

ADAMANT MFG. CO.,
MANUFACTURERS
OF **Adamant Wall Plaster**
100 ESPLANADE EAST, TORONTO.

[OVER]

ADAMANT

is a machine made mortar; comes **dry** in bags; is simply mixed with water and put on with a trowel, same as common mortar. Any mason can apply it. It can be used in the coldest weather without heat. We furnish Adamant the same as the lime dealer does lime, sand and hair.

WE CANNOT QUOTE the price or estimate the cost of a wall complete, as we do not know the price of labor in the various towns and cities, this being an important factor when the entire cost of a wall is taken into consideration.

WE ESTIMATE that 12 bags No. 2 and 4 of 1 XXX will cover 100 yards of two coat work.

A BUILDING CAN be delivered and occupied from four to six weeks quicker than where lime mortar is used, and the rent for this time, saved, will more than cover the extra cost.

SEND YOUR ADDRESS to our mill for samples, circulars, particulars, &c.
