

There was an old woman who lived in a shoe,  
She had so many children, she knew not  
what to do;  
Some she had nursed, and some bottle fed,  
But those raised on NESTLÉ'S FOOD  
Came out far ahead.

NESTLÉ'S MOTHER GOOSE SERIES

F. B. PATTERSON, 27 PARK ROW, N.Y.

## WHAT IS NESTLÉ'S MILK FOOD?

---

It is the most delicious and nourishing substitute for mother's milk ever made. Its simplicity is its leading feature, as it contains solely milk, wheaten breadcrust and sugar, as stated on each tin, chemically so combined that by the addition of water only it makes a liquid almost identical with mother's milk, and which can be used from birth. Hence the mother knows just what she is giving her child, and avoids all the danger of sour, impure, diseased and adulterated milk. It is to be used when the mother's milk does not agree, is insufficient in quantity or quality, or entirely lacking, or when the entire nursing of the child is too great a tax on the strength of the mother.

It is prescribed by the most eminent physicians of all countries, who have found it to agree where every other food has failed. A pamphlet giving full particulars, can be obtained from any druggist. Retail price, 50 cents per tin.

**CAUTION.** The immense success attending Nestlé's Milk Food has led to numerous imitations of it, so-called milk foods. To be sure of obtaining the original, take only Nestlé's and be sure that each tin bears the signature of Henri Nestlé.

Henri Nestlé's Condensed Milk, like his Milk Food, is the richest, purest article of the kind procurable. Test this assertion by trying it. Sold by all druggists and grocers.
