VUES STEREOSCOPIQUES.

L. P. VALLÉE,

Invite le public, et particulièrement les amateurs du beau et ceux qui désirent s'instruire en s'amusant à visiter son atelier, ils y feront un voyage agréable, sans craindre le mal de mer, la poussière des chars et le désagrément d'être à dos de chameaux ou d'âne dans les lieux suivants: Terre Sainte, France, Angleterre, Italie, Etats-Unis, Canada, intérieurs des Eglises de Paris, de Rome et d'autres lieux. Intérieurs des principaux palais de l'Europe, Jardins zoologiques, Scènes animées, Groupes de personnages et d'enfants, Scènes de la vie de Louis XIV, La Pompadour, Vues instantanées des rues de Paris, etc., etc., etc.

Bien peu de personnes savent encore qu'elles peuvent voyager et visiter toutes ces merveilles, qui font l'admiration du monde entier, sans sortir de leur salons: qu'elles peuvent aller de St Pierre de Rome à l'église de l'Assomption en Palestine, sans changer de place. Pendant les longues soirees d'hiver, il n'y a pas d'amusement plus agréable et plus instructif qu'une collection de ces vues stéréoscopiques avec un de ces instruments magiques qui vous transporte par une illusion enchanteresse dans des lieux que beaucoup d'entre nous seraient condamnés à ne jamais voir, sans cette merveilleuse découverte du stéréoscope et de la potographie.

Rien de plus présentable pour des étrennes.

Entered according to Act of Parliament, in the year one thousand eight hundred and seventy-five, by M. L. A. J. CHERRIER, in the office of the Minister of Agriculture and Statistics of the Dominion of Canada.

PREFACE.

—

The Compiler has great pleasure in presenting this the **Fifteenth Edition** of "**Cherrier's Quebec Directory,**" to his numerous patrons.

The Street Directory having met with the unqualified approval of the Public and others, is again inserted in the present Edition, as also, the General Classified Business Directory, its utility having been acknowledged by Business Men and Travelling Agents visiting the City.

The chief recommendation, and aim of a City Directrory is "*correctness,*" in this essential feature, the Compiler can safely assert that it would be a very difficult matter to make one more so than the present volume. Its Compiler has not altogether depended upon Agents or outsiders to procure the necessary information, but being a resident himself of the City, has supervised the whole of the work *personally;* this added to his long experience has given him an advantage which no other could possibly claim and which reduces all possible errors to a mere *minimum.* It will be always his aim in future Editions to increase the utility of the work by adding any additional matter that may be useful to the Business Men and Strangers who visit the City.

To the present issue is added a Street Directory of St. Sauveur, distinguishing proprietors from tenants, this will be found of great value to the Legal profession and others: Bienville, St. Joseph and Lauzon are also included, thus giving the whole of Levis.

It is with a just pride and satisfaction that the compiler would draw the attention of his patrons to the vast amount of useful and necessary information embraced in the "Miscellaneous Matter" rendering the work a complete *Encyclopedia* of *Commerce* of the City of Quebec, and worthy of a place in the Exchanges and Various Commercial Centres of the Dominion; thereby enhancing its value to its advertising patrons.

The Compiler returns his thanks for the numerous and useful suggestions given him by friends to the work, many of which have been adopted, in conclusion he hopes that by untiring effort he may continue in future to merit that support and patronage that has hitherto been accorded to "CHERRIER'S QUEBEC DIRECTORY."

WEIGHTS AND MEASURES.

Previous to 1828, there were used in Great Britain as legal standards, the Ale Gallon, Wine Gallon and Corn Gallon, all of different capacities; also the Winchester Bushell for dry measure, besides Heaped Measure; all of these are now abolished, and but one standard Bushel and Gallon for all measures, both dry and liquid, is used, called the Imperial Bu-

shel, one eighth of which is the Imperial Gallon.

The Imperial Bushel is an upright cylinder, whose internal diameter is 18,789 inches and depth 8 inches. The Imperial Gallon is one-eighth of this, and cubical contents equal to 10 lbs. water. We may quote from this, as Imperial Measure, « a pint of water a pound and a quarter; » and from the weight of water given below corresponding to the different measures, it follows, that if measures were lost, we could find their equivalents by weight of water, and if weights were lost we could find their equivalents by cubical contents of water.

The standard of Canada and of the United States is the same both for liquid and dry measure, and consists of two measures, namely the Winchester Bushel for dry measure and the old English Wine Gallon for liquid measure. The Winchester Bushel, so called because the standard measure was formerly kept at Winchester, England, is an upright cylinder, whose internal diameter is 18½ inches, and its contents equal to 2150 2-5 cubic inches and equal to 77,627 lb. of pure or distilled water at a temperature of 62 and barometer at 30.

The proportion between the Imperial Liquid measure and ours is very simple and convenient for reduction, being nearly 5 to 6. Thus 5 Imperial Gallons are equal to 6 Gallons Canada or United States Standard. The Imperial Bushel is about 1,32 part more than the Winchester, 31 Bushel Imperial being equal to 32 Winchester.

There are still used in the United States, the old Beer or Ale Gallon of 282 cubic inches, equal to 10. 18lbs. of water and a New York State Bushel of 2211-84 cubic inches, and gallon of 221-184 cubic inches, or 8 lbs. water. All transactions involving the measuring or purchasing of liquids, &c., should state the measures understood. By Act of Canadian Parliament, the following are the legal weights per bushel of the different kinds of grain:

	lbs.
Wheat, Peas, Beans, Cloverseed, Potatoes, Turnips	60
Carrots, Parsnips, Beets, Onions	60
Indian Corn, Rye, Salt	56
Flaxseed 50, Barley, Timothy Seed, Buckwheat	48
Hempseed 44, Castor Beans 45, Malt 36, Oats	34
Dried Peaches 33, Dried Apples 22, Blue Grass Seed	14
A Ton weight 2000 lbs., a Hundred weight	100
A Ton of Timothy, Clover, or other Hay or Straw	2000

A Bundle of Straw 12 lbs. of Hay 15 lbs., and if tied with a withe, one pound additional.

The new Copper Coinage of Great Britain, 1860, is composed of 95 parts Copper, 4 of Tin and 1 of Zinc. A pound of this is coined into 48 pence of 80 half-pence or 160 farthings, and the half-penny measures one inch in diameter. The Canadian Cent is the same diameter, and 100 of them weigh one pound.

In the absence of Apothecaries weights and measures, the following items are worth remembering:

About 25 drops of any tin liquid will fill a common sized teaspoon,—three table spoons will fill an ordinary sized wine glass,—four wine glasses will fill a common sized tumbler.

1 Teaspoonful = 1	1 Wineglassful = 2

The following are the cubical contents and weights in pounds of water, of the different Standard Bushels, Gallons and Subdivisions.

INTEREST.

General rule for calculating interest for days Multiply 1 year's interest on the amount by the number of days, and divide the result by 365.

SPECIAL RULE FOR 7 PER CENT.—Multiply the amount, days, and the decimal 019178 together; the result will be the answer in cents; or multiply the principal, days and 19178 together, and from the result cut off 6 figures from the right, the remainder is cents for the answer; if there be cents to multiply in the principal, cut off 8 figures.

To Convert Pence into Cents.—Add a cypher to any number of pence and divide by 6. Example: To 44 pence add a cypher, 440; which divided by 6, gives 73 2-6ths, say 73 cents.

To Convert Cents into Pence.—Multiply any number of cents by 6, and put off the last figure, which is tenths. Example: 73 cents multiplied by 6, gives 438, or 43 pence and 8-10ths, say 44d.

To Convert Sterling into Currency.—To the given sum, add one-fifth of itself and one-twelfth of that one-fifth.

Currency into Sterling.—Multiply by 60 and divide by 73.

EXCHANGE CALCULATIONS.

In the absence of tables, the following calculations will be found useful; and as there are various modes of calculating Exchange, we choose the following as being the most easily understood. As before stated, such are made upon the old base or par, rendering it necessary to convert all sums to that standard, to enable us to find the required result. Four shillings and six pence sterling and one dollar at old par are equivalents; and as that relative value has been altered, but still retained as a base of calculation, it follows that 9, 9½ or 10 cent. premium quoted, means 9, 9½ or 10 cents on the dollar, or dollars, on the hundred, or pounds, &c., in *addition* to the old par value; and as in these calculations we shall use the dollar as basis, quotations as above will read as $1.09, $1.095, or $1.09½ and $1.10; and the sums are to be multiplied or divided by the required premiums, written in a similar manner.

Sterling into Dollars and Cents, at any premium. Multiply the pounds by 40, and divide by 9; this result gives the sum in dollars at old par; then multiply this result by the quoted premium, expressed as before stated.

Example.—What must I pay for a Bill of Exchange for £300 sterling, the quoted rate being 8 per cent., or $1.08?

Solution—£300 multiplied by 40 and divided by 9, gives $1,333 33 at old par; then 8 per cent. added to this, or multipled by $1.08 gives the answer, $1440.00.

Dollars and Cents into Sterling at any premium; (this operation is the reverse of the preceding). Multiply the dollars by 9, and divide by 40; this sum will be dollars into sterling at old par, which divided by the quoted premium, gives the required result.

Example.—What amount of Exchange on London can I buy for $1440,00, the quoted rate being 8 per cent, or $1 08.?

Solution.—$1440, multiplied by 9, and divided by 40, produce pounds at old par, this sum, being divided by $1.08, gives the answer, £300 sterling. *Note.*—When shillings and pence are in the sterling amounts to be operated on, it will be necessary to reduce them to the decimals of pound. A very little practice will soon familiarize one to the easiest method: say for 17 shillings and six pence, then 10 is £5, then say 5s. half of that or £125; these added, give £875, the required decimal. This mode will expedite all calculations in other denominations, especially where there are fractional quantities.

EXCHANGE WITH FRANCE.

London and Paris *par* of Exchange, one pound sterling equal to 25 francs 57 centimes. United States and Paris.—20 francs Louis Napoleon equal to $3.84 or one dollar in gold= 5 francs 21 centimes. The *real* value of the francs is about 9½d sterling and the *real* value of the pound sterling is 25 francs and 26 centimes in gold, and 25 francs and 26 centimes in silver.

Canada and France.

One franc = 18¾ cents. Five francs = 93¾ cents or 4s. 8d. Canadian. One dollar, = 5 35-100 francs. French invoice are reduced to dollars and cents for Canadian Custom Entry at the rate of 18¾ cents per franc, or decimally expressed. 186.

Francs, into Dollars at Par.

Multiply the amount by the decimal, 1866.

Dollars into Francs at Par.

Divide the amount by the decimal. 1866.

Bank Exchange here with Paris assumes a par of 25 francs to £1 sterling governed by quotations of sterling Exchange, with ½ per cent. additional for difference between Paris and London; thus, if sterling Exchange be 10½ our Bill must be based on 11.

Question.—I have a Bill from Paris to pay, amounting to 216, 05, sterling Exchange being 10½ per cent; what must I pay here in dollars and cents?

Solution—216, 05 francs divided by 25 produce £8 12s. 10d. sterling and this amount into dollars and cents at 11 per cent. (½ per more than the quoted rate), produces $42.63, which I have to pay, to settle my account with Paris.

MODES OF CONVERTING ONE CURRENCY INTO ANOTHER.

Pounds Canadian into Dollars and Cents.

Pounds multiplied by 4.....are Dollars.
Shillings " " 20..... ..... " Cents.

" multiplied by 3 and divided by 5 Pence.

Three-fifths of any amount of cents are pence or multiply any amount of cents by 6, and reject the last figure, which is tenths, as 73 cents x8=43 pence and 8-10; or say 44 pence.

CANADIAN POUNDS INTO STERLING at 9½ or New par of £1 4s. 4d. to the pound sterling. Multiply by 60 and divide by 73.

STERLING INTO POUNDS CANADIAN at 9½ or New Par

Reverse the preceeding rule or to the sterling add 1-5 and 1-12 of that fifth, equal to 21-2-3 per cent, of the whole amount.

STERLING INTO DOLLARS, at 9½ or New Par

Multiply the sterling by $4,866, or divide by the decimal 2055.

DOLLARS INTO STERLING at 9½ or New par.

Divide the dollars and cents by $4866, or multiply the amount by the decimal. 2055; the result will be pounds and decimals of a pound.

QUEBEC MERCURY (THE), daily, evening, annual subscription $6 00; G. T. Cary, editor proprietor and printer, 9 Buade. "THE MERCURY" FILES—We have had the satisfaction of receiving, by this day's English mail, intimation that the file of the *Quebec Mercury* bound in yearly volumes from its foundation by T. Cary, senior, barrister, first editor and proprietor, in January, 1805, (and grandfather of the present editor and proprietor,) has been received complete and in good order at the library of the British Museum in London, where it will be preserved with all the other historical works open to the British public in that valued and venerable institution. Canadians can thus at any time refer their friends or correspondants in England to the *Mercury*, for reliable records of local events during recent or remote years: and it shall be our endeavor always to make it as full and authentic a diary in the future as it is admitted to have been during the past. Complete files of this paper are also among the archives of the Parliament of the Dominion of Canada at Ottawa, and that of the Provincial Legislature in this city. *Mercury*, January, 1875.

NOTRE DAME DE LÉVIS.

A large and flourishing town on the south shore of the River St Lawrence, opposite Quebec, Seigniory of Lauzon, parish of Notre Dame de la Victoire, county of Levis. It is divided into three different wards, namely: the wards of St Laurent, Notre Dame and Lauzon. The head post office is in Lauzon ward, and branches of it in St Laurent and Notre Dame wards. An extensive trade of timber and fire wood is carried on here, which is surpassed in the province only in the cities of Montreal, Ottawa and Quebec. Several manufactures are in operation. Montreal Telegraph Co. has two offices here, one at the railway depot, and another in Hadlow Cove. The station of the Grand Trunk railway is situated in the St Laurent ward. Two steamboats ply every quarter of an hour between Levis and Quebec. Distant from Quebec, one mile, fare 3c.; from Richmond 96 miles, and from Montreal 174 miles. Mail daily. Population about 6691.

MOUNT PLEASANT,

The proper name of the place is *Mount Pleasant*, but sometimes it is called Guenet's village. This name was given to it because a member of the Guenet family was one of the first to settle there.

VILLAGE OF ST. CHARLES.

OR

HEDLEYVILLE.

Situated on the north of the St Charles river, connected with the City by the Dorchester Bridge, contains about 180 families and 850 persons, mostly of the working classes, who have been drawn there by its proximity to the lumber coves, Jones' saw mill and Brown's rope and cordage factory

It is beautifully situated, being on the banks of the River, with a full view of the City and Port of Quebec, but except something be done to protect it from the tide, in spring and fall, it becomes inundated.

It has been established for many years, but in consequence of the inconvenience of the rising tides has not become so populous as it would otherwise have been.

Being within the Banlieue of the City, it is consequently in the same electoral division.

STADACONA.

Situated on the River St Charles, and connected with the City by "Bickell Bridge," very recently constructed by the gentleman whose name it bears. Although this village is outside the limits of the City, it may be considered a suburb of Quebec, possessing most of its advantages without being subject to its burdens. The population consists of about 90 families, containing some 540 souls, mostly of the working class, who gain their livelihood in the adjoining ship yards, of which there are five on that side of the river; three only however, are in operation, viz: those of Messrs Julien & Labbé, J. & J. Samson, and McKay & Warner; there is likewise a steam saw mill which is not now in operation. The Cast Steel Co. of Canada is also in operation, and will, no doubt, add greatly to the prosperity of the place. Hare Point, on the City side, has three ship yards, viz: Messrs. W H Baldwin, Narcisse Rosa, and Louis Rosa besides the lumber establishment of Mr. T. E Gauvreau. It is to be hoped that in the good time that is now coming, when manufactures of all sorts will take the place of the now languishing industry of ship building, Stadacona will rank as one of the most populous of our suburbs. It is in every way suitable for the establishment of manufactories. On the heights above the River St. Charles is a fine level plateau, exceedingley well adapted for Villas, and overlooking the extensive valley of the St. Charles, with a fine view of the Parishes of St. Foye's, Lorette and St. Ambroise, on one side, and on the other bounded by the pretty river "Lairet" having a splendid view of the City and Port of Quebec. Distant from Quebec about one mile.
