HISTORICAL SKETCH OF TORONTO.

TORONTO, the Queen City of the West, is the largest and most populous in Western Canada ; it is situated on the north shore of Lake Ontario, between the Humber and Don Rivers, 30 miles N. N. W. of the mouth of the Niagara River, and is one of the most English places in Canada, and the acknowledged business centre of the Province of Ontario. It was at first called York ; but in 1833, when it was incorporated as the first city of Upper Canada, its name was changed to Toronto, derived either from the Mohawk De-on-do, "trees in the water," descriptive of the appearance of the Islands, or from Toronto, "the place of meeting" of the tribes. Some say Toronto was the name of a noted Indian chief.

Of all the cities on the Canadian shore of Lake Ontario, Toronto is the largest and most important ; although not picturesque, it is most agreeably situated. The handsome Bay, forming its southern front or boundary, gives it as a lake port, great commercial advantages, and collects for shipment to the sea-board more grain than all the other cities and towns in Ontario put together. The view from the western entrance to the harbour and from the island is varied and striking. The spires and cupolas of its public Buildings afford a most agreeable diversity to the distant outline of the city, and mark it as a place of wealth and enterprise. From the cupola of the St. Lawrence Hall at the south, and from that of the Educational Department, and the University at the north, the view is both extensive and animating. The long lines of houses, and the rectangular blocks of buildings, intersected by streets running towards the four cardinal points of the compass, and here and there a handsome church or an elegant edifice, strike the eye of a stranger with an agreeable surprise. Young in years, it has none of the associations which render Quebec almost classic ; but it is as proud of its beautiful Bay and aquatic sports as Quebec is of its ancient Walls and Citadel.

The streets of Toronto are spacious, well laid out, and regularly built. The two main arteries of the city are King and Yonge Streets, which crossing each other at right angles, divide the city

into four large sections. Yonge Street runs north and south, King Street east and west. The Street Railway passes along the entire length of King Street, up Yonge Street to Yorkville, and up Queen Street as far as the Provincial Lunatic Asylum, thus forming a convenient means of transport for parties living at the northern, western and eastern extremities of the city.

Streets.

YONGE STREET.

Starting from the foot of Yonge Street northwards from the Bay, the most striking objects we meet are the Great Western Station, Custom House, American Hotel, the Bank of Montreal, Royal Insurance Company, then Wellington Street, and on either side the City Hall, Bank of Toronto, numerous wholesale houses, Edinburgh Life Assurance Company's Building, Merchants' Bank, Bank of British North America. The lower portion of Yonge Street from King to the Bay is composed principally of wholesale houses, while above King, it is almost an unbroken line of retail shops of every description, and it is perhaps the most busy street in the city; the buildings, many of them, being of fine structure. This street is the great leading thoroughfare of the north, runs almost north and south, and divides the city into two grand divisions, extending from the Bay as far north as Holland Landing, a distance of about 30 miles.

KING STREET.

King Street, the principal one in Toronto, is 66 feet in width is well built up with substantial brick and stone buildings, some of them being equal to any on this continent.

It is about forty years since it was completely composed of wooden structures, and was hardly passable to pedestrians; but now each side is lined with stately stores, where most of the business is done. The improvements on this street are advancing rapidly, and it bids fair to be eventually one of the finest streets in Canada.

This street is built up for about three miles, but extends still further; it forms the main artery for business from the east.

THE COLLEGE AVENUE.

This drive and promenade, leading from Queen Street to the University Grounds, is nearly one mile in length, 120 feet in width, and contains about ten acres of land. It is handsomely

planted with trees on either side, through the centre of which there is a carriage drive, flanked by a grass border of considerable width. The Avenue is one of the finest in the Dominion, or perhaps on this continent, and was laid out about the year 1829 or 1830 by the University of Toronto, and planted by the late Mr. John Wedd. In 1859, this, with the Yonge Street Avenue, which is much narrower and crosses it at right angles at its northerly termination, together with 50 acres of the University Park, were granted to the Corporation of the City of Toronto, on a lease for a period of 999 years, for the purpose of a Public Park to be kept in order by the city. Building lots for villas of a certain description have also been laid out for leasing around this Park, and many elegant residences have already been erected.

Public Buildings, Schools, Etc.

UNIVERSITY BUILDINGS:

This magnificent pile of buildings was erected during the years 1856-57, to provide accommodation not only for the University of Toronto (which simply confers degrees) but also for University College with its various lecture rooms, residences and students' quarters. The massive structure was designed by Messrs. Cumberland and Storm, and built under their directions. The chief facades of the building are to the south and east—the former of great and massive elevation, for distant effect from the lake and city.

The general outline of the building approaches the form of a square, having an internal quadrangle of about 200 feet square, the north side of which is left open to the park. The main frontage on the south is about 300 feet long, with a massive Norman tower in its centre 120 feet in height and comprising two stories, that on the ground being devoted to lecture rooms, and the upper story to the Library and Museum; these may be called the public portion of the building. The east side of the building is 260 feet in length, and entered by a subsidiary tower. The west end of the quadrangle is about 200 feet in length, and used as residences for students. The whole cost was nearly \$500,000.

TRINITY COLLEGE

Is a very handsome building, situated on Queen Street West, standing in spacious grounds facing the entrance to the Bay.

The College was erected in 1851, at a cost of £8,000, after plans prepared by Mr. Kivas Tully. The building is of white brick with stone dressings, and is designed in the third period of pointed English Architecture. It has a frontage of 250 feet, facing south, with wings projecting east and west 53 feet each. The porch of the principal entrance is cut stone, over which is a bay window and ornamental gable to correspond. There are also handsome bay windows in each wing, with gable and windows similar to those over the entrance. The building is designed to accommodate eighty students, with class rooms, chapel, library and museum; also private residences for the Provost and two senior professors. It is a great ornament to the west end of the city, and a noble ornament to the unwearied zeal of Dr. Strachan, the first Protestant Bishop of Toronto.

THE NORMAL AND MODEL SCHOOLS AND EDUCATIONAL OFFICES.

One of the most attractive spots in Toronto is the buildings and grounds of this Department, which includes the Education Office and Depositories, and Educational Museum, the Normal School, with Girls' and Boys' Model School. The buildings are situated upon the centre of an open square, of about seven acres and a half of ground, bounded on the north by Gerrard Street, on the east by Church Street, on the south by Gould Street, and on the west by Victoria Street. The situation is a very beautiful one, being considerably elevated above the business parts of the city, and commanding a fine view of the Bay, Peninsula and Lake. The adjoining grounds are handsomely laid out, and are very attractive in summer.

The Educational Museum includes specimens of Canadian natural history, and the best varieties of maps, charts, diagrams, philosophical apparatus, and school furniture. It also contains an extensive and beautiful collection of copies of celebrated Italian, Dutch and Flemish oil paintings and engravings, and casts in plaster of Paris of some of the most noted groups of statuary (ancient and modern), together with a collection of English, Canadian, and classical busts, &c. Free admission to this Museum may be obtained daily from nine to five o'clock.

OSGOODE HALL, QUEEN STREET.

This Hall, which is named after the Hon. William Osgoode, the first Chief Justice of Upper Canada, is the seat of the Law Society of Upper Canada, and contains court-rooms and offices for the Superior Courts of the Province.

The cost of the buildings has amounted to about \$250,000. The grounds comprise about six acres of land.

A Law school has been established under the direction and tuition of three readers, designated respectively, The Reader on Common Law, The Reader on Equity, and the Reader on Real Property.

Four Scholarships have been established, one for students under two years' standing of £40 per annum ; one for students under one year's standing of £30 per annum ; one for students under three years' standing of £50 per annum ; and one for students under four years' standing of £60 per annum.

UPPER CANADA COLLEGE

Stands on a site of nine acres opposite the Government House, fronting on King Street, and consists of a row of neat brick buildings. This institution was founded A.D. 1829.

The centre building is the College proper, containing large and well ventilated class-rooms, a library, a laboratory, a public hall, the residences of the principal and of the various masters being on either side. The College boarding-house, which has lately had a very large addition added to it, is spacious and fitted with every appliance, and does not appear in the view, as it recedes from the line of the other buildings. The same may be said of the gymnasium, &c. The lawn is handsomely laid out, and its cricket-ground and play-yards are extensive.

Eight exhibitions, varying in value from \$40 to \$120 per annum, are open to competition of the whole Province. The examination for these are entirely conducted by gentlemen unconnected with the Institution. It is modelled after the celebrated English Grammar Schools, and aims to impart a sound classical and commercial education. The College is munificently endowed. A large portion of our leading men received their education, either wholly or in part, at this College ; and the success of its pupils in our universities is a further proof that it is conducted in an efficient manner.

THE TORONTO MECHANICS' INSTITUTE

Stands on the corner of Church and Adelaide Streets, and is a large, commodious, and imposing structure, 104 by 80 feet, designed in the Italian style by Messrs. Cumberland and Storm, architects. The erection of this fine building was the result of a most praiseworthy liberality on the part of the public and of the members of the Institute. The cost of the building and

ground was about \$50,000. For capacity it is not equalled by any of the kind in the Dominion of Canada.

The building contains a large and commodious Music Hall, 75 by 53 feet, and 35 feet high of ceiling (with ante rooms), the entrance to which is on Adelaide Street. It also contains a Lecture Theatre capable of holding 800 persons, a large Reading Room, Library, Committee and Apparatus Rooms, with other accommodation.

This Institute was established in 1830, and incorporated in 1847. A life membership is \$20 ; annual membership \$2 50 ; Ladies and Youths \$2. The Institution is in a prosperous condition and doing a useful education work.

TORONTO POST OFFICE

Is situated on Adelaide Street, facing Toronto Street, and was opened to the public on Monday, 20th April' 1874. The style of architecture is Italian. It is 75 feet in front by 60 feet in depth, and 56 feet high to the eaves, but a dome carries it 34 feet higher. The building is of richly wrought Ohio stone, three stories high, with a basement and a lofty attic in a Mansard roof. The front elevation is composed of a central break, which is relieved with complex columns and pilasters with polished caps, and marble bases, and moulded cornices at heights corresponding with each floor. On each side of the central break is a recess bay, and beyond, at each outer angle, a tower having instriated pilasters and a continuation of the cornices as on the pilasters of the central break.

Cathedrais, Churches, Etc.

ST. JAMES' CATHEDRAL.

This fine structure stands upon the corner of Church and King Streets, and is the principal Episcopal Church in Toronto ; it is the fourth parish church which has occupied the same site. The corner stone of the present building was laid on the 20th November, 1850. The extreme length is 200 feet and 105 feet wide ; the interior 111 feet long and 75 feet wide.

During the year 1873, the massive tower was completed, making it 150 feet 3 inches in height. Two handsome side porches, and the pinnacles on the west were also completed during the same year.

The spire is 139 feet 9 inches high, and the wrought iron vane 16 feet high, making the total height from the ground 306 feet, being several feet higher than Trinity Church, New York, and the highest in America.

The total cost has amounted to about \$166,000, including the peal of bells.

In 1875 the celebrated Chiming and Illuminated Clock, which took first prize at the International Exhibition at Vienna, was purchased from J. W. Benson, of London, England, by the citizens of Toronto, and presented to the Dean and Churchwardens of St. James' on Christmas Eve last. The movement of the clock, next to that of Westminster is the largest in the world, and in point of quality of material and finish of workmanship, is unequalled by any. The clock plays a chime on the smaller bells every quarter of an hour, and strikes the hour of the day on the largest bell.

Last summer the site was enclosed with a handsome new fence set on stone.

ST. MICHAEL'S CATHEDRAL.

Which stands on the corner of Church, Shuter and Bond Streets, with an entrance on Bond Street, is in the early decorated style of English Gothic architecture, built of white brick and cut stone dressings, being 200 feet in length by 90 feet in width, and with the transepts making a total width of 115 feet exterior dimensions. The windows are large and filled with tracery of great variety—the eastern window, of seven lights, being 36 feet high and 18 feet wide. The transepts have large rose windows, with canopied niches in the gables. The building is wholly under one roof, forming in the interior a nave 170 feet long, 40 feet wide, and 56 feet in height, with piers and arches, triforium and rich ceiling. The side aisles are 180 feet long by 20 feet wide, and 48 feet high, with a gallery at the west end. The building was commenced in the year 1845, and finished in 1847. The Tower and spire is 250 feet in height.

KNOX'S CHURCH.

It is situated on Queen Street West, off Yonge Street. The tower and spire of this church are very much admired for their graceful proportions. The building is of white brick, and is designed in the early decorated English Gothic style, with handsome traceried windows at the sides, and a stained glass rose window at the end. The pulpit, canopy and screen

are highly decorated. The exterior length of the church is 104 by 70 feet wide. It will accomodate 1,300 persons. The total cost, including bell, was \$24,000. The Rev. Alex. Topp, A.M., is the present minister.

WESLEYAN METROPOLITAN CHURCH.

This fine structure, the principal Wesleyan Church in Toronto, is situated in the centre of Magil Square, between Bond and Church Streets, the square having a frontage of 248 by 552 feet. The architecture is of the early French style, and is an ornament to the city, as well as a credit to the Wesleyans.

The material used is white brick, relieved with cut stone dressings. The dimensions of the main building is 72 by 128 feet, the chapel in the rear being 63 by 63 feet, over which are large and commodious class and committee rooms. In the front of the church is a massive tower, 29 feet square, and 180 feet in height to top of pinnacles; on either side, at the junction of the main building with the chapel, are two smaller towers, 16 feet square by 122 feet high. The roof is covered with slate of variegated bands.

The principal entrances front on Queen Street, by two open porches on either side of the main tower; there are also entrances on either side. The gallery is reached by two commodious stair-cases, and can be emptied in seven minutes. The pulpit is situated at the north end, and immediately to the rear of the orchestra, which contains one of the finest organs in the Dominion.

The church is ventilated on the most improved principle by three large shafts, carried into the tower turrets, and large flues in four chimneys; and will seat comfortably 1,800, but will contain 2,500 persons.

The ground and building cost \$110,000. Henry Lingley, architect; Joseph Gearing, builder.

HORTICULTURAL GARDENS.

The beautiful grounds occupied by the gardens extend over a space of ten acres, all of which are highly cultivated, and are the property of the Toronto Horticultural Society. They were first opened to the public on the occasion of the visit of His Royal Highness, the Prince of Wales, in 1860.

Up to 1860, the Directors had expended the large sum of nearly twenty thousand dollars in laying out and improving the grounds, building the pavilion and gardener's lodge, and a small

forcing house, for growing bedding-out plants and other flowers for the decoration of the gardens.

The gardens are now open during the summer months to all who may desire to visit them, from six in the morning until eight o'clock at night—after which hour the Directors have the right under their agreement with the city, to charge an admission fee to those attending weekly promenade concerts or other performances given for the benefit of the Society.

PROVINCIAL LUNATIC ASYLUM.

This large edifice, the largest in Toronto, is situated in the western portion of the city, on Queen Street, two miles and a half from the Central Market. It is located on a level plain, on a part of the old Garrison Common, known as the Ordnance Land. Its front measures (veranda included) 644 feet. The building is four stories high. The basement contains the apparatus of the establishment, such as kitchens, heating furnaces, bakery, store rooms, tailor shop, &c. The floors above the basement are appropriated to the patients and their medical attendants. Two very large wings have been added to this institution, and it now ranks third, in point of size and population, on the continent of America. The grounds adjoining the Asylum are highly cultivated, the ornamental part is very neatly kept, and adds very much to the enjoyment of the patients. At present there are in the Asylum proper, and the two adjacent hospitals over 500 patients.

The Institution is under the direction of Daniel Clarke, Esq., M.D., the Medical Superintendent, assisted by a competent staff.

THE CRYSTAL PALACE, OR PROVINCIAL EXHIBITION BUILDING.

This very handsome structure presents an admirable likeness to its great prototype of Hyde Park. The outline is very nearly the same, and the transepts are produced in miniature with excellent effect.

The site of the building is on the Ordnance Reserve, directly south of the Lunatic Asylum. The structure is principally composed of cast iron and glass, and the roof is covered with tin. The total length of the building is 256 feet, and its extreme width 14½ feet, which includes a covered entrance 32 feet by 16 feet, on the southern front.

The Crystal Palace was erected by the Board of Agriculture for Upper Canada, as a permanent structure, in which to hold the yearly Provincial Exhibition of Agricultural Products. The

total cost of the building was about \$26,000. The contribution of the City Council was \$20,000, and of the County Council \$4,000.

ST. LAWRENCE HALL, KING STREET.

This is a very substantial and elegant building in the English style of architecture ; though its beauties are greatly concealed from view, in consequence of its abutting abruptly on the street. The principal front is on King Street. There are two large shops on each side of the centre of the building, with carved and moulded piers on the ground floor, sustaining rich entablatures with balconies to the first floor windows. The entire frontage is 150 feet.

On the centre roof is a cupola or dome, supported by a rustic base with windows, the dome being 17 feet in diameter ; in the cupola is the bell, 2,130 pounds, also the city clock, the faces of which are to the four cardinal points. The whole is terminated by a small cupola and flag-staff, the height to the top of the cupola being 120 feet.

In the centre of the Hall is an archway, with highly ornamented bronzed iron gates, leading to an arcade of shops, the rear of which is occupied as the butcher's market, having shops on both sides ; each shop having connection with a square leading from East and West Market Streets respectively, which are occupied by farmers for the sale of produce. The Hall is 100 feet long and 36 feet 6 inches wide, with a gallery at one end, under which is a reception room ; the ceiling and walls of the Hall being richly ornamented.

LIEUT.-GOVERNOR'S RESIDENCE

Is situated on the corner of King and Simcoe Streets, and is designed in the modern French style of architecture, which has been adopted largely in American cities, and is gaining favour rapidly in England. Red brick is the material used in the walls, relieved with Ohio cut stone dressings and galvanized iron strings and cornices, painted and sanded to imitate stone. The wing extends 100 feet more, making a total of 188 feet.

This wing is two stories in height, treated in a plainer and somewhat similar manner.

Covering the main entrance, which is under the tower facing Simcoe Street, is a large handsome carriage porch, supported on clusters of Corinthian columns resting on cut stone pedestals. From the capitals of columns spring arches supporting entablature with enriched balustrade, finishing at angles with panelled

pedestals and carved vases. The veranda on the south front is treated in a peculiar manner. The main doorway is deeply recessed with massive cut-stone arch and jambs, and broad cut-stone steps, and leads into the vestibule, 12 feet square, which is separated by an elaborate screen, filled in with stained and embossed glass, from an inner vestibule or loggia of the same dimensions. This again is separated from the main hall by an enriched arch, springing from fluted Corinthian columns, with richly carved caps. The inside of the building is finished in the most elaborate style, with every modern convenience, main cornices are heavily bracketed with moulded cornice of galvanized iron, the angles with moulded brackets of the same material. The material is found to be much more suitable to our climate than stone, and at the same time is exceedingly economical.

The main building is three stories in height above the basement; the upper story is partially in the roof, which is constructed on the Mansard principle, the sloping sides are very steep, covered with Melbourne slate and relieved by handsome segmental domes, lighting the third story apartments. The ridge is finished with moulded sides, and the deck is laid with the same material.

Towards Simcoe Street the frontage is about 80 feet, and in the centre of it rises a tower 70 feet high, finished with a handsome wrought-iron railing. The roof of the tower is of the same description as that on the main building, but starts from a balustrade finished at corners with panelled pedestals and carved vases.

The frontage of the main building toward King Street is about 88 feet. The grounds have been much altered and improved, and approaches of Nicholson pavement put to the entrance. Total cost of the building, \$102,000.

Railroads and Stations.

THE GREAT WESTERN STATION

Covers an area of 311 feet 6 inches by 150 feet. In the central space between the platforms, which is 64 feet wide, four tracks have been laid, with switches for transposing from one to another. The passenger platform, which is on the north side of the main entrance from Yonge Street, 195 feet long by 36 feet wide, over which is a handsome wooden building neatly painted.

The size of the main building is as follows: Height to the eaves 34 feet; the height to the centre of the building is 54 feet; and from the eaves to the centre of the circular roof 21 feet. This circular roof, which is covered with galvanized iron of English manufacture, presents a very striking appearance, and answers a very useful purpose, that of lighting the station, one continuous window being placed each side of the roof. Handsomely constructed windows have also been inserted on the south end or main entrance of the shed.

The excellent lighting of the station is one principle of its construction. The visitor, although feeling sensible of being under cover, can scarcely distinguish between the amount of light inside and outside the building. The credit of this very necessary part of the design is due to the architect, Mr. Storm, who determined, it seems, to employ that cheapest of all lights, daylight, in the greatest abundance. He may justly feel proud of the entire structure, which has cost altogether a little over \$20,000.

Places of Amusement.

SKATING AND CURLING RINK.

This beautiful building has been recently erected for the use of the young and the old during the long winter months; it is used for a skating and curling rink during the winter, and given for concerts and Bowling green. The building is one of the handsomest in the city, being of brick with yellow trimmings, and it is an ornament to the city. Mr. Thomas McGaw, (of the Queen's Hotel), and Mr. David Walker, (of the Walker House), treasurer and secretary. The building is on the north side of Adelaide street, at the head of Widmer street. Persons visiting this place can take the King or Queen street cars and ride within one block of the rink.

THEATRES.

GRAND OPERA HOUSE, Mrs. Morrison, manageress; is situated on Adelaide near the corner of Yonge.

ROYAL OPERA HOUSE, James French, proprietor and manager: This is one of the finest theatres in the Dominion, being located in the centre of the city and convenient to all the hotels; it is large and its exits are complete in case of fire. It is situated on King between Bay and York, at the entrance of 99 and 101 King.

BUSINESS DIRECTORY.**TELEGRAPHY.**

do.	1	do.	2 do.
do.	$1\frac{1}{2}$	do.	3 do.
do.	2	do.	4 do.
And so on.			

The above rates must in every case be prepaid by postage stamp. When posted wholly unpaid they cannot be forwarded, but will be sent to the Dead Letter Office. If insufficiently paid (not less than one full rate), double the amount of the deficient postage will be charged on delivery, except letters from the United States, which must be fully prepaid.

REGISTERED LETTERS.

Letters intended to be Registered, when addressed to places in CANADA must be prepaid by stamp, in addition to the postage rate, 2 cents each. To the UNITED STATES 5 cents each, and to the UNITED KINGDOM 8 cents each. All Letters for Registration should be posted 15 minutes before the hour of closing the mails.

REGISTERED LETTER STAMPS have been issued of the denominations of 2, 5 and 8 cents, which may be obtained at any stamp agency.

No Letter will be accepted at this Office for Registration, addressed either to a fictitious name or initials, and any such Registered Letters received from other offices, or deposited in the Letter Box for Registration, will be sent to the Dead Letter Office.

NEWSPAPERS AND PERIODICALS.

Newspapers and Periodicals Addressed to Places in Canada, Newfoundland, Great Britain [by Canadian Steamer], or the United States,

Printed and published in Canada, and posted from the office of publication, News Agency, to actual Subscribers or News Agents (*including Exchanges*), are subject to a rate of one cent per pound, gross weight, which must be prepaid by Publisher at the time of posting. When sent *via* New York to Great Britain, 2 cents per 4 ounces, prepaid by postage stamp.

English Newspapers received by Canadian Mails, may be reposed by News Agents, to regular Subscribers in Canada, free of Canada Postage.

Transient Newspapers and Periodicals Addressed to Places in Canada and United States.

On all Newspapers and Periodicals other than those from the Office of Publication, including all Newspapers and Periodicals published *less frequently than once a month*, the postage rate is one cent per four ounces in weight, which must be prepaid by postage stamp.

Newspapers and Periodicals weighing *less than one ounce* may be posted singly if prepaid by postage stamp, *one half cent each*.

Newspapers posted for city delivery must be prepaid by one cent stamp each.

Transient Newspapers Addressed to GREAT BRITAIN.

Newspapers addressed to places in the United Kingdom must be prepaid by postage stamp *Two cents* per 4 oz., or fraction of 4 oz.

Book Packets and Patterns, or Samples of Merchandise, 2 cents per 2 ounces or fraction of 2 ounces.

PARCEL POST.

The Postage on Parcels addressed to places in Canada continue at former rates, which must be prepaid by postage stamp, viz:—

Not exceeding $\frac{1}{2}$ lb. weight, 12 $\frac{1}{2}$ cents.

do.	1	do.	25	do.
do.	1 $\frac{1}{2}$	do.	37 $\frac{1}{2}$	do.
do.	2	do.	50	do.

And so on.

Parcels intended to pass through the Mails should not exceed 4 pounds in weight or 24 inches in length, and should be marked "by *Parcel Post*." Parcels may be Registered by affixing a 5 cent Registered Letter Stamp thereto, in addition to the Postage.

MISCELLANEOUS POSTAL MATTER.

Books and Pamphlets, Printed Circulars, Prices Current, Hand Bills, Book and Newspaper Manuscript, Printers' Proofs, Maps and Prints, Engravings, Sheet Music, Photographs, Insurance Policies, Militia and School Returns, Seeds, Cuttings, Bulbs, Roots, &c.

CANADA AND UNITED STATES.

When posted addressed to any place in Canada or the United States, must be prepaid by postage stamp at the rate of one cent per 4 ounces in weight, and Book Packets must be put up in wrappers *OPEN AT BOTH ENDS*. If put up in envelopes, only partially open at the ends, they will be treated as letters, and charged double letter rates of postage on delivery.

Post bands with an impressed one cent stamp, for this purpose, may be obtained at any stamp agency.

PATTERN AND SAMPLE POST.

Canada.

Patterns and samples of merchandise, when posted in Canada for places within Canada, must be prepaid by postage stamp at the rate of *One Cent* per 4 ounces in weight, and put up in such a manner as to admit of inspection. Sample Packets may be Registered on affixing a 5 cent Registered Letter Stamp thereto, in addition to the Postage.

United States.

Patterns and samples of merchandise, posted for places in the United States, will continue to be subject to the special rate of 10 cents each, prepaid by postage stamp, and must not exceed 8 ounces in weight.

United Kingdom.

Patterns and Samples of Merchandise, when addressed to places in the United Kingdom, must be prepaid by postage stamp at the following rates :—2 cents per 2 ounces or fraction of 2 ounces.

Goods sent for sale or in execution of an order, however small the quantity may be, or any articles sent by one private individual to another, which are not actually Trade Patterns or Samples, are not admissible.

Circulars and Prices Current, 2 cents each.

DANIEL BELL & CO.,

MANUFACTURERS OF THE

Excelsior Organs & Melodeons.

Office and Sample Rooms—59 King east, over Messrs.
Brown & King.

This Company is only in its second year and from the increasing demand for our Organs, owing to the superiority of workmanship, tone, and amazing low prices of our Instruments, we find that we will have to extend our manufacturing premises. Our organs have all the latest improvements, and parties wishing to purchase Organs and Melodeons would do well to call and examine our styles and Illustrated Catalogues and price list before purchasing elsewhere. A proper form of guarantee for five years given with each Instrument.

THE MIRROR SIGN

(Patented—June, 1877.)

AND THE

DIXON SHOW CARD

(Patented—August, 1873).

Manufacturing Company,

No. 108 KING STREET WEST, TORONTO.

THE MIRROR SIGN is a new invention, and is exactly what has been wanted by advertisers for years, namely, a show card ornamental enough to place in hotel parlors—being a mirror and advertisement combined, ensures perusal. For every kind of advertising it is the *ne plus ultra*.

THE DIXON SHOW CARD is extensively used by manufacturers and dealers throughout the Dominion and the United States—and for novelty, excellence, and real beauty, combined with its low price, has no equal.

Show Cards of every description on hand and to order. Send for price-list and circulars. Agents wanted for all parts of Canada.

A. H. DIXON,

P. O. Box, 1608.

 Zimmerman R., physician, 107 Church cor. Richmond

CONNECTICUT

Mutual Life Insurance Company, OF HARTFORD, CONN.

Assets, \$46,213,006 33.

Surplus, \$4,121,962 93.

Expenses, 6.95 per cent

The following current cases in CANADA, at different ages, explain the favorable results of the management :

The Annual payments are respectively reduced by the surplus of the preceding year, and the First Premium—the Tabular Rate—may be reduced, when desired, by anticipating the surplus of the year of death or maturity to the extent of 30% on WHOLE LIFE, and 20% on Endowments at 6% interest

The following current cases, extracted from the Books at Hartford, fully demonstrate the practical advantages arising from thus utilizing the surplus earnings towards reduction of the cost. It will be seen that the average Annual Premium has been less than one-half of the Tabular Rates.

Age when insured.	The Rate by Table per \$1000	Computed at the end of the	Is found, by Annual Surplus returned, to have averaged
22.	\$18.80	{29th year thereafter.	\$3.40
26.	21.10	29th "	9.36
34.	26.40	29th "	11.91
43.	35.70	28th "	16.16

By saving 5 cents a day, *annually decreasing*, a person aged 21, can obtain a policy for \$1000, payable at death.

By saving 8 cents a day, *annually decreasing*, he may obtain the additional advantage of the amount being paid to himself, if alive, in 30 years afterwards.

GOLD! GOLD! GOLD!

THE

BEST YEAST

IS

"GOLD."

This Yeast derives its name from the Gold Medal bestowed upon it at the World's Fair in Vienna, in 1872. It is the only Yeast in the World that ever received a Gold Medal. Its qualities are unapproachable, making Bread from 1 to 3 hours quicker than any other brand known. It is warranted for two years, or money refunded.

ASK YOUR GROCER FOR IT.

TAKE NO OTHER.

GOLD! GOLD! GOLD!

"BEST YEAST."

Manufactured solely by the Waterloo Yeast Company.

T. L. BUCKLEE, Manager.

See that the word "GOLD" is on all packages of the Best Yeast. None other is genuine.
