

An Accurate MAP of the WEST INDIES.
Exhibiting not only all the Islands possess'd by the English, French, Spaniards & Dutch, but also all the Towns and Settlements on the Continent of America adjacent thereto.

Course TO Jamaica.
All Ships from Europe or Africa bound for Jamaica make the Island of Antego or some other of the Caribbees near it, because from thence they can bear away before the Trade Winds due West to Jamaica. Ships also from Carolina and all our Plantations on the Continent of America are obliged to get to Antego or the E. of St. Christophers, and then fall into the same Trade Wind Course; the Gulph of Florida which seems to be a nearer way for them being impracticable, the Current there setting from S. to N. & after that the Trade Winds being for 100 Leagues against them.

FROM Jamaica by the Gulph of Florida.
From the W. Point of Jamaica to the W. End of Cuba Ships have the advantage of the Trade Winds, which are after that till they get into the Gulph as much against them; so that while they are trying it between Cape Florida and Cuba, the Guardia Costas from the latter can easily bear down upon them. Again, as the Florida Coast is flat and shoaly for 7 or 8 Leagues out, they are obliged to keep near the Bahamas, and are again in danger from thence, all those Islands being Spanish, except Providence where if our Ships get, and take any Logwood on board, tho' the Growth of that Island, the Spanish Guardia Costas which lie off the Abaco I. will make Prize of them, pretending that Wood only grows in their Territories.

FROM Jamaica by the Windward Passage.
The most difficult part of this Course is from Port Royal to Point Morant which being against the Trade Winds, has sometimes taken up 6 Weeks, tho' but 20 Leagues. But the most dangerous is from that Point till they are clear of Crooked Island, a Course of 160 Leagues, for the Spaniards from Cuba, Porto Rico & Hispaniola (and sometimes the French) are in wait to intercept the English. This is called the Windward Passage because Ships are obliged to keep to the Windward to avoid the Shoals on the Coast of Cuba.

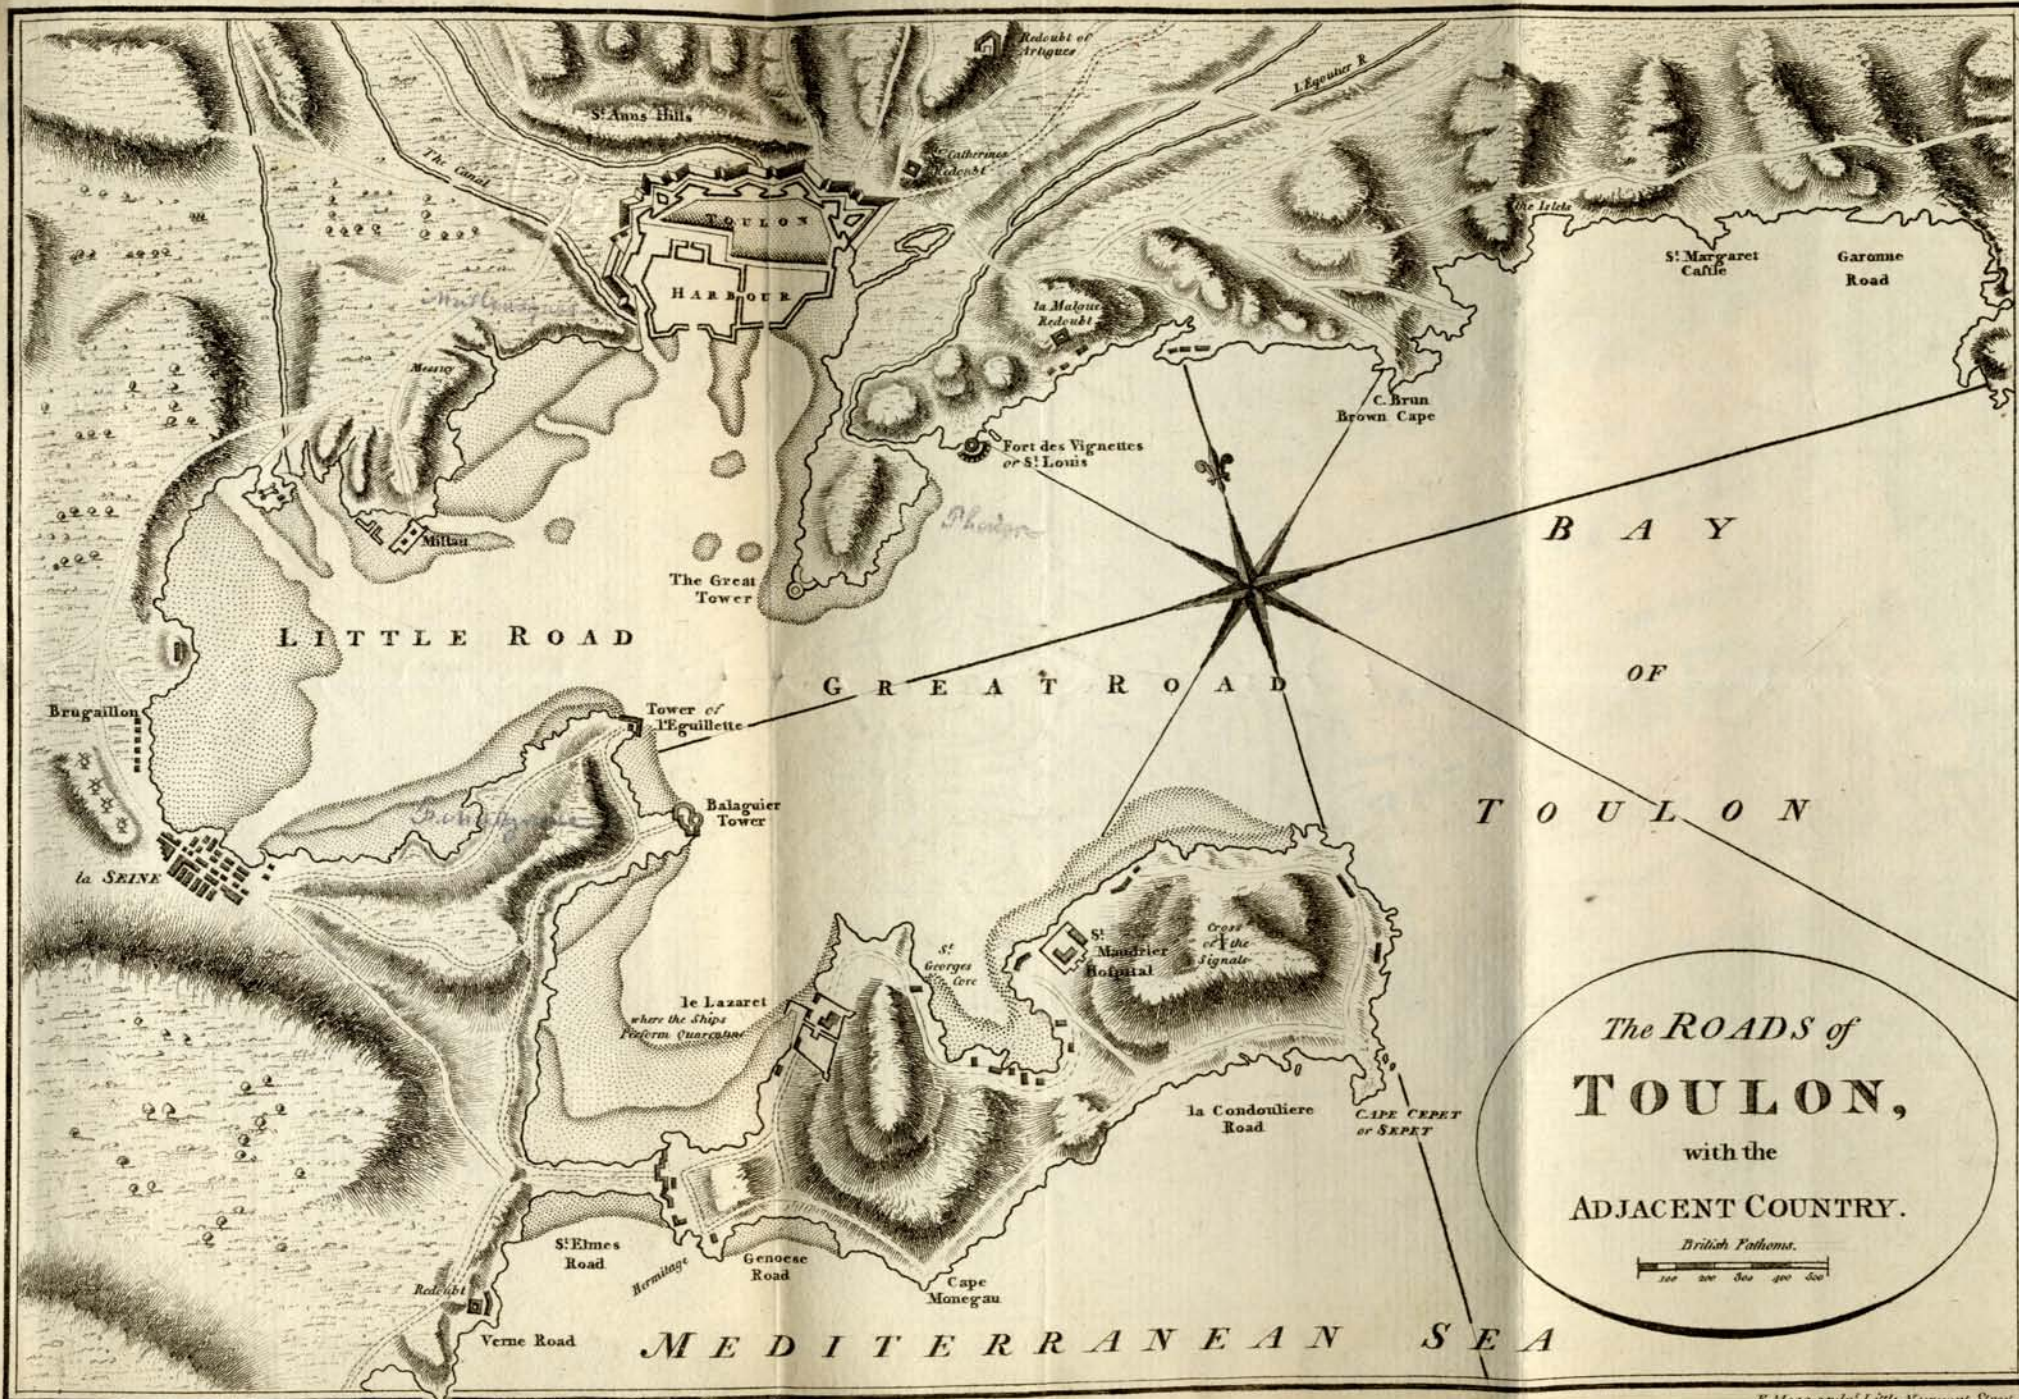

A. Charles II. by Charter dated June 30. 1665 granted to L^d Charles Clarendon, D. of Albemarle &c. the Province of Carolina extending Southward to the 35. Deg. of North Lat. which takes in F. S. Angustine now possess'd by the Spaniards; — In 1729 the British Parliament purchased S. Carolina of the Proprietors for his Majesty K. George II. who soon after granted to trustees for establishing a Colony of Georgia the Lands between the Rivers Savannah and Altamaha.

The Spanish Gallions coming before R. de la Hacha notice is sent thither & from thence over land to Cartagena, Lima, Panama &c. to hasten the Kings Treasure. They then continue their Course to Cartagena and after stay of 2 Months go to Puerto Bello and are about a Month taking in the Treasure from Panama &c. then they return to Cartagena finish their Loading & Sail to the Havana to meet the Flota from la Vera Cruz, whence they proceed together thro' the Gulph of Florida for Old Spain.

In 1700 the Bahama Islands which belonged to the English were taken by the French & Spaniards: In 1717 Captain Rogers after having plundered most of those Islands retok Providence which has ever since belonged to the English.

Note, the Countries & Islands Colour'd Yellow belong to Spain; those with Red to England; those with Blue to France & those with Green to Holland.

The Mosquitos is a small Nation never yet Conquer'd by the Spaniards the Country being secured by Morasses, inaccessible Mountains, Shoals and Rocks, See Gent. Mag. for Nov. 1738. page 585.

Sea Leagues 20 to a Degree.

The Jesuite Settlement in Paraguay was obtained by the policy of that crafty Tribe who found means to insinuate themselves into the good opinion of the Warlike Natives, and effected that by Art, not by Force, they had often attempted in vain with their Arms; and by Degrees reduced the Indians of this Province which contains above seven hundred Families into a State of absolute Subjection and Slavery to their present Tyrannical masters the Jesuits, who are possessed of the finest part of a Continent situated 200 Leagues South from the Portuguese Paulists, and separated from them by the River Ioroguary, which falls into the Great Parana, and Jopur. It is upwards of 200 Leagues North of Buenos Ayres and about 180 from the Province of Tucuman. They are divided into 42 Parishes from 1 to 10 Leagues apart, and lying chiefly along of Paraguay and Parana. The Mission together can assemble 60000 well disciplined Men in a few Days for their defence against the Spaniards or Portuguese (in case of an Attack) of whom they keep themselves Independent. Their Government having been a kind of Republic till lately (according to certain Intelligence) one of this Holy Fraternity has assumed a Royal dignity by the Name of Nicolas the 1st by the Grace of God King of Paraguay &c.

The Sacrament Colony opposite to Buenos Ayres was granted to the Spaniards by a Treaty with the Portuguese 1750.
