All orders sent to us will be filled promptly and carefully at the lowest market prices.

CAVERHILL, LEARMONT & CO.,

WHOLESALE SHELF AND HEAVY
HARDWARE MERCHANTS.

.. MONTREAL.

Best American Green

and Black Wove Wire.

THE HOMER BRAND of Wire Screen Cloth is justly entitled to the enviable reputation it has attained of being the Best, Hard Steel, Double Selvage Wire Cloth made. It is standard in gauge and mesh. In placing it before the trade we feel confident it will give perfect satisfaction to the consumer.

We carry the largest and best assorted stock of this line in the Dominion; the demand being very great at this season of the year we would advise our customers sending in their orders as early as possible to secure prompt shipment.

The following sizes in stock, all in 100 feet lengths :—

18	20	22	24	26	28	30	32	34	36	42 inches wide.
150	166 $\frac{2}{3}$	183 $\frac{1}{3}$	200	216 $\frac{2}{3}$	233 $\frac{1}{3}$	250	266 $\frac{2}{3}$	283 $\frac{1}{3}$	300	350 sq. feet in roll.

PRICES ON APPLICATION.

The Canadian Wire Screen

Cloth Holder . . .

No. 1. To hold 8 rolls, . Each, \$7.35 No. 2. To hold 4 rolls, . Each \$5.00

These Holders are strongly and substantially made, to hold 50 or 100 feet of painted screen cloth, 18 to 36 inches wide. They answer equally well for Hardware or Fanning Mill grade webs.

HARDWOOD
OILED
WITH
SPRINGS.

WIRE CLOTH
PUT ON
WITH A
GROOVE AND
WEDGE.

THE OWOSSO HARDWOOD ADJUSTABLE WINDOW SCREEN has become a LEADER over all other screens, and is conceded by all to be the best ; it being the most perfect screen in the market.

The adjustment is simple, perfect and reliable. The wings are operated by coil springs and are made adjustable by means of steel rods screwed into them which also prevents them from warping or splitting.

The frames are made of hardwood finished natural color, oiled.

The wire cloth used is the best in the market. It is fastened to the frame by pressing into a groove, into which a wedge is driven, avoiding the use of tacks,

PRICES ON APPLICATION.

OWOSSO FLUSH PATTERN SCREEN DOORS.

FOUR PANEL.

Both sides alike, Wire put on with a Groove and Wedge.

Sizes in Stock.

No. 92

2 ft. 8 in. x 6 ft. 8 in.

No. 96

2 ft. 10 in. x 6 ft. 10 in.

No. 100

3 feet x 7 feet.

They are finished in walnut stain, with dark colored mouldings. Green painted wire cloth, the best in the market, is fastened to the frame by pressing into a groove and made secure with a wedge, avoiding the use of tacks.

Cloth put on in this manner cannot sag or stretch.

THE OWOSSO FLUSH PATTERN SCREEN DOOR is made from kiln-dried pine, with stiles either 3 or 4 inches wide, $\frac{7}{8}$ inch thick, 4 panels, bottom rail 7 inches wide, flush mouldings put together with eighteen corrugated, hardwood dowels and glued joints. The dowels do not cut away the stiles nearly so much as a mortise, thereby making it much stronger than a mortised door, in fact it makes a pine door with hardwood joints.

PRICES ON APPLICATION.

OWOSSO FANCY PATTERN SCREEN DOORS.

WITH FLUSH MOULDING.

Cherry Color Varnished, Fancy Moulding.

1 1/8 INCH WOOD.

Detroit No. 2.

PATENT APPLIED FOR

Full Circle.

Genuine "CALIFORNIA" Lawn Sprinkler.

NO other Lawn Sprinkler has ever met with the degree of success attained by the "California" since its introduction five years ago. Its reputation has been made solely on its merits as the simplest, most efficient and durable device for the artificial watering of Lawns. It comes nearest to being a perfect substitute for the "gentle summer rain" of any sprinkler on the market.

Its advantages can readily be seen by its construction. The bearings are made of the best Babbitt Metal and Phosphor Bronze. These being anti-friction metals, the Sprinkler will run with very light pressure, and will water a space from 20 to 60 feet diameter evenly according to the pressure applied. The revolving tips are not made of cast metal, nor struck up in dies, but from solid brass rod. Each hole is drilled at such angle as to evenly distribute the water over the space to be sprinkled. At the same time a large quantity of water is atomized or vaporized, which the atmosphere retains and deposits in the form of heavy dew over a much larger area.

The Sprinkler is so constructed that it may be pulled by the rubber hose from one part of the lawn to another without wetting the feet. It is handsomely finished, every working part being made adjustable for wear, and is warranted in every particular.

The "GIBBS" Lawn Rake

Lawns can be cleaned perfectly with this rake in less time and labor, requiring no picking of grass or leaves from the teeth, and not tear the sod when raking.

To Unload Rake.—Simply push backward without raising it. One motion clears all the teeth perfectly.

PRICES ON APPLICATION.

The Myers Bucket Spray Pump and Fire Extinguisher.

WITH AGITATOR.

THIS Spray Pump is constructed entirely of brass, a material that is not affected by the poisonous arsenites used in different formulas for spraying fruit trees, vines and shubbery.

It is provided with a large air chamber, and has a ball valve at the bottom between the cylinder and the air chamber, whereby the pressure is held uniformly in the air chamber and on the hose, so that the nozzle throws a **continuous spray**, and is not affected by the movement of the plunger. The operator is enabled to keep a constant pressure on Nozzle of from 50 to 100 lbs. with very ordinary exertion. It will throw a solid stream 50 feet and is of unusual value for washing windows, buggies, and extinguishing fires, sprinkling lawns, flowers, etc. **For Spraying it is arranged so as to discharge a fine jet in the bottom of the bucket and keep the solution thoroughly mixed and agitated, a feature peculiar to this pump only and a very necessary feature to a spray pump.** The pump is also provided with a sprinkler for flowers.

"NUMYR" Hose Nozzle.

Will throw a perfect solid stream and also a perfect spray through the same tube.

No. 3 has 3-16 inch hole and is threaded for $\frac{1}{2}$ or $\frac{3}{4}$ inch hose.

SPECIALLY ADAPTED FOR CITY USE

"GEM" Hose Nozzle

Throws a spray or solid stream.

PRICES ON APPLICATION.

CROWN ICE CHIPPER.

THE only simple, effective and cheap tool for chipping ice for use in freezers, in place of the old-time bag and hatchet. Reduces ice quickly to small uniform pieces, size of peanuts. Makes it possible to freeze ice cream more rapidly and uniformly. Saves waste of ice, time, temper. A 20 lb. block of ice can be reduced to small pieces with this chipper in less than five minutes. It can also be used to great advantage to chip ice for soda fountains, bar rooms and restaurants.

GEM ICE SHAVE.

IS a simple and handy tool for shaving and collecting ice from blocks without removing the latter from the refrigerator or ice chest. It is constructed like an ordinary plane, made of galvanized cast iron, with a knife adjustable for shaving fine or coarse. In front of the knife is a receptacle about the size of a tumbler, closed by a lid, in which the shaved ice collects. When filled, the lid is raised and contents emptied. Shaved ice is desirable for a great variety of purposes, such as

For cooling Cantaloups, Melons and other fruits.

For use in sick rooms—dissolving quickly in the mouth.

Making ice poultices; being fine, it perfectly fits the parts to which applied.

For cooling oysters on half shell.

For cooling water, wines or other liquids.

For making lemonade or iced drinks of any kind.

For use at soda fountains, bar rooms and restaurants.

SHAVING
ICE

COARSE
OR
FINE

No. 23—Tinned\$2.50 per Dozen

“Enterprise” Ice Shredder.

FOR
SHAVING
ICE

COARSE
OR
FINE

THE operation of our Shredder requires no explanation, being simply to draw the Blade upon a piece of Ice—the pressure applied producing fine or coarse pieces, as desired. To remove the finely cut ice from the Cup, grasp the Shredder firmly in the right hand and strike it, inverted, upon the left, at the same time being careful to keep the Lid closed. Then scrape the ice into some convenient receptacle. It is not necessary to take the ice out of the refrigerator, as you may reach in and fill the Cup from the side, end or top of a cake of ice without disturbing anything or wetting your hands. Its use will be appreciated for Fruits, Drinks, Oysters and Clams on the half shell, Olives, Celery, Radishes, Iced Tea, Sliced Tomatoes, etc., and for many purposes in the Sick Room.

Fruit, Wine and Jelly Press

TINNED.

No. 34.

Price..... \$ 3 00

Capacity of Hopper, 1 qt. Length, 12 in. Height 12 in. Weight, 13 lbs.

THE illustration represents our Combination Fruit Press in operation. We confidently guarantee it superior to all others in the market. Its principle is very simple, it is easily operated, saves all the re-handling necessary with other presses, as it extracts the juice and ejects the skins and seeds in one operation. It can be used for many purpose, such as making **Wines, Jellies and Fruit Butters from Grapes, Strawberries, Raspberries, Blackberries, Huckleberries, Gooseberries, Elderberries, Cranberries, Currants, Tomatoes, Quinces, Pine-apples, etc.**

The dryness of pulp or refuse can be regulated by means of Thumb Screw at the outlet.

It is advisable in pressing some varieties of grapes to also put in the stems.

Not intended for Making Cider.

Packed 3 in a case.					

No. 42 is a very efficient machine, but requires so much strength to operate it that we recommend it for Pork only, which chops much easier than Beef.

ENTERPRISE

Sausage Stuffer and Lard Press

Screw Movement.

DIRECTIONS

FOR stuffing sausages, the Tin Strainer and Bottom Plate are to be removed. There are two Plunger-Plates with each machine—the large one for stuffing and the small one for pressing. They can be easily exchanged by screwing them on or off. For pressing Fruit or Lard, the perforated Cylinder and Bottom (as shown in cut) are to be placed in Press.

When in operation, the pressure applied will remain without holding the Crank. When the Plunger is raised so as to clear the top of the Cylinder, it can be readily swung around so that the Press can be filled or emptied. We furnish the machines Japanned or Tinned, and find the latter are steadily growing in favor.

A cloth or bag should be used when pressing fruit or jelly, to prevent the pulp or seeds from passing through the holes in the Strainer.
