REPORT

OF THE

FINANCE MINISTER OF CANADA

ON THE

TRADE OF THE PROVINCE.

*To His Excellency the Right Honorable CHARLES STANLEY, Viscount
MONCK, Governor General of British North America, &c.,
&c., &c.*

MAY IT PLEASE YOUR EXCELLENCY :

I have now the honor to lay before Your Excellency the Trade and Navigation Returns for the year 1862.

The total value of the Imports for the past year has been.....	\$ 48,600,633
and the value of Imports in 1861 was.....	43,054,836

shewing an increase of.....	\$ 5,545,797
-----------------------------	--------------

Of the total importations in 1862, \$23,971,370 were of dutiable goods, against \$25,094,748 in 1861; showing a decrease in this class of imports of \$1,123,378.

The customs receipts in each year compare as follows :—

In 1861.....	\$4,768,192
In 1862.....	4,652,748

Shewing a decrease of	\$115,444
-----------------------------	-----------

Comparing the value of dutiable goods imported during the first half of 1862 with the value of those imported in the first half of 1861, and also comparing the duties collected thereon respectively, we have the following results :—

1861.—Value,.....	\$12,911,135.	Duty,.....	\$2,505,570.
1862.—Value,.....	11,955,459.	Duty,.....	2,059,826.

Decrease, \$ 955,676	\$ 445,744
----------------------	------------

A result which may be attributed to the continuance of the civil war in the United States and more especially to apprehensions excited by the seizure of the "Trent" and the subsequent action of the Imperial Government.

A similar comparison of imports of dutiable goods and of duties collected during the last half of the same years shews a small decline in value ; but owing to the change in the tariff the Customs revenue shows an important increase. In the last half of

1861.—Value,.....	\$12,175,700.	Duty,.....	\$2,262,623.
1862.—Value,.....	12,020,911.	Duty,.....	2,592,923.
Decrease, \$154,789.		Increase, \$330,300.	

The increased value of imports in 1862 is therefore altogether due to the importation of free goods, of which the value in that year was.....\$24,624,263 while in 1861 the value was.....\$17,960,088
 shewing an increase of.....\$6,664,175

Of this increase \$2,130,054 is due to imports of military and naval stores and clothing, \$679,105 to unmanufactured tobacco, and \$2,886,571 to the increased importation of cereals.

The increased values of the free goods on the one hand, and the reduced values of the dutiable goods on the other, may be, in some degree, ascribed to the fact, that during the latter half of the year considerable deductions were authorised from American invoices subject to duty, whilst the free goods were entered and officially returned, at the invoice values, without deduction.

With respect to the excise, it will appear by the returns that the revenue from that source has largely increased. The duty collected on spirits and malt liquors amounted in

1862 to.....	\$480,848
and in 1861 to.....	285,947
showing an increase in 1862 of.....	\$194,901

This, as well as the increased revenue obtained from Customs in the last half of the year, shew the result of the measures adopted during the last session of Parliament.

The exports in 1862 fall short of those of 1861 by \$3,018,070, the amounts for each of those years standing respectively as \$33,596,125 and \$36,614,195. Of this decrease, the falling off in the exports of flour represents \$770,581, and of wheat \$2,119,519, while the total decrease in the exports of agricultural products amounts to \$3,195,474. This decrease, with the increased imports of cereals previously referred to, gives some guide to the deficiency of our harvest in 1862 as compared with the harvest of 1861.

The movement of property on the Provincial Canals shews a steady increase. On the Welland Canal the movement

And on the St. Lawrence Canals, the movement was as follows :—

	TONS.	
In 1859, of Property.....	631,769	
“ “ Vessels	765,636	
		1,397,405

In 1862, of Property.....	964,394

		2,013,624

The movement on the Welland Canal has therefore increased in 1861 by $7\frac{1}{2}$ per cent. over 1860, and in 1862 by 15 per cent. over 1861. Whilst on the St. Lawrence Canals the movement of tonnage has increased in 1861 by 22 per cent. over 1860, and in 1862 by 6 per cent. over 1861.

In this connection I propose to consider the effect which the removal of the tolls from the St. Lawrence Canals and the reduction of those on the Welland has had on the movement of property through those works.

That the movement of property by the St. Lawrence route has been greatly augmented during the past three years is sufficiently apparent from the figures above given, and we may congratulate the country thereon ; but that this increase has been due to the remission of the tolls is not to be assumed without taking into account other circumstances which have mainly influenced the direction of trade.

First among these circumstances may be stated the greatly increased production of cereals in the Western States, and the figures presently introduced will shew that in proportion to that increase, and to the whole volume of agricultural produce moved from Lakes Erie and Michigan to Tide Water, we have not obtained so large a traffic since the removal of the tolls as we obtained prior to the adoption of that policy.

The following statement shows the quantity of Grain sent eastward from the Lake regions—including Western Canada—during the last seven years.

	Flour—Barrels.	Wheat—Bushels	Corn—Bushels.	Other Grain— Bushels.	Total reduced to Bushels.
1856	3,865,442	19,505,358	14,282,632	4,592,569	57,707,769

The statement on the next page shews the proportion of Wheat and Flour which has passed from the Western States to tide-water by the St. Lawrence and Erie Canals respectively, during the same period.

Per centage passed through the St. Lawrence Canals	7.3%	15.4%	12.01%	16.08%	7.16%	8.26%	11.4%

NOTE.—The above Statement is computed by adding to the importations (from United States Ports) at Kingston, the quantities sent down the St. Lawrence Canals from the United States to Canadian Ports; and it is assumed that all the imports at Kingston were sent down the St. Lawrence Canals.

— The movement on the Erie Canal during the first six years is taken from the Canal Auditor's Reports.

— The movement through the Erie Canal in 1862 is taken from "Hunt's Merchant's Magazine."

— This Statement relates only to Wheat and Flour.

Hence it appears that, of the whole quantity of Western wheat and flour which was transported to tide water through the New York and Canadian canals during the past seven years we obtained for the St. Lawrence route in

1856,.....	7.3	per cent,
1857,.....	15.4	"
1858,.....	12.01	"
1859,.....	16.08	"
1860,.....	7.16	"
1861,.....	8.26	"
and 1862,.....	11.4	"

These are the principal commodities which have heretofore passed through the St. Lawrence canals. If we include with them the Indian Corn which figures so largely in the Welland and Erie Canal returns, the per centage will become still less favourable to us; and the proportions will be still further reduced by bringing into the comparison the cereal products of the Western States which are carried to tide water by the several railways converging on the Atlantic ports.

Among the circumstances which have influenced the direction of trade, may also be reckoned the improved facilities now available at Kingston and Montreal for the transshipment of grain. These facilities have been created within the past four years, and there is little doubt but the advantages they afford have a money value to ship-owners greater than the tolls now imposed.

It is also known that the owners of western produce have been induced to direct their property to Canadian ports, by considerations connected with the derangement of the currency of the United States.

While we have failed to obtain so large a proportion of the western trade, since the removal of the tolls, as we obtained in 1859 and in preceding years, the tolls levied on property passing through that canal, which is the chief competitor with the St. Lawrence route, have been materially increased, as the following comparison of tolls on the three principal articles will show :—

	1860 and Previous years.	1862.
	Toll per 1,000 lbs. per mile.	Toll per 1,000 lbs. per mile.
On Corn.....	2 Mills.	2½ Mills.
" Flour.....	2 do	3 do
" Wheat.....	2 do	3 do

This increase is equivalent to an advance of 70 cents per ton on wheat and flour from Buffalo to tide water, and of 40 cents per ton from Oswego to tide water;—whilst the advance on corn is equivalent to 35 cents per ton from Buffalo, and to 20 cents per ton from Oswego.

The rates of freight have also increased by the Erie Canal, and they have increased in a still greater ratio by the St. Lawrence. During the four years next preceding 1859, the average freight for flour from Lake Ontario ports to Montreal was \$1.84½ per ton,

In 1860—the year in which the tolls were removed from the St. Lawrence Canals—the rate of freight was.....\$2.11½ per ton

In 1861 it was..... 2.56½ per ton

In 1862 it was..... 2.61 per ton

so that the increase over the average of the four years preceding 1859 has been

in 1860 = 72 cents per ton

in 1861 = 72 cents per ton

and in 1862 = 81 cents per ton

If we add to these figures the tolls remitted, we find that the forwarders received over the average rates which they obtained in the four years above alluded to :—

In 1860 = 49 cents per ton

In 1861 = 94 cents per ton

In 1862 = 1.03 cents per ton

together with the tolls on the tonnage of his shipping.

Comparing in a similar manner the rates of freight obtained for carrying wheat, we have a still more striking example of the advanced rates which the forwarders have been able to exact.

The average freight rates for wheat from Lake Ontario ports to Montreal in 1855, '6, '7 and '8 was \$1.81 per ton ;

In 1860 the average rate was.....\$2.80 per ton ;

In 1861 it was..... 2.72 per ton ; and

In 1862 it was..... 2.71 per ton.

Thus the advance over the average rate during the four years first named was :—

In 1860.....\$1.21 ;

In 1861..... 1.13 ; and

In 1862..... 1.13.

Adding the tolls relinquished by the Province it will be seen that the advance obtained by the forwarder has been :

In 1860..... \$1.43 ; and

In 1861 and '2..... 1.35 per ton,

Together with the tolls due to the tonnage of his vessels.

Whatever else may be urged in favour of free canals, it certainly cannot be said that the policy of 1860 has been productive of benefit, either to the producer or consumer of Western breadstuffs; and from the advance which has taken place in the freights by the St. Lawrence route, as well as in both tolls and freight, by the competing route to tide water at Albany, it is abundantly manifest that the forwarder can pay a moderate toll without unduly trenching upon his profits.

It can be shown from reliable data that in so far as the actual cost of transport (including therein the canal tolls recently imposed) is concerned, western produce can be carried to tide water much cheaper by the St. Lawrence than by any competing route ; and we must trace our failure to obtain for our canals a greater proportion of the western trade, to other causes than the charges heretofore imposed for the use of those works. I am persuaded that the chief cause of that failure lies in the absence of sufficient competition among forwarders engaged in the St. Lawrence trade, in the financial relations between

shippers engaged in the western trade and the capitalists of New York; and finally and chiefly in the lower rates of ocean freights from New York to Europe, occasioned by the greater competition at that Port than is to be found at Quebec or Montreal.

It is gratifying to know that the Canadian forwarder has been able to obtain the advanced rates above quoted, but we cannot find therein a justification of that policy which, in addition to other advantages, would give him the free use of costly works which complete the grandest system of Inland Navigation in the world, and have not been constructed without imposing heavy burthens on the country.

If it could be shown that the tolls remitted had gone in mitigation of the comparatively high rate of ocean freight to which our trade is subject, we might find in that fact some reason for making our canals absolutely free. But it has been shown that this has not been the result. The tolls have gone to enhance the profits of the forwarder whose freight tariff has been regulated, not by the cost of doing his work, but by the competition with which he has had to contend.

There is but one course open for securing that quota of the western trade which the advantages of the St. Lawrence route gives us reason to anticipate. If we can give to the owners of the largest vessels now profitably engaged in the trade of Lake Michigan, the option of trading to Kingston and the St. Lawrence, or to Buffalo, as may be found most profitable, we shall have thrown down the barrier which now force the main current of trade into the Erie canal. We shall have more than balanced the greater insurance and freights charged from our sea ports to Europe over the corresponding charges from New York, and we may thereafter expect Quebec and Montreal to take rank amongst the greatest grain marts of this continent.

All of which is respectfully submitted.

W. P. HOWLAND,
Minister of Finance.

Quebec, May 12th, 1862.
