN the present publication, the Proprietors have spared no pains nor expense to ensure its correctness, and though some small or trivial errors may be found throughout the body of the **ALMANACK**, yet such are incidental to a work of this nature, and still more so to the first edition of a publication similar to the present.

To obtain with more certainty the various lists, application was made to the different Departments, who have all very liberally furnished the information within their power, and the Editor takes this opportunity of returning to the individuals who have assisted him in the undertaking his most sincere thanks.

With a view to superior arrangements, the Editor has classed all the information usually found in Almanacks, under distinct heads, and as he hopes it will be found an improvement upon the Almanacks which have been heretofore published in Canada.

To the attention of **D. DALY**, Esq. Provincial Secretary, the Editor was indebted for permission to copy from the Registers of his office the dates of almost all the Commissions now held in the Province granted since the year 1792, which having never hitherto been given, the Editor trusts, will be found not only interesting, but also useful for reference on various occasions.

Changes and alterations have occurred during the printing of the **Almanack**, all of which, as far as they have come to the knowledge of the Editor will be found at length at the end of the work.

In conclusion, it may be necessary to say that the arrangement of the different officers or public bodies in this publication, though as perfect as circumstances will permit, cannot in any wise affect any precedence, to which either of them respectively may be entitled.

Should sufficient encouragement offer, the Almanack for the the succeeding year will be enriched with several statistical tables and returns relative to the Province, highly useful to the public in general, which from the late period at which the present undertaking was commenced could not be prepared with sufficient accuracy for that of this year.

OF THE CHANGES OF THE MOON.

Many persons, understanding that the mean time between one new Moon and another is 29 days, 12 hours, 44 minutes and a fraction, imagine that, to find the full or quarters of the Moon, they have only to add a half or fourth part of that time; and when they do not find the changes marked in the Calendar to correspond with this method, they impute it to mistake in the calculation of those changes. It is therefore, necessary to put them in mind, that the great inequality of the Moon's motions renders the above rule extremely inaccurate, so that nineteen times in twenty, it must fail in giving the true conjunction or change.

ECLIPSES OF THE SUN AND MOON FOR 1829.

Of Four eclipses which will take place this year, one only will be visible at Montreal.

- I. 20th March.—The Moon will be eclipsed, but to us invisible.
- II. 3d April.—The Sun will be eclipsed but also invisible.
- III. 13th September.—An eclipse of the Moon, visible at Montreal, beginning at 0h. 31m. the middle at 1h. 43m. and the end at 2h. 55m.—the whole duration 2h. 24m. Digits eclipsed 6°. 5' on the Moon's southern limb.
- IV. Sept. 27th—The Sun eclipsed but to us invisible.

This Tide Table shews the time of high water on any day of the moon's age nearly, and the stream continues to run one hour and a half after high water, or, in the seaman's phrase, it flows "Tide and Quarter Tide," and this is to be observed in every part of the river.

RULE.—Having found the age of the moon at the top of each month in the Calendar, look in the left column of the table for the day from new to the full moon, then in the right column the day from the full to the new moon, and in the middle column you will find the time when it is high water ashore.

GENERAL POST OFFICE.

LONDON, 11th June, 1827.

By an Act passed in the present Session of Parliament, intituled, “*An Act to amend the Laws relating to the Duties of Postage in Great Britain and Ireland.*”

All Letters conveyed by the Post from Great Britain to Ireland, and from Ireland to Great Britain, are chargeable with the like Rates, according to the distances such Letters are conveyed, *as would be payable if they were conveyed the whole distance in Great Britain*, in addition to the separate Rates of Packet Postage, and the several Rates payable under the Acts for building the Menai and Conway Bridges, respectively.

Parliamentary Proceedings sent to the Colonies by Packet.

Printed Votes and Proceedings in Parliament from Great Britain and Ireland to any of His Majesty's Colonies, are to be charged with a rate of *one penny half-penny per ounce*, and so in proportion, in lieu of any sum payable under any former Act, *to be paid on putting the said Votes and Proceedings into the Post Office.*

Colonial Legislative Proceedings brought into the United Kingdom by Packets.

Every Vote, Proceeding, or other Public Paper, printed by Order, or under the Authority of the Legislative Assemblies of any of His Majesty's Colonies is to be charged with a rate of one penny half-penny per ounce, and so in proportion to be paid on delivery thereof to the person or persons to whom the same shall be addressed.

Newspapers brought by Merchants' Ships from Abroad

Every Newspaper printed within His Majesty's Colonies, brought into the United Kingdom by any Ship, other than a Packet, and delivered by the Commander at any Post Office, with the Ship's Letters, is to be charged with a rate of three pence, to be paid on the delivery thereof, by the person or persons to whom the same shall be addressed.

Pamphlets, &c. conveyed to the Colonies.

Every Pamphlet, Magazine, Review, or other Periodical Publication, put into the Post Office at Falmouth, not exceeding six ounces in weight, to be charged one Shilling, and the further sum of three pence for every additional ounce.

Pamphlets, &c. under this Section cannot be received at any Post Office except Falmouth.

N. B.—If such printed Vote, Proceeding, Newspaper, Pamphlet, Magazine, &c. be not sent without a Cover, or in a Cover open at the sides, or if any writing be thereon, other than the Superscription, or any other Paper or thing, be enclosed therein, the Packet will be liable to the full Rates of Postage, as a Letter.

The above enactments commence and take effect from and after the 5th July, 1827.

The following come into immediate operation.

Newspapers for His Majesty's Colonies, and Places beyond Seas.

Every such Newspaper or other printed Paper liable to the Stamp Duty, and for the conveyance of which any duty of Postage is chargeable, to be put into the Post Office of the Town or place in Great Britain or Ireland, in or at which such Newspaper shall be published on any day, within seven days, next after the day on which the same shall be published, the day of publication to be ascertained by the date of such Paper, and in case any such Paper be put into any Post Office, after the expiration of such seven days, such Paper to be charged as a single Letter.

N. B.—This Clause alters the regulation according to which Newspapers to the Colonies, &c. were required to be put into the Post on the day of Publication.

Merchants' Accounts, &c.

All Merchants' Accounts, Bills of Exchange, Stamped Receipts, Invoices, Bills of Lading and Proceedings at Law, written *on one and the same piece of Paper with a Letter*, to be charged as a single Letter only; and any sheet of Paper on which Letters to *several and distinct persons* be written shall not be chargeable with any higher rate of Postage, in Great Britain or Ireland, than if *one Letter only* were written upon such sheet of Paper.

Letters addressed to Officers of the Army, Navy, &c.

Letters addressed to any Commissioned Officer of the Army, Navy, or Ordnance, at any place where such Officer shall have been employed *on actual service*, and who, before the delivery thereof, shall have removed from such Place, *in the execution of his Duty*, not to be charged with *any additional* postage over and above the rate of Postage that would be payable, if delivered at the place to which they were *originally directed*.

By Command,

F. FREELING,

Secretary.

In order to find the distance from any place, in the foregoing Table and List, to another, deduct the smaller from the larger number of miles, and the product gives the distance:—*thus*, do you want to know how far it is from *York* to *Coteau du Lac*, by the main road; deduct 731 from 1253, and there remain 522

miles, the true distance ; or, if it be a *Cross Road*, and you want to know how far it is from *York* to another place named—say to *Raleigh* ; see how far *York* is from *Halifax* (by the List that is given) and how far *Raleigh* is from *Halifax*—deduct 1253 from 1427 and the result is 174 miles, the true distance from *York* to *Raleigh*.

As these Tables and Lists are taken from those used in the Post Office, it must be presumed they are as correct as the present state of the country will admit of.

APPENDIX.

BRIEF ACCOUNT OF PUBLIC EVENTS IN CANADA, FROM THE DISCOVERY OF AMERICA TO THE PRESENT DAY.

1492.—Christivallo Colon, or Christopher Columbus, a Genoese, under the patronage of Isabella of Spain, set sail from Palos, with three vessels and 90 men, on the 3d August. On the 11th October discovered St. Salvador, one of the Bahama Islands.

1497.—John and Sebastian Cabota, Italians in the service of Henry VII. of England, discovered Newfoundland, and coasted along the continent to 67° 50' N. latitude. He entered, and explored some part of the Gulph of St. Lawrence, but did not take formal possession.

1506.—Jean Denys of Harfleur drew a map of the Gulf and adjacent coast.

1508.—Thomas Aubert made a voyage from Dieppe to Newfoundland and sailed up the St. Lawrence.

1517.—The banks of Newfoundland are visited by at least 50 Spanish, Portuguese, French and other European ships.

1522.—Verazani, an Italian, in the service of Francis I. of France, discovered a great portion of the American continent, took formal possession in the name of his sovereign, and gave it the name of *Nouvelle France*.

1535.—Jacques Cartier, of St. Malo, discovered the river of Canada, now St. Lawrence. He sailed up the river for 300 leagues, formed alliances with the natives, took possession of the territory, built a fort, and wintered in the country. He visited Hochelaga which he named *Mont Royal*. He returned to France in 1536, with Donnaconna, a chief of the natives, and was coolly received, as he brought no gold nor silver.

1540.—François de la Roche, Lord of Roberval, Viceroy of Canada, sent out Cartier to Canada with five ships, and individuals to commence the colonization of some portion of the banks of the St. Lawrence. Cartier returned to France in the Fall and died in 1543, broken hearted.

1542.—Roberval came himself this year to Canada, built a fort, and wintered 4 leagues above the Isle of Orleans.

1549.—Roberval, his brothers, and a long train of adventurers sailed from France for Canada, but were never heard of. This so discouraged the French government and people, that 50 years elapsed without any measures being taken to settle Canada.

1581.—The trade with Canada began to be renewed, which had been interrupted by Cartier's conduct to the natives in 1535.

1583.—Three ships, one of which averaged 150 tons, were employed in the Canada Trade.

1591.—The Walrus common in the Gulf of St. Lawrence; a fleet of ships fitted out from St. Malo, for Canada, to engage in the killing of those animals, whose teeth sold dearer than ivory.

1598.—Marquis de la Roche was appointed by Henry IV. Viceroy of Canada. His commission authorized him to grant lands en fief et seigneurie, as rewards for military service. He landed his settlers on Sable Island, and proceeded on his voyage of discovery, but was unable to return and withdraw the individuals he had there left. Of these, 12 only survived when visited in 1605. La Roche died shortly afterwards of vexation and remorse.

1600.—The patent of the Marquis was renewed in favor of M. de Chauvin, who visited Tadoussac, and returned with a valuable cargo of furs. The next year he visited Three Rivers.

1603.—Pierre de Monts succeeded Chauvin on his death, and received a patent of the territory included between 40° and 46°, whereby he was constituted Lieutenant General, with power to colonise and convert the natives to Christianity. Samuel de Champlain, and M. de Chatte, Governor of Dieppe, were his principal associates. Champlain visited Tadoussac this year, Demonts devoting his attention to Nova Scotia.

1607.—The patent enjoyed by Demonts revoked, and then renewed on condition of forming settlements. The patentees found it, however, more advantageous to carry on trade with the Indians, and in consequence the Acadian colony was neglected, and the contemplated Canadian one delayed.

1608.—Champlain persevered in his efforts to found a settlement, and succeeded this year in commencing the city of Quebec.

1611.—Champlain visited France, having already been engaged in two successful expeditions against the Indians, and was there detained in great suspense as to his future situation or relation to the colony.

1613.—Champlain returned to Quebec under the patronage of the Prince de Condé, and visited the Ottawa.

1614.—The affairs of Canada were transferred to a company of merchants in Rouen, St. Malo and Rochelle, who had induced Champlain to consent to their participation in the supposed advantages of the Canada trade.

1615.—Champlain entered into an expedition against the Indians, and was detained a winter among them.

1620.—The Prince de Condé transferred his commission to the Marshal de Montmorenci.

1621.—The Iroquois began their system of extermination, and carried on the most sanguinary and destructive warfare in the history of the world. A mission was sent to France to represent the defenceless state of the Colony. The patent was transferred to William and Emeric de Caën.

1622.—The population of Quebec, though established 14 years, amounted to only 50 souls.

1623.—This and the three succeeding years were consumed in preventing alliances among the Indians—the proselytizing of some tribes by the Jesuits—and the transferring of the Viceroyalty of Canada from the Marshal de Montmorenci to his nephew the Duke de Ventadour.

1627.—At the instance of Champlain, the patent enjoyed by de Caen, who devoted himself solely to the fur trade and personal advantage, was revoked, and the colony placed in the hands of a company of 100 associates, organised under the direction of the celebrated Cardinal Richelieu.

1628.—War being then existent between England and France, Charles I. of England granted authority to David Kirk, and his kinsmen, to conquer the French dominions in America. Kirk appeared before Quebec, after having captured the fleet destined for that place, and ordered it to surrender. Not having the means to enforce a surrender, he retired.

1629.—Louis and Thomas Kirk, brothers of David, appeared before Quebec, the inhabitants of which having been again deprived, by the capture of another fleet for Quebec by Kirk, of their supplies, and threatened with an invasion from the Indians, and starvation within the garrison, gladly surrendered to the British arms, 130 years before the memorable conquest by Wolfe.—The capitulation was so honorably fulfilled that the majority of the inhabitants preferred remaining with the captors. Champlain and most of the Jesuits returned under free passes to France.

1632.—Charles I., by the treaty of St. Germain-en-laye, resigned to Louis XIII. of France, all his title to Canada and Nova Scotia, then so little valuable as an appendage to the English crown. From this year is dated the commencement of a train of events which led to the loss of Canada to the French Government, and of the American Colonies to Great Britain. Champlain returned to Quebec as Viceroy with extension of his powers, and a large accession of settlers.

1635.—A college founded at Quebec by René Rohault, a Jesuit. Champlain died this year universally regretted, celebrated alike as a historian, traveller, author, mathematician, or seaman. He was succeeded by M. Montmagny.

1639.—The Ursuline Convent at Quebec founded by Madame de la Peltrie. The Hotel Dieu at Sillery founded the preceding year.

1642.—The Island of Montreal vested in Mr. Maisonneuve and 34 associates in 1640, and of which he was declared Governor in 1641, was this year taken possession of, by him and several families, with many religious ceremonies.

1644.—The island was transferred to the religious order of St. Sulpice in Paris.

1647.—Mr. Montmagny, under whose government the colony advanced languidly, was recalled and succeeded by Mr. D'Ailleboud. The latter proposed to the English Colonies an alliance

against the Indians, which was by them rejected, as it required them to make enemies of their allies, the Mohawks.

1648.—The Colonies of New England proposed to the Governor and Council of Canada, perpetual peace between the colonists, even when the parent states were at war. This proposal was unattended with success.

1649.—The Huron village of St. Ignatius, of 400 persons, was attacked by 1000 Iroquois, and the inhabitants massacred.

1654.—The Iroquois this year exterminated the Erie Indians.

1658.—D'Aillebout was succeeded by Mr. Lauzon in 1650, by the Marquis D'Argenson, and this year by the Baron D'Avengour, all of whom were severally censured for the unfavorable reports of the state of the colony which they transmitted to the Company.

1660.—Francis de Laval, Abbot of Monsigny, was appointed Bishop of Canada, came over and brought with him a body of clergy for the settlement.

1663.—The Baron D'Avengour had sufficient influence with the King of France to have his report relative to the state of Canada attended to. His Majesty in consequence determined upon resuming his rights and erecting Canada into a royal government. The 100 associates, tired of maintaining the country at a great expense, had retired from the fur trade, and now reduced to 45 members, willingly made a total resignation of their rights to the Sovereign, who thereupon appointed Monsieur de Mesy the first Royal Governor of New France. A dreadful earthquake is mentioned by the Jesuit historians to have occurred in February of this year, throughout all Canada, particularly below Quebec, but we are unaware whether geological evidence or traditionary lore will bear out the reverend writers in their statements. During the course of the year Mr. de Mesy arrived at Quebec and put in execution a Royal Edict, which nominated a Sovereign Council for the Government of Canada. This Council consisted of seven members, of which were the Governor, the Bishop, and the Intendant. The powers conferred on this body extended to the cognisance of all causes civil and criminal, to judge definitely according to the laws and ordinances of France, and the practice of the Parliament of Paris. To this was added other powers of such a nature as to render the institution of the Council an era in the History of Canada.

1664.—Canada was transferred to the West India Company, who by Louis the Fourteenth were put in possession of all the territory then owned abroad by the French king. The grant did not give much satisfaction to the inhabitants of Canada, who made complaints to the Company.

1665.—Mr. de Mesy was succeeded by Mr. de Courcelles.

1666.—Mr. de Tracy, the Governor General of the territories of the West India Company, visited Canada, built three forts on the Chamby river, and made a successful incursion into the territory of the Mohawks. This year the complaints of the Colonists against the monopoly enjoyed by the Company were appeased by an edict, granting to the inhabitants the trade in furs, subject to

the payment of one-fourth of all beaver. This did not however prevent a very extensive smuggling trade.

1667.—The West India Company were confirmed this year by the Governor General in all the rights and privileges formerly held by the Company of one hundred associates.

1668.—Mr. de Talon, to encourage Colonization, induced the French government to disband within the country the Carignan Regiment, and to ship from France about 300 women of loose character, who were, in less than 15 days, disposed of among the inhabitants, to whom, on marriage, considerable presents were made. Pensions were also granted to all individuals who had ten children lawfully begotten.

1671.—The see of Quebec was this year established, dependant on the see of Rome. Concessions of land were also reduced to one half of their original extent.

1672.—M. de Courcelles, built a fort near the modern Kingston, for the purpose of bridling the Iroquois, pretending it to be only a place of trade. This gentleman was this year superseded by the Count Frontenac.

1673.—The Count completed the fort on Lake Ontario, which hereafter was known by his name. The River Mississippi was this year explored by orders of the Government of Canada.

1674.—The charter of the West India Company was revoked by an edict of the French king.

1675.—The Sovereign Council was this year increased to 9 members and its powers extended.

1679.—An edict in Council prohibited the imprisonment of any French subject except by order of the Governor General or Sovereign Council.

1682.—The Count Frontenac was recalled, and Mr. de la Barre appointed Governor, with instructions to cultivate an intercourse with the French West Indies.

1684.—Mr. de la Barre made an unsuccessful inroad into the territories of the Five Nations, with the natives of whom he entered into a treaty, and de la Barre with his whole army returned to Montreal.

1685.—The population of Canada amounted to 10,000, of which 3000 were capable of bearing arms.

1687.—The dangerous rivalry which had arisen between the inhabitants of the British and French Colonies, by the erection of numerous forts by the latter, and cherishing the hostility of the Five Nations to the French by the former, received the interference of James the II. of England.

1688.—The Five Nations excited by the Rat, one of their powerful leaders, attacked the French settlement at Montreal, killing 1000 of its inhabitants and committing horrid cruelties.

1690.—The Count Frontenac, who had returned from France last year with forces to carry the war into the English Provinces, was unable to effect his purpose till this year, when he attacked Schenectady and massacred its inhabitants. The alarm which this last affair had on the minds of the inhabitants of the British Colo-

nies, induced them to enter into co-operative measures and decide upon an expedition to Canada. Sir W Phipps, who was sent from Boston for that purpose, did not arrive before Quebec, till Count Frontenac had sufficiently prepared for defence, and his order to surrender, was soon followed by his own departure from the St. Lawrence.

1692.—Frontenac entered the territory of the Iroquois and commenced a warfare which continued for several years, and so weakened that nation, that they were never afterwards able to make any impression upon Canada.

1698.—The Count Frontenac died at Quebec and was succeeded by Mr. de Callieres, who succeeded in effecting peace with the Five Nations, as a power independent of Great Britain.

1702.—War was again renewed between Britain and France, and Mr. de Callieres represented to his Court the necessity of reinforcements, and made preparations for the defence of the Colony.

1703.—Mr. de Callieres died and was succeeded by the Marquis de Vaudreuil, who devoted his attention to destroy the influence which the English possessed over their Indian allies.

1704.—The Bishop of Quebec, returning from France, was taken by an English frigate and kept prisoner in England, to effect a release of French Protestants. The negotiation was unsuccessful.

1705.—Mr. Reaudot, the Intendant, introduced some improvement in the laws of the country, which had a tendency to repress the litigious spirit which prevailed within the Province.

1708.—An attempt of the Clergy to raise their tythe from a twenty-sixth to a thirteenth was foiled, as being too burthensome to a Colony so limited in its resources.

1709.—The English Colonists incensed by the massacre of the inhabitants of Haverhill, again determined upon attacking Quebec by sea and land, and the New Englanders were only restrained from proceeding, on learning that the forces intended for Canada, had been required for service in Portugal.

1711.—The operations by sea which this year took place in pursuance of the original intention, were unsuccessful from the inadequacy of the means, and the fleet was so damaged by tempestuous weather, that the expedition was abandoned.

1713.—The treaty of Utrecht left the French in peaceable possession of Canada, and of extensive means of annoyance to the peace and commerce of the New England Colonies.

1718.—This year was remarkable for the discovery in the forests of Canada of the plant Ginseng, so highly valued by the Chinese.

1720.—The inhabitants of Quebec and Montreal paid taxes for improvements in the fortifications of their cities, then commenced under Mr. de Lery.

1722.—A definitive regulation of the distribution and limits of parishes took place, and finally promulgated within the Province.

1723.—Nineteen vessels cleared from Quebec—their cargoes limited to peltries, lumber and provisions.

1725.—The Marquis de Vaudreuil closed his long and meritorious career, who was succeeded the succeeding year by Mr. de Beauharnois, a natural son of Louis XIV.

1731.—The administration of Mr. de Beauharnois was marked by the continual erection of new forts, and displays of military force, for the purpose of keeping the English traders within proper limits. His recommendation to the French government to erect a line of military establishments were successful, and this year the important and well situated fort at Crown Point was erected.

1743.—During the long peace which followed the treaty of Utrecht in 1713, several measures had been put in execution with a tendency to promote the welfare and prosperity of the country. The conduct of the Nuns, so contrary to the vows they had undertaken, was repressed; several ecclesiastical decretals bearing heavily upon some portions of the people were repealed, and this year a Royal Edict issued, which prohibited the Jesuits and other ecclesiastics from acquiring mortmain acquisitions.

1744.—An important change was made in the law of Canada, by which only such of the laws of France as should be enregistered in the books of the Superior Council, by His Majesty's direction, should have force in the Colony. By this circumstance the French *Code Marchand* never was in force in Canada.

1745.—His Majesty directed that no houses should be erected but on farms of one acre and a half in front by 40 in depth. The consequence has been that the population of Canada has been always kept confined and thickly settled, and the pernicious law of subdivision of property has had a tendency to weaken, instead of strengthen families. Cape Breton was this year taken by Great Britain.

1747.—The Count de la Galissonniere, who had succeeded the Marquis de Beauharnois, having in vain sought assistance from the mother country, employed engineers to mark out and settle a line of demarcation, to restrict the English within the Alleghany mountains. He also succeeded in establishing forts beyond the limits of Nova Scotia. He was however superseded by Mr. de Jonquieres.

1748.—The negotiations were finally terminated for a line of demarcation between the British and French territories in America, in consequence of a clause of the treaty of peace of Aix La Chapelle.

1749.—Forts were erected in the Bay of Fundy by the Governor of Nova Scotia, to counteract the views of the Governor of Canada, who endeavoured to seduce the Indians and Acadians from their allegiance to the British Crown. A private expedition sent out by the Governor and officers of the Government for the purpose of exploring a route to the Pacific Ocean, terminated, as it was really intended, in a rich return of furs, of which the Governor's share amounted to £12,000.

1750.—Mr. Bigot, the Intendant of Canada, displayed this year much of that license and prodigality for which he became notorious, and resorted to the most profligate means for the support of his expenses, which were lavished upon a female favorite.

1752.—Mr. de Jonquieres was succeeded in the administration of the government by the Baron de Longueuil. His appointment was but temporary, for the Marquis de Quesne, arrived in August as Governor General, and prepared for active warfare against the English traders on the Ohio, and offensive hostilities soon commenced. The conduct of the Intendant, who had entered into a conspiracy to defraud the government, was calculated to destroy the resources of the government and alienate the affections of the people, and probably by creating internal weakness and disunion effected as much of the conquest of Canada in 1759 as the valour of the invaders.

1755.—No offensive operations took place between England and France, except a small naval engagement on the Banks of Newfoundland, till this year, when an expedition of regulars and Colonial militia under General Braddock, for the purpose of giving a decided check to the encroachments of the French government on the Ohio, was defeated, through his disregard of all precautionary measures. The troops which were brought off by the celebrated General Washington, joined the Provincial troops under Governor Shirley and General W. Johnson. The latter was attacked near Lake George by a large army under Baron Dieskau, whom he repulsed and forced back upon Crown Point. This success restored the spirit of the hitherto discomfited Provincial troops, but circumstances did not permit their following up their success this season.

1756.—The Marquis de Montcalm arrived from France with a fine army, reduced Fort Oswego, and displayed his warlike trophies in Montreal. He also succeeded in destroying the outworks of Fort George, and the batteaux and sloops prepared for an attack on Crown Point.

1757.—Bigot continued to pursue his iniquitous career of fraud, oppression, and most nefarious conduct, while Montcalm was occupied with extensive plans of warfare. This year's campaign was signalized by the capture of Fort George and the massacre of 2000 of its inhabitants by the Indians under his command. This latter affair roused the indignation of the British Government, and the determination of the English Colonists to destroy French dominion in America, was supported by the energy, which the elder Pitt infused into the councils of his Sovereign.

1758.—This year was principally spent in preparing for the blow intended at French dominion, and no means were spared to excite the people to meet the invaders, as the warfare in which France was engaged in Europe did not permit her to spare many troops to defend her Colonial possessions. The clergy, who dreaded a conquest by a Protestant Government, lent their powerful aid, towards encouraging the people to defend the country against the enemies of France and the Romish religion.

1759.—The military operations of this year form a glorious era in the history of our country, but our limits will not permit us to state them but very briefly. The British Government, at the urgent request of the Colonists, resolved on a decisive measure. The Colonists themselves were to have an opportunity of co-operating with the regular troops, who were to attack Canada at three points. To General JAMES WOLFE was assigned the task of attacking Quebec from sea; to Sir W. Johnson, the reduction of Fort Niagara; and to General Amherst, that of Crown Point and Ticonderoga; and in case of success, a junction of the armies was to take place at Montreal. Wolfe landed in June on the Island of Orleans, with an army of 8000 men, to whom was opposed the Marquis de Montcalm with 9800 disposable forces and a reserve of 2,200 men, independent of the garrison of Quebec. The first attempt of General Wolfe on the French intrenchments at Montmorenci proved unsuccessful, and the tenor of his despatches to the British Government led them to await a defeat, rather than a victory. By a council of war, a landing so as to obtain a position on the plains of Abraham was determined, and on the 12th September the measure was fully executed with a surprising degree of secrecy, silence and address. Montcalm imprudently determined on meeting Wolfe on the plains, the next day, and after a battle, remarkable for displays of courage, more than scientific manœuvres, and in which the spirit of the invading army was well met by the vigour and energy of their opponents, victory declared in favor of the arms of England. Both nations had to regret their commanders, Montcalm expired ere the capitulation could be effected, and Wolfe expiring in the arms of victory, received all the manifestations of public gratitude which the British Government never fails to grant to the heroic character and warlike glory of her sons. The capitulation of Quebec succeeded the battle, and the effects of the termination of this portion of the expedition were, if possible increased, by the successful reduction of Fort Niagara by Sir W. Johnson, and Crown Point and Ticonderoga by General Amherst.

1760.—The entire conquest of Canada, became comparatively easy, to the co-operating armies, after the capitulation of Quebec, and the successes which we have mentioned. Though some drawn battles and undecisive engagements took place between the French and English, the contemplated junction of the different divisions of the invading forces took place this year near Montreal in September. This event, combined with the continued misconduct of Bigot, led to the capitulation of Montreal on the 8th of that month and the complete subjection of Canada to Great Britain.

1761.—The preceding season it was announced to the people of Canada that Mr. Bigot's bills on the Treasury, were dishonored, and thereby a loss to the inhabitants of about £4,000,000, which was then in circulation. Upon an examination into the affairs of the Intendant by Commissioners, it was perfectly ascertained that the amount of his peculations was little less than £400,000. The only Courts within the Province, since the capitulation, were Mili-

tary tribunals within each District, and an appeal to the Commanding Officer.

1763.—A treaty of peace between England and France was signed at Paris on the 10th February, by which the French King renounced all pretensions which he might have had to Nova Scotia, Canada, &c. and France was by one blow deprived of every acre she possessed in North America. The King issued a Proclamation on the 7th October, promising to the new settlers in Canada a variety of benefits, several of which have unfortunately never been fulfilled.

1764.—The Quebec Gazette, the first newspaper in Canada, established in Quebec by Messrs Brown and Gilbert. New Courts of Civil and Criminal Jurisdiction were established by the Ordinance of Governor Murray, by which also the Laws of England were introduced in conformity to the provisions of the Royal Proclamation of 1763. An assembly of delegates from all the parishes except Quebec were called together, but the most being Roman Catholics, could not conscientiously take the requisite oaths, and no proceedings were thereupon had.

1765.—The famous Stamp Act passed the Imperial Parliament, so disastrous in its consequences to the peace of the New England Colonies, to which, however, Canada and Nova Scotia submitted.

1766.—Several meetings of the Cabinet took place in London, for the purpose of imposing a Constitution upon Canada, and some were reports made by the Attorney and Solicitor Generals discussed. The dissolution of the Rockingham administration, and the changes that thereupon ensued, caused the affairs of Canada to be entirely forgotten.

1771.—Under the administration of Lord North, the affairs of Canada were again taken up, and the Crown Lawyers directed separately to report a plan of civil and criminal law for the Province of Quebec.

1773.—The reports of the Crown Lawyers were given in, and whatever may be said of their consequences, they are highly creditable to the talents of those officers. Meetings of the French and English inhabitants took place in Canada for the purpose of obtaining a Legislative Assembly, and petitions to that effect severally transmitted to the Imperial Legislature.

1774.—The Quebec Act, 14 Geo. III. cap. 83, was passed this year in England, by which Canada was restored to a situation entirely different from that of every other British colony, in reference to its laws, language, religion or manners—in short it became again a French colony, although nominally British.

1775.—The difficulties attendant upon passing the Stamp Act in 1765, were daily increasing in the New England States, and the Quebec Act did not tend to allay the rising ferment. They regarded it as favoring the Catholic to the exclusion of the Protestant religion, and as oppressive of the subject. The Colonies, then about to demand redress of their own grievances from the mother country, called upon the Canadians to send their delegates to the Philadelphia Congress. Not so violent in seeking for redress

as the New Englanders, the Canadians remained tranquil, and the Declaration of Independance was scarcely made public, ere an invasion of Canada was talked of by the Provincialists. The first advance of the rebel troops was remarkably successful.—Chamblly, St. Johns, Longueuil, then posts of some importance, after some seige, fell into General Montgomery's possession, and the city of Montreal, whose inhabitants had defeated a former attempt of Col. Allen, were obliged to capitulate in November. Montgomery followed up that success by taking possession of all the military stores and provisions, not only at Montreal but also on board of the river craft, which surrendered about Lavaltrie. Another invasion of Canada under General Arnold, had been decided upon, by the Kennebec and Chaudiere rivers, and the army of the latter officer, after 34 days march through woods, arrived before Quebec on the 9th of November, in a state to rival Falstaff's ragged regiment. On the 14th he encamped on the plains of Abraham, and began his operations. Governor Carlton had made every preparation for a seige, and successfully opposed the progress of his adversary till the evening of the 31st December, when an assault was made by the Provincialists, during the night. The attempt was unsuccessful—Montgomery was killed, and the year terminated without the surrender of Quebec.

1776.—The arrival of reinforcements in Spring, enabled the Canadians successfully to contend with the Provincialists who were now in full retreat, and before the end of June the whole Province was evacuated. The number of the besieging army consisted of 1500 men, which was augmented this season to 8000 men. The British at the seige numbered about 1500 recruits, marines, seamen and militiamen, raised within a few months, with scarcely any regulars.

1777.—The Quebec Act, which had passed the House of Commons in a very hasty manner, and in opposition to the feelings of a great portion of the people of Canada, had been the subject of complaint to the British Government in petitions from the people in 1775, and a proposal for its repeal made by Lord Camden and Sir George Saville, for its repeal, met with little success. The Act continued to excite feelings of disgust within the Province, and measures were taken to effect a remedy.

1780.—The 19th May was distinguished by the phenomenon of a remarkable darkness in the northern parts of America; and is still called "*the dark day*." In most parts of the country where it prevailed, the darkness was so great that persons were unable to read common print, determine the time of day, dine, or manage their domestic business, without additional light. It commenced between 10 and 11 A. M. It appeared to grow by a succession of clouds from the northward and was most pitchy about 2 o'clock.

1783.—The Province of Quebec contained by enumeration, 113,000 inhabitants, English and French, exclusive of 10,000 loyalists who had preserved their allegiance to the British Crown and located themselves in the upper portions of the Province.

1784.—A petition was this year presented to the Parliament by

the English inhabitants, to which many Canadians united themselves, soliciting the entire repeal of the Quebec Act, and the establishment of a representative constitution, with a mixture of English and French laws, and distribution of elective suffrage to the old and new subjects.

1786.—Lord Dorchester arrived in Canada as Captain General and Governor in Chief of Quebec and the other British Provinces.

1790.—The petition of 1784 was neglected till this year, when the British ministry brought before Parliament, and obtained the passing of the Act 31 Geo. III. cap. 31, commonly called the Constitutional Act, dividing the Province of Quebec into two Provinces, giving to each division a Legislature, consisting of a House of Assembly, Legislative Council, and a representative of His Majesty.

1792.—The first session of the first Parliament of Lower Canada opened by Lieutenant Governor Clarke. Mr. J. A. Panet chosen Speaker. The House consisted as it still does of 39 knights, 8 citizens and 3 burgesses, in all 50 members. The session occupied principally in framing rules and regulations.

1793.—The second session opened by Lord Dorchester. The Judicature Bill, 34 Geo. III. cap. —, passed the Legislature. The assertion of the privileges of members in relation to freedom of arrest, asserted in a case of Mr. Young of Quebec.

1795.—In consequence of the failure of the crops, the Governor in Council proclaimed an embargo, prohibiting the export of wheat, &c. A Bill of indemnity for the act was passed in Parliament. Acts were passed for the making the Lachine turnpike, and the cutting the Lachine Canal.

1779.—The second Parliament met in January, and was opened by General Robert Prescott—Mr. Panet re-elected Speaker.—French emissaries employed by the French revolutionary government to disseminate orally its principles among the unlettered people of Canada, were denounced by Proclamation.

1798.—Great excitement in the country from the abuses attendant on the Land Granting Department, the members of the Board of which had granted to themselves, immense tracts of territory, to the injury and distress of thousands of settlers, and to the discouragement of emigration. Governor Prescott came to an open quarrel with Chief Justice Osgoode, on this occasion.

1799.—The Legislature during the session pass bills for the erection of Court Houses, and Houses of Correction, and for other important measures.

1800.—The Legislature opened by Sir Robert S. Milnes, Lieutenant Governor. C. B. Bouc, Esq. expelled the House by vote, having been found guilty and convicted of a conspiracy to defraud. Jean Casot, the last of the Jesuits died this year.

1801.—A new Parliament meets, when Mr. Panet is a second time re-elected. C. B. Bouc again expelled the House by vote. Bills passed for the establishment of the Royal Institution for the advancement of learning, and for removing the Fortifications of Montreal.

1802.—The annual annoyance of Mr. Bouc's re-election, led to a Bill disqualifying him from ever sitting or voting in the House of Assembly.

1803.—The Chief Justice of Montreal rendered a decision that as the Criminal Law of England and the Habeas Corpus Act were in force in Canada, no right of property in slaves could exist in Lower Canada, and the few slaves still existing in Canada were thus manumitted. In consequence of the declaration of war between France and England, the Parliament were suddenly convoked and Bills passed for the exigencies of the case.

1805.—The fourth House of Assembly was opened by Sir R. S. Milnes. Mr. Panet was again elected Speaker.

1806.—The House voted Isaac Todd, Esq. the President of a public dinner at Montreal, who gave, and Edward Edwards, Esq. the proprietor of the Montreal Gazette, who published certain toasts reflecting on the conduct of the House of Assembly, in relation to the Montreal Gaol, were voted guilty of a breach of privileges, but no proceedings had thereon.

1807.—The trade of Canada was this year considerably increased in consequence of the Milan and Berlin decrees. In consequence of the appearance of approaching difficulties with the United States of America, for the affair of the Leopard and the Chesapeake, Sir James H. Craig, a distinguished officer, was appointed Governor General.

1808.—In consequence of the embargo laid on all American vessels by President Jefferson, an extensive contraband trade with the United States was carried on, and the exports from Canada this year were double their accustomed value. Ezekiel Hart, Esq. expelled the House for professing the Jewish religion.

1809.—Fifth Parliament met, and Mr. Panet again elected Speaker. Ezekiel Hart, Esq. again expelled by vote. Serious difficulties arose during the session between His Excellency and the Parliament, and the House was in consequence dissolved by proclamation.

1810.—The arrangement made with the American Government by Mr. D. Erskine, being disapproved of by the British ministry, the prospect of peace was considered exceedingly doubtful. The sixth Parliament met, in the month of January, and Mr. Panet re-elected Speaker. The subjects which came under consideration were the exclusion of the Judges from the House of Assembly, and other matters which had a tendency to excite angry feelings. On the 7th of February, the House pledged itself to vote the necessary sums to defray the civil expenses of the Government—a pledge which Sir James H. Craig considered unprecedented as the Legislative Council had never been consulted, and His Majesty had not made any formal demand for such an aid. The Bill passed the House of Assembly for the exclusion of Judges, and some amendments made by the Council thereon, in which the House could not concur, and the latter then proceeded to the expulsion of Judge Debonne by vote, which was carried. His Excellency not wishing, as he stated, to make himself partaker in

the violation of an Act of the Imperial Parliament, dissolved this short and turbulent Parliament by Proclamation. The *Canadian* newspaper, which directed its whole energies against the Executive, upon whose conduct it commented with unusual severity, was destroyed by the authority of the Executive, the press conveyed to the Court House, and the Printer sent to prison. Six individuals were also taken into custody, who never were tried. These and other similar harsh proceedings on the part of the Executive caused this period to be familiarly designated as the "Reign of Terror."

1811.—The seventh Parliament composed of nearly the old members, re-elected Mr. Panet, for the seventh time their Speaker. The most of the old members were found to be component parts of the new Assembly, and the appeal to the sense of the people, was any thing but favorable to the views of the Executive. The session, however, passed over in greater quiet than might otherwise have been expected from recent proceedings, and it presented all the appearances of a busy session. On the 21st March, Sir James H. Craig delivered his farewell speech to the Legislature, and on the 19th June was succeeded by President Dunn. On the 14th September, Sir George Prevost assumed the reins of Government as Governor General.

1812.—The United States of America took the opportunity when Britain was engaged in a war in Europe, to declare war against that power, at a time, also, when from various circumstances, Canada was supposed to be in such a state as to be unable to resist a powerful invading army. The whole force then in Canada, scarcely exceeded 4000 men, and in consequence the Legislature was assembled to decide on the best measures to be pursued on the occasion. Government paper bearing interest was issued, battalions ordered home were detained, the militia drafted for active service, the garrisons placed in a state of defence, and in less than a month after the news of the declaration was made known, the Lower Province was prepared to meet the assailant. The first movement of the enemy, was the army under General Hull crossing into Upper Canada, in July, with his retreat to Detroit in August, after hearing of some reverses at Amherstburgh and Michilimackinac. General Brock, the Lieutenant Governor of Upper Canada, however attacked Hull on the 16th August, and his whole force were marched captive into Montreal, within two months after the breaking out of the war. The enemy by November collected a large additional force on the Niagara frontier.—They crossed into Upper Canada at Queenston, where they were again defeated by General Brock, whose death followed the wounds he received in the engagement. In November, the Americans under General Smyth, invaded the country near Fort Erie, the British naval force made an attack on Sacket's harbour, but neither were attended with any important result.

1813.—In January the American General Winchester was taken at Detroit by General Proctor, with 500 other prisoners. An attack on Ogdensburg by the British forces failed of success.

On the 27th April, the Americans landed at York, and burnt, and destroyed the whole town, and afterwards proceeded to Niagara. Towards the close of May the whole Niagara frontier was in their possession. General Proctor captured about this time an additional 500 Americans on the Miami River. At Burlington Heights, the Americans were on the 6th June defeated by Lieut. Col. Harvey, and driven back to Fort George, and the Niagara Frontier again restored to the British troops. An attack upon Sacket's harbour by Sir George Prevost, completely failed of success, and became one of the charges against the military conduct of that General. On the 3d June, 2 vessels were captured at Isle aux Noix by Lieut. Col. Taylor, and in July, Black Rock, and the barracks at Plattsburgh were destroyed by the British troops. On the 10th September, Commodore Perry captured the whole British force on Lake Erie under Captain Barclay, which was followed by the partial defeat of General Proctor on the 5th October near Detroit. These disasters compelled the British Commander to fall back on Burlington heights. In October, the people of Lower Canada were called out to repel the American army then threatening to invade Montreal in two directions.—General Hampton with an army of 7000 men entered the Province by the Chateauguay, on the banks of which, his advance was met by the Canadian Militia, under Lieut. Col. De Salaberry, and defeated, and Hampton obliged to retire to Plattsburgh.—General Wilkinson commenced his descent in November, on the 11th of which month, Colonel Morrison with about 800 men, attacked General Boyd at Chrysler's Farm, and drove them to their boats. The whole army retreated by the Salmon river to Plattsburgh and Sacket's harbour. Before the close of this season, the Americans had deserted the American frontier, and burnt Newark, the British took Niagara, and General Riall destroyed Black Rock and Buffalo.

1814.—In March, the American army under Wilkinson again entered Lower Canada, was defeated at Lacolle by Major Handcock, and retired to the States. General Brown crossed in July into Upper Canada, and captured Fort Erie. The Niagara frontier during the months of July and August was the scene of several engagements between the American troops under General Brown, with detachments under Generals Drummond and Riall, and success seemed rather to favor the American arms. Reinforcements were however added to the British army at the close of the latter month. Sir George Prevost in September, with an army of 11,000 men, entered the United States, attacked Plattsburgh, defended by 1500 regulars and some militia on the 11th, and retreated with considerable loss on the 13th. At the same time the British flotilla on Lake Champlain was defeated by Commodore McDonough. The conduct of Sir George Prevost was loudly censured and became one of the serious charges with which he stood accused. In November, the Americans had evacuated every military post they possessed in Canada, and when several of their forts and stations had been captured, the command of the Lakes

secured, and large reinforcements added to the strength of the inhabitants, a treaty of peace between the two powers was signed at Ghent on the 21th December, 1814—a termination inglorious to both nations, and particularly to Great Britain.

It has often been remarked with great truth, that History becomes deficient in interest during times of peace, and that the annalist finds ample materials for comment, in the sanguinary details of war. Since the termination of the last American war, few circumstances have occurred that merit particular notice, it will suffice merely to mention the proclamation of peace, the commencement of hostilities between the rival fur trading Hudson's Bay and North West Companies, and the impeachments of Chief Justice Sewell and Monk by the House of Assembly in 1815; the administration of the Government by Sir Gordon Drummond, John Wilson and Sir John Coape Sherbrooke in 1816; the impeachment of Judge Foucher by the House of Assembly in 1817; the arrival of the Duke of Richmond as the Governor in Chief, the payment of the Civil List by the Province, and the commencement of those financial difficulties which have since unfortunately too much disturbed the tranquillity of the country in 1818; the unfortunate termination of the Duke of Richmond's career on the Ottawa, in 1819; the assumption of the reins of Government by the Earl of Dalhousie in 1820; the discussion of the Union of the Provinces as proposed to the Imperial Parliament in 1822; the administration of the Government by Sir Francis Burton, in the absence of Lord Dalhousie, the launch of the mammoth vessel, the Columbus, in 1824; the unsatisfactory nature of the financial arrangements by the Legislature, and the return of Lord Dalhousie to Canada in 1825; the dissolution of the House of Assembly, the elections of the new members, and the prorogation of the Legislature in consequence of the difficulties which had arisen in relation to the appointment of Mr. Papineau as Speaker of the Lower House in 1827; the reference of the affairs of Canada to a Committee of the House of Commons, the departure of Lord Dalhousie from the Province, and the assumption of the Government by Sir James Kempt as Administrator in 1828.

Grand total.....				50	423,630

Partial enumerations of the population of the Province are to be found in early historians. In 1622, there were only 50 persons in Quebec. In 1685, the inhabitants of Canada, according to an accurate account made by order of the government, amounted to 17,000, of whom 3000 were capable of bearing arms. In 1693, Canada by computation, contained 180,000 souls, but this probably included Indians as well as the white population. In 1706, the Intendant in a memoir submitted to the Court of France, stated that the colony contained 20,000 souls. In 1714, according to a statement of Mr De Pont Chartrain, Canada contained 4484 inhabitants capable of bearing arms, which considered as a sixth of the population, would make the total number of souls as about 27,000. In 1720, Quebec contained about 7000 souls. In 1549, the Militia of Canada amounted to 12,000 men. In 1759, at the capitulation of Quebec, that city contained 10,000 souls. In 1763 the population of Canada was estimated at 65,900. In 1783, the Province of Quebec contained by enumeration 112,000 inhabitants, English and French, exclusive of 10,000 Loyalists, who had recently settled in the upper parts of the Province. Since that date no enumeration or census has been taken till that of 1825 given above. A more specific return of individuals follows. Total of inmates in each family 423,630; absent from the Province, 1450; under 6 years of age 12,570; upwards of 6, and under 14 years of age, 74,429; over 14 and under 18 years of age, 23,935. Of males, there are of 18 and under 25 years, 23,378 single, and 5293 married; of 25 and under 40 years of age, 7899 single, and 31,783 married; of 40 and under 60 years, 2664 single, and 23,419 married; of 60 years and upwards 1834 single, and 9443 married. Of females, there are, of under 14

years of age, 68,731 ; of 14 and under 45 years, 39,518 single, and 52,454 married ; of 45 years and upwards 6682 single, and 1860 married. By the evidence taken before the Committee of the House, to whom these returns were referred, it would appear that the grand total given above, is much less than the reality, as many persons, probably fearing that the census was for a capitation tax, concealed from the Commissioners the true number of their families.

THE MONTREAL GAZETTE, (*by authority,*) being now enlarged to twenty-four Columns, and Printed on a very superior quality of Imperial Paper, is published twice a week, on the afternoons of Mondays and Thursdays, at the Office, No. 25, *Notre Dame Street*, near the English Church.

From arrangements which the Proprietor has made with Correspondents and Agents in various quarters, from whom the latest Papers, Periodicals, and other Publications are received, the GAZETTE will contain copious selections on the most interesting subjects of European Politics.—Commerce and Agriculture will receive a great share of attention, and Law Reports, both Foreign and Provincial, on important subjects, will have frequent insertion in the Columns of the GAZETTE.

The local Politics and the general interests of the Canadas, and the events which daily pass before us, will be duly examined and recorded; a Commercial Price Current corrected with care by experienced Merchants, will be frequently published, during the most active periods of business; a brief condensed list of the Sheriff's Sales in the Province, that are to take place during the month subsequent to that of publication, will be inserted monthly; and on the arrival of each LONDON and LIVERPOOL Packet, the Promotions in the Navy and Army, and interesting events connected with these services will receive early attention.

During the sitting of the PROVINCIAL PARLIAMENT, an individual connected with the office will be present at QUEBEC to send early and full reports of the Debates and Proceedings of the different branches of the LEGISLATURE, which cannot but prove interesting to all classes of the community.

From the present very extensive circulation of the MONTREAL GAZETTE, it can with confidence be recommended as a useful vehicle for general Advertisements, and being the *only* Official Paper in the District of MONTREAL, it is a safe LEGAL record, and will be admitted by the Courts to be the best reference and proof of the Acts of Executors, Tutors and Trustees, Sales of Property, Dissolutions of Partnerships, or any Acts from which future contest may possibly arise.

The annual charge for the GAZETTE is 20s. if delivered in Town, and 25s. if sent by Post to the Country, payable *six* months in advance.

All kinds of Books, Pamphlets, Catalogues, Funeral Cards, Posting and Hand Bills, &c. &c. &c. will be executed with neat-

ness and dispatch, on moderate terms. An assortment of Custom House, Half-pay Officers' and Widow Pensions' Blanks, Declarations, Inscriptions, Subpœnas, and other Forms used in Legal Proceedings, Bills of Exchange, Lading and other Mercantile Blanks, always kept on hand, and sold at reasonable rates.

The following Agents of the MONTREAL GAZETTE, will receive and forward, without delay, all Communications and Advertisements or Orders for Printing at the GAZETTE Office, and also receive Subscriptions and payment of Accounts.
