IMPORTANT TO GROCERS.

THE GOURLEY PATENT.

PATENTED

JULY 15th 1879.

Galvanized Steel Blade Scoops

The heads and handles of these scoops are made of hard, well-seasoned wood, and the bowls of galvanized steel.

The handle is attached to the head in a very ingenious and durable manner, by means of a pin passing vertically through the head.

The bowl is secured to the head with wire barbed nails, and in addition has continuous bracing tongues lapping over the rear face of the head, fastened with screws.

They are devised for rapid and easy handling, and will stand the hardest kind of usage.

They will not rust or corrode, and do not discolor sugar, like tin.

They give universal satisfaction, and elicit the highest commendation from all who have used them.
