Rules for Calculating Size and Speed of Pulleys

To Find Diameter of Driver

Multiply number of revolutions of driven by its diameter and divide product by number of revolutions of driver.

To Find Diameter of Driven

Multiply number of revolutions of driver by its diameter and divide product by number of revolutions of driven.

To Find Revolutions of Driven Shaft

Multiply diameter of pulley on drive shaft by its number of revolutions and divide product by diameter of pulley on driven shaft.

Reverse above rule to ascertain number of revolutions of drive shaft.
