PREFACE.

The compiler and publishers take the opportunity of congratulating the residents of British Columbia on the favorable aspect of affairs on all sides. Our drydock ready for use, the trans-continental railway complete, a Pacific line of powerful steamers established and a liberal subsidy therefor promised by the Imperial Government; enhanced and firm rates for real estate and all descriptions of property, with no war cloud threatening the political horizon; these are facts which promise a long continuation of the steady increase of population which has begun, arising from the growing acquaintance with our resources now so prevalent abroad.

The compilation of the present work has been attended with lengthy correspondence and protracted attention on the part of the publishers, and could not have been accomplished even at this late period but for the cheerful and painstaking assistance rendered to the authors by their very valuable contributors, whom they take the opportunity of now thanking; and trust the result will prove one more success of the British Columbia Directory.

VICTORIA, July 1, 1887.

ESQUIMALT DRY DOCK.

July 21st, 1887.

At 3 o'clock yesterday afternoon the formal opening of the Esquimalt Dry Dock was to take place in the presence of representatives of the Dominion Parliament and Senate, the Provincial Government and Assembly, the civic Council of Victoria, leading business men and a number of ladies.

The caisson having been opened by steam, which operation, until it passed into the chamber, taking 2½ minutes, H. M. S. Cormorant passed in to a lively air by the band of H. M. S. Triumph, and in a few minutes was in position, the hawsers attached to the shore, the caisson again closed and the pumping engines started into motion. Mr. Conolly, of Larkin, Conolly & Co., the contractors, entertained the visitors and was duly toasted by them on proposal of Mr. Speaker Pooley. Mr. Bennett, Resident Engineer, received his meed of praise at the hands Hon. J. W. Trutch, and was toasted by the assembled company. Mr. Bennett, in the course of his remarks, alluded to the fact that the Quebec graving dock was earning $900 a day. H. M. S. Triumph, it is understood, will enter the dock after the Cormorant has left.

DESCRIPTION OF BRITISH COLUMBIA.

SHORTENED FROM A FORMER EDITION.

In speaking of the Province of British Columbia, it is to be borne in mind that we speak not of a tract of insignificant area, but of a vast region, sitting partly astride of the Rocky Mountains and comprising within its limits either wholly or in part the great rivers flowing to the Pacific north of the 49th parallel, and the upper tributaries of that great river (the Mackenzie) which drains the continent northward, towards the Arctic ocean. The computed area of the province is 350,000 square miles.

This vast tract extending in a north-westerly direction through 12 degrees of latitude and with varying breadth and varying elevation, presents much difference of local feature and diverse conditions of climate. A portion of the Pacific sea-coast enjoys a winter climate as compared with the Atlantic coast, equal to a difference of at least 10 or 12 degrees of latitude. The interior parts too, are far from exhibiting the severity of climate of the eastern coast, and they are for the most part drier.

The coast climate may be said to extend some miles above Yale. The evidences of a drier climate then begin to appear; and at the junction of the Fraser and the Thompson rivers, 55 miles above Yale, all the evidences of a hot and dry climate are perceptible: such as the parched and sandy appearance of the ground (yielding abundantly under irrigation) and a prevailing growth of cacti and other succulent plants. The whole of the interior plateau comprised between Lytton, the lower ford of the Bonaparte and southward towards the boundary line at Osoyoos, is conspicuously a tract adapted for the pasturage of herds of cattle. This is the region of the red pine and the bunch grass country. It has a dry climate and irrigation is in many parts necessary to ensure a crop, but this provided, enormous results are arrived at.

At certain points, through the grazing of large herds, the famous bunch grass has at least partially disappeared; another class of vegetation no less nutritous has succeeded it, and thus the loss is so far neutralized.

A large proportion of the foot hills having a southern exposure, are probably well suited for the culture of the grape. The soil near the bases of the hills in an extensive tract of country reaching southward from Lillooet, composed largely of decomposed volcanic detritus, seems specially favorable; and at Lillooet vines are successfully cultivated for the limited local supply.

The agricultural capacities of the lower country have been already expatiated on elsewhere. Grasses of the finest quality are freely and abundantly grown; prizes and other awards of merit have been given to such exhibits of the province as have been sent to various industrial exhibitions abroad. The exuberant fertility of the low delta lands of the Fraser is locally proverbial.

The immediate neighborhood of the coast as we proceed northward, is in most parts heavily timbered, and generally mountainous. From the southern limit of the province on the Straits of Fuca, up to Cross Sound, beyond Sitka in Alaska, a series of inland navigation is available, and for steamers of the largest size. Stupendous inlets diverge inwards from the main route of communication.

But, to refer to the interior, which by no means ought to be overlooked, I mean that portion lying towards Clinton beyond Alexandria, and thence upwards to the Rocky mountains. In this wide tract is situate the rich gold mining region known as Caribou or Cariboo. A good waggon and stage road conducts from Yale clear up to Barkerville in the heart of the mining region; but during the open season the transport is relieved by a steamer which plies from Soda Creek, twenty miles below Alexandria to Quesnelle, some forty miles below. The succession of valleys by which the district is approached, known as Bridge Creek, Lac La Hache, Williams Lake, &c., though elevated in position are attractive in character, and there is throughout a succession of thriving settlements. There are other thriving communities along the banks of the Fraser towards Alexandria. Seated at a lower level, the occupants enjoy necessarily a climate more uninterruptedly genial than their neighbors of the higher interior tracts.

SODA CREEK, above the mouth of the Chilcoten river which flows into the Fraser, is the point where the navigation of the upper Fraser commences—the intervening portion between this and Yale

being too much interrupted by violent rapids to be usefully navigated. As an entrepot it is a point of some local importance. ALEXANDRIA, twenty miles above Soda Creek, is a site of a post of the Hudson Bay Co., formerly of much importance. Good wheat and other grains are grown here. The level of the Fraser here, by observations of the Royal Engineers, is 1,430 feet above the sea.

QUESNELLE, 40 miles above Alexandria, is situated on the left bank of the Fraser, at the mouth of the Quesnelle river. It has a claim to importance as a distributing point for the neighboring mining region of Cariboo, sharing this honor, however, with BARKERVILLE, which may fairly claim to be the nucleus of the surrounding district. The mouth of the Quesnelle is 1,490 feet above sea level. Beyond this point there is an excellent line of boat-navigation, extending in an eastern direction to Tete Jaune Cache on the confines of the Rocky mountains 750 miles from the sea; and in a western direction through Stuart's River branch and its lake connection, to the limits of the Coast Range, nearly equi-distant. Through a great portion of this upper tract, ordinary agriculture has for many years been successfully carried on; barley, potatoes and other vegetables, and wheat, though rather precarious in its returns.

In the southeast angle of the province, lying between the boundary line of 49°, the Rocky Mountains and the Columbia River, is the KOOTENAY DISTRICT. (See description elsewhere of this highly promising district.) In an opposite angle of the province is OMINECA, recognized only so far for its gold producing capacity, now not so great as formerly. Omineca can be approached by two routes by the Skeena River and Babine Lake, and from Quesnelle by pack train.

POPULATION.—The population of the province though small, but increasing rapidly, for intelligence, industry and orderly conduct, may be classed prominently among the people of the various dependencies of the crown. Here the law rigidly administered is as a rule strictly obeyed. The Indian element also is a great feature: we have in the main a well-ordered native population, studious of improvement and eager in the acquisition of those industrial arts which conjoined with other instruction, can elevate them permanently in the social scale. Kindness, firmness and justice may sum

briefly the secret of success of the once powerful trading companies of the North-west and the Hudson Bay. The natives are large producers, and as consumers contribute an important share in the aggregate customs revenue of the province. The coal mines, the saw mills and above all the canneries, are largely dependent on them, and in the interior as packers and canoe-men they are invaluable.

PRODUCTS.—The products of the Pacific province are gold*, silver, coal†, lumber‖, iron‡, fish—such as salmon, herring, oolachans, halibut, dog-fish—used for oil by boiling the liver, and black cod. Of salmon there are five species, the Silver arriving first in March or early April, weighing from four to twenty-five pounds; the second kind arriving from June till August, are considered the finest, but only weigh from five to six pounds. The third average seven pounds and are an excellent fish. The humpback salmon comes every other year, lasting from August till winter, weighing from six to fourteen pounds. The hook-bill arrives in September and remains till winter, weighing from twelve up to forty-five pounds. The principal salmon canneries are located on the Fraser River, Alert Bay, River's Inlet, Skeena River, Metlakathlah and Naas River. Large quantities are also smoked and cured and salted and packed in barrels for shipment.

But our space is limited and we must draw to a conclusion. The sober and industrious settler need have no fear of want. While elsewhere sad plaints of dearth and starvation are heard—here the bountiful products of nature waste through want of occupants.

It might be added that though the prices of necessaries are double those of eastern Canada, wages are in the same proportion; days suitable for out-door labor more numerous in the year and in the cities house rent is very moderate.

*From 1858 till the present year the yield has been about $45,000,000.
†True bituminous and also anthracite, 1800 lbs of the former equal to 2400 and 2600 lbs from the neighboring territories for steam purposes.
‖See elsewhere for quantities exported.
‡Found on Texada Island containing 64 per cent. of iron, at the entrance to Sooke Inlet, and Douglas Portage.

THE CANADIAN PACIFIC RAILWAY.

[Taken from the Manchester Examiner of recent date.]

Colonist, January 1st.

But little interest has been manifested in the completion of the Canadian Pacific railway, the fourth of its kind which spans the North American continent, and which Lord Lansdowne, the Governor-General of Canada, inaugurated by driving the last spike of the line. As a railway project it is the largest single enterprise ever attempted, while the confidence and energy with which its builders have successfully grappled with the physical and financial difficulties it presented seeks its parallel in the annals of railway enterprise. The Canadian Pacific railway has been appropriately called the offspring of two great ideas—firstly, the necessity of uniting into one empire the British colonies of North America; secondly, the importance of throwing open for settlement a vast area of fertile country, and of finding for the commerce of Europe and America the shortest and best route to the great and promising markets of Eastern Asia. The first practical proposals for the construction of the Canadian Pacific railway emanated from British Columbia, where Mr. Waddington, an English settler, prior to confederation, succeeded in demonstrating the feasibility of the project on economic grounds. In 1868 the Pacific province, which had desired so soon as the union of the provinces was agitated to join the Dominion, despatched delegates to the Federal Government for the purpose of negotiating the terms of its adhesion, the most important for which were the construction of a railway from the Pacific towards the Rocky Mountains to connect the sea-board of British Columbia with the railway system of Canada, (sec. No. 11 terms of union); and the expenditure of one million dollars annually on the construction of an interoceanic line; the Dominion Government to begin the construction of the railway within two years, and to complete it by 1881. British Columbia immediately accepted, and the Dominion thus stood committed to the herculean task which is now a fait accompli. It would be tedious to follow in detail all that took place during this interval. Suffice it to say that the railway became in politics the greatest question of the day, and over the policy adopted in its construction bitter political conflicts took place. The

expediency of construction by government was tried, but with unsatisfactory results. A fatal error was undoubtedly made in the principle laid down in the earlier Acts passed on the subject that the line should be constructed without increasing the taxation of the country, and in the assumption that huge land grants alone would induce private enterprise to carry out the work. In spite of party differences it soon became evident that the progress made on the prescribed lines was quite out of proportion to the cost incurred, and that the construction of the railway would more probably consume the greater part of a century than the stipulated ten years. Matters were precipitated by the revelation towards the close of 1878 that only a total of 139 miles of railway had been laid and 189 miles graded. A radical change of policy was urgently called for, and 1881, when the present Government came into power, a company was induced to undertake the work, aided by a cash subsidy of $25,000,000, a liberal land grant of 25,000,000 acres, and the completion, at the cost of the government, of the two sections already commenced, viz., Port Arthur to Winnipeg 428 miles, and Port Moody on Burrard Inlet, westwards to Savona Ferry, Lake Kamloops, 213 miles, valued at $30,000,000, thus leaving the company to build the two sections from Callander to Port Arthur, 657 miles, and from Winnipeg to Savona Ferry, 1,252 miles. The company set to work with determination and vigour. During the season of 1882 rails were laid at the average rate of three miles a day. By the end of the season 450 miles were ready for trains, and 610 miles graded. In June (1882) the section from Port Arthur to Winnipeg was opened, and by the end of the summer there was a continuous line of steel from Lake Superior to a point 450 miles west of Winnipeg. With a view of securing an independent eastern terminus for their system, the company now bought a controlling interest in existing lines, giving it connection with Ottawa, Brockville, Montreal and Quebec. In 1883, on the difficult section north of Lake Superior, 200 miles of track were laid, and westwards, the summit of the Rocky Mountains, 962 miles west of Winnipeg, was reached in November. By the end of the year the company had 2,963 miles of the road under its control. The strain of this tremendous energy began at last to have an effect on the company's financial resources, and the situation was intensified by the orga-

nized hostility of its rivals, who repudiated its stock until it became unsaleable except at an immense sacrifice. Under these circumstances the Canadian Government came temporarily to the assistance of the company. The section north of Lake Superior and in British Columbia—the latter presenting great difficulties in crossing the Rocky Mountains and the Selkirk and Gold ranges—were both complete in the course of the present summer. The Canadian Racific railway was thus finished six years before the limits of the company's contract, and it only needed the formal opening ceremony before starting on a career full of great promise. The advantages that are claimed for the railway are certainly of a substantial nature, and such as should exercise an important influence on its immediate future. The system of the Canadian Pacific railway is more compact, its route is shorter by 450 miles than that of any other of the transcontinental lines; its equipment is most complete, and suited to modern exigencies of traffic. Possessing uncontrolled its termini on the Pacific and Atlantic Oceans—an advantage not possessed by any of its competitors—it will not be forced to divide, like them, with rival lines the earnings of the remunerative traffic that will pass over its system. It already draws a large and steadily-increasing revenue from its local traffic, and its debt charges are so much smaller than those of any of the other similar lines in a flourishing condition, that low and yet remunerative rates will be possible, sine qua non for attracting transit traffic. As an advantagously placed route to the East, the railway will primarily commend itself to English merchants. Its line runs entirely through British territory, with large coal deposits at both ends, and it effects a saving of 900 miles over the United States route, and 1,300 miles over that via Suez. The comparative distances are as follows:—

LIVERPOOL TO YOKOHAMA.

		Miles,	Days.	Miles,	Days.
Via Suez				11,275	50
Via United States	Liverpool to New York	3,040	12½		
	N. Y. to San Francisco	3,320	5½		
	S. F. to Yokohama	4,660	19½	11,010	37½
Via Canada	Liverpool to Montreal	2,790	11½		
	Montreal to Port Mdy	2,911	4		
	Port Mdy. to Yokohama	4,180	17½	9,884	33

The above times are obtained by assuming a uniform speed of nine to ten knots an hour on the sea passages, and thirty miles an

hour for passengers on the railway. Goods on the latter would go slower, say 20 miles an hour, or two days extra, and four days for transhipment delays.

Of course faster passages—as little as 38 days, have been made via Suez to Yokohama; but under like conditions the passage via Canada could be reduced to 27 days. Thus there will always be a gain of from 11 to 17 days on the Canadian route, a matter that should weigh with passengers when the rates would be the same by both lines. In freight rates the difference will be much smaller than is currently believed. Adopting as a basis the present through rates via the States and via Suez, the difference will virtually lie between 2,911 miles of railway carriage (Montreal to Port Moody), at ¾ of a cent per ton per mile, and 4,305 miles water carriage (the balance of the Suez route over the sea passages of the Canadian route) at ¼ of a cent per ton per mile, minus the saving of time on the Cadadian route, whatever that may be commercially worth. The tolls of the Suez Canal may be held to equalise the transhipment charges at Montreal and Port Moody. The substantial gain in time, and the ability of the Canadian Pacific railway company to reduce their rates, must inevitably turn the scales in favor of the Canadian route. The trade follows the flag is now a well recognized truism. It is, however, one of the chief reasons why the Canadian Pacific Railway should become the great Asiatic route to and from Europe, inasmuch as the shipping of the world is owned and operated by British Merchants, who will carry trade through channels of their own choice. It is indeed remarkable how signally the American inter-oceanic railways have failed to draw the Asiatic trade over their roads. A tolerably accurate explanation of the situation is the evidence of a prominent Bostonian before the Committee of Inquiry, which may be summed up in the few words that commerce is now carried on so small a margin, and on such a great scale, that the profit or loss depends upon the cost of transportation, the rate of exchange, and facilities of credit, matters in all of which England holds a commanding position. Thus it comes that England's position as the greatest maritime nation, and as the money or credit centre of the world, is able in conjunction with her colonies to govern the general movement of commerce. The Canadian Pacific railway as a British route to the East cannot fail to derive great

benefits from the tendencies of these influences, which should ensure it a comfortable future. Over its road will come the tea, coffee, rice, spices, indigo, sandal and other woods, silks and textile fabrics, the products of the countries of Eastern Asia, where everything points to a great commercial development in the immediate future. As an alternative route for the transmission of mails to the Australian colonies, the Canadian Pacific railway must sooner or later find recognition. Manchester mails via Montreal and Port Moody would reach Sydney in 34 days, Brisbane in 35, Melbourne in 37, Adelaide in 39, Wellington, New Zealand in 34, Hongkong in 32, and Yokohama in 27 days. This railway will bring about rapidly the settlement of the lands along the prairie section of its line, and the development of the mineral resources and the fisheries of the "Pacific Province." It is sufficient to say that the progress the country will make in the immediate future will amply justify the sacrifices that have been made by Canadians generally for the establishment of the road, and the patience and foresight of those who have pinned their faith to it.

[FROM PICKEN'S PAMPHLET, VANCOUVER.]

Completed now to Coal Harbor, Vancouver City, February, 1887.

The Company have a monopoly for 20 years of the territory between its lines and the United States by prohibiting during that period the building of lines there by other parties except southwest, and not to approach within 15 miles of the frontier. Mr. Van Horne, the manager of the line, has stated that he will undertake with the present equipment of the road, to transport 8,000 armed men a day with their baggage and appurtenances from the Atlantic to the Pacific; that he could continue to do this for a week and in no case the transit occupy more than a week. Thus 50,000 men with artillery and baggage can be started from England and within two weeks the advance guard will arrive on the Pacific Coast, and all could be there in three weeks after their departure.

THE CANADIAN PACIFIC.

POINTS FROM THE ANNUAL REPORT OF THE COMPANY.

(Colonist May 21st. 1887.)

MONTREAL, May 14.—The annual report of the Canadian Pacific railway company has been made public. It shows that the agreement entered into with the government on November 10th provided for the payment to the company of the balance of the cash subsidy and for the release of $4,000,000 of the $5,000,000 of the lands grant bonds held by the government under the original contract. These are now held by the company. The gross earnings for the year were $10,008,183, the working expenses $6,378,317, leaving the net earnings $3,703,487. Deducing the fixed charges, leaves a surplus of $635,444.

The report says that although the railway was open for through freight traffic only for the last five months of the past year no less than seven cargoes of tea and other Chinese and Japanese commodties were brought to the line during that time by sailing ships, and consigned to the principal cities in Canada and to St. Paul, Chicago, New York and other cities in the United States. A temporary service for the present season has been arranged for, to be performed by three steamships between Vancouver and Yokohama and Hongkong. Negotiations are in progress with the Imperial government for the establishment of a first-class line of steamships between Vancouver and China and Japan, and there can be little doubt of satisfactory results. [The first of these steamships has already arrived.—ED.]

Before the next annual meeting trains of the Canadian Pacific will be running from Halifax to Vancouver; a branch of the Sault Ste. Marie line will be open; the Boston line will be fully established; and it is expected that the Ontario and Quebec will have an independent working connection with Chicago and the Western States.

Victoria City---General Remarks.

Victoria, the capital of British Columbia, is situated at the S. E. extremity of Vancouver Island, in lat. 48° 25' N and long. 123° 22' W. It is about 750 geographical miles from San Francisco.

The City was incorporated in 1862, and since that date has twice enlarged its boundaries, now extending from the Gorge Road on Victoria Arm, on the N. W., to Cedar Hill Road, Cadboro Bay Road and Moss St. on the E.; its southern boundary cutting across Beacon Hill Park and abutting on the salt water at foot of Menzies Street, James Bay.

These limits enclose an area roughly, of four square miles, and according to a census undertaken by order of the City Council in the spring of 1886, a population, including Chinese and Indians, approaching 14,000. The city has sixty miles of streets and a water frontage, available for wharves, of six miles

Victoria now numbers among its industries, Sash and Door Factories, Planing Mills, Sail Lofts, Boat and Ship-Building Yards, a Malting Establishment, Breweries, Soda Water and Syrup Factories, Tanneries, Hat Makers, Saddle and Harness Makers, Barrel and Furniture Factories. Rice Mills, Broom and Match Factories, Coffee and Spice Mills, Saw Mills, Wire Works, Corset Works, Stove Factories, Blacksmiths and Foundries, Boot and Shoe Factories, Piano Manufacturing, Waggon and Carriage Making, and Pork Packing Establishments, Cigars and Cigar Box Manufactories, Lithographic and Chromo-Lithographic Printing, Job Printers, Blank Book Manufacturing, Book-Binding and Ruling, Brick-Making, Cracker Bakeries, Soap Works, and others too numerous to mention.

It is hoped that in the near future, enterprising capitalists will establish Smelting Works for the reduction of both iron and copper ores, both of which abound in the Province; also Woollen and Paper Mills, Rope Works, Glass Works, Wood and Willow Ware, Drain and Tile Works.

Five weekly and four daily newspapers, and other publications, provide the necessary intellectual *pabulum*, and a free library is spoken of.

The nucleus of a provincial museum is in existence under the fostering care of the government, and a curator appointed of tried skill and experience in the work, by whom contributions of curiosities and works of art will be thankfully received.

The hotel accommodation is most ample. Where all are so complete and replete with modern improvements, it would be invidious to mention any by name; but in the course of the last two years, two or three hotels, which may be classed as leading ones, have either been newly established, or greatly enlarged in a superior manner the accommodation offered to travelers. They are situate on Johnson Street, Yates Street, and View Street. We venture to say that a sudden influx of visitors, bent on pleasure, could be at once accommodated by our obliging landlords.

We must not forget the erection of a new and costly theatre to seat 800, built by a company on an eligible and convenient site.

SPENCER & HASTINGS' ART STUDIO. FORT STREET, VICTORIA, B. C.

Steamships of the C. P. N. Co. and the People's Line establish communication with the Mainland and Coast Settlements; and the O. R. & N. Co., and P. S. N. Co. accommodate the traveling public visiting the Sound and San Francisco.

The city revenue for the last year was $197,905. It has a constabulary of twelve members, costing last year, with clothing and other expenses, $16,678, and six private watchmen, paid by their employers.

The fire limits were extended on 22nd April, 1885, reaching from the centre of Fisgard Street on the N., to the centre of Courtenay Street on the S.; and from the centre of Douglas St. on the E., to the harbor on the W. With very trifling exceptions brick buildings, including fire-proof coverings and cornices, must be built within these limits. Wooden awnings, to the regret of some, have been abolished.

A paid Fire Department has been substituted for a volunteer one; and consists of a chief engineer, salary $700; an assistant engineer at $300; three foremen of companies at $16.25 per month; three engineers at $60 per month, and eighteen firemen at a monthly pay of $14; aggregating $564.18 per month; or for the last year $14,759.20, including repairs, purchase of hose, etc.

Cisterns have been provided at the intersection of the leading streets, ten in number altogether, and 53 hydrants are now in place, of which 7 are in Yates St.; 7 in Douglas St.; 4 in Cormorant St,; 7 in Fort St.; 6 in Government St.; 6 in Store St., &c., &c The water supply is very good.

The fire property includes four buildings (two two story brick) two steam fire engines, horses, carts, hose, tools, etc.

The water supply is extending to many outlying streets, and $75,000 was borrowed last year by authorized vote of the rate-payers for the purpose of constructing high level reservoirs for the better and more regular supply of the higher districts. The total cost of the system, when the last named amount has been expended, will be, exclusive of salaries, $100,000 loan, $50,000 loan, $20,000 loan, and $75,000 loan, or $250,000. The gross receipts last year from water rates were $37,786.44.

Electric lighting in the streets has entirely superseded gas; though the most thoroughly economical use of it has not yet been found, still great hopes are entertained of this desideratum being soon accomplished. The three original masts, 125 feet high, on the Brush system (as carried out in Cleveland, Ohio) have been supplemented by four masts 60 feet high, having also clusters of lamps, in situations which most needed them, and single lamps at the most important intersections of streets, by contract with the Sperry Electric Light Co., of Chicago, Ill. This addition to the city's lighting cost $22,435.70, including a new brick building for electric light, $3,300. The operative expenses for the year were $5,980. The total value of electric plant is set down at $34,953, and is the property of the city, which operates the lighting.

A company will soon be in active operation for lighting private dwellings and stores.

The Telephone Co., under the able management of R. B. McMicking, Esq., is advancing in utility and is largely availed of. Victoria is fast becoming a city of posts and masts.

Definite steps have been taken towards securing efficient sewerage. Plans and estimates have been prepared by Mr. Pickering, of England, who visited Victoria

A. GREGG & SON, YATES STREET, VICTORIA, B. C.
Receive the first Imported Woolens in the City.

Agents for the Bell Organ, Weber and Steinway Pianos.

for the purpose of obtaining data. It is intended to borrow a large sum of money to carry out the plans. The present City Council will probably execute a portion of the works. While waiting, a new feature has been inaugurated, that of underground box drains.

Public School education occupies a large share of public attention; two ward schools have recently been built in the city; others are spoken of in city and province. The proposed expenditure this year on schools and school buildings is estimated at $101,695.

The corporation has accepted a gift of the Mechanics' Institute Library in consideration of opening a Free Library; though their intention was temporarily defeated last year by an adverse vote of the ratepayers.

Lines of Street Cars at very moderate rates of fare have taken their places on our streets and hack rates have been much reduced. We have a Transfer Co. and Truck and Dray Companies, and numerous Livery Stables with expensive and elegant carriages and equipments and valuable horses.

A new Agricultural Hall has been built by the city specially for exhibition purposes. We have three batteries of garrison Artillery and a Rifle company all located in Victoria, well drilled, and commanded by experienced officers. C. Battery, from eastern Canada, and heavy guns from England, for the defence of Victoria and Esquimalt dockyard, are expected shortly to arrive i the Province.

A modern composite bridge has been quite lately built across Rock Bay at a cost of about $11000 .A new bridge is also in progress across James Bay, on stone piers and wooden arches, to cost about $7000.

The Esquimalt & Nanaimo Railway is an established fact, and is another illustration of perseverance in a set course, being rewarded. It is one of the features of the Settlement Bill, which was arranged by our present government, and carried through by the company, of which Robert Dunsmuir, Esq., M.P.P., is the head; whose public spirit and energy are well known.

Though last, not least, as affecting Victoria, as well as the whole Province, the Canadian Pacific Railway has been completed from ocean to ocean; and one, at least, of our manufactures has already, through its medium, found a market for itself in the Eastern Provinces. Trans-Pacific steamers, of large capacity and power, will shortly run between Victoria and Hong Kong and Yokohama. The point yet to be desired is a lowering of the charges on a portion of the C. P. R. line to allow living profits to businessmen who would largely use it. Victoria has been visited, among others, by the Chief of the Dominion Government, who has lived to see his own great work, and receive the congratulations of his British Columbia friends.

Headquarters for Boots and Shoes, } ERSKINE'S EMPORIUM, VICTORIA, B. C.

VICTORIA DISTRICT

Has an area of twenty-seven square miles, and a population of about one thousand. It is bounded on the south and east by Haro Straits, on the west by Victoria Arm and on the north by Lake District.

The soil is principally black loam, with clay subsoil.

The drives along the Saanich, Burnside, Cedar Hill, Gorge and Cadboro Bay roads are delightful, and possess many convenient and enjoyable resorts for pleasure seekers. During the last two years a number of handsome private dwellings have been erected. The climate is mild and the district sheltered from the prevailing winds. In former years the district was heavily timbered, but at the present time presents quite an old settled appearance, with its fine farms and rich meadow lands, hewn as they were from the primitive forest. This section is rich in scenery as well as lands, and the ascent of any of the numerous low hills will be richly repaid, as at a glance the whole of the surrounding country is seen. The temperature of the district is delightful, the winter of 1886–7 being about the coldest experienced for years, the thermometer did not fall lower, in exposed situations, than eight above zero, while the summer heat is seldom more than eighty in the shade. All the hardy fruits, such as apples, pears, plums, and an endless variety of smaller fruits grow well, while many flowers that are only found in greenhouses in the east, thrive well in the open air, and a bouquet of roses, wall-flowers, daisies and violets, plucked from the garden, is no unusual sight in January. The district is remarkable for the large number of oaks it originally contained—a fine collection still remain in Beacon Hill Park. They are generally an index of good though, sometimes, a rocky soil. The farmers of this and a neighboring district are famous for exhibiting vegetables of mammoth size, such as cabbages, turnip and mangold. Hops are a product which thrive well. A new church has been lately erected in the district, at Spring Ridge—a former one was built on the Gorge Road. The district is traversed by the following macadamized roads, commencing at the Victoria Arm and travelling east and south to the Straits, viz. :—Gorge Road, Burnside Road, Topaze Avenue and Saanich Road; Spring Ridge and Cedar Hill Road and Oakland ; Mount Tolmie cross-road, Cadboro Bay Road, Foul Bay Road, Gordon Head Road. The water main for the supply of Victoria from Elk Lake and connections is laid along the Saanich Road, which passes the Swan Lake, a resort of fishermen and skaters. The Government land in the district has been sold, and cleared land, fenced, sells at from $50 to $100 per acre, and if very near the City of Victoria, a still higher price is obtained. Lands within two miles of the capital have changed hands at from $400 to $800 per acre, and the tendency is still higher as their richness and productiveness are better understood and the constant improvement that is taking place in the market. As a section for a residence Victoria District is unsurpassed.

SAANICH PENINSULA.

NORTH AND SOUTH SAANICH AND LAKE DISTRICT.

GENERAL DESCRIPTION.

The Peninsula of Saanich, including Lake, comprises about 60 square miles, and contains some 38,500 acres, a very small proportion of which is hilly or otherwise unfit for cultivation. Almost the whole of these districts has been taken up by purchase or by settlers—and in large part held by speculators. It is surrounded on three sides by the Straits of Haro, the Satellite channel and Saanich Inlet. Its soil varies considerably; as a rule it is a rich black loam, varying from 8 inches to 2 feet in depth, with a clay subsoil. Near the coast it is chiefly composed of lime and all sorts of shell detritus, the remains, probably, of ancient Indian feasts. Barley is renowned especially for malting purposes, and hops are unrivalled and fetch good prices in San Francisco. The lakes in the District so named are the resort of sportsmen for angling; and from Elk Lake is obtained the Victoria water supply.

Three public schools are established in the District. A small church (Episcopalian) has been recently built in Lake District; some twenty years ago an Episcopal church and parsonage house was built in S. Saanich, and during the past year another has been built in N. Saanich on a generous donation of two acres of ground, cleared and fenced, and overlooking the Inlet. A neat cemetery, fenced and surveyed, has been laid out in S. Saanich; one is contemplated in N. Saanich. The Roman Catholic church has a place of worship and a small cemetery in S. Saanich Not far from E. Road is a chapel belonging to the Methodists.

All descriptions of fruit come to perfection Saanich has always been celebrated for its musk and water melons. Some 17 years ago the farmers of Saanich established an Agricultural Society, which now possesses four acres of land and a large building. Here is an annual show.

The Provincial exhibitions of the Dominion, and even the recent universal exhibition at Paris, have awarded gold medals to Saanich wheat.

An excellent quality of oat meal and flour is produced at the steam mills of Brackman & Ker.

An excellent quality of lime is obtained in the district, which leaves but little slack and finds a ready market in Victoria and Vancouver.

First class lumber is found, especially in cedar and white and red fir of large size. The arbutus, popular, hemlock and spruce also abound.

The District is traversed by two roads from N. to S., about 2½ miles apart, and for the most part admirably macadamized; when first started a sum of $9,000 was spent on a portion only of N. Saanich roads.

They are second to but few in the Province. A railway is projected to run the whole length of the District. A commodious wharf has been erected for convenience of East Coast steamers. Whales have been seen in large numbers in the Inlet.

This District sends two members to the Local Legislature, and is a part of Vancouver District, which is represented by one member in the Dominion House of Commons.

ESQUIMALT TOWN.

DESCRIPTION.

The town of Esquimalt is situated on a small peninsula, which separates the Royal Roads from Esquimalt harbor, and is distant about 3½ miles from Victo ia, with which it is connected by a good macadamized road. The place is justly celebrated for its beautiful harbor, which is capacious, easy of access, and well sheltred. Principally on account of the facilities this harbor affords, and the general healthiness of the locality, this place was selected by the British Admiralty at an early date, as the chief naval station for Her Majesty's ships on the Pacific, and consequently the Admiralty has established an arsenal here, in which are stored large quantities of naval ordnance supplies of all kinds. In addition to the dock yard and arsenal is the naval hospital. A naval cemetery has been laid out, in which, among others, the late Gov. Seymour of the united colonies of British Columbia and Vancouver Island, was buried in 1869. A neat chapel is also erected. There is a powder magazine situated on Magazine Island, in the northern part of the harbor. It is generally expected that Esquimalt will, at some not very remote period, form the western terminus of the Canadian Pacific Railway, and, certainly, the accessibility of the harbor and the superior accommodation which it affords would seem to justify such expectation.

Esquimalt has a church and a public school, the former belonging to the Eng ish Episcopal.

The dry dock, the second largest of the public works ever undertaken in the province, deserves special notice. The amount expended in construction to date is $250,000. Its length, 450 feet on centre line of dock; 450 feet on floor; entrance 65 feet wide; depth, 26 feet. The material used in its construction being Portland cement. It has a concrete floor in cement 7 feet thick. A course of granite forms the meeting face of the caisson, which is of the class known as *Kinippels' patent travelling caisson*, and is provided with a folding or lowering bridge. By the Settlement Bill, introduced and carried by the present government, as between the Provincial and Dominion Governments, the works and plant were handed over to the Dominion

Government, and a refund made to British Columbia, amounting then to $300,000, of outlay in material, plant and labor. It has since been finished as a Dominion work, and is the pride of the Province. Messrs. Kinippel and Morris were the engineers, and Mr. W. Bennett the resident and supervising engineer at Esquimalt. First (partial) contractors, Reed Brothers, of England; first whole contract under Provincial auspices, McNamee & Co., of Montreal; final contract under Dominion Government, Larkin, Connelly & Co. It will compare favorably, for construction and price, with any other work of the same class in any part of the world. It has been proposed to enlarge it so as to receive, if necessary, the ocean monsters promised us by the C. P. R. Co., to run as a mail between Vancouver and Yokahama, touching at Victoria or Esquimalt. Several cargoes of tea from China have already been delivered at Port Moody for the C. P. R.

HISTORY OF THE DRY DOCK.

Taken from the "Daily Colonist," April 3rd, 1887.

Correspondence on the subject of a graving dock was commenced in 1867, when the Lords of the Admiralty instructed Rear-Admiral Hastings to report upon the facilities afforded at this station for docking vessels the size of his flagship, H.M.S. Zealous, and to select a site for the dock. The correspondence was continued between the Admiral and the Governor of the colony, Frederick Seymour, and the Admiralty until May, 1868. Governor Seymour was more in favor of having the dock built at Burrard Inlet or Nanaimo, but eventually approved of Admiral Hastings' selection of Esquimalt as the best site. One of the terms of union on British Columbia entering confederation was that the Dominion Government should guarantee interest for ten years, from the date of completion of the work, at the rate of 5 per cent. per annum on a sum not exceeding £100,000. Tenders were called for in 1875 for the construction of a dock by the government of British Columbia, tenders to be accompanied by working drawing, etc.

Only one tender was received and it was not accepted.

In 1872, Mr. Bulkley, then chief engineer of the provincial government, reported in favor of the dock being constructed where it now is, he having been employed in surveying the site and taking borings, and he expressed the opinion that it would be more economical to carry out the work as a government measure.

Arrangements having been made that the Dominion guarantee of 5 per cent. on £100,000 should be changed to a subsidy of £50,000, payable as the work progressed, the imperial government were then appealed to for assistance. Mr. DeCosmos was sent to England, as a delegate, and secured a subsidy of £30,000, which Mr. Walkem, when he went to England in 1874, succeeded in getting raised to £50,000 sterling.

In 1874, Messrs. Kinipple & Morris, 2, Westminster chambers, London, England, were appointed by the government of B. C. as their engineers, and were instructed to prepare plans for the cofferdam and dock. Messrs. K. & M. sent Mr. W. Bennett, the present resident engineer, in 1875. Tenders for the building of the cofferdam were called for and the contract was awarded to Hayward & Jenkinson, of Victoria, who were allowed to transfer, under government sanction, their contract

to Messrs. Reed Bros. & Co., of London, England. Their agent arrived in March, 1876, and the cofferdam should have been completed in October, 1876.

In March, 1879, the contractors stopped work altogether, and the government were compelled to take possession of the works in June, 1879.

Tenders were immediately called for the completion of the unfinished work, but the bids were so high that the government, on the advice of their engineer, did not accept any, and the work was completed under his supervision in November, 1879.

Tenders were then called for the construction of the dock itself, and in March, 1880, the contract was awarded to Messrs. F. B. McNamee & Co., of Montreal, the price being, in round numbers, $350,000, the government to provide the pumps, Portland cement and caisson, three very costly items, the contractor to be paid 90% as the work progressed, the remaining 10% to pe paid on the completion of the dock. The head of the firm arrived in June, 1880, and went away in August, leaving the work in charge of three local gentlemen, Messrs. Nicholson, Robertson and Huntington, whom he had taken into partnership. The excavations were commenced in September, 1880, but progress was slow, and in April, 1882, the contractors stopped work, and consequently, on the 27th June, 1882, formal possession of the graving dock was taken by the provincial government and the work was carried on by day labor, until June, 1883.

On the 24th August, 1883, the Esquimalt graving dock, under the provisions of the well-known Settlement bill, was formally handed over by the late Hon. Wm. Smithe, Chief Commissioner of Lands and Works, to Hon. Jos. Trutch, C.M.G., on behalf of the Dominion Government. From this period the work fell into good hands, and has been energetically pushed to its present successful completion.

The total cost of the graving dock will be in the neighborhood of $900,000. The Quebec graving dock and this one are probably the two most economically built on the American continent. That of the United States on Mare Island will cost over $2,000,000. That at Brooklyn, only 286ft. long, 30 in width at bottom, with a total length of 350ft., cost $2,000,000.

The contractors are Messrs. Larkin, Conolly & Co., well and favorably known in the east, where they have been contractors for heavy public works. They were also concerned in the Island Railway and will probably be heard from in another railway.

Mr. W. Bennett, C.E., was superintending engineer for the whole work; Mr. Aylen, C.E., was contractor's engineer.

ESQUIMALT DISTRICT.

DESCRIPTION.

This district lies in a westerly direction from Victoria City, and is bounded on the east by Victoria harbor, on the south by the Straits of San Juan de Fuca, on the west by Metchosin, and on the north by Highland and unsurveyed districts.

The district includes a portion of what is sometimes called Victoria West with the main road leading to Esquimalt town; also a suburb called Craigflower, situated on Victoria arm where is a noted oatmeal mill which was celebrated for the good quality of biscuit manufactured for the Royal Navy. Craigflower possesses one of the public schools of the district; some of the pupils have readily passed into the Victoria High School. Colwood is another favorite resort of the Victoria public, and has been the scene of many a contest at cricket between a Navy and a Victoria

eleven. Langford Lake, on the road to Goldstream, is also interesting to the tourist and pleasure seeker who never fail to call at the Goldstream House, largely patronized in the halcyon days of Leech River excitement. The district possesses also a tanning establishment, that of the Belmont Company, on the Lagoon. The saltwater arm over which Parson's bridge is thrown is the resort of the angler. The Esquimalt & Nanaimo Railway traverses a portion of the district, the nearest station to Victoria being in Victoria West, and adjoining the Songish Indian reserve.

METCHOSIN.

DESCRIPTION.

Metchosin, lying in a southwesterly direction from Victoria and about sixteen miles distant, is situated along the shores of the Parry Bay. Its area is about twenty-four square miles, and is bounded on the north and east by Esquimalt District, on the east and the south by the Straits of Fuca, on the west by Sooke District. It includes the farming settlements of Rocky Point and Happy Valley. It is one of the oldest farming settlements in the Province, and probably contains more sheep among its stock than any other district around Victoria. The soil is for the most part loam with a clay subsoil; and in some parts good crops have been grown for eighteen years without manure. All kinds of fruits, cereals and vegetables of tem-

SOOKE.

DESCRIPTION.

Sooke is situated about 23 miles south-west from Victoria, and is a thriving settlement. The soil is black loam and clayey loam with clay subsoil. It is very fertile: all kinds of cereals, fruit and vegetables thrive well, oats having grown over seven feet, and single turnips weighing from twenty to thirty pounds each. The Woodside Mill, owned and run by Muir Brothers, carry on a lumbering business. Mr. James Keill turns out very superior barrels from his cooperage. Sooke is conected with Victoria by a good wagon road. There is communication twice a week. An express leaves Sooke on Monday and returns next day, and the mail leaves on

Thursday, returning next day. The steamer "Woodside" runs between both points, carrying passengers and freight. There have been a number of wild animals killed in the district lately, viz., Panthers, Wolves and Bears. They are very destructive of sheep. Sooke is one of the favorite hunting grounds of the Victorians—Deer, Grouse of different kinds, and Quail are very plentiful, and a variety of Ducks are found all over the district. Good fishing is to be had, both in fresh and salt water.

Leech River, a tributary of Sooke River, is situated in this district, and is famous for its gold discoveries, under Corporal Leech, of the Royal Engineers, who headed one of the expeditions organised by Governor Kennedy and the people for the exploration of Vancouver. The amount contributed privately was doubled by the Government. $150,000 of coarse gold, it has been stated, was taken from Leech River and neighborhood, and large quantities since. It is the opinion of some that this is nothing compared to what is left, and that the true source of the gold has yet to be discovered.

HIGHLAND DISTRICT.

Highland District is very hilly and thickly timbered. It contains some good agricultural land in the valleys, and the hills form excellent runs for cattle. It is very thinly populated, and only the southern portion has been surveyed. It contains an area of about twenty-five square miles, and contains several small lakes within its boundaries.

ALBERNI.

DESCRIPTION.

This is the most recent settlement on Vancouver Island for agricultural purposes, and on its westerly coast, and is probably consequent on the wise idea of the Government of appointing an experienced and travelling agent to point out desirable locations to intending settlers. About 125 pre-emptions have been recorded within the last two years. The settlement already gives plain signs of prosperity, and at this writing a public school has been opened for its benefit. During last session a liberal grant was made for roads and bridges, and has been judiciously expended. A new wagon road has been completed from Nanaimo by Cameron Lake. The time is not far distant when Alberni, as an agricultural district, will become known at our exhibitions.

COWICHAN ELECTORAL DISTRICT

Consists of the Sub-Districts of Cowichan, Quamichan, Shawnigan, Comiaken, Somenos, Sahtlam and Chemainus, and the adjacent Islands of Salt Spring, Galiano, Mayne, Pender, Saturna, Moresby, Prevost, Portland, Kuper, Thetis and Reid.

That portion of Cowichan situated on Vancouver Island is a beautiful and fertile agricultural district, interspersed with fine timber, and is situated on the East coast, about midway between Victoria and Nanaimo, extending in a northerly and southerly direction for thirty-five miles. Its eastern boundary is the salt water, and contains many lovely bays and safe and commodious harbors. Its Western limits have never been clearly defined, although it extends as far as the Great Cowichan Lake, and contains many smaller ones, viz., Shawnigan Lake, about seven miles long; Quamichan, Somenos and Lotus, with many others not named. Settlement began practically in 1862—Cowichan being the second district to avail itself of the new pre-emption regulations, Salt Spring Island being first—and among the Pioneers were Messrs. Drinkwater, Skinner, Duncan, Smithe, Marriner, Lomos, Alexander, Bell, Kier, and the late Doctor Davie, the father of the present premier (the Hon. A. E. B. Davie, Q.C.), who, as well as his late lamented predecessor, the Hon. William Smithe, got his first taste and experience of colonial life in this charming but, then, very wild, district. It has steadily developed, however, and is now one of the largest, the most populous, and the most flourishing agricultural districts on Vancouver Island. The land is noted for its productiveness, Cereals of all kinds yielding more than average crops, whilst the meadows produce the very finest grasses in extraordinary abundance. The Indians of Cowichan always have had the name of growing the best (Wapitoes) Potatoes sent to Victoria, and still does this district maintain its celebrity by producing in abundance the finest Roots and Esculents. It is found that Apples, Pears, Plums, Peaches and Cherries not only yield well but possess a flavor and bouquet that may be sought for in vain in the imported fruits grown in more southerly climes. A good market is offered in the North West and Manitoba.

Mr. Jessop, the head of the Immigration Bureau in the Province, collected, last season, a variety of fruits grown here and forwarded them to the Colonial Exhibition, then being held in London. The result was most flattering. By the best and most impartial judges many samples were pronounced quite equal, if not superior to Eastern American fruit, and all were highly commended. Settlement upon the farming

ands in Cowichan proceeded steadily at first, but naturally languished during the years the Island Railway was an unsettled question, as all lands were then reserved from settlement at the request of the Dominion Government; but since the 2nd June 1884, after the passing of the Settlement Bill, the land on Vancouver Island was again thrown open for four years to actual settlers for pre-emption, at one dollar per acre, and under this arrangement nearly (400) four hundred new records have been made (not including the Islands, where about half as many more have been added), and the influx of these new Settlers, who are all of a most desirable description, together with the building of the Island Railway, now complete and in full operation, has given an impetus to all industries, and the condition of this settlement may be well called prosperous and happy. Game of all kinds is abundant For lake fishing Shawnigan is unrivalled and now easy of access, thanks to Mr. R. Dunsmuir, president of E. & N. R. R., who has built a station for the accommodation of visitors on the very edge of the lake. Here, at the Morton house, which bears the name of the proprietor, the fisherman or hunter will find a comfortable home and be given every information. The favored district of Cowichan affords rare opportunities to the Artist and Photographer, and well and richly will be repaid the Tourist who climbs to the summit of Mount Prevost and there feasts his eyes on the glorious panorama spread out before him.

SALT SPRING ISLAND.

DESCRIPTION.

Salt Spring, or Admiral Island as it is sometimes called, is an Island in the Gulf of Georgia, on the way to Nanaimo, about 40 miles from Victoria. It is about 12 miles long, with an average of three miles wide. It has several small lakes of fresh water, and a quantity of fine cedar trees. The soil is good and of considerable depth, and it contains the highest mountain outside of Vancouver. Her copper has been found. It is noted for several salt springs towards the N. E. extremity. They are of great depth. It has several good harbors: Ganges harbor, Fulford harbor, Long harbor, Burgoyne Bay. And it will be always remembered as absolutely the *first agricultural settlement* in the then Colony of Vancouver. Its pioneers, 29 in number, who hired a schooner and prospected for themselves, can claim to be the originators of the pre-emption system, as it was inaugurated in their favor 29th July, 1859, by the late Sir James Douglas and his Surveyor-General, J. D. Pemberton, Esq. Many of the original pre-emptors still hold and occupy their claims.

Nanaimo, V. I.

The site now occupied by the City of Nanaimo was bought by the Hudson Bay Company from the Indians in the winter of 1852, and was established by the Company as a trading post and mining village, where they carried on operations until 1862, when the town plot, mining works and buildings, together with an extensive tract of country which had been acquired by special grant from the Crown, were purchased by the Vancouver Coal Mining and Land Company (limited).

The City of Nanaimo was incorporated in 1874. The population of the city and neighborhood is estimated at about 4,000. This number is being continually added to by immigration of miners, mechanics, laborers and settlers, with, in many cases, their families; this influx of new population has been steadily maintained by the progressive development of the coal fields, and the stimulus of railway construction during the past three years.

The City fronts upon the harbor and is situated in latitude 49 deg., 10 min., 15 sec. north, and in west longitude 123 deg., 56 min. 36 sec. from Greenwich. It is well situated and sheltered by islands, which, however afford two clear passages into the Gulf of Georgia at all seasons. There are no bars. The range of tide is sometimes as much as 16 feet, which is as high as is met with anywhere on the coast, and makes Nanaimo a most eligible spot for the construction of docks for which it offers peculiar facilities. This great range of tide occurs at midnight during winter and in the daytime in summer. The anchorage is perfectly safe.

The City of Nanaimo, in the midst of a rich mineral region abounding in first-class coal, with extensive colliery works in full operation, surrounded with good farming and stock country, and possessing exceptional natural facilities and resources, is destined to attain a high position of industrial, manufacturing, and commercial importance and prosperity. The city wharves regularly receive steamships from San Francisco, Portland, Or., Alaska, and other foreign ports, as well as from Victoria, New Westminster, and coast ports, and a fleet of trading vessels.

The mainspring of the coal industry of Nanaimo is the enterprising British joint stock company, known as the Vancouver Coal Mining and Land Company (limited), whose proprietary rights are ably represented in the city by their superintendent, Mr. Samuel M. Robins, J.P., from whom the unsold land in the city and its suburbs can be obtained on easy terms by persons desirsous of acquiring the same.

The merchants and mechanics of Nanaimo have been long known in the commercial world for their good business standing; and on the whole there are few communities where thrift and contentment so generally prevail as in this city.

The line of the Esquimalt and Nanaimo Railway Company runs into the centre of the city where a station or depot is established in the block bounded by Franklyn, Selby and Prideaux streets. The line of railway is continued towards Comox as far as Wellington.

The District of Nanaimo is famous as the seat of the coal mining industry of Vancouver Island, and includes the celebrated coal fields which yield the true bituminous coal known as Douglas, Wellington, New Douglas (or Chase River), Newcastle, South Fields, Alexandria and Harewood coals.

Erskine's Boot and Shoe Emporium, } COR. GOVERNMENT AND JOHNSON STS., VICTORIA, B. C.

GRAY & DUMBLETON, } STEAMBOATS AND LAUNCHES. Coal Oil Engines and Machinery of every description. VICTORIA, B. C.

The Electoral District of Nanaimo comprises the rising and important farming and official districts named Oyster Bay, Cedar, Cranberry, Harewood, Douglas, Mountain, Wellington, Nanoose, Englishman's River, and Lower Qualicum; also the adjacent islands of Lasqueti, Jedidiah, Gabriola, Valdez, and the DeCourcy group, and the thriving settlement of Alberni on the west coast of Vancouver Island.

The Company has recently erected a large ventilating fan at the head of the No. 2, or upcast shaft, by means of which the colossal No. 1 shaft and its immense labyrinth of underground workings are supplied with pure air. This fan is of a capacity of 180,000 cubic feet of air per minute. The fan with its engine was built by Messrs. Black, Hawthorn & Co., the well-known locomotive and marine engineers of Gateshead-on-Tyne. The fan is of the Guibal type: 36 ft. in diameter, 12 ft. wide. The fan proper weighs nearly 30 tons.

The difficulty hitherto has been to make a shaft that shall carry so great a weight between bearings over 15 feet apart, the vibration is so great that the nature of the metal appears to undergo a change, and in numerous instances fan shafts have had to be replaced repeatedly. Messrs. Black, Hawthorne & Co., who have built upwards of six hundred Guibal fans, have now designed a steel shaft which they claim will not be subject to the same deterioration, and they have supplied the Vancouver Coal Co. with two of these ponderous shafts.

Working at 26 revolutions the Fan is producing 60,000 cubic feet of air per minute, which is ample to the present requirements of the Colliery. The speed can be increased to 70 revolutions, or upwards, if required.

BORING OPERATIONS.

Under the Douglas Seam, which is being worked at the No. 1 Shaft, there is another seam, known as the Newcastle. Many years ago this was worked on a small scale on Newcastle Island, the coal being in much favor for domestic purposes. By some mining experts this seam is considered to be identical with the Wellington, but other engineers state that the Wellington seam will be found at a still lower depth.

With a view to ascertain the depth, thickness and quality of the underlying seams, the Company is now boring by Diamond Drill at the foot of the No. 2 Shaft. This they have been precluded from doing until their new ventilating apparatus was in operation, a large air furnace having been recently in full blast at the point where the bore is now in active progress.

Should the exploration prove successful it is proposed to deepen both the No. 1 and No. 2 Shafts, with a view to opening out the underlying seams.

The No. 1 Shaft is connected with the coal wharf by a line of railway along the esplanade, of steel rails, flange section, 56 lbs. per yard, fished, 4 ft. 8½ in. gauge.

SOUTH FIELD MINE.—The extension of the railway southwards, a distance of about four and a half miles, to what is known as the South Field, was a most enterprising undertaking. In this locality the Company had proved about 1,000 acres of land to be coal bearing by means of their Diamond drilling machine, and a mine known as South Field Mine has been opened by a slope into the seam.

The valuable coal properties known as Delholt's Peninsula, and the Frew Estate, which forms the delta of Nanaimo River, have been acquired by the Company. The Harewood E tate, consisting of about 9,000 acres, is the property of the Vancouver Coal Company.

The Vancouver Coal Company employ about 600 persons, of whom about 100 are Chinese and Indians, and have expended a quarter of a million of dollars in explorations and works. The average rate of wages is from $2 to $3.50 per day; Chinese, $1 to $1.25; Indians, $1.25 per day. Miners' earnings are from $2.50 to $5 per day.

TOBACCO PLANT.

Come ye citizens and strangers,
Miners, sailors and western rangers,
Listen to the truthful story
Of Frank Campbell of Victoria.

He in truthful words will tell you,
Just the goods he has to sell you;
Mind ye, now, he isn't joking,
If you are fond of chewing and smoking.

Or, if you are given to snuffing
What he keeps does not need puffing;
He has brands will suit you really—
Tobacco users prize them dearly.

From all parts of the "Old Dominion,"
He has stock, and his opinion,
Is that none will suit you better—
They will please you to the letter.

His cigars, just from "Havana,"
Smoke in the most lovely manner;
Meerschaum pipes of style and fashion
Just to suit the taste and passion.

And it is in Canada stated,
His tobaccos are celebrated;
Green Seal, Straight Cut, all go,
Big Lick, Big Cut, Wind Sap, also.

And the Fine Cut brands for chewing,
That your teeth will never ruin;
Pipes to suit the inveterate smoker,
Cards for playing sinche or poker.

Pipes of briar, and stems of cherry
More than any man can carry;
It would take a week to tell you
All the things he has to sell you.

While in town you may be stopping,
At the "Adelphi Corner" drop in;
Campbell you'll find at that location,
Ready to give you information.

Or to see you well provided
With what is by all decided—
The smoker's and the chewer's glory—
The best and cheapest in Victoria.

ESQUIMALT AND NANAIMO RAILWAY.

This line of railway, in length 75 miles, for a long time a bone of contention between the Dominion and Provincial Governments, was finally undertaken by the Company, of which Mr. Robert Dunsmuir is president, on the terms of the famous Settlement Bill, which gave to the Company a considerable land grant and a subsidy of $750,000. This amount went but a short way towards the construction of the line, some portions of which were of a formidable character, taxing the skill of the engineers, besides making heavy draughts upon the private capital of the Company. Construction was begun in the month of October, 1884, and finished in August, 1886, the last spike having been driven on the 13th of the latter month by the Right Hon. Sir John A. Macdonald, Premier of the Dominion. This interesting ceremony was graced by the presence of Lady Macdonald, and witnessed by a number of distinguished gentlemen, the guests of the President. The line has since been in continuous operation, and the trains, hitherto free from a single accident arrive and depart punctually on time. A considerable portion of the road on the south end runs through a country affording to the artist bits of finest scenery—and the line can boast of one tunnel, fifteen miles from Victoria. Shawnigan Lake, skirted by the railway, twenty-seven miles from Victoria, is a sheet of water about seven miles in length, of great natural beauty, abounding in trout and surrounded by fine wooded hills where large game is plentiful. This lake and vicinity have already been visited by many in quest of sport and pleasure, and judging by their success, will very soon be known as the sportsman's and tourists' paradise. The Railway Company have laid out the land surrounding the lake into lots suitable for the building of summer villas, and Shawnigan Lake will shortly become the great pleasure resort of Vancouver Island. An hotel has been established on the banks of the Lake by Mr. C. Morton, where pleasure boats may be hired and fine accommodation obtained, and another large hotel is contemplated. The stations along the line of railway are in suitable localities and with no pretentions to architectural effect, are amply sufficient for the present or prospective business of the line. During the time the line has been in operation it has been much appreciated by the travelling public as shortening the trip to Nanaimo, and saving the wearisome delays incident to steamboat travel. A seat in a comfortable and elegant passenger coach running thirty miles an hour and covering the distance between Victoria and Nanaimo in a few hours is certainly to be preferred to the deck of a steamboat, where the day, from sunrise to sunset, owing to numerous calls, is occupied in the trip between these points.

Nanaimo is a city of coal; its production and delivery are the foundation of its wealth and importance—a substantial one it will be allowed. Mr. R. Dunsmuir, to whose energy and public spiritedness almost alone we are indebted for the railway, is the head of the well-known firm of R. Dunsmuir & Sons, owners of the Wellington collieries. Wellington coal has a wide reputation and stands unrivalled among the coal productions of Vancouver Island.

DEPARTURE BAY AND WELLINGTON.

Departure Bay is situated some three miles north of Nanaimo, on a picturesque inlet of the Gulf of Georgia, and is the shipping point of the well known Wellington coal. The mines are about three miles south of the bay, where the manager's office, carpenter and blacksmith shops are located.

The mining village of Wellington comprises North, South and East Wellington, having a population of about 1,000; and when the demand is sufficient the company has facilities of 1,500 tons of coal per day. The mines were discovered in 1869 by Rob. Dunsmuir, the present owner.

The East Wellington mines are owned by Mr. Chandler, W. S. Chandler, manager.

COMOX DISTRICT.

Comox, on the East Coast, about 140 miles from Victoria, is the most compact, and, as yet, the most northerly agricultural district on Vancouver Island. It was the third settled district on Vancouver Island, and under the auspices of the first Attorney-General, G. H. Cary. The open land was all taken up over 20 years ago, but the settlement is steadily increasing in a north-westerly direction, where there are still fine stretches of alder and swamp land. To meet the requirements of the settlers two new schools were erected during the past summer. On the old farms, which lie along both banks of the Comox River, (famous for its angling facilities), the pioneer log buildings have been replaced by substantial frame houses and barns. Logging camps are busy all around the district, especially up the river, where the timber is of a most excellent quality. The present saw mill is doing a rushing business, and there is talk of another starting, The stores are also doing pretty well, and, although Sinbad-like, Comox yet carries her Old Man, in the shape of a whiskey saloon, into whose insatiable maw too much of the ready money goes, yet indications are not wanting that in the near future this incubus will be got rid of. Population, about 400.

DENMAN AND HORNBY ISLANDS.

(Situated in Comox District.)

The Islands of Denman and Hornby and the Vancouver Coast opposite got their first impetus in settlement from the opening of the now forsaken Baynes Sound Coal Mine. That enterprise failed through lack of capital to thoroughly prosecute the work; but good coal is known to exist in the vicinity, particularly on the lands of the Perseverance Company and farther up towards Comox on the Union property, now owned by Dunsmuir & Sons, who have also acquired the lands of the old Baynes Sound Company.

The districts of Nelson and Newcastle lie between Comox on the north and the Qualicum River on the south. There is no naturally open land of any account either in them or on the Islands, with the exception of some rather bare tracts on Hornby, but the climate of all is remarkably mild, cattle being easily able to keep themselves through the winter. Sheep farming is carried on with much success on Hornby, and both Islands excel in fruit raising. Population about 80.

New Westminster City--General Remarks.

POPULATION 4,000.

On the left or north bank of the F aser river, about sixteen miles from its mouth in lat. 49 deg. 12 N., and long. 122 deg. 53 W., and built upon a gentle hill which, for the most art, slopes to the sun, New Westminster ("The Royal City") occupies a site at once commanding, healthful and pleasant.

The natural centre and distributing point of the Lower Fraser District, provided by river, rail and road, with means of communication which give her ready access to all parts of the district (to all parts of the world for that matter), the capital city of the mainland has an assured future of growth and prosperity. Salmon canning and the manufacture of lumber have already attained to large proportions, and many other wealth producing industries are coming into prominence. The R yal City Plaining Mills Company alone give employment to over 200 men, and with their mills, steamers, (three of which they own and use) repair and supply shops, form a little community of themselves. They cut a daily average of over 60,000 feet of lumber, and their list of manufactured articles is a very long one. The Brunette Saw Mill Company, the Gas Works, Law's Foundry, the Woollen Mill and Port & Company's Fresh Fish Exportation Establishment, may also be mentioned as important factors in the prosperity of the city. The branch railway to Port Moody just completed, the last spirited effort of New Westminster, at once makes the latter the fresh water terminus of the C. P. Railway. Freight in large quantities is brought over it and deposited in New Westminster warehouses and provincial produce returned. Notwithstanding the fact that building has gone on very briskly for some years past, the demand for house room and hotel accommodation has for some time been in excess of the supply, and this has resulted not from any "boom" or factitious excitement, but from the steady growth which is the outcome of the natural advantages already outlined.

Too young as yet to boast any exemplars of architectural beauty, New Westminster is yet a handsome city. The uncouth structures of pioneer days, run up hurriedly by men whose outlook was often bounded by the anticipated profits of the spring or fall trade, are giving place to substantial and permanent buildings, silent witnesses of prosperity in the present and confidence in the future; while in every direction, along streets which a few years ago existed only on the maps, neat residences, often surrounded by handsome gardens, tell the same story. Schools and churches abound.

The country immediately adjacent, on both sides of the Fraser, is still clothed with the dense growth of the primeval forest, but the wide river reaches, sweeping away to east and west, and the lofty peaks of the Coast Range, are visible from all parts of the townsite; and from the higher levels the eye ranges over broad expanses of fertile delta land to the Gulf of Georgia and across that to the distant hills of Vancouver Island in the west, while to the east, the mighty, snow-covered crown of Mount Baker stops the view, giving the beholder the impression that the mountain's first slopes rise from the dense forest at his feet, although he knows that between forest and mountain lie many broad acres of prairie and meadow, dotted by hundreds of thrifty homes.

New Westminster District.

DESCRIPTION.

Captain Geo. H. Richards, in the "Vancouver Pilot," says: "Fraser River, in point of magnitude and present commercial importance, is second only * to the Columbia on the northwest coast of America. * * * * The cause of its immunity from the dangers and inconveniences to which all great rivers—emptying on an exposed coast, are subject, is obvious; a sheltered strait, scarce 15 miles wide, receives its waters, the neighboring island of Vancouver serving as a natural breakwater, preventing the possibility of any sea arising which would prove dangerous to any vessels."

The district of New Westminster is of varied interest and diverse capacity. The Delta lands are productive in the extreme. Individual enterprise, at great cost, has already brought into cultivation a large area of these lands; a portion of the district is striving, with legislative assistance, to free itself from the incubus of the Derby Company, formed with the object of dyking a portion of the low-lying land, and obtaining certain privileges, felt to be very onerous.

The district of New Westminster comprises the municipalities of Richmond, Ladner's Landing, (or Delta), Surrey, Maple Ridge, Langley, Chilliwhack, (comprising Matsqui and Sumas).

That portion of the New Westminster district lying between Burrard Inlet and Fraser River, and south to the boundary line, presents more signs of awakening

*Query: Next to the Columbia River!—COMP.

prosperity than perhaps any other part of the province owing chiefly to the completion of the Canadian Pacific, and also to the fact, that in the great delta lands of the Fraser, in the vast numbers of salmon which annually visit that river, and in its valuable tract of timber, and facilities for the manufacturing of lumber, it has held within its boundaries these very resources which the completion of the C. P. R. would necessarily cause to be developed.

But aside from the direct influence which our great national highway may have, in the rich delta lands of the Fraser, lies, to a very great extent, the wealth of New Westminster district; and few, except those who have made themselves personally acquainted with the facts, can have the faintest idea as to the increase in settlement, or the quantity of improvements which mark the history of this place for the last decade.

Those early pioneers, whose ideas of accumulating fortunes were not so extravagant as were those of the no less industrious miners, and who located their homesteads at the mouth of the Fraser, are now, after bearing the burdens which belong to early settlement, in comparatively easy circumstances; but not only this, they have drawn around their standard an army of followers, a colony of industrious settlers who must, in a very few years, convert this section into the most prosperous and flourishing portion of the district.

A trip from Victoria to Vancouver and Port Moody by steamer, and thence by rail to New Westminster, and from that place by steamer again down the Fraser, is one which the traveller can now make with some degree of comfort, and with very little outlay of time or money he may inform himself of the rapid changes which are now going on in that favor d portion of the mainland. Such a trip is described by a correspondent of the DIRECTORY in the following letter:

"On the morning of the 24th of December last, we took passage on board the C. P. N. Co.'s steamer Princess Louise, bound for the mainland, and, after steaming along past the many islands which mark the route between Victoria and Plumper's Pass, we found ourselves on the waters of the Gulf of Georgia. The sun was barely up; and all the peaks of the coast range were shining white in their winter robes. But around us the wide Gulf of Georgia lay, just rippled by a balmy breeze, and shimmering like a summer sea. A glorious morning it was for midwinter. Far away on this side and on that, the mighty peak of Mt. Baker, and the blue-gray masses of the Vancouver mountains; nearer, the lower peaks and slopes, with their sharp contrasts of white snow and dark green pine foliage; and all around us the shining waters. A run of two hours carries us across the Gulf, and, passing Point Atkinson light on our left, and Point Gray and English Bay on our right, we enter the first Narrows. With scarcely a perceptible checking of speed, the good steamer bears her way through the "riffle," and the noble expanse of Burrard Inlet opens out before us—a land-locked bay on which the fleets of the world might ride. Yonder on the left the Indian village shines white and neat-looking in the morning sun; and beyond it, Moodyville clus ers and clambers about the hillside, above the big mill which is the *raison d'etre* of the little town.

To our right stands the city of Vancouver, the syndicate terminus of the C.P.R., a veritable Phœnix, risen from its own ashes; for but a few months ago when New Vancouver with its hundred new places of business was clustering round and swallow-

ing up old Granville, the fire fiend rose up and in one breath swept the earth clean of both. But one house was left standing. But the plucky inhabitants were only for a moment checked, and, amid the smoke of their destroyed city, immediately began the building of the present one, and the appearance of Vancouver now, with its many substantial and costly buildings, is certainly proof enough of the energy and perseverance of its people. A few years of such work as this year has seen will make Vancouver a city indeed. Steaming on we pass the Hastings Mill, where the big saws hum a duet with those of Moodyville across the water, as they rip the giant pines into marketable lumber; past a wide bay with its flanking point, and then another bay, in which, against a background of tall firs, nestles the little village of Hastings, whose name is known far and wide as the "Brighton" of the mainland. Half a mile above Hastings we enter the second narrows, after steaming through which, the bay widens out again till we reach the mouth of the North Arm, a stretch of water reaching some twelve miles up into the heart of the mountains. Far up this Arm, its crown white with perpetual snow, and reared above its surroundings, stands Mount "Yo," the home of the mountain goat, the black and brown bear, and a favorite resort for a few of our most intrepid hunters. A few miles further on we reach Port Moody, the "parliamentary" terminus, and, landing at the wharf, nearly a mile below the town, and, as the train for New Westminster starts in ten minutes, we have just time to rush into the car, when we are off again.

We move slowly up the yard, with its tangle of sidings and switches, past the town of Port Moody, with its sad memorials, a frost-bitten "boom," and out into the woods beyond, turning back for a last look at the beautiful bay we have left.

The four or five miles of rail to the junction run through a forest which needs all the witchery of summer to make it attractive; but as we turn off at the "Y" we catch a glimpse of the bridges which span the limpid Coquitlam—most pellucid of rivers, and note evidences of the fact that we were approaching the farming country; but New Westminster lies to the right, and we rush into the woods, and on for some miles through a country which is not attractive enough to invite settlement in competition with unoccupied prairie and delta lands. One or two farms are passed, however, then we cross the Brunette, and the long whistle and slackened speed tell us that we are once more approaching civilization. Those houses on the right are the suburb of Sapperton, here, on the left is the Brunette saw mill, on the hill yonder, stands the provincial penitentiary, and below it what was Government House, when the mainland was a separate colony from Vancouver Island, with a governor of its own, and here, right beside us, rolls the broad Fraser, and in a few minutes the Royal City is reached.

RICHMOND MUNICIPALITY.

This municipality includes that part of New Westminster District known as Sea and Lulu Islands, together with all the smaller islands in the North Arm of the Fraser River, and all those contiguous to Lulu Island in the South Arm. The population ranges from 300 to 400. The soil is of superior quality. All the cereals can be successfully grown. Oats average about 75 bushels to the acre, and barley not much less. A large portion of the cultivated land is in timothy meadow, which generally

yields three tons to the acre. Root crops yield abundantly, all being of a large size and excellent quality. Considerable attention has of late been given to the cultivation of fruit trees and the prospects are most favorable. There are three salmon canneries in the municipality—the Richmond C. Co., in the North Arm, and Ewen & Co., and the Phœnix C. Co. (English's), in the South Arm. Two cheese factories are in successful operation, which produce a first-class article. There are three post-offices, viz.: North Arm, Sea Island and Lulu Island. Within easy distance by water from New Westminster, Victoria, Nanaimo and Vancouver, the facilities for reaching these markets are admirable. A tri-weekly steam service to Vancouver would be most acceptable just now, as a lively market for farm and garden produce is rapidly developing itself in that rising city.

DELTA MUNICIPALITY.

This highly important agricultural and pastoral section of the District of New Westminster, occupies that portion of the South Arm of the Fraser River that extends from the municipality of Surrey on the east, to the Gulf of Georgia, on the west, embracing within its borders some of the finest land on the Pacific Coast, the section being noted for th remarkable fertility of its soil. The settlement comprises over 40,000 acres of rich Delta land of deep black loam, with a clay bottom, yielding immense crops of timothy hay, oats, barley, wheat, mangold wurtzel, turnips, carrots, potatoes and fruit. Over 25 tons of potatoes have been raised on an acre of Delta land.

There are seven fish canning establishments situated within the municipality, viz.: Delta Canning Co., British Union Packing Co., Wellington Packing Co., British America Packing Co., E. A. Wadham's Cannery, Findlay, Durham & Brodie's Cannery, and the British Columbia Packing Co.

The main outlet of the settlement is Ladner's Landing. This place contains a church, post office, general store, town hall, butcher shop, blacksmith shop, and a boat builder's shop. There is a free wharf for the accommodation of the settlers, at which the regular mail steamers from New Westminster and Victoria call three times per week each way, also the Nanaimo steamers call at this landing once per week. To one seeking a home, with land of exceeding richness, no more inviting spot can be found than the Delta of the Fraser.

MUNICIPAL OFFICERS.—*Reeve*, W. H. Ladner; *Councillors*, Wm. Arthur, T. E. Ladner, I. R. Sutherly, Robt. McKee, I. B. Benson; *Clerk and Assessor*, W. McKee.

SURREY MUNICIPALITY.

Extending from the Fraser River to the international boundary, and from the western boundary of Langley to the coast on Semiahmoo Bay and Mud Bay, comprising one hundred and twenty square miles of territory, and within its limits are the thriving settlements of Brownsville, Clover Valley, Elgin, Hall's Prairie, Kensington Prairie, Mud Bay, North Surrey, and the Serpentine. There is a weekly mail from New Westminster, and post offices established at Clover Valley (where there is also a telegraph office), Elgin, Hall's Prairie, and Mud Bay. There are three school districts (with a prospect of a fourth) within the Corporation, all of which have commodious school houses for the accommodation of the settlers' children. There are two churches in the district; at Mud Bay, Presbyterian, and at Surrey Centre, Episcopalian; other denominations hold services in the various school houses. There is a good system of roads throughout the district, which are being improved every year. During the past year, 1886, the Municipal Council expended between three and four thousand dollars on permanent improvements. There are also two navigable rivers within the district, the Nicomekl and Serpentine, both discharging into Mud Bay. The soil throughout being fertile and productive, is well adapted to the raising of all the cereals, roots, hay, hops, fruit, &c. A large number of settlers have located on the government lands during the past few years; these are making substantial improvements, so that in a short time we trust that this Surrey of ours will have made such rapid advances that its internal development will be the means of inducing many more to come and cast in their lot with us. There are several points in the district where manufacturing establishments could be carried on profitably, and the council are prepared to assist in establishing such schemes within the corporation. There is also a splendid opening for the establishment of a popular summer resort at Semiahmoo Bay, the sands on the beach being very extensive, being dry and hard when the tide is out, where are the most enchanting walks, drives, etc. Bathing facilities are the best that could be desired: the natural scenery is magnificent, and when better known Semiahmoo Bay will become the Naples of B. C. Surrey was first incorporated in 1879.

LANGLEY MUNICIPALITY.

This municipality is situated on the south side of the Fraser, and its landing place (Fort Langley) is 17 miles (by the river) from New Westminster. This fort is very near the site of the new city projected before New Westminster was founded. Town lots were sold in it and afterwards exchanged for lots in New Westminster, where it was decided, chiefly for strategic reasons, to adopt the site of the present New Westminster. The municipality has a frontage of about ten miles on the river, and extends back to within two miles of Washington Territory. The soil and climate are especially adapted to the growth of hay. The Salmon Prairie contains upwards of 2000 acres of strong, rich land. The Hudson Bay Co.'s farm is in this municipality. It is drained by the Salmon and Nicomekl Rivers. The Langley road runs through the middle of the district, southwest from the steamboat landing at Langley to the Prairie school house, where it joins the New Westminster and Yale road, thirteen miles from New Westminster. The number of farmers is just double that of two years age.

CHILLIWHACK MUNICIPALITY.

MATSQUI AND SUMAS.

This municipality, sometimes called the garden of the Province, comprises the two settlements of Chilliwhack and Sumas, the former being bounded by the towering peaks of Cheam Mountain and the latter by the Sumas Mountain and Lake—both settlements lying upon the south side of the Fraser, also Fernycoombe and Harrison Mouth.

In or near the centre of the municipality is a rising town, appropriately called Centreville, having been laid out by Mr. I. Kipp, who owns most of the adjoining property. Seven miles below Centreville is lower Sumas. The land at Sumas is mostly very low and flat, and liable to be flooded. Sumas Lake occupies about 11,000 acres. Matsqui, or Riverside, settlement, contains many thousands of acres of fertile land.

The settlement covers a very large extent of ground, bounded on W. by Langley and Maple Ridge, on S. by 49th parallel, on the E. by eastern line of New Westminster District, and on N. by mountains of Coast Range. The climate is healthy and singularly invigorating. The scenery around the neighborhood of Chilliwhack is grand, and for a lover of nature it would be difficult to find a more beautiful spot. The steamboat landing for Chilliwhack is one mile from Centreville. Cheam peak,

just outside the bounds, is really seven mountain tops, one behind the other, with beautiful valleys between.

A railway company has been formed to run a line from Popcum, a few miles above Chilliwhack, to Ladners' Landing, a distance of about 70 miles, which will greatly benefit the agricultural country south of the Faaser.—(Mr. Picken's pamph.)

FERNY COOMBE

Comprises the country on the North bank of the Fraser along the line of the C. P. Railway from Farr's Bluffs (about four miles above Harrison mouth) to Sea Bird Bluffs, a distance of twelve miles.

It takes its name from the Ferny Coombe farm, which is situated at Agassiz station, about the centre of the settlement, and is the second oldest farm on the Fraser valley, having been started in the spring of 1862 by L. L. Agassiz, Esq., formerly an officer of the 23rd Royal Welsh Fusiliers.

There is about 12,000 acres of the best agricultural land in this valley, but owing to lack of roads, etc, it has not attracted much attention until the last two years, since when the land has been pretty generally taken up by new settlers owing to the building of the C. P. Railway through the heart of it. This valley also extends to the Harrison Hot Sulphur springs, situated on Harrison Lake, a distance of about five miles from the station, and which are fast coming into popular notice as a health resort, owing to the curative powers of the waters, which issue out of the rocks boiling hot. There is already a first-class hotel at these springs, and they bid fair to have a very beneficial influence in the way of a market upon the rest of the settlement, as soon as a projected tram road to the station is in operation.

PORT MOODY.

At first the declared terminal point for the greatest railway system on the American continent (that of the C. P. Railway) and excited by the outlay on public works, consequent on the intention of the Dominion Government to finish here the tran-continental railway, many public and private buildings were here erected. Port Moody and its surroundings loomed up as of the largest importance and the great city of the future. But "put not your trust in any child of man," received another exemplification in its case. The railway passed into the hands of a syndicate, and the latter soon declared their intention, since carried out, of continuing their railway to Coal Harbor, or some twelve miles nearer to the entrance of Burrard Inlet. The local government, which held a reserve at that point, made over 6000 acres to the company in aid of the undertaking, with forfeiture of $250,000 if not completed in a certain time, now expired. The Government still held a larger portion, viz: 14,000 acres. The new town called Vancouver will, no doubt, be of some detriment to Port Moody. This latter, owing to the combined energy of its people and those of New Westminster, is connected by railway with New Westminster, to the advantage of both. It has been said that the C. P. R. would have connected with New Westminster in any case withoutthe very liberal monied contribution of the Royal City. Port Moody will, no doubt, be a place of very great importance. The distance from Port Moody to New Westminster is six miles, and to Victoria City 105 miles. And now comes the account of the death of Colonel (now General) Sir Richard Clement Moody, whose name was left to the terminus of the C. P. Railway; and the real father of New Westminster, by whose advice the Royal City was removed from Langley to its present location.

MOODYVILLE

Is situated on the north shore of the Inlet, distant from Vancouver about two miles. It has a population of about two hundred and fifty, chiefly officers and employees of the Moodyville Sawmill Co., which extensive establishment occupies a site on the water's front near the centre of the town. Moodyville has its churches, common school, well kept reading room and a first-class hotel. It is also the headquar-

HASTINGS

Is situated on the south side of the Inlet, three miles from Vancouver and one and a half miles from Moodyville. It is connected by stage road with New Westminster and Vancouver, distant from the former place nine miles. It is the "Brighton" of the mainland, and the fashionable resort for visitors far and near, and during the summer months boasts of quite a crowded population. It has one of the best hotels on the mainland. Stages to New Westminster and Vancouver daily. It has an excellent wharf. It is on the line of the C. P. Railway. The Hastings Sawmill, on the shore of Coal Harbor, has an average daily capacity of 60,000 to 70,000 feet. The logging camps employ about two hundred men. The mill site comprises about six acres of land.

VANCOUVER.

☞(*In the following description of Vancouver, some extracts have been made from Mr. Picken's pamphlet on Vancouver.*)

Once more the honoured name of Vancouver recalls to memory the renowned seaman who, on the 12th of June, 1792, anchored his two ships, the British sloop of war Discovery, and the tender Chatham, in Birch Bay. Proceeding to explore in boats, he sailed up the Inlet to within half a league of its head, and took possession in the name of the British Government, calling it after Sir Harry Burrard, of the navy. Were the intrepid navigator to appear again on the same scene, it would, till lately, have presented nearly the same aspect as it did nearly an hundred years ago! The same solemn silence brooding on its waters: the same apparently impenetrable forests between the shore and the mountain tops.

Now, however, how different! The whirr and rattle of machinery, life and building rivalry at once at Hastings, Moodyville, Port Moody and the new city called by his name, the metropolis in embryo of this continent: the last massive link of that iron chain, which, across mountain, plain and river, spans the continent and, transmuted into the cable, loses itself in the Atlantic to reappear at Galway.

Situated on a beautiful level stretch of land which fronts on the S. and the W. on False Creek and English Bay, and on the N. in Coal Harbor, Vancouver has not only room enough for a large city, but is perhaps the only point on Burrard Inlet offering the same facilities. The Harbor, which is completely land-locked, is three miles wide at its greatest width, and about twelve miles long. The entrance, a quarter of a mile wide, is easy to navigate at all states of the tide and in almost any weather. It has the largest wharf facilities, or, in other words, the greatest frontage of any port of the province.

The climate is temperate with but little snow or frost; if it has a drawback it is in the presence of too much rain; but this is compensated by great facilities for drainage.

As mentioned elsewhere, the Provincial Government made a grant of 6,000 acres in aid of the extension of the Canadian Pacific Railway to Coal Ha bor. At this writing the railway has been finally brought to Vancouver, and the engineering staff removed to Vancouver, which will henceforward be the headquarters.

In but a few months, the intended town assumed a solid aspect; and though a disastrous fire on the 13th of June last year, swept it out of existence, its property-owners, assisted with smpathizing hands, by sister cities, and backed by their own native energy, nothing daunted, shortly rebuilt it, and with many points of superiority. On the sixth of April last year, the town was incorporated; and though subjected to another ordeal, the disturbances growing out of the Chinese element of the population, has continued rapidly to advance. Already the centre of lumber production, supplying the Hastings mill, it will, in the near future, be a coal and iron producing port; $1,000,000 have been already expended since 13th June last, in buildings of every description, in large part of brick; among others a palatial hotel for the C. P. Railway, rivalling that of the N. P. Railway at Portland. Projected improvements for the current year foot up to even a larger amount than last year's.

SPENCER & HASTINGS' ART STUDIO. FORT STREET, VICTORIA, B. C.

A water company will shortly be in working order for the supply of the city from the Coquitlam River; and the electric light will soon be in use. The Royal City Planing Mills Company own two mills at New Westminster, and one large steam saw mill at Vancouver. The Brunette Saw Mill Company, of New Westminster, have a large wharf at Vancouver on False Creek. Leamy & Kyle's mill and the Moodyville saw mill all add to the productiveness and wealth of the infant port, and to the renown of Burrard Inlet lumber. The total production of Moodyville saw mill for 1886, chiefly for exportation, was fifteen million feet of lumber; that of the Hastings Saw Mill, nearly eight million feet. Brick and tile drain works will soon be in operation.

Seven tea ships from China and Japan have already discharged 7,878,000 pounds of tea for transport on the C. P. R., and the first of this year's shipment has already been received and forwarded over the road.

Vancouver has daily communication with the outer world both *westerly* by daily steamer to Victoria, and so on to California and South American ports, soon to be complemented by the superb steamers which will maintain intercourse with China, Japan and Australia, to say nothing of the Sandwich Islands; besides weekly steamer to Nanaimo and several times a week to New Westminster; *easterly* communication it has daily per C. P. R. with Montreal and the Atlantic; and so by steam to Europe. There is also a daily train between Vancouver and New Westminster.

Branch banks have been established by the Banks of Montreal and British Columbia, and the city offers twenty-five hotels and boarding-houses to the travelling public.

It has four churches, and public and private schools.

The distances to other abodes of civilization are: To New Westminster by stage, 12 miles; by railway 25 miles; to Port Moody by water or rail, 12 miles; to Victoria B. C., 75 miles; to Halifax N. S., traversed in 5½ days, 3000 miles; to Melbourne, Australia, traversed in 21 days, 7,500 miles. The distance between Liverpool and Melbourne via C. P. R. and Vancouver can be covered in 34 days, the present contract time being 44 days; four days can also be saved between Liverpool and Hong Kong; and to Hong Kong and Japan, as compared with the Suez Canal, 12 days can be saved.

Following are the names of municipal offices for 1887, MAYOR, M. A. MacLean; *Aldermen:* Ward No. 1, L. A. Hamilton, Dr. Lefevre; Ward 2, Jos Humphries, Jos. Mannion; Ward 3, Robt. Clark, R. H. Alexander; Ward 4, David Oppenheimer, Isaac Oppenheimer; *City Clerk*, Thos. F. McGuigan; *Treasurer and Assessor*, G. F. Baldwin; *Auditor*, John Devine; *City Engineer*, J. P. Lawson; *Police Magistrate and Solicitor*, T. T. Black; *Chief Police*, J. M. Stewart; *Police Sergeant*, John McLaren; *Constables*, W. H. Haywood, J T. Abray; *Chief Fire Department and Inspector*, J. H. Carlisle; *Engineer*, A. W. Cameron; *Hospital Steward*, Owen Hughes.

FIRE BRIGADE: *President*, G. L. Schetky; *Chief*, J. H. Carlisle; *Assistant Chief*, J. G. Garvin; *Foremen*, J. Livington and J. Matier; *Secretary*, Thos. Beckett; *Treasurer*, A. B. McKenzie.

MAPLE RIDGE MUNICIPALITY.

This is the only rural municipality in British Columbia through which the Canadian Pacific Railway passes. It extends from Pitt River to Stave River, a distance of sixteen miles on the right bank of the Fraser River. It has three railway stations, viz: Hammond, Haney, and Warnock.

Haney's chief industry is brickmaking. It has also a salmon freezing establishment.

Hammond is the most important point on the right bank of the Fraser above New Westminster. Being centrally located in the best agricultural section of the municipality, it presents advantages for business which are destined to make it an important town.

Dairying as an industry has not yet been prosecuted to any great extent, but taking into consideration the many thousands of acres of meadow lands in the vicinity of Hammond, producing nitritious grasses in abundance, this industry, in the near future, will be an important factor in conducing to the wealth of the municipality.

MUNICIPAL OFFICERS.—*Reeve*—W. J. Harris. *Councillors*—A. Docksteader, H. Ferguson, John Laity, J. W. Sinclair, H. Dawson. *Clerk*—Paul Murray. *Collector*—D. C. Webber. *Treasurer*—John McKenney. *Assessor*—J. M. Webster.

HOPE AND POPCUM.

The town of Hope is situated nearly 100 miles from the mouth of the Fraser River, and presents an attractive appearance. It is located on the most beautiful flat along the Fraser River with space for a city of 30,000 inhabitants. Gold was discovered, though not in paying quantities, in Coquesalah River, immediately at the rear of Hope. It has always been an important trading post for the Similkameen Valley settlers, which is 40 miles from Hope. At one time the head of navigation on the Fraser, until Yale was reached by steamer by an enterprising steamboat owner, Hope is still a place of considerable importance. The government is at present considering the advisability of building a road from Hope to Nicola Valley, by which good agricultural land will be opened for settlers.

At Popcum is a saw mill, owned by Knight Bros. This is a really picturesque village, and from the peaks of the adjoining mountains a magnificent view of the windings of the Fraser River and the adjacent settlements may be obtained, and on a clear day the waters of the Gulf of Georgia can be seen. Two miles below Popcum is the Cheam Indian village.

YALE.

The town of Yale is situated on the right bank of the Fraser River, 110 miles from its mouth, at the head of uninterrupted navigation during about nine months in the year. It is backed by some of the highest mountains on the mainland; the site is limited for building purposes. It has good wholesale and retail stores and excellent hotels. The town is nearly on the dividing line between two climatic zones—the moist coast climate, and the arid interior climate. There are pleasant prospects from some parts of the town. A short distance above the town the Fraser boils through a narrow gorge, and an active pedestrian will be amply rewarded by wide views of grand scenery.

Mails reach Yale every day (at present) by railway, and during summer months steamboats ply between New Westminster and Yale. Between Yale and Boston Bar some of the heaviest rockwork for the railway was prosecuted; as of old was the case in building the waggon road. Bold projecting bluffs, beetling canyons,

swirling and rushing currents, are the characteristics. Nicaragua and Alba bluffs are names to conjure by.

YALE DISTRICT.

The district may be described generally as a hilly or mountainous district of British Columbia. It comprises more than one half of the southern interior tract of the mainland, and has a roughly estimated area of about 24,000 square miles.

The climate differs essentially from that of the Lower Fraser and the coast, it being drier and seasonally more regular.

The towns and villages in the district are Hope, Emory, Yale, Spence's Bridge, Lytton, Cache Creek, Savona Ferry, and Kamloops. The district has a considerable future before it as a mineral region, and produces a good deal of gold yearly. Fish and game are sufficiently numerous to interest both the sportsman and the settler.

Twenty-five miles above Yale is Boston Bar, where there are good hotels for the traveller on his way to the interior.

SPENCE'S BRIDGE SETTLEMENT

Is situated on both sides of the Thompson River, which are connected by a substantial wooden bridge. The Cariboo waggon road here taps the C. P. Railroad, and this place is also the distributing point for the Nicola valley. It is eighty miles east of Yale, and about the same disance west of Kamloops and 47 from Nicola Lake. There are two good hotels, two stores, blacksmith's shop, nursery, green-house, and gardens; also post offices with money order branch; the climate is dry, and invalids find great benefit from its salubrity.

ASHCROFT.

Ashcroft, one of the principal stations on the Canadian Pacific Railway, is situated on the Thompson River, 193 miles from Port Moody. Ashcroft will be always an important point, as all the waggon roads to the upper interior of British Columbia are tributary to it. The Thompson here is crossed by a bridge of the composite type over which the traffic to the Cariboo and Lillooet districts passes. It will also be an important junction as the most feasible route to build the proposed Cariboo branch road is up the Bonaparte River, which enters the Thompson less than a mile above Ashcroft station. The large quantity of supplies to the interior is at present hauled by ox and mule teams. The site is very pleasant, the climate mild, dry and bracing. Less rain falls in this vicinity than in any other part of the province, a most desirable feature for persons afflicted with affections of lungs, or any disease for which a dry atmosphere is so commended. Throughout the winter no snow falls to remain. The principal places of business are the railway station, a forwarding sta-

tion, post office, three stores, forge, one large hotel and one in process of erection, a B. C. Express office and school house. There is one commodious hotel, Evans & Bligh, proprietors, where the best accommodation and attention are bestowed. A well supplied table and comfortable beds are furnished, and the charges are moderate. The Dominion express office and the B. C. express office are connected with the railway and telegraph office. In the B. C. office is the telegraph to Cariboo. Stages leave here every Monday, Wednesday and Friday at 7 o'clock for Clinton, where the branch lines to Cariboo and outlying places connect by Tuesday's stage with Cariboo. The popularity of this line is well-known. Every facility is afforded everyone, and punctuality has characterized the line since its establishment by Mr. Barnard, M. P., over twenty years ago, and continues under the present energetic manager, S. Tingley. The company has, from its inception, carried a way-bag in which the letters and papers of settlers along the Cariboo waggon road were brought to the doors of those who might be a considerable distance from a post office. This voluntary act entailed additional responsibility, but not a failure in delivery has ever occurred The finest scenery awaits the tourist on the line to Cariboo or intermediate stations. There are a few fine ranches within a short distance of Ashcroft. Governor Cornwall's magnificent ranch is about five or six miles from Ashcroft station. There excellent and well-flavored grapes and cereals are grown in abundance. Mr. Barnes, two miles up the river, and Mr. Pennie, eight miles, at which there is a station, grow excellent wheat and other grains. Harper's grist mill is situated at the mouth of the Bonaparte. The most improved machinery is used, and the finest quality of flour is turned out at the rate of about fifty barrels a day. The wheat used is grown by irrigation and is preserved free from the wet, which injures the quality of other flour. There are also extensive cattle ranges. Mr. Harper has also a store in connection with the mill. Six miles from Ashcroft begins the Cache Creek valley. This was formerly a stopping place for the stage line, but since the railway was completed it has ceased to possess any importance. The road to Savona's Ferry begins here, and Savona's Ferry is twenty-four miles distant. A few miles from Cache Creek on the Savona road are situated the two magnificent farms of Mr. Jas. Stewart and Mr. C. Semlin, M. P. P. Mr. Stuart grows annually about two hundred thousand pounds of wheat alone, while barley and oats are grown very extensively. There is also a grist mill on this farm. Mr. Semlin's farm is of fine extent and grain is grown largely. Both farms have large herds of cattle and horses. On the Cariboo waggon road in the Bonaparte valley, are a number of smaller ranches that are exceedingly productive. There are no better potatoes grown on the continent. Mr. W. Walker has introduced culture of fruit and already has had some fine specimens of apples. The first baiting place after leaving Ashcroft is Mundorf's, the 124-Mile House, and twenty miles from it. This house is well-known for the good table set to the traveller. On ascending a considerable number of feet of an elevation, the well-cultivated arm of Mr. Dougherty's is reached. A splendid crop of all the products of the farm is produced by irrigation. The next place reached is Clinton, a central point from which a number of roads and trails diverge to other sections of the country. Clinton is situated 32 miles from Ashcroft, and the stage stays here for the night. This is a distributing point for mails, etc. The village contains about 150 inhabitants. There are two stores, two hotels, telegraph and post offices, court house and jail, an extensive forge of Messrs. McLellan & Co., and a wheelwright shop, under the management of Mr. McIntyre, a tinsmith's shop under Mr. Stoddard. There is a well-

CLINTON HOTEL,

CLINTON, B. C.

This well-known establishment is open for the public accommodation and will be carried on for the future, as in the past,

ONE OF THE BEST HOTELS ON THE MAINLAND

THE BEST OF ACCOMMODATION.

BOARD & LODGING BY THE DAY, WEEK OR MONTH.

THE BAR IS ALWAYS SUPPLIED WITH THE BEST WINES, SPIRITS AND CIGARS.

First-class stable in connection with the Hotel where horses have the best of care.

Stage connections with Ashcroft tri-weekly each way. Cariboo, Lillooet and Alkali Lake line of stages arrive at and leave Clinton weekly. The Clinton Hotel is headquarters for these different lines.

The Clinton Hotel is situated in the pleasant little town of Clinton, Cut-off Valley, on the main road from Yale to Cariboo, and thirty-two miles from Ashcroft on the line of the C. P. Railway.

THE SCENERY ROUND CLINTON IS BEYOND DESCRIPTION.

The Foster Gold Milling and Mining Company mine and mills are situated about eighteen miles distant.

The summit of Mount Soues is seven thousand feet above sea level. It is easily reached on horseback in about four hours ride from Clinton. The views from this mountain on a clear day are exceedingly grand. There are two other mountains, not so high, from which very good views can be had. Pavilion Mountain is about fifteen miles distant, where the scenery and hunting cannot be surpassed.

Parties fond of good fishing can have all the sport they desire ; fishing in the streams near town and in two lakes, one eleven and one thirteen miles from Clinton on the road to the Foster mines ; also in another lake about 3 miles distant. The trout in these lakes cannot be surpassed in quality. Each lake is furnished with a boat.

Tourists visiting Clinton will find the climate healthful and bracing and will feel amply repaid for the time and expense. Sportsmen will find game of all sorts plentiful.

Tourists having time to spare would not be sorry of a visit to Clinton.

MARSHALL & SMITH, Proprietors.

C. A. Lombard & Co., LEADING MUSIC STORE, VICTORIA, B. C.
Agents for the Bell Organ, Weber and Steinway Pianos.

stocked library of first-class books, comprising over 700 volumes, besides many of the leading periodicals of the day. There are a number ot good ranches in the vicinity of Clinton. The mound situated on the Bonaparte five miles from Clinton, is a fine ranch owned by Mr. W. Saul. Wheat of prime quality is grown, besides oats, barley and hay. The best stock of horses in the province is bred on this farm. They fetch the highest price. There is also an extensive cattle range. On the Lillooet road, which leaves the Cariboo waggon road at Clinton, are situated a few valuable ranches. Over the road up Pavilion mountain are situated Mr. Michael Gillon's, J. E. Holt's and R. Carson's. The dairy product of Gillon's ranch is very large. A vast quantity ot hay is grown on Pavilion mountain. R. Carson's ranch produces three hundred tons a year, and an average of wheat and oats of 40,000 to 50,000 pounds. Altogether on the mountain there are between two and three hundred thousand pounds of grain grown annually. All the principal garden vegetables are grown in profusion. The average per acre is ten tons of potatoes. There is also on each ranch a large herd of cattle. The winter season being but short, the feeding of cattle in winter is not so great a burden as in the eastern parts of the Dominion. M. Soues, government agent at Clinton, has about a half acre under cultivation. Nothing can exceed the exuberance of currants, red and black, gooseberries, raspberries and vegetables. Turnips, potatoes and a number of varieties of cabbage and beans are produced and are not excelled for size or quality. Mr. Soues has shown what the soil can produce by cultivation and irrigation. There is no finer sight than this garden at its full bloom. Mr. Soues has reduced the cultivation of the soil to a science and his methods are a model worthy of study and attention. About 17 miles from Clinton is situated the Big Slide mine, known as the Foster ledge. It is reached by first travelling thirteen miles over the Lillooet road, and thence by trail, which has lately been widened to admit of teams to haul machinery and freight. The assay promises well and the manager, Mr. Henderson, is confident of success. This is the first quartz mill erected in the province, a ten stamp, and the public view with interest and hope the development of its mineral resources by him. Mr. Hiram Gould and Mr. Ward have been prospecting during the past season. Mr. Gould is an expert from Nevada, and he is enthusiastic about the mineral resources of the country. Sportsmen will find here the grandest region for their amusement and delight. There is one important advantage over other places: there is no underwood, and a man can travel on horseback for miles without the usual obstruction of forest and fell. There are deer in abundance, trout abound in every stream and lake, and mountain sheep at a reasonable distance from a central point. Grouse and prairie chicken are very plentiful. Ducks and geese swarm in the lakes, which dot the country in every direction. Twenty-three miles from Clinton is the 70 Mile house, with a splendid dairy ranch, owned by Mr. Wm. Boyd. The finest quality of butter is produced at this dairy, and commands the highest price in the market. The annual product is about five thousand pounds. The best bacon is also made by Mr. Boyd. Here the stage stays for dinner, and the best meal served on the road may be partaken of. Accommodation for travellers is obtained from the genial proprietor at moderate rates. Thirteen miles from the 70 is the 83 B. C. Express stables at which a change of horses is made, when the driver proceeds to the 100-mile House kept by Mr. T. McA. Hamilton. The 100-mile house is at the foot of the high elevation which had been traversed from a short dis-

tance from Clinton. Between Clinton and the 100 or Bridge Creek is fifty-five miles. Here the stage stays for the night. An early start is made and the next night the passenger finds himself at the 150. Along this road is the section of country known as Lac La Hache valley. The country widens and the road follows the lake for twenty or thirty miles forming a beautiful scene. There are quite a number of stock breeding ranches along the whole valley. A great many cattle are bred for the beef market of Victoria and northwest. Mr. Wm. Abel has also a fine dairy ranch which produces excellent butter. At the 108 are B. C. X. stables where a relay of horses is made, and here also is a telegraph office. There are about 5000 cattle bred in the valley, a few thousand sheep, and Mr. McKinlay has made a success of breeding the Angora goat, which yields the finest quality of wool. The coyote is very destructive of sheep but the goat shows fight and drives off the enemy. At the appearance of the coyote the sheep rush for protection to the goats who form a circle of unbroken front behind which the sheep take shelter. After leaving the 108 the next resting place for the stage is the 134. This is a very extensive ranch owned by Mr. W. Morrison. There are several hundreds of acres under fencing within which a large stock of horses is bred and great quantities of hay are cut. The 134, or Morrison's, is 119 miles from Ashcroft. The lake abounds in fine mountain trout of rich flavor, which are caught by seine, and preserve well for winter use. There is also a great quantity of white fish found in Lac La Hache. The product of the valley in round nu bers is about 4,000 cattle, five hundred thousand pounds of natural hay, and between four and five thousand pounds of butter. Sixteen miles from Morrison's is the 150, and 135 miles from Ashcroft. This is an important trading centre. Veith & Borland keep a large stock of goods and miner s outfits, the post office and express stables. A trail from the 150 leads to Horsefly mining region from which about forty thousand dollars in gold dust is taken annually. This camp is about forty miles from the 150. Veith & Borland have a large ranch also which yields about two hundred tons of hay. The other principal places are Mr. Gavin Hamilton's, jail and school house. A few miles off the waggon road, following the course of the valley is St. Joseph's Mission. Here are two schools for girls and boys. There is also an extensive ranch in connection with the Mission, on which large quantities of hay, grain and roots are grown. A few miles further on and, near the head of William's Lake, is the fine farm of Mr. C. B. Eagle. The commodious residence erected this season shows the prosperous condition of Mr. Eagle. The average grain product is one hundred and fifty thousand lbs. of wheat and one hundred and fifty tons of hay. Potatoes are also grown in large quantities. At Williams Lake is an Indian reservation. The Indians strive to adopt civilized modes of life by cultivating the land and cutting hay. The Lake is a beautiful sheet of water about five miles long, at the margin of which runs the road to the magnificent farm of Pinchbeck and Lyne. The soil is extremely productive. There are six hundred acres under cultivation, and four hundred more could be put under crop. The altitude is about 2100 feet, and latitude 51°, 10″. Root crops average from 10 to 15 bushels to the acre. Wheat of the best quality and potatoes of great size, which are exceedingly prolific, attest the wonderful fertility of the soil The most improved machinery is used. A separator driven by steam power; a grist mill by water power of large capacity and most approved type; a sawmill, planing mill, forge and store; are the outfit of a single farm. Twenty-two teams are frequently at work. The averege yield of wheat is about two hundred thousand lbs. There are 150 horses and about 300 cattle. The farm constitutes a little settlement in itself. This excellent farm is situated 11 miles from the 150 off the main waggon road. This is the sportsman's paradise. All game are found in great abundance.

SAVONA FERRY

Is twenty-two miles from Cache Creek, and thirty miles from Kamloops, and has, within the past few years grown from a small settlement into a thriving and busy little town. The volume of business is daily growing larger, owing to the many sub-contracts on the railway, and it bids fair to become a place of constant activity.

Three steamers ply on Lake Kamloops, into the Shuswap Lake and on to Eagle Pass, carrying supplies to the several landings convenient for settlers in the interior.

At Savona proper Mr. John Jane has the largest store as well as the best selected stock, and enjoys a large volume of business.

There are three hotels, the Lake View, by Messrs Ferguson & Newland, and the Sav ona, by James Uren. The Central is owned by Abraham Thomas. There is also an express and a telegraph office.

KAMLOOPS.

Kamloops, a thriving and prosperous town, and end of a division on the Canadian Pacific Railway, is 252 miles from Vancouver, and 2654 from Montreal. Pleasantly situated at the junction of the North and South Thompson Rivers, it is the centre of a large tract of grazing country. There are several fine farms in the immediate neighborhood; several mines in the district are opening up well, and the development of mining interests will do much for the future prosperity of the town.

Kamloops possesses a fine dry and healthy climate, and has good hotel accommodation. The Grand Pacific hotel, near the railway station, has been newly erected; the Arlington has also increased its accommodation by recent additions; the Cosmopolitan and Dominion still hold their own as old established hotels

The Presbyterians and Methodists, the Church of England and Roman Catholics, are about to erect churches for their several denominations.

The Bank of British Columbia is erecting a branch office adjoining the new court house.

The town has a steam saw mill and grist mill. During the season the steamers Peerless, Kamloops, Spallumcheen and Lady Dufferin make regular trips between Savona and Spallumcheen.

Population about 750, with about the same number of Chinese.

LYTTON.

This town is situated at the junction of the Fraser and Thompson Rivers, 57 miles above Yale. It is a picturesque and rapidly growing town. The business of this town has of late largely increased, and is constantly multiplied by the enterprising firms of Lytton. A bridge at the mouth of the Thompson River gives access to the Upper Fraser country.

NICOLA VALLEY, B. C., DESCRIPTIVE.

Nicola is centrally situated, being distant from Kamloops 60 miles; Spence's Bridge 50 miles; Hope 80 miles; Granite Creek gold fields 60 miles; Semilkameen, alias Princeton 60 miles.

Nicola is reached from Spence's Bridge and Kamloops by waggon road; from the other centres by good pack trails. Spence's Bridge is the nearest railway station on the C. P. R. line.

At present a weekly mail leaves Spence's Bridge every Monday morning by B.C. Express Co.'s coach and reaches Central P. O., Nicola, about 5 p. m. On delivering and receiving mails the coach proceeds up valley to Rockford, delivering remote mails at Quilchanna P. O

The mail coach returns on Thursday, delivering mails and passengers at Spence's Bridge same evening.

Nicola division of Yale district contains five post offices, and a sixth asked for at Rockford.

Present offices are as follows: From Spence's Bridge to Lower Nicola, 35 miles; to Coutlie's, 40 miles; to Nicola, 50 miles; to Quilchanna, 60 miles; to Douglas Lake, 80 miles. Nicola is the central office. It is a money order office.

The Douglas Lake and Minnie Lake mails are left at Quilchanna P. O. Douglas Lake mail service connects with main line to and from Spence's Bridge.

Lower Nicola is a thriving little settlement. It contains two stores, post office,

GRAY & DUMBLETON, VICTORIA, B. C. STEAMBOATS AND LAUNCHES. Coal Oil Engines and Machinery of every description.

public school, saw and grist mill, and a carpenter's shop. Its surroundings are prosperous farmers and stock raisers; an Indian reservation being also adjacent.

Coutlie's is a center of importance. It contains a large store, hotel, post office, blacksmith and butcher shops. It is a point where several avenues converge: Nicola-Savona trail, Granite Creek trail and Hope-Nicola trail. Consequently is a distributing depot for mails, merchandise, etc. It is flanked by large agricultural and pastoral interests.

Nicola bids fair to be the town of the district. It contains a church, public school, court house, jail, land office, central P.O., two extensive stores, boarding house, flour mill, saw, sash, shingle and planing mills, blacksmith and carpenter shops. There are several comfortable and imposing private residences, and others of large dimensions in process of construction. The location and surroundings of Nicola are pretty and pleasant; it is becoming quite a health resort. Good water, pure air, fishing and shooting, boating, pleasant rides and drives, are amongst its attractions.

Quilchanna is another centre where the Douglas and Minnie lake waggon roads tap the main line; it is also the point of departure for travellers and freight from Kamloops to Granite Creek. It contains a good hotel, store, post office and blacksmith shop. The next centre on the Nicola-Kamloops road is Rockford, where man and beast can find good accommodation.

The chief industry of Nicola district is stock-breeding. Cattle and horses, largely predominate; sheep-breeding limited. Cattle number some 30,000 head; good horses owned by settlers, some 2,000; sheep, less than 2,000. About 80,000 acres of the public lands are owned by residents; the best grazing, tillage and meadow lands are all taken up. Eventually the man who owns the most land will be able to keep the most stock.

The proximity of Nicola Valley to the coast, its accessibility at all times of the year, and its adaptation to stock-raising, places it first on the list as a meat supplying emporium to the cities of the sea. The cattle syndicate of Douglas lake and vicinity can furnish fat, grass-fed beef any day in the year.

Agricultural pursuits are only followed to supply local wants, and generally fail to do that; although roots, cereals and grasses under irrigation do remarkably well. The hay crop, from natural and artificial grasses, is what the stock owner labors to increase.

Small fruits are grown in profusion. Apples, plumbs, etc., are being tried, and in some places appear to succeed. The hardy plants give a sweet return, in bloom and beauty for the little attention they receive.

The district is supposed to be rich in coal and the precious metals; but so far there has been but little done towards development.

THE OKANAGAN, SPALLUMCHEEN, SALMON RIVER, GRAND PRAIRIE, OSOYOOS LAKE AND SIMILKAMEEN VALLEYS.

These valleys are reached by different routes; first by trail striking eastward from Fort Hope, on the Fraser River, twelve miles below Yale. From Hope to Princeton on the Similkameen River is 66 miles; thence 40 miles to Keremeos; thence 24 miles to Penticton at the lower end of the great Okanagan Lake; thence 35 miles to Okanagan Mission. From the Mission to Spallumcheen is 50 miles over a good road. There are other routes by way of Yale and Lytton; and either through Kamloops or the Nicola Valley; but these are much longer, though they have the advantage of being passable all through the year, which the other route has not.

Pleasant and Salmon River valleys may be said to contain the largest area of farming lands in British Columbia and in a north-east direction it is not necessary to irrigate.

Spallumcheen Valley runs from the head of Okanagan Lake; the length is about 30 miles. Among its attractions may be named that steamers for nine months of the year touch at the settlement. Crops grow without irrigation and yield enormously; soil chiefly black loam and easy to cultivate.

ENDERBY,

Another district of Spallumcheen, better known until lately as the Landing, from its being situated on the banks of the Spallumcheen River, promises to be a thriving district. Although prosperous, it has hitherto made small progress owing to the difficulty experienced by the farmers of Spallumcheen and the surrounding country in finding a profitable market for their produce in consequence of the distance from Kamloops, the irregularity of the river navigation, and the high charges made for all kinds of freight. To accommodate the wants of the district the Columbia Milling Company, have, with laudable enterprise, now erected a large roller flour mill. This is the only roller flour mill in the province, and the building is 95 feet in length, by 45 feet wide and 60 feet high. The designs are from plans furnished by Messrs. Goldie & McCullock, of Galt, and the mill is fitted with all the latest improved types of flour-mill machinery, embodying some special features, including a tramway, worked by an endless steel band, for shipping and landing grain and goods from vessels lying at the company's wharf. The company also own the steamer "Red Star," which is fitted with every convenience for passengers and freight and makes the voyage between Enderby and Sicamous and back three times a week. The "Spallumcheen" has re-commenced running on the same route, and the competition will probably lower freight charges. The erection of the mill has given a great impetus to the trade of Enderby, and has assisted materially in the advancement of the Shuswap and Okanagan railroad. The bill authorizing the construction of the railroad, which is to run from Sicamous to a point on the Okanagan Lake in connection with the Canadian Pacific railroad, passed its third reading unanimously this session, and the Provincial Government have guaranteed the interest on a sum of $200,000 towards the cost of construction, and endeavors are now being made at Ottawa to obtain a similar guarantee from the Dominion Government.

The land near the mill is now being laid out in town lots by Messrs. Lambly Bros.

OKANAGAN.

Okanagan Valley may, in view of its length and area of valuable agricultural land, be classed second to none in British Columbia. It ext nds from the head of Lake Okanagan to a fort bearing the same name at the mouth of Okanagan River, which empties into the Columbia about sixty miles below the 49th parallel. The lake is 75 miles in length, and reaches to Penticton. Just below is Dog Lake, about eight miles in length. The principal part of the farming land on the Canadian side of this valley lies between Okanagan Mission and the head of the lake, a distance of 47 miles.

SIMILKAMEEN.

This Valley extends 70 miles in a north-easterly direction from the 49th parallel, through which the Similkameen River takes its course--along which gold has been discovered. Stock breeding is the principal business in this valley at present. The climate is dry, with moderate cold in winter. Goods are generally packed from Fort Hope. It is distant 100 miles from Keremeeos, the chief settlement. Freight can be taken by Yale and Kamloops, but only heavy freight goes this way.

KOOTENAY DISTRICT.

This district, since the completion of the C. P. R., is fast coming to the fore. It consists of three great valleys, which we will consider each by itself.

The LOWER KOOTENAY VALLEY, about 1700 feet above sea level, is approachable at present from the Northern Pacific Rail (Kootenay station or Lake Pend d'Oreille), thence a good waggon road 32 miles long leads to Bonner's Ferry, on the Lower Kootenay River; from here three small steamers ply down the river 100 miles to Kootenay Lake, 90 miles long, famous for the immense deposits of galena (silver and lead ores), on its banks. This valley will soon be one of the richest agricultural districts in America, the soil (alluvial loam) on the flats along the river being of wonderful richness and great depth. At present the Kootenay bottoms are subject to an annual overflow, which makes agricultural development impossible. The Kootenay Syndicate (Limited), of London, England, consisting of English capitalists, propose to prevent the overflow by suitable works at the outlet of the lake (deepening it) and as soon as this is accomplished the wonderfully sheltered Lower Kootenay Valley will become one of the choicest localities for fruit growing and farming, including hops and tobacco, for both of which the soil and climate are most suitable. Two railways, the Kootenay Railway and Transportation Company (a California enterprise) and the Kootenay & Athabasca Railway Company, a Canadian association backed, it is said, by the C. P. R., have obtained charters and have surveyed their routes, the one to connect the Kootenay Lake with the Columbia River (25 miles); the other to build a line from the north end of the Kootenay Lake to the C. P. R., at the western crossing of the Columbia, the great mineral deposits on the Lake being in both cases the inducement. When these lines are completed the lake, which is generally acknowledged to be by far the most beautiful sheet of water on the Pacific Coast, and probably in the whole of North America, will undoubtedly become a great resort for tourists and sportsmen, as the fishing and shooting are of the best, the rare landlocked salmon, they take spoon bate) for which this profound lake is famous, affording particularly fine sport.

The UPPER KOOTENAY VALLEY, which lies parallel with the lower valley, but nearer the base of the Rocky Mountains, the two valleys being separated by a spur of the Selkirks, over which fairly good trails for pack horses lead, is of an entirely different character. The bottom land along the Upper Kootenay River is not so extensive as in the lower valley, nor is it subject to heavy overflows. On either side of the river there extends for many miles an excellent bunch grass country. The forests are of park-like character, open, with no underbrush. The river is navigable for shallow draft steamers, and the Kootenay Syndicate propose also to improve this valley and to place a couple of steamers on the Upper Kootenay River this year, and at the same time to construct a short one-mile long, navigable canal across the "canal flat" (the low watershed between the Kootenay and the Columbia), so as to connect the river with the navigable waters of the Columbia, where there is already a steamer plying, thus obtaining for the whole valley direct steamer communication with Golden City, a station on the C. P. R. They also have started a townsite on the canal flat, which is a perfectly level flat of park-like character of about 2000 acres in extent, having on one side the Upper Kootenay River; on the other the singularly picturesque Upper Columbia Lake, which is the source of the great Columbia River, and which is, as already mentioned, navigated by a steamer of about sixty tons, that runs up

from the railway at regular intervals. A telephone line will be erected from the townsite to Golden City (105 miles), and lots will be placed on the market as soon as work commences on the canal. The government, which have made a concession of land to this company, have made it a condition that the canal shall be completed within two years, but it is reported that the company propose to complete it in 1887.

The Upper Kootenay Valley has a length of some 90 miles. It is some 600 or 700 feet higher than the Lower Kootenay Valley, but equally favored in climatic respects, as it lies at the very base of the Rocky Mountains, which rise to a great height, sheltering it completely towards the north and east and acting as a desirable "catch," diverting the warm Pacific or Chinook breezes into the valley, so that snow never remains very long on the ground. The winters are short, with bright, clear days, but occasional short spells of severe cold are experienced. The spring sets in usually by the commencement of March. The summers are dry and the heat is never oppressive, while summer frosts are unknown in either of the Kootenay valleys. Hops and all the more delicate crops thrive uncommonly well. The cattle and horses, particularly the latter, are fine, and hitherto they have wintered out without feed or shelter. Improved stock should, however, be better cared for, particularly as wood is very handy and hay bottoms are distributed along the river. There are three or four hundred Indians (Upper Kootenays) in the valley, whose services would come in usefully for certain work, such as hop picking. It is the intention of the Dominion government to establish a mounted police post in the valley; hitherto a single constable has sufficed for whites and Indians. The mineral development of the Upper Kootenay has been much retarded by the valley's isolated position and difficulties of transportation. Up to this year all supplies and tools had to be packed in on horse-back from Idaho Territory (Sandpoint), over 150 miles of rough mountain trails, the freight alone amounting to ten cents per pound. Under these circumstances no machinery could be got in, and without that all mining must necessarily remain of the most primitive kind. That both the Selkirks and the Rocky Mountains are very rich in gold is plainly manifested by the fact that in two seasons over two million dollars worth of gold was taken out of one creek (Wildhorse) in this valley. That was twenty years ago, and other gold excitements having lured away the miners so that the turn out has gradually decreased very considerably, last year official sources only report a result of $76,650 in gold. As soon as steamer navigation on the Kootenay River has been established all this will be vastly improved, for with the assistance of machinery, particularly with respect to gold quartz mines, an industry that hitherto has been entirely neglected, most satisfactory results may legitimately be expected, for the gold is there and can be found in its alluvial form in every creek in the valley. A company to work the Finlay Creek deposits has quite recently been formed on the strength of favorable privileges having been granted them by the provincial house of legislature.

The timber in the Upper Kootenay Valley is remarkably fine, particularly the tamarac (larch), and yellow pine species. Both these kinds will soon come into demand down the Columbia River, where, owing to an abrupt change in the climate from a dry to a wet zone neither of these trees is found.

The Upper Kootenay Valley can best be reached from Golden City, on the C.P.R. by the steamer Duchess, which makes the trip in one day (105 miles). From the valley several low passes (Vermillion, Crow's Nest and Kootenay Passes), lead across to the North West Territory over good trails and with the best feed. In future these

If you want anything in the Book, Stationery, or Paper Line, enquire of J. B. Ferguson and you will be sure to get it.

routes will be the cattle trails by which the eastern cities can be gained at no expense for shipping. Likewise can the Northern Pacific Railway be reached over easy country, so that the settlers will have the choice of two routes for shipping produce and stock, the best cure for high freight rates.

A Canadian company (the East Columbia Railway Company) are at date of writing, applying for a charter to build a railway between Golden city and the "canal flat," at the head of the Upper Kootenay Valley.

In 1845 the famous missionary and worldwide traveller, Father de Suiet, visited the Upper Kootenay Valley and wrote home: "The advantages nature seems to have bestowed on this spot will render its geographical position very important at some future day, and when emigration shall have penetrated, it will prove a very important point. The climate is delightful, the extremes of heat and cold are seldom known. The hand of man would transform it into a terrestrial Paradise." A few years more and the old traveller's prophecy will have become true.

THE COLUMBIA VALLEY comprises the great bend of the Columbia River round the Selkirks, which is undoubtedly the most majestic group of mountains in North America. The valley, following the Columbia, is 440 miles long; but only the uppermost portions are available for agricultural or stockraising purposes, the remainder being a densely timbered and rocky country of much future importance, however, on account of its mineral riches. The three chief places in the valley are Golden City, at the mouth of Kickinghorse River, where the C. P. R. first strikes the Columbia river after descending from the Rocky Mountains. It will be of some importance as the distributing point for the Kootenay Valleys. Seventeen miles farther down the Columbia is Donald, a larger place on account of its being the end of a division, and it contains roundhouses and workshops of the C. P. R. Finally, Farwell, or Revelstoke, as the railway company call it, which again is the distributing point for the Big Bend mines, where quartz mining (gold) has a bright future. Farwell, too, is the point from which the Kootenay and Athabaska Railway Co propose to build their branch line to tap the galena mines on Kootenay Lake. The splendid white pine, cedar and fir timber along the C. P. R. route through the Kootenay district can not fail to bring about an early development and the establishment of large sawmills to supply the treeless North-west.

DONALD.

Donald, called after Sir Donald A. Smith, an influential member of the C. P. R. Syndicate, is a small town situate on a large flat at the first crossing of the Columbia River by the C. P. R. going west, and is distant about 17 miles from the mouth of Kicking Horse River, *i. e.*, the commencement of the ascent over the Rockies by the now well-known Kicking Horse Pass, where some of the steepest grades known to railway experience are being travelled over daily with wonderful regularly by the trains passing from Montreal to Victoria and *vice versa.*

The town is entirely the offspring of the railway mentioned, as, till the advent of the latter, the site was but an unknown spot in the vast wild of mountain, wood and valley which now surrounds it; and which was to all intents and purposes the reverse of a "howling wilderness," resembling, in this respect, many of our British Columbia forests, which are remarkable for the solemn stillness "that reigns around;"

no sign or sound of living thing being seen or heard for miles. Since railway construction the woods have been enlivened with the sound of the woodman's axe and the hum of many saw mills, etc.

Donald is a busy place, possessing many business houses and being an important, if not the *most* important, divisional centre on the C. P. R. line, between Winnipeg and Vancouver. The company are erecting round-houses, machine shops, etc., in Donald. As many as thirteen tracks of rails here intersect. Its importance in the future will entirely depend on the development of the quartz mines (which are supposed to be rich and abundant in the immediate neighborhood), and on the industry and produce of the settlement—manufacture of lumber, etc.

The country is supposed to be particularly adapted to the production of all fruits generally found in northern countries. Some very prolific vegetable gardens were cultivated during the summer of 1886. The town is surrounded by the most attractive mountain scenery.

Two churches will shortly be built; one for the Episcopalian and one for the Presbyterian mission. A public school will soon be established, as there are now more than the requisite number of permanently resident children whose parents regret their present inability to send them to places of instruction.

CARIBOO DISTRICT.

The vast mineral region known as Cariboo extends from Horse-Fly River 150 miles north, and is about 70 miles wide.

Although most noted for its alluvial gold mines, there are extensive stretches of good farming land throughout the district, and some sixty pre-emptions were recorded during the year 1886.

Three flour mills are in successful operation, selling flour at the rate (in Barkerville) of $8.50 and $9 per 100 pounds.

The beef grown on the ranches in the west and south of this district is not to be surpassed in any country. Fruit will not ripen and has to be imported, and sells here retail (apples) at 50 cents per pound.

Vegetables are in abundance, and sell at from 10 cents per pound.

The quartz ledges known to exist throughout the district have been assayed this year with satisfactory results, and two quartz mills are to be erected immediately. The amount of gold taken out averages $763 per annum per man employed.

The projected railway will pass through or near the centre of present mining operations; and in all probability a mining camp prospected late this year will be opened up in the spring.

There are four schools having an aggregate average attendance of about eighty-eight pupils.

The mail is delivered weekly by stage at the different stations.

The climate is cold but healthy.

Lumbering for the mines and building employs five mills.

The population is intelligent and social. The Chinese mine much of the ground on the bars of the rivers, making two to three dollars per day.

Fare by stage from Barkerville to Ashcroft, nearest railway station, 280 miles, $42.50.

WILLIAMS' LAKE DISTRICT.

(P. O. Address, 150-Mile House.)

The Williams' Lake district comprises Williams' Lake, 150-Mile House, Soda Creek, and Chilcotin. Its characteristic is rolling grass and farming lands. Quite a number of new names have been added to the list in this section. It supplies the flour, beef, bacon and vegetables for the mining region. Some of the most extensive and well-appointed farms in the province are in this district. There is a school at the 150-Mile house, and the Roman Catholic Mission have one at Williams' Lake, with an attendance of about forty.

The stage passes to Barkerville and to Ashcroft each way weekly, carrying the mail.

A well-kept hotel and store at the 150, kept by Veith & Borland, supplies travellers and others with what they require.

SODA CREEK.

Soda Creek, pleasantly situated on the Fraser, was the usual landing from the river steamer. This is now discontinued. It contains two stores and hotels and blacksmith shop; also flour mill. It is the distributing point for the Chilcotin country, and a considerable mining and agricultural country surrounds it. The stage from Ashcroft arrives here weekly on Wednesdays, carrying the mail. Mr. P. C. Dunlevy and Mr. Robert McLeese, M.P.P., have hotels and stores for passenger and other traffic. Some very fine farms, growing "prize" wheat are in this neighborhood.

QUESNELLE.

(P. O. Address, Quesnelle.)

Quesnelle, situated on the banks of the Fraser, at the mouth of Quesnelle River, is an important point, being the objective point of both railway routes sketched out for this part of the province. The fur trading and fitting out for a long distance up the Fraser are done here. Two hotels, several stores and a sawmill are to be found here. The Chinese on the bars of both rivers contribute to swell the revenue of the place, and the heavy ox teams seldom go further than this. Good vegetables are grown here for export to the mines, and a school keeps the rising generation up to the requirements of the age.

The stage arrives weekly on Thursdays, carrying mail. The Hudson Bay Co. and Jas. Reed, Esq., M. P., keep large stores here.

CASSIAR DISTRICT.

The district of Cassiar is situated along the north-western boundaries of the province. The population is about 400. Attention was first drawn to Cassiar by the discovery of gold on Thibert creek, in 1873. The principal streams on which mining has been prosecuted profitably are the Dease, Thibert, McDame and Walker creeks. The district has produced over $5,000,000 in gold.

The features of the district are mountainous, being of little use for agricultural purposes, except on the Stickeen River, where there are a few farms which produce grain of the best quality and all of the hardier kinds of vegetables of excellent quality. The miners are supplied with vegetables from the last-named farms, the product being regulated by the demand.

The southern portion of the district being on the coast, has produced, during the last five years, of salmon, furs and gold a considerable contribution to the exports of this province. The average yearly exports from Cassiar during the time mentioned has been about $700,000.

Its rivers and lakes teem with fish, and its forests abound with game. There is not the least doubt that remunerative gold deposits are waiting to be developed, and a mining population will be found in this country for many years to come.

NORTHERN COAST, NORTHERN INTERIOR AND WEST COAST OF VANCOUVER ISLAND.

METLAKAHTLA

Is situated some 20 miles from Fort Simpson, and is purely an Indian settlement with a population of about 800. The industries prosecuted here are a saw mill, a barrel factory, a salmon cannery, blacksmith's work, and other mechanical arts.

SKEENA RIVER

Is situated fifteen miles south of Metlakahtla, and is the second largest river in British Columbia. The river is navigable for a distance with steamers of moderate draught and with canoes to the head of the Babine Lake.

The Skeena is a prolific salmon stream, and fish of the finest quality are procured here.

FORT SIMPSON.

This fort is situated on the north-west end of the Simpshean peninsula, separated from the south end of Alaska by the Portland Inlet.

The town is situated on a sloping hill-side, and has a population of 800 Indians, who are chiefly engaged in the fishing and fur trade business.

The village has a fire brigade, a brass band, a rifle company, and is governed by an Indian council.

Kit-a-maat, about 100 miles down the coast, is an Indian village, and has a population of 350.

QUEEN CHARLOTTE ISLANDS.

The general character of these islands is mountainous and heavily timbered. The extreme length is about 170 geographical miles, their extreme width about 100 miles. The mining resources of these islands are undoubtedly very extensive.

The only industry established here is the Skidegate Oil Company, which enterprise is confined to the manufacture of oil from a small species of shark, commonly known as the dog-fish.

The chief trading places on the islands are at Massett and Skidegate Inlet. The chief item in trade is fur seals, in which about $10,000 of trade is annually done.

The Hydah Indians of these islands are famous for their skilful carving in wood, silver or slate, and their crest poles adorn every village. They are, beyond doubt, the best canoe makers on the coast.

NAAS RIVER AND DISTRICT.

Naas River ranks third in size of British Columbia rivers, and waters the country north of the Skeena. On the right bank, close to the mouth, is the mission village of Kincolith; population about 225.

Several well equipped canneries are located along the Naas River, and thousands of Indians are engaged in fishing during the salmon and oolichan run.

The Methodist mission is in charge of Rev. A.E.Green, and there is a school where Indians are taught the habits of civilized life.

The winters are very severe, the thermometer falling from 40 deg. to 50. deg. below zero for weeks in succession. Gold is found in small quantities, and also croppings of coal. When properly prospected no doubt much wealth wi l be discovered.

FORT RUPERT.

This post is situated near the northern extremity of Vancouver Island, and was established by the Hudson Bay Company for a trading post.

ALERT BAY

Is situated about twenty miles south of Fort Rupert, on Cormorant Island, and a convenient stopping place for vessels on their way to and from the Northern ports of British Columbia and Alaska Territory.

BELLA BELLA

is di tant from Victoria about 400 miles, and is an Indian village with a population of about 250.

O-WEE-KAY-NO

Is situated at the head of Rivers Inlet, where the well-known canning establishment of Shotbolt, Hart & Co. is located. The Indians in this neighborhood number about 150, and speak the Bella Bell Indian language.

SMITH'S INLET.

A good sized stream empties into this inlet, up which the salmon run in large numbers, and several canneries have been established in this neighborhood since the issue of the last Directory.

BELLA COOLA

Is situated at the head Burke Channel, and was formerly the landing place for Cariboo miners. The Indians are quite numerous, and the country abounds with fur-bearing animals.

LILLOOET.

The town of Lillooet is situated on the right bank of the Fraser River. Its position is 650 feet above the sea. The town consists chiefly of one broad street, having stores belonging to whites and Chinese intermingled.

The agricultural land in this section is exceedingly rich, and railway work has caused stock and other produce to command a high price, so that farmers prosper.

Bridge River mines are paying fair wages in spring and autumn when the water is low. The Indians in this neighborhood are engaged in agricultural pursuits and are happy and contented.

CLINTON.

Clinton is situated in what was formerly called Cut Off Valley at the junction of the Cariboo and Lillooet roads, 136 miles from Yale and about 50 miles from Lillooet. Stages from Cariboo and Yale meet here once a week. There are two hotels, a telegraph and post office, a B. C. Express office, an excellent and well-stocked library containing about 700 volumes of first class books and receiving the leading papers and periodicals of the day. The court house and jail are also situated here. Although the site of Clinton is about 2,700 feet above the sea level, vegetation of all kinds is in perfection and potatoes reach an enormous size; many weighing between seven and eight pounds are produced. The surrounding scenery is grand, and Clinton is famous for its beauty.

PHŒNIX FIRE ASSURANCE COMPANY

LOMBARD ST., AND CHARING CROSS, LONDON.

ESTABLISHED - - 1782.

For Insuring every kind of Property in all parts of the World from Loss or Damage by Fire.

The promptitude and liberality with which its engagements are always met by this Company are well-known, and the importance of its relations with the public may be estimated from the fact that since its establishment it has paid more than Nine Millions Sterling in discharge of claims for Losses by Fire.

The security offered to the public by the Phœnix Office is unlimited, comprising, in addition to the large invested capital of the Company, the whole fortunes of numerous proprietors, composed of some of the most opulent merchants and others in the United Kingdom. Annual and short time Insurances are effected upon all kinds of property in Vancouver Island and British Columbia on the most favorable terms.

Prompt Cash Payments and full power to settle all losses and claims without referring to the Head Office in London.

Rates and Particulars of Insurance may be had on application to

NO. 116--A BY-LAW

Respecting the Fire Limits, Wooden Buildings, and the Storage of Hay and Straw.

IN AMENDMENT OF THE EXISTING BY-LAWS BE IT ENACTED BY THE Mayor and Council of the Corporation of the City of Victoria as follows:

1. Section 2 of "The By-Law for Prohibiting the Erection of Wooden Buildings, 1879, Amendment By-Law, 1883," is hereby repealed, and in lieu thereof the following substituted:

"2. That portion of the City of Victoria which is contained within the limits hereinafter described, namely—commencing at the Northwest corner of Lot 127, thence running easterly along the northern boundary of the said lot to Store street, thence easterly across Store street in a straight line to the centre of Fisguard street, thence easterly along the centre of Fisguard street to the centre of Douglas street, thence southerly along the centre of Douglas street to the centre of Courtney street, thence along the centre of Courtney street to the northeast corner of lot 8, thence along the northern boundary of lot 8 to the shore of Victoria Harbor, thence along the shore line of Victoria Harbor to the point of commencement,—is hereby declared to be within the Fire Limits of the said city."

2. No addition to or alteration of any wooden building within the said fire limits shall be made.

3. No building other than with main walls of brick, iron or stone, and roofing of incombustible material shall be erected or placed within the said fire limits.

4. It shall be lawful for the Mayor and Council of the said city to authorize by resolution any officer therein named to pull down or remove any building which shall have been constructed or placed in contravention of this by-law; and all expenses reasonably incurred in pulling down or removing any such building shall be repaid by the owner or owners thereof to the treasurer of the said Corporation, and shall be recoverable with costs in a summary manner before the Police Magistrate or any other Justice of the Peace having jurisdiction within the said city.

5. In this By-Law the word "building" shall not apply to any shed within the curtilage of another building and used exclusively for the storage of fuel for consumption in such other building, such shed not exceeding ten feet by twelve feet in superficial linear measure and ten feet in height, nor shall it apply to any shed erected or to be erected wholly on or over the wooden piles of a wharf on the water front; but no shed shall hereafter be erected on any wharf within the said fire limits other than with roofing of incombustible material.

EDUCATION.

Extracts from the Report on Public Schools of the Superintendent of Education, December, 1886.

The Record of the year has been a mast satisfactory one—increase in the number of pupils—and general progress made. The number of schools in operation during the year was 83, 71 common schools, 7 graded schools, 2 ward schools, 3 high schools, and 101 teachers employed. Twelve new schools were established, 4 on the Island and 8 on the Mainland, and one school re-opened. The aggregate number of pupils enrolled was 4,471 and the average actual daily attendance was 2,481.

The expenditure for education proper was $79,527, an increase of $8,376 over previous year; for construction of school-houses, $16,613; furniture, repairs, &c., $2,474; total, $98,615. (As stated elsewhere the proposed expenditure this year is $101,695). In the school year 1872-73 the expenditure was $36,763 as against $79,527 in 1886 for education proper.

Remarks.—*Increased attendance.* The increase in daily average attendance has been nearly ninety per cent. of the increase in enrolment. The annual presentation of Rolls of Honor has very considerably contributed to this desirable result. *Competent Teachers.*—It is worthy of note that nearly two-thirds of the whole number on the present staff of teachers are holders of higher certificates, though the Superintendent recommends that trustees should be largely influenced by moral worth, successful experience and adaptability.

Public School Teacher's Examinations, 1886.—Four graduates of British universities obtained first-class grade A certificates; eight obtained first class grade B; two second class grade A; four second-class grade B; twenty-two third-class grade A, and twelve third-class grade B. Of seventy-nine candidates, twenty-three failed to obtain certificates of any kind. Most of the failures for the higher certificates arose from the want of a thorough foundation in the ordinary English branches, such as arithmetic and grammar. The certificates it must be observed are merely assurances of standing in the subjects of examination, and not of ability to impart instruction. While there are holders of second-class certificates who are first rate teachers, there are holders of first class certificates who are but second rate teachers, and further there are some schools in the charge of teachers holding third class certificates whose rank in the essentials of a good school equals, if not excels, that of those taught by some holders of the higher certificates.

The Provincial teachers institute now numbers one hundred and twenty four members.

There are in the Province 17 Teachers holding certificates First class grade A; 40 holding first class grade B; 14 holding second class A certificates; 26 second class grade B certificates; 22 holding third class A; 12 holding third class B; grand total of 131 certificated teachers, besides 18 having only temporary certificates.
