

Fall 1924

THE "2" BARKERS, LTD.
AMHERST, N.S.

Announcing

THAT the side fastening for coats is without competition and is marked with one or two fancy buttons. Smaller buttons are largely used for trimming, especially on the more tailored styles. Fur banding for trimming is a new feature in addition to the usual fur collar and cuffs. The straight line coat predominates. Belts are conspicuous by their absence. In addition to the prevailing shades of Autumn browns and fawns there will be forest greens and coppertones that will appeal to smart women.

Wrap around and pleated skirts are still the prevailing styles and the hips are invariably snug fitting.

Many straight line dresses are being shown with the beltless idea emphasized, while slashed tunic effects add a note of novelty. For ordinary daytime wear tailored styles with narrow shoulders and fitted sleeves are very smart. Wool crepes and fine twill fabrics are again well to the fore, while in silks much is being made of crepe satin, although crepe de chine, canton crepe and flat crepe are still very popular. Pleating, tucking, bead embroidery, fancy braids and laces add smart trimming touches.

NORTHWAY GARMENTS have that distinctiveness which not only appeals to the most discriminating wearer, but covers such a variety of styles that choosing is easy, and at prices that anyone can afford to pay. Not the least of many desirable features are their perfect fitting and "SHAPE-KEEPING" qualities. When making your selections look for the "NORTHWAY" label; it is your guarantee of lasting and perfect satisfaction.

SHAPE.KEEPING

shape Keeping **Northway** GARMENTS superior Fit
