INTRODUCTORY ADDRESS.

In placing the second Volume of his "QUEBEC DIRECTORY, AND CITY AND COMMERCIAL REGISTER" before the Public, the Compiler desires to acknowledge his deep sense of the honor which has been repeatedly conferred upon him by his fellow citizens in their acknowledgement and approbation of his former publications relating to this renowned City.

It is always gratifying to receive the approval of ones fellow Men, and the hope that the present production will at least be useful, has been the chief inducement of the Compiler to undertake the task; for sooth, to say, the profits have as yet been none—not, be it understood, for want of the patronage of the Quebec Public for that has been most generous, but from the absence of honorable conduct in those connected with former publications, in whom he had placed confidence.

In submitting his design of publishing the present Volume, the Compiler is proud to say, that in filling his subscription List upwards of 800 names were placed upon it in a few days.

For any errors or omissions that may be observed in the Volume: he has only to say, that he trusts they will be good naturedly overlooked, for indeed their are few publications of the nature of the present one, which can under any circumstances be entirely correct.

In fine, the compilation of the work has been a task of no ordinary labour, more especially as it has been confined entirely to the exertions of the compiler himself.

The Compiler desires to acknowledge his many obligations to Joseph Hamel, Esquire, City Surveyor, for the very valuable assistance he has at all times most readily and willingly accorded to him on former as well as on the present occasion.

To the Mayor and Corporation of the City, the Compiler also begs to return his best thanks for the unanimous encouragement which has been frequently and unreservedly bestowed upon him.

The Great Fires of 8th May & 28th June, 1845.**A BY-LAW**

PASSED 4TH JULY, 1845,

To provide for the construction of dwellings in such way as to diminish the danger of Fire.

Whereas, on the Twenty-eighth day of May last, more than two-thirds of St. Roch's Suburb of this City were destroyed by Fire, and on the Twenty-eighth day of the month of June following, nearly the whole of St. John's Suburb, and a portion of the Suburb of St. Lewis fell also a prey to the flames, and in the first Fire more than thirteen hundred houses, and in the second about fifteen hundred houses, were reduced to ashes, and nearly twenty thousand individuals thereby rendered houseless by the disasters; and, whereas, in the one and the other of these calamities it was found impossible to arrest the progress of the flames owing to a high wind which at these times prevailed from the quarter in which the Fire on both occasions originated, following a drought of several days previous, which aided in spreading the fire with irresistible violence among the wooden dwellings and buildings of which these two suburbs were for the greater part composed; and, whereas, if these large and important portions of the City were rebuilt of materials similar to those of which they were heretofore constructed, it would be impossible to prevent, under like circumstances, which might from time to time arise, their future destruction by Fire, a calamity which might involve the other portions of the City, wherefore it becomes imperative to prohibit the use of like inflammable materials in the reconstruction of the said suburbs.

Be it therefore ordained and enacted—

1.—That, hereafter, it shall not be lawful to build any house, dwelling, or building for habitation, or in which it is intended to make or introduce fire; or to erect chimneys, ovens, furnaces, stoves or other receptacles, or machinery intended to receive fire or in which fire may be placed or kindled, unless the four walls of such house, dwelling, or building be constructed of stone or brick, or of other incombustible materials;

and unless the covering be entirely composed or re-covered with tile, tin, sheet iron, or other uninflamable materials.

2.—That in all buildings, covered with metal, the lower surface of that part of the wooden roof which projects beyond the walls and the exterior surface of the wall-plate (*sablère*), (if constructed of wood) shall be also covered with metal ; and that all spouts and gutters shall be made of incombustible materials.

3.—That all gables or division walls which separate buildings shall be raised at least two feet above the level of the roof of the highest house or edifice, with *consolles* in front and rear, which shall project at least nine inches beyond the walls of the building.

4.—All *hangars* outhouses, stables, workshops, or other buildings, the highest part of which exceeds fifteen feet, shall be constructed in strict conformity with the present By-Law ; all similar buildings, of at least fifteen feet in height, shall nevertheless be covered with incombustible materials between this date and the first day of September, one thousand eight hundred and forty-seven (1847,) without inferring from the preceding clause, that it shall be lawful to construct edifices of wood in those wards in which such buildings are forbidden by a By-Law of the 19th June last, intituled, "By-Law to prevent accidents by fire."

5.—It shall not be lawful to construct chimneys, ovens or furnaces, or to place stoves or other receptacles for fire, or to use fire in the yards or streets in the vicinity of any building, or in the interior of any building, which shall not have been constructed in conformity with the above first three clauses.

6.—That all houses or other buildings of wood within the limits of the city shall be lathed and plastered at least one inch in thickness, on that side which is next to the street, between this date and the first day of September, one thousand eight hundred and forty-seven (1847), and all buildings which shall be hereafter constructed of wood in those wards in which the use of that material is permitted by law, shall be lathed and plastered in the manner above mentioned.

7.—The present By-Law shall have full force and effect from the date of its adoption throughout the whole extent of the City, with the exception of that part of St. Roch's ward which is situated to the west of Crown Street, in which the sixth article shall be nevertheless observed.

8.—The present By-law is not intended to prevent such persons as have suffered the loss of their property by the late fires in St. Roch's and St. John's Suburbs from constructing temporary places of refuge in wooden buildings of *only one story*; but all buildings which are not found to be constructed in conformity to the present By-law shall be demolished and removed between this date and the first day of September, one thousand eight hundred and forty-seven (1847.)

9.—That part of this By-law, which regards the covering of buildings, shall be held in suspense until the first day of September, one thousand eight hundred and forty-seven (1847) with regard to such buildings as are at present in process of construction.

10.—Any person who shall refuse or neglect to conform to the different clauses of the present By-law, shall incur a fine of five pounds currency (£5,) for each day that such offence shall continue.

11.—All undertakers, masons, carpenters, or workmen who shall construct any part of a house or other building; otherwise than in conformity to the present By-law, shall incur a penalty of five pounds currency (£5) for each day that such infraction of the By-law shall subsist.

LEGAL TENDERS OF COINS.

By the Currency Act, 4th and 5th Victoria, chap. XCIII, it is provided, that the British sovereign of full weight, and the American eagle of eleven dwts. six gr. troy, coined before July, 1834, and all their multiples and subdivisions, shall be legal tender, the former at £1 4s. 4d., the latter at £2 10s.; and if not more than two grains less than full weight, each coin shall continue to be by tale to any amount, at a deduction of $\frac{1}{2}$ d. currency, for each quarter grain. Provided that, legal tenders if the payment exceed £50 currency, either party may insist of such coins being weighed in a lump, and to be legal tender at the rate, the British of 94s. 10d. currency per oz. troy, and the United States coins at that of 93s. currency.

In like manner the gold coin of France of forty francs with its divisions and multiples, at 93s. 1d. currency, per oz. troy; the old doubloon of Spain, or quadruple pistole, the Mexican and Chilian doubloon, at 89s 7d currency, per oz. troy; the gold coins of La Plata and Columbia at 89s 5d currency, per oz. troy; the gold coins of Portugal and Brazil at 94s 6d currency, per oz. troy;—all these if coined before Sept. 1, 1841, are legal tender for sums above £50, weighed out at the annexed rates.

The following silver coins are legal tender:

The silver dollar of Spain, the United States, of Peru Chili, Central America, the States of South America, and of Mexico, if coined before the year 1841, and weighing seventeen dwts. four grs. troy, at 5s 1d currency; and half-a-dollar of the same coinages and proportionate weight, at 2s 6 $\frac{1}{2}$ d; to any extent, by tale.

Their subdivisions—the one-fourth dollar for 1s 3d currency; the one-eighth for 7 $\frac{1}{2}$ d currency; the one-sixteenth for 3 $\frac{1}{2}$ d; are legal tender to the extent of £2 10s at one time, by tale, if they have not lost more than one-twenty-fifth of their weight.

The French five-franc coined before 1841, in tale for any amount at 4s 8d.

The British crown at 6s 1d currency; which, and other descriptions of British coin lawfully current in Great Britain and Ireland, of proportionate weight, and for proportionate sums to the amount of £2 10s currency, and no more.

The Governor General can by proclamation include among legal tenders the more recent coinages of those nations of the values specified, having verified their pureness by assay.

£100 sterling is equal to £121 13s 4d currency, and is deemed par of exchange, from which rate exchange seldom fluctuates more than one per cent.

To bring sterling into currency, add 1-5th to the sterling amount and 1-12th to the 1-5th; and to reduce currency into sterling, multiply by 60 and divide by 73.

The basis of the currency is the imperial gold standard, differing from sterling money in the different nominal value of the pound and its constituents.

The pound sterling is by law fixed at *Twenty-Four shillings* and *Four-Pence* currency. At this rate all large transactions are settled, and remittances, with the correction of the day for exchange, are calculated.

A shilling sterling and a quarter of a dollar are taken in the stores as equal. The exchangeable value of the dollar, of course, varies with the course of exchange between the Provinces and the United States, which is principally ruled by that between New York and London. In general, its value is about 5s 1d currency, or 4s 2d sterling.

The Shilling currency is subdivided into twenty-four copper coins, called Coppers. Coins of this metal, of Colonial, British and American origin, and of very various denominations, are common, and each is pretty generally taken as the equivalent of a copper, without much reference to its intrinsic value. The English Penny, Half-penny, and Farthing, of not less than five-sixths of the weight of currency, is a legal tender to the amount of 12d.

The following coins are also usually taken at the rates specified :—

This Table is convenient for finding the maturity of Notes. A note of 60 days, dated Feby. 2, being the 23rd day of the year, as is seen in the Feby. column on a line with 2 in the Index, the addition of 60 (including 3 days grace) shows that the note falls due on the 9th day of the year, which will be found, on reference to the month and the index, to be Friday, the 5th day of April.

Light Houses.

Light House on the South Pillar, shews a Revolving Light,

Keeper—MR. CHARLES JULYAN.

On Green Island, a Fixed Light. Keeper—MR. R. N. LINDSAY.

The Lantern of the Light-House on Green Island shews a Light every Evening, from Sunset to Sunrise the next morning, from the fifteenth day of April to the tenth day of December inclusive; and the following are the Bearings of it, by Compass, from the respective places here under mentioned, viz:

Red Island	-	-	E. S. E. $\frac{1}{2}$ S.
White Island	-	-	E. N. E. $\frac{1}{2}$ E.
Brandy Pots	-	-	N. E. by E. $\frac{3}{4}$ E.
Apple Island	-	-	W. S. W.
Basque Island	-	-	W. S. W. $\frac{1}{4}$ W.

The Shoal at the N. E. end of Green Island, S. W. $\frac{1}{2}$ S.

The Shoal at the West end of Green Island, N. E. $\frac{3}{4}$ E.

Floating Light in the Traverse. Commander—J. RICHARDSON.

Light House on Pointe des Monts. Keeper—JOEL BEDARD.

Will shew a light every evening from sunset to sunrise, between the first of April and the thirty-first of December inclusive.

The following notice was published by the Trinity House, relating to this Light-House.

NOTICE TO MARINERS.

That a Light-House (a Fixed Light) has been erected on **POINTE DES MONTS**, (or Cape Monts Pelés) on the north side of the River St. Lawrence, nearly opposite to Cap Chat, the lantern standing one hundred feet above the water.

The Light-House lays with the outermost part of **CARIBOU POINT** N. 52°. East and South 52°. West, by the Compass, and it can be seen over that point and to the Eastward of it.

Ships approaching the light from the Eastward, as they draw towards Caribou Point must bring it to bear W. by S.; they will then be in a good fair way, and if necessary, they can near the land by the lead.

After passing Caribou Point, and as they draw towards the Light-House, they must come no nearer than twelve fathoms water to avoid two ledges of rocks, one of which lays E. S. E. from the Light, with only 12 ft. of water on it; the other lays S. W. from the Light, and E. S. E. from the Western extremity of Pointe des Monts, with 16 feet water on it; but these rocks do not lay farther from the shore than half a mile at low water.

The Light-House lays with the western extremity of Pointe des Monts N. 64 °. East and South 64 °. West, and distant about one mile; and when ships are to the Westward of the Point, the Light-House is in one with the outermost rocks off the Point; and in day time it forms a bold distinct Land Mark, and on this line of bearing ships are in the best possible fair way for the general purposes of Navigation, whether bound up or down.

For any particular purposes of Navigation, ships may safely stand to the Northward, until the Light bears E. by N.; they will then be drawing near the North land: and when it bears E. $\frac{1}{2}$ N. it is time to tack; for when it bears East it will shut in with the High Land, and cannot be seen to the *Southward of East*, and then they will be only one mile from the land, and if they are off Godbout River, Pointe des Monts will bear from them E. by S. two leagues distant.

When ships are off Saint Nicolas Harbour, and the light bearing E. by N. they are in a good fair way from the North Land. The S. E. spit of *Manicouagan* great Shoal, the ship and the Light-House are then all in one line of bearing.

Light House on S.W. Point of Anticosti. Keeper—MR. E. POPE.

A Light-House having been erected on the South West Point of the Island of Anticosti, notice is hereby given that a grand Revolving Light, on the Argand principle, was shewn thereon for the first time, on the 25th of August, 1831, and that the said light will continue to be shewn every night from sunset to sunrise, from the 1st April to the 15th December, in each year inclusive.

When ships are to the Eastward of the Light-House, they may safely stand towards the Island until it bear N. N. W. by Compass—they will then be in a good fair way; and if they wish to make more free with the land, they can do so by their lead. The land trends from the Light-House S. E. by S. or nearly so.

When ships are to the Westward of the Light-House, they may safely stand towards the Island until the light bears S. S. E. $\frac{1}{2}$ E. they will then be in a good fair way from the land, and as before mentioned, they can make more free by their lead.

Nearly East and West with the Light-House, and about three-fourths of a mile from it, is the outermost part of a *Reef of Rocks* which joins the S. W. Point. These are dry at low water and are the only dangers near the Light-House; therefore a berth of a mile from the Point, is a good fair way.

Sixteen leagues to the Eastward of the Light-House, at Shallop Creek, and sixteen leagues to the Westward of the Light-House, at Grand Bay, and at the Light-House itself, are Depots of provisions for the use of Mariners in distress, or other shipwrecked persons.

THE Subscriber, in expressing his obligation for the very liberal patronage he received during the preceding summer, begs to inform the Public that "THE CANADA HOUSE" is again OPENED by him, for the reception of Visitors; and he most respectfully solicits a continuance of their patronage. He assures them that he will spare no pains to add to their comfort, health, and recreation.

Since the close of the last season, the house and grounds have undergone many important alterations and improvements, which, it is hoped, will add to the comfort and convenience of Visitors. The Dining-room has been considerably enlarged, and the Bar removed from the house.

The Subscriber is happy to state that MISS MURRAY, whose attention to visitors is so well known, will still remain at the Springs.

The Caledonia Springs present the great advantage of a variety of Medicinal Waters, acknowledged by the most eminent of the Faculty to be, each of their kind, unrivalled in their efficacy for the cure of diseases, and invigorating qualities.

The Salt and Sulphur Baths are in full operation, from the use of which the most extraordinary benefits have been derived.

The Stages will leave Montreal every Morning, Sunday's excepted, and arrive at the Springs in the Evening.

The charges at CANADA HOUSE are the same as last year, viz:
