THE JOSEPH HALL MACHINE WORKS.

THE CHAMPION REAPER.

From the Whitby "Chronicle."

The Champion Reaper is destined, beyond a doubt, to revolutionize the Reaper trade of Canada, as it has done in the United States, and is doing in Europe.

Twenty years ago, Messrs. Whitley, Fassler and Kelly began in a small two-story shop, 40 x 50, by building fifty Champions, without any capital but their energy, high character, and mechanical ability—all being practical men. At that time other leading machines were being built by the thousand. The Champion was brought to such a state of perfection, that this house could not meet the demand for the machines; and the Champion Machine Company was organized, with a capital of \$500,000, for the building of Champion Reapers alone. A few years later, the old-established, wealthy house of Warder, Mitchel and Co. gave up a very large trade in various agricultural machines, including the Buckeye, New Yorker, and Marsh Harvester, and began to manufacture exclusively the Champion Reaper. Meanwhile, the original shop has been enlarged, until it is now 400 ft. long by 50 ft. wide, and four stories in height. Warehouses have also been erected by these companies, with storage for 18,000 machines; and last August stock was purchased by the three concerns for the manufacture and construction of 30,000 Champions, to meet the demands for the harvest of 1875. Enormous Malleable Iron Works, employing 200 hands, have likewise been erected for the purpose of making malleable castings, *exclusively for the Champion*. A further immense workshop, which will employ 400 hands, is nearly completed, and in which will be manufactured the guards, chains, and knives for the Champion. When this latter is in full working order, the company will be able to turn out the guards, chains, and cutter bars, with knives, for 50,000 Champions a year; and the other shops are being enlarged to the same capacity. The cause of this truly wonderful progress, is the real merit of the Champion, as in every respect the most perfect Reaper and Mower in the market. The frame is made of wrought iron, the shafts are of steel, and so also is the drawbar. The greatest possible care is used in its construction. It is easily adjusted to all kinds and conditions of grain or grass. It is now made as a Single Reaper, Combined Reaper and Mower, and Single Mower. There is no better evidence of the superiority of the Champion, than that manufacturers of inferior machines are using the name "Champion" to give their machines a position. *THE CHAMPION is patented in Canada, and built only by the JOSEPH HALL MANUFACTURING CO. of Oshawa*, who are working under the special directions of W. N. Whitley, Esq., the inventor. Mr. Whitley, as well as the Hall Company, are determined to supply the Canadian farmer with a Champion Harvester *in every respect a perfect duplicate of the American machine*, and fully equal to it in mechanical construction and quality of material used.

GEORGE B. STOCK

MANUFACTURER OF

Stock's Extra Machine Oil

AND DEALER IN ALL KINDS OF

MACHINE AND WOOL OILS.

Office: 90 KING STREET EAST, TORONTO.

A circumstance has proved itself in some degree annoying to our travelling agents. Jealous of the reputation of our oil among consumers, unscrupulous agents representing other houses have succeeded in some instances in palming off inferior oils as being identical with STOCK'S EXTRA MACHINE OIL. The *very barrels* originally containing my oil, and impressed with my *Trade Mark*, have in a few instances been employed in these nefarious transactions. The extent to which my business has been injured by these representations has been more than counterbalanced in my favor by the unanswerable argument thus afforded as to the superiority of my oils, and the estimation in which they are held by the public. All my agents are furnished with the necessary credentials.

TESTIMONIAL IN ITS FAVOR.

Office of the East Toronto Planing Mill,
Corner of Queen and George Streets.

G. B. STOCK,

DEAR SIR,—In answer to your request as to our opinion of your oil as compared with others, we have to say that we have decided to use no other so long as we can get yours; and this was brought about by the fact that other dealers came round and said that they could give us oil as good as yours for much less money, so we took samples from each. The following is the result of FOUR TESTS OF EACH SAMPLE, in one of Foster's Patent Oil Cups, on our engine. Cup No. 12, once filled, run with sample No. 1, at 25c. per gallon, 2 days; sample No. 2, at 45c. per gallon, 3 days; sample No. 3, at 55c. per gallon, 6½ days; STOCK'S EXTRA OIL, AT 60c. PER GALLON, OUT OF BARREL THAT WE WERE USING, 12 DAYS. The above samples were from the *leading oil dealers of Canada*. I may also say that we are using your oil on our cylinder instead of tallow, and find it does as well, and is much cheaper, and better for the boiler. I think we can truly say that we are saving fifty per cent. in oils since we commenced using STOCK'S EXTRA.

Respectfully yours,

WILLIAM H. ESSERY,
Engineer for Messrs. Withrow & Hillock.

Toronto, Sept. 3, 1874.

GEORGE MAIR,
Manager.

Vamped out of one sheet-
iron sheet,

I represent for those to view,
To whom it may be some-
thing new.

The model patent flat-crimped elbow,
Turned out by Wexelberg & Co.
On Queen Street West, three eighty-four;
For stove-pipes we it much adore:
So apropos, with draft so clear,
They scarce need cleansing once a year;
So ornamental in its bend,
The bon-tons value it a friend;
So neat and tidy that, we trust,
It is not troublesome to dust.
The galvanized, the gay and bright,
Wrought out of tin-plate water tight.
As graceful as the rainbow's skirt,

Behold it, and you will admire it;
Examine, and you may desire it.
For smoke or water to escape
The eye of fancy fancies shape.
Ingenious, tasty, and complete,

It triumphs over soot or dirt.
For steam it is a prime receiver,
And worthy of the Golden Beaver.
Such aqueduct and steampipe elbows
Are made at Wexelberg & Co.'s,
From copper, brass, or tin, or zinc,
On iron galvanized to pink,
To satisfy your beau ideal,
In choice and best material.
It won't corrode, or eat with rust,
Nor wear with time, as others must;
Not subject to be clogged with ice—
The water whirls through it so nice.
Select, and test it if you want to,
It takes the premium in Toronto.
For use, utility, or show,
It is the nonpareil Elbow.
