We Pay the Freight

Aladdin Homes

"SOLD BY THE GOLDEN RULE"

The Aladdin Company offers you an opportunity to buy a complete house direct from the manufacturer, saving four profits on the lumber, mill-work, hardware and labor.

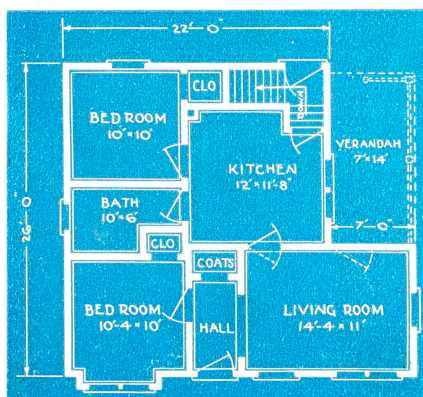

The Lorraine

THE LORRAINE. The greatest value for the money from any viewpoint—whether considered from the angle of available floor space, attractive appearance or roomy convenience of interior arrangement. For those who prefer, outside the front door, a stoop and steps of wood

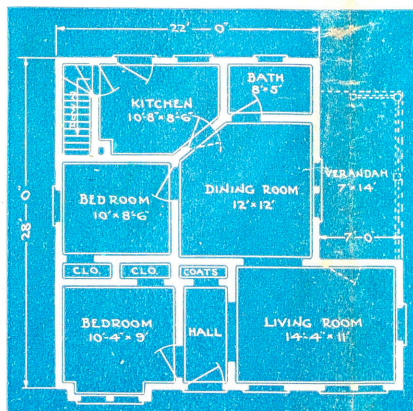

(instead of making these of brick, as illustrated, or concrete) we will include these, readi-cut for \$19.00.

The photograph of this home shows the walls finished with XXXXX British Columbia Cedar Shingles. If you prefer siding, we will supply it without extra cost.

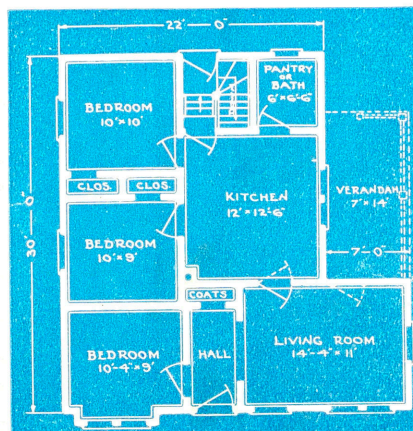

Owing to the lack of headroom, it is not practical to have rooms upstairs.

LORRAINE No. 1

LORRAINE No. 2

LORRAINE No. 3

VERANDAH
For those desiring a verandah, provision has been made, as shown in dotted outline on the Floor Plan, for it, size 14 feet x 7 feet. The door giving access to the verandah from the living room is shown in dotted outline, and is only provided, of course, if the verandah is ordered.

A Prize Aladdin Home—Wonderfully Planned

The Tuxedo

THIS delightful home can be had either as an eight room house, Plan A; or a six room house, Plan B. If it is not desired to finish the second floor at the present, Plan A becomes a six room house and Plan B becomes a four room house.

Many will be attracted by this feature—the possibility of building a minimum house for the present and later expanding it to take care of increased needs.

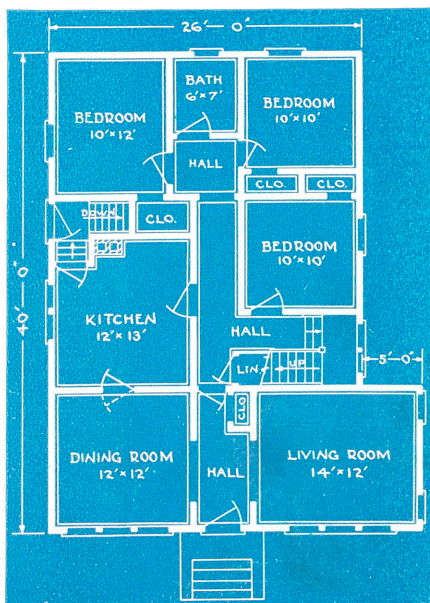

finished to provide two extra bedrooms at a very small cost. Imagine a five bedroom house with the beautiful lines of the Tuxedo at such an extraordinary low price. Other convenient features are, a private hall giving access to the front door and every room in the house; coat closet, linen closet and grade entrance to the cellar.

Plan B has a bedroom on the first floor while the two other bedrooms are upstairs.

The materials for finishing the upstairs are quoted separately.

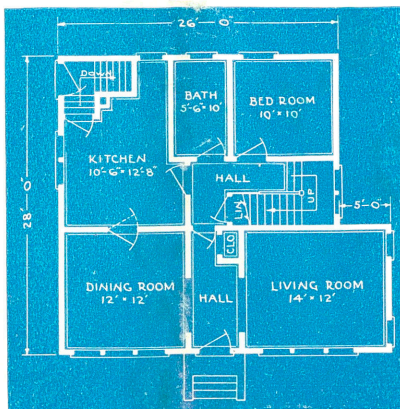

Unless otherwise requested all Aladdin Homes are roofed with XXXXX Clear B C. Cedar Shingles. If "Four Color" shingles are wanted, they will be furnished at a small added cost which will be quoted on request.

PLAN OF SECOND FLOOR
PLANS A AND B

An Appealing Home—Three Plans—Priced Alike

The Rosedale

IN this "Home" the real meaning of the word is apparent. It is a "gem of a home" which gladdens the hearts of its proud owners. Those who live in such homes are invariably the substantial type of citizens who place their homes first in every consideration. And because of this they are the backbone of every community.

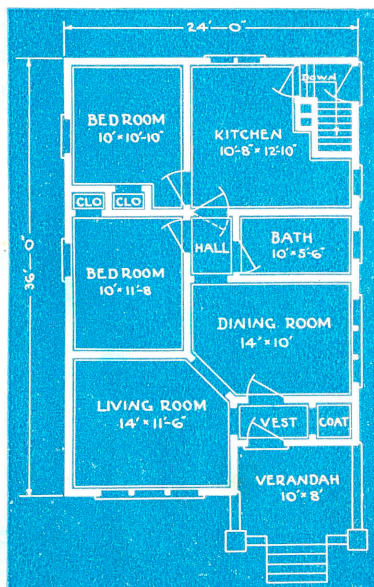

The cottage roof and wide over-hang of the eaves gives the homelike air. The square verandah is part of the house, and is included in the quoted price.

Nothing which will add to the beauty and attractiveness of this model bungalow has been overlooked. See the many artistic windows, the unusual verandah with attractive battlement rail, piers and columns. The whole house has artistic lines which lend dignity and distinction. All-in-all, the Rosedale is "quite out of the ordinary" yet a solid, sensible home that anyone will be proud to own.

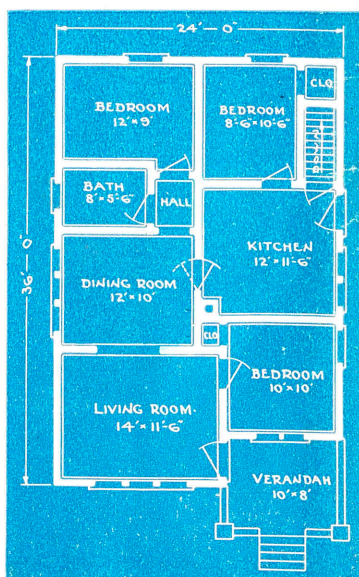

If siding or shingles are preferred for the exterior walls, instead of stucco as illustrated, they will be supplied at price quoted.

If you like this house, but require more bedrooms, or to have the bedrooms upstairs, please refer to the "Windsor", illustrated on Page 8.

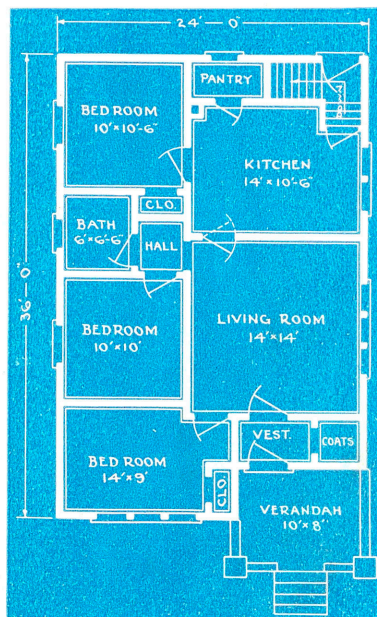

Unless otherwise requested all Aladdin Homes are roofed with XXXXX Clear B. C. Shingles. If the "Four Color" shingles shown in the illustration are wanted, they will be furnished at a small added cost which will be quoted on request.

ROSEDALE—PLAN A

ROSEDALE—PLAN B

ROSEDALE—PLAN C

A Real Beauty—Two Sizes—Four Plans

The Cedars

::

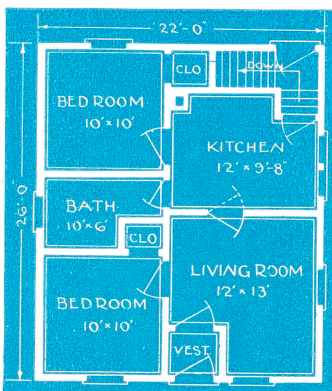

22 x 26 feet and 22 x 28 feet

THE CEDARS is a beautiful bungalow, marvellously low priced and remarkably designed. Wonderful in its convenience of layout, as in its very low cost and, at the same time, handsome in appearance. A home you will be

proud to own. The verandah, size 16 x 8 feet, shown in picture may be ordered with the house or added later, when desired. If preferred, verandah columns extending down to the verandah floor will be supplied *without additional cost*.

THE CEDARS—22' x 26'—Two Plans

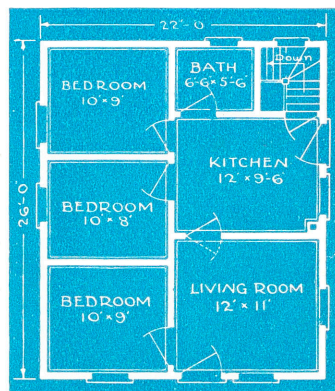

THE CEDARS—22' x 28'—Two Plans

PLAN F

THE CEDARS—PLAN F
22' x 26'

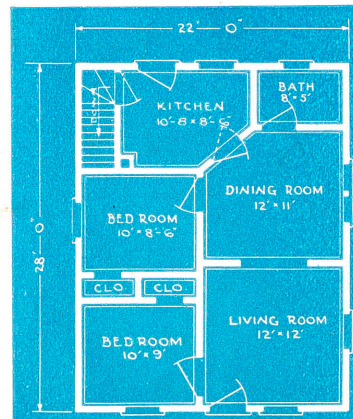

Plan F provides a vestibule inside the front door, also a grade entrance and basement stairs at the rear door. Two good bedrooms, each with closet, a bathroom and large kitchen and living room offer every comfort.

PLAN G

THE CEDARS—PLAN G
22' x 26'

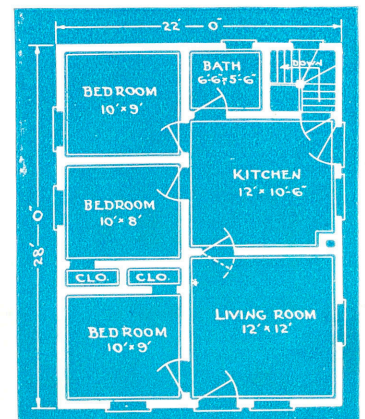

Here is a plan for a family of six. Three bedrooms, living room, kitchen, bathroom and basement stairs. A cosy convenient little home of which you will have reason to be justly proud.

PLAN K

THE CEDARS—PLAN K
22' x 28'

A wonderfully popular plan with every essential of a home. The two bedrooms each have closets and the bathroom is located so that it can be made into a pantry, if desired, by moving the door to open to the kitchen.

PLAN L

THE CEDARS—PLAN L
22' x 28'

This home has large living room and kitchen and three good bedrooms. The bathroom opens from the kitchen. This space may be used as a pantry, if desired.

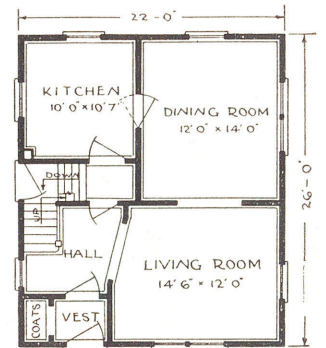

The Adams

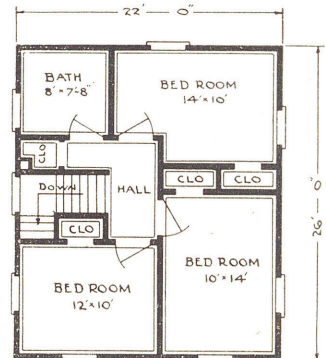

THE ADAMS is a Canadian home of chaste simplicity. Straight architectural lines create a pleasing and substantial style of home, which fulfils the ideals of those who prefer conveniences rather than embellishments. Note the exposed rafters, shingled gable and belt at second storey. A spacious living room, square hall, vestibule and coat room, well proportioned dining room and model kitchen with grade cellar entrance, complete the first

storey. The second storey has three excellent bedrooms, four closets and bath. We show an optional second storey which incorporates four bedrooms; either may be had at the same price. The verandah size 20 ft. x 8 ft., sets off the house to advantage and is particularly desirable in the summertime. It is quoted separately, as the Adams may be ordered and built without it. If preferred, verandah columns extending down to the verandah floor will be supplied without additional cost.

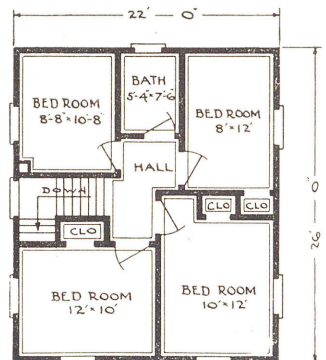

See Pages 16 and 17 for Specifications and Terms.

FIRST FLOOR PLAN

SECOND FLOOR PLAN No. 1

SECOND FLOOR PLAN No. 2

The Cedars, 27 (with upstairs)

QUITE frequently we receive requests for a Cedars with bedrooms upstairs. Carrying out our policy of supplying homes which will fulfil in every way the requirements and wishes of our customers, we have prepared plans of a home, known as the 'CEDARS 27' which provides, on the ground floor, just the same accommodation as the Cedars (shown on the opposite page) and also provides two additional bedrooms upstairs. This is effected by increasing the pitch of the roof and by other means. Windows are provided in the gable ends to light these bedrooms.

Two alternative ground floor Plans of the Cedars 27 are shown, known as H and J. Note particularly that if desired to have bedrooms upstairs

The Cedars 27, Plan J, has a living room, kitchen, bathroom (which may be converted without additional expense into a pantry) and two bedrooms downstairs and two additional bedrooms upstairs, that is, four bedrooms in all.

The prices of the Plan H and J are a little higher than for the other Cedars plans, due to the additional materials required to give the two extra bedrooms upstairs.

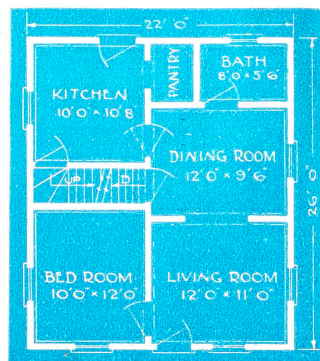

If desired, either of these plans may be ordered without the materials for finishing off the upstairs, for which reason these materials are quoted separately. The door provided at the foot of the stairs shuts off the upper floor if it is not required.

It takes the same verandah as the Cedars. The verandah is, of course, optional.

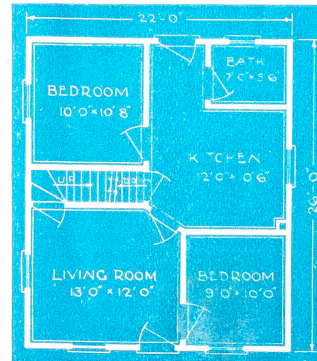

in the Cedars, it is necessary to order either Plan H or J, as these upstairs rooms can only be provided with one or other of these floor plans.

Please do not ask us to send one of the Cedars plans shown on the adjoining page, with upstairs bedrooms, as that cannot be done. The position of the stairs makes it necessary to have Plan H or Plan J if an upstairs is desired.

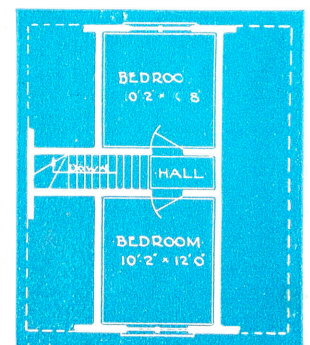

The Cedars 27, Plan H, has a living room, dining room, kitchen, pantry, bathroom and one bedroom downstairs, and two additional bedrooms upstairs, that is, three bedrooms in all.

FLOOR PLAN H

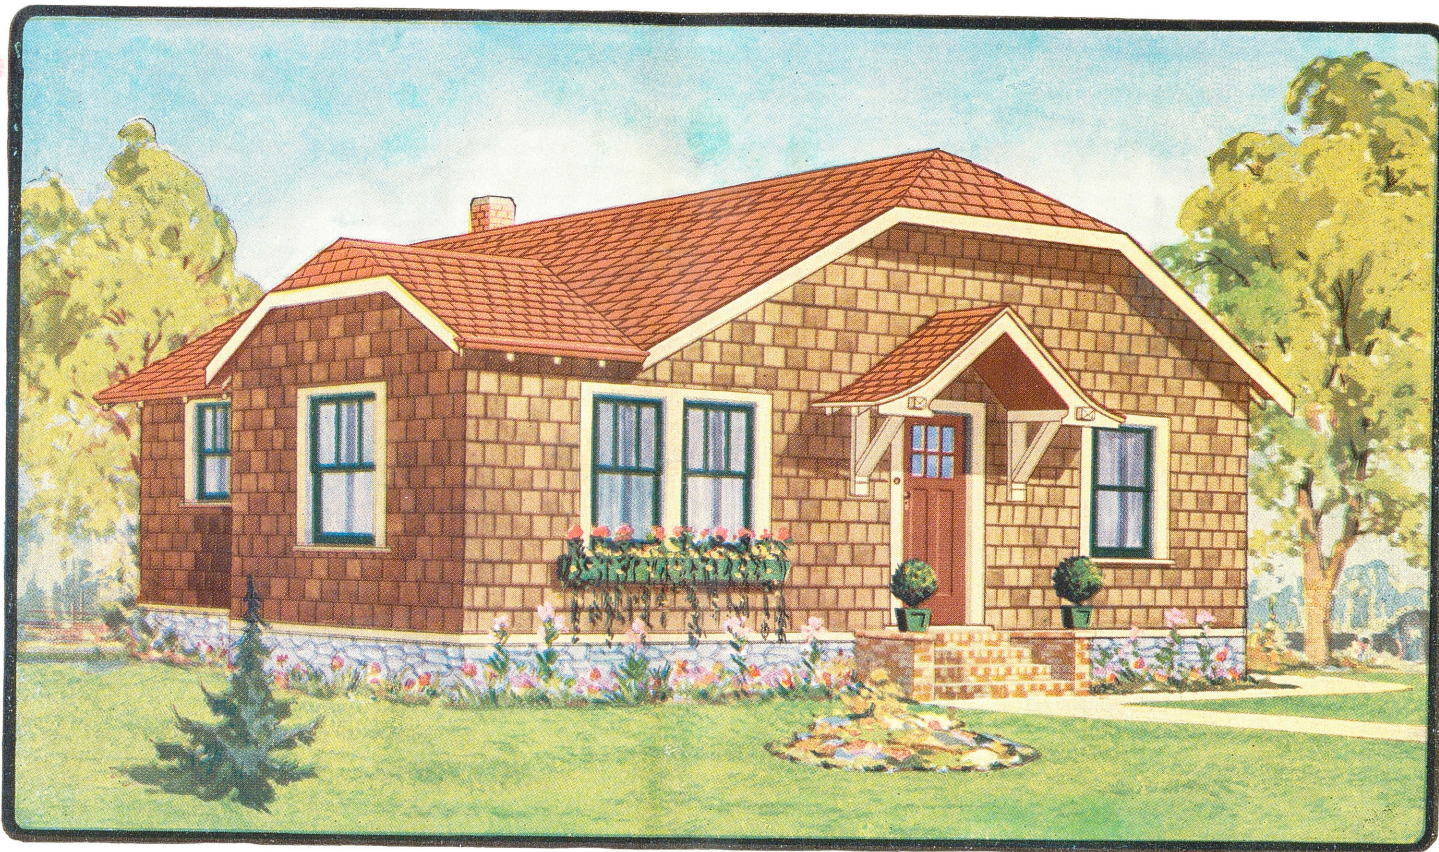

FLOOR PLAN J

SECOND FLOOR PLAN

A Bungalow Gem—Two Plans—Priced Alike

The Emerald

There are so many features contributing to the charm and convenience of this home—a real “Jewel” among homes.

There are two floor plans, from which to choose. They are both the same size, 29 ft. frontage and 30 ft. in depth. PLAN A provides a central front Hall, with wide framed opening to the spacious Living Room, so well lighted from both front and side. Another wide framed opening (for which French Doors may be ordered if desired) leads to the lovely Dining Room. Access to the kitchen is through a double swing door.

Note the central hall, from which the rear bedroom and the bath room open. There are two bedrooms in Plan A, each with a clothes closet.

PLAN B is wonderfully conveniently arranged for those requiring three bedrooms, and extra large Living Room and Kitchen. How often do you find a kitchen so large, 12 ft. x 12½ ft.—And a Living Room 14 ft. 8 in. x 11 ft. in a house of this size?

The room opening from the kitchen at the rear is just right either for a Pantry or a Bathroom, whichever is required.

The rear entrance at grade level, and cellar stairs are appreciated by all.

If you prefer a verandah, instead of the hooded entrance as shown at the front door, let us supply, for the front of the Emerald, the verandah, 14 ft. x 7 ft. as illustrated on the Columbia Page 14, or the pergola verandah, which is 14 ft. x 8 ft., shown on the Elmhurst, Page 23.

For those who would prefer, outside the front door, a stoop and steps of wood, instead of making these of brick, as illustrated, or concrete) we will include these, readi-cut, for \$19.00 Either Plan will be REVERSED without charge.

If desired, siding will be provided, instead of shingles, for the outside walls without extra cost.

See Pages 16 and 17 for Specifications and Terms.

WHAT ALADDIN HOME OWNERS SAY

A “Satisfied Customer”—

“We have been living in our Holmwood since September, and are very much pleased with it. Everything went together fine. The lumber was good and there was lots of it; plenty of everything. You can put us on your ever-growing list of satisfied customers.”

J. J. BEVAN, Druid, Sask.

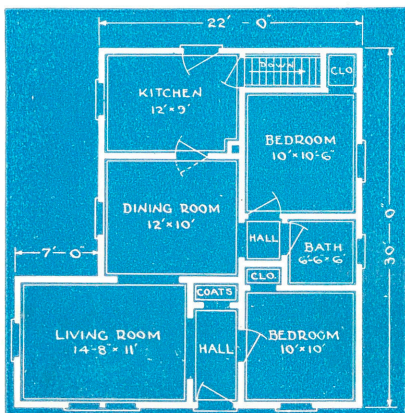

The accuracy of the cutting “was simply wonderful”—
“I purchased from the Aladdin Company your ‘Wabash’ home and built it myself according to your system of house-building. I take great pleasure now in testifying to my entire satisfaction with everything connected therewith. I found the Company courteous and generous, giving plenty of everything. The quality of the material was all that could be desired; and the accuracy with which each piece fitted into its appointed place was simply wonderful. If I were going to build again, I would follow the same course.”

JAS. MALCOLM, Agincourt, Ont.

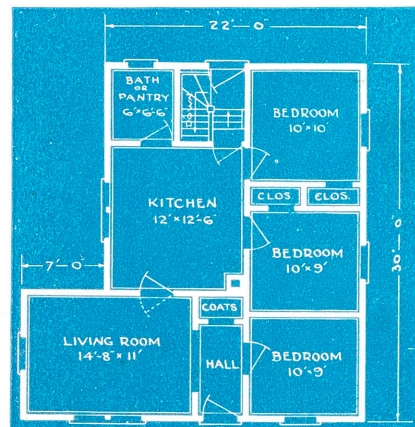

Exceptional lumber—

“I have duly received the house and I am more than pleased with it. The lumber is far in advance of what we get here. Will you please send me two more catalogues as I have already got two friends who I think will go in for similar houses.”

R. W. WATSON, Trail, B.C.

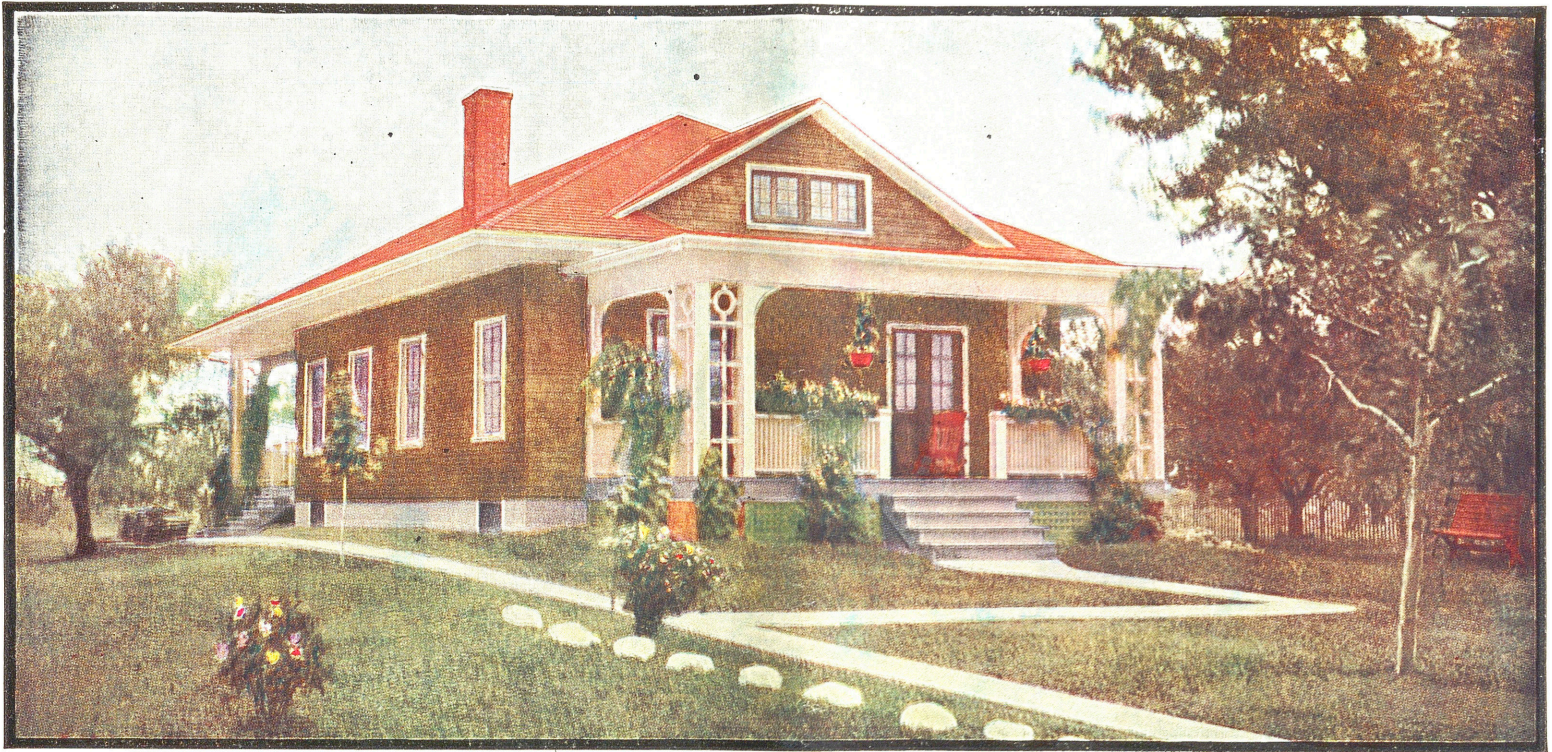

FLOOR PLAN A

FLOOR PLAN B

A Commodious Bungalow with Soft-toned Coloring

The Wabash

THE beauty and long life of Cedar shingles have given great vogue to their use as a wall finish. When walls and roof are both shingled and stained, a soft and mellow effect is had which blends perfectly with the lawn, flower beds, shrubs and trees, and the ideal result is achieved of a home which is part of the landscape. This bungalow so finished will grace any community or any setting. It should be placed on a lot not less than thirty-five feet wide.

The verandah is large and beautifully ornamented with columns, lattice, rail, and balusters. The living room and dining room are each a good size and are connected by a wide framed opening which permits of their being used as a single room if desired. There are three bedrooms, each with a good closet and an extra closet opening from the living room to be used for coats and hats.

Note the spacious kitchen. By taking four feet from the left side of it, a pantry 4 feet square and an inset rear porch, 4 x 6 feet in size, will be provided *without charge* to you. Mention this, if desired, when ordering.

The photograph of this home shows the walls finished with XXXXX British Columbia Cedar Shingles. If you prefer siding, we will supply it without extra cost.

French doors opening to the verandah are shown in the illustration above. The Floor Plan does not show them, as

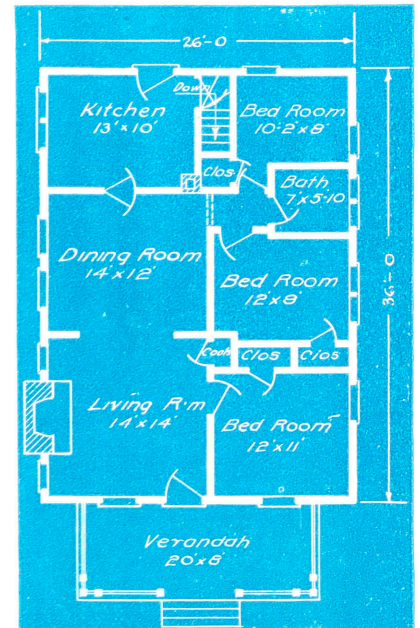

in most cases they are not desired. They will be supplied, if required, at a slight additional charge.

Hardwood flooring will be supplied instead of the standard Edge Grain Fir Flooring, for any home, if desired, at an added cost, which will be quoted on request.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

We will **REVERSE** the Plans of any Aladdin Home, without charge.

WONDER
FOLIO**

FLOOR PLAN

COST OF ERECTION

"What does it cost to erect an Aladdin Redit-Cut house?" is a question that every prospective buyer will ask.

One-storey Bungalows of the type of the design Bluebird will cost to erect, about 25 per cent. of our price.

The Edmonton and other two-storey houses will cost 25 to 30 per cent. of our price.

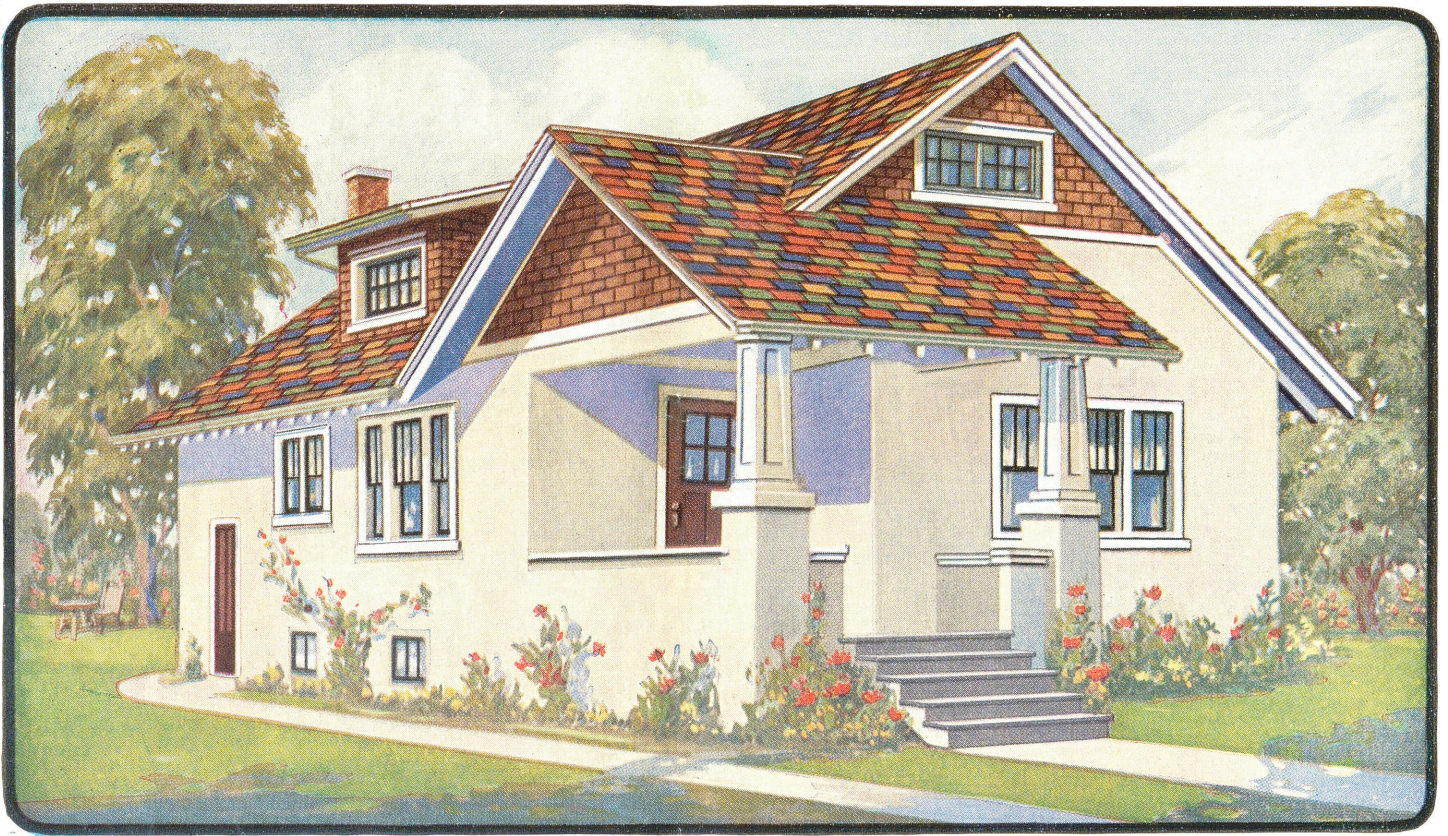

These costs will vary with one thing only—the industry of the workmen. All the materials for the whole house are lying sorted, bundled and marked, ready to hand. The position in which they are to be placed is graphically shown on the

plans. There is no excuse for delays or loafing on the job. The materials can be placed just as fast as nails can be driven.

We are prepared at all times to give detailed estimates of the costs which enter into the completed house. Labor and material costs vary from time to time in different communities and our estimate will be made on the general average as we find it.

Write us as to the design which you favor and we will send you the complete building data for it and profusely illustrated **WONDER FOLIO**.

The Windsor—"Here is a Beautiful Home"

The Windsor

HERE is a spacious home, providing every convenience the heart can desire. Nothing has been overlooked. From the square verandah we pass through the vestibule, with its coat-room to the left, and step into the handsome living room, which is square. A fireplace may be built in the side wall, if desired.

A framed opening leads to the dining room, which, like the living room, has dignified double-mullioned windows. The

WONDER FOLIO—FREE
Pictures, Plans and Specifications of the
Home You Favor—Ask for it

kitchen is complete with pantry, and a grade entrance gives access to the garden and to the basement.

There is also a bedroom on the ground floor, a linen closet and a large, square hall.

Upstairs are two delightful bedrooms, with closets, and 6' x 8' bathroom.

If it is desired to have the bathroom downstairs, it can be arranged without additional cost by opening the main stairway from the living room and utilizing the outer portion of the downstairs hall as a bathroom, size 7' x 6'.

The exterior appearance is just as attractive and dignified as the interior is convenient and appealing to discriminating home lovers.

"There IS a lovely home!" so many have said.

The exterior walls are shown, finished in stucco. Variations may be had by using siding or shingles if desired.

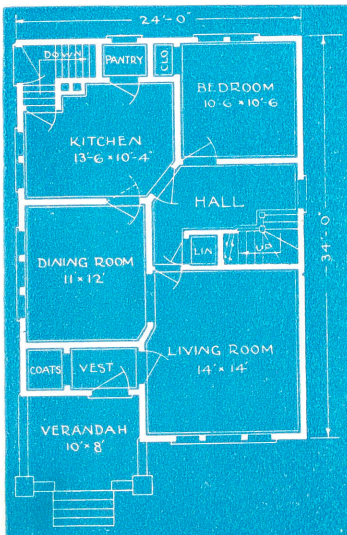

Hardwood flooring will be supplied, if desired, instead of our standard Edge Grain Fir flooring, at an added cost, which will be quoted on request.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

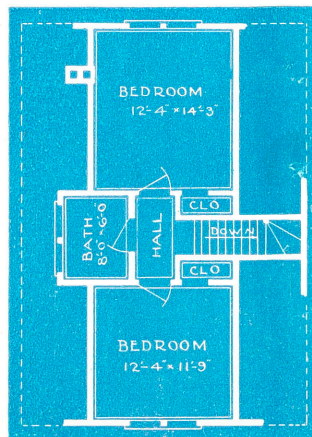

Unless otherwise requested, all Aladdin Homes are roofed with Clear XXXXX B. C. Cedar Shingles. If the "Four Color" shingles in the illustration are wanted, they will be furnished at a small added cost which will be quoted on request.

See Pages 16 and 17 for Specifications and Terms.

THE WINDSOR—FIRST FLOOR

THE WINDSOR—SECOND FLOOR

For Windsor Bungalow see next page

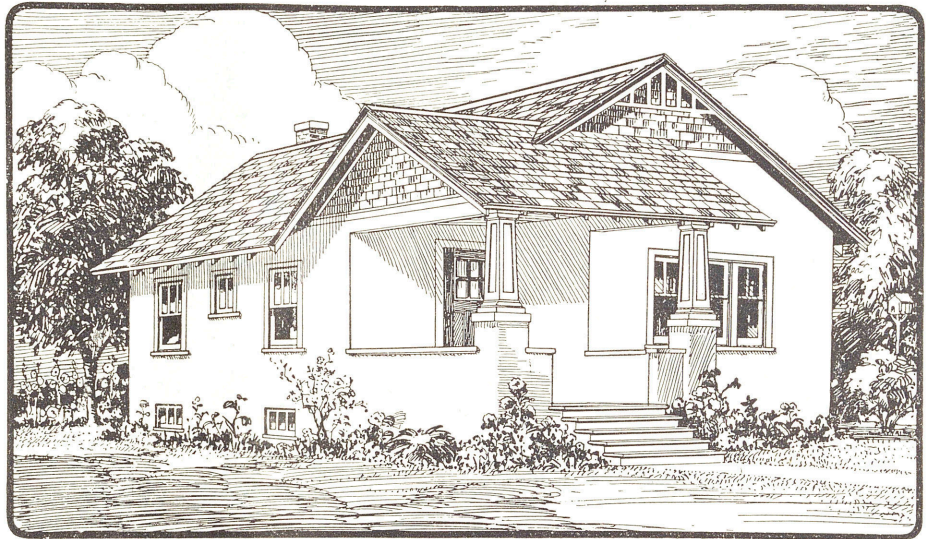

The WINDSOR "Master Series" of Bungalows—Five Plans

This is the Windsor Bungalow
It has one storey only—
No second floor.

The WINDSOR BUNGALOWS

The Windsor "Master Series" of Bungalows is our most recent achievement. They are meeting with instant popular approval. The lines of the home are delightful and the many unusual features of roof, gables, verandah, panelled columns and attractive window groupings lend themselves to a contrasting and harmonious color scheme. It can be truly said that, if you live in a Windsor Bungalow there is no handsomer home in town than yours.

The Master Series is a group of five Bungalows. Each one is a triumph of design in which the maximum of convenience and comfort is arranged in an architecturally perfect home at the absolute minimum of cost.

"WINDSOR" BUNGALOW "C"—

22' x 34'

The front door opens to a vestibule with coat closet from which access is had to the living room and dining room. A grade cellar entrance goes down from the kitchen. There is a center hall off the dining room from which the bathroom and bedrooms are reached.

"WINDSOR" BUNGALOW "D"—

22' x 34'

A compact and roomy three bedroom home with every essential but no waste space is provided in Bungalow "D". The living room and dining room are connected by a framed opening.

"WINDSOR" BUNGALOW "E"—

22' x 38'

A very complete and interesting layout is had in this home. Note the vestibule and coat closet at the front door and the central hall opening to the bathroom and two of the bedrooms. Living room, dining room and kitchen are brilliantly lighted.

We have combined in the "Ideal Bungalow" what twenty years experience has proven to be the five perfect Bungalow Floor Plans. The result is the "Master Series" of Windsor Bungalows. Each one is a delight to the eye and a master piece of design for convenience and comfort—and there is a price for every purse.

"WINDSOR" BUNGALOW "A"—

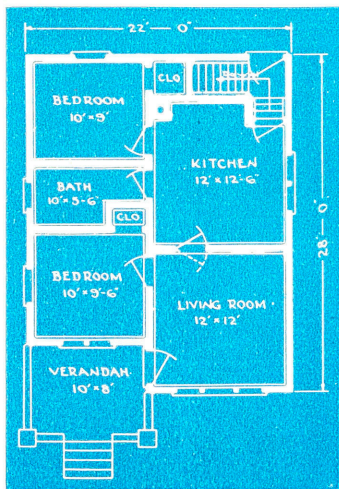

22' x 28'

This smallest of the series is adapted to the family that requires a large kitchen but no dining room. The two bedrooms each have closets. The bathroom can be used as a pantry, if desired. The grade cellar entrance is a great convenience.

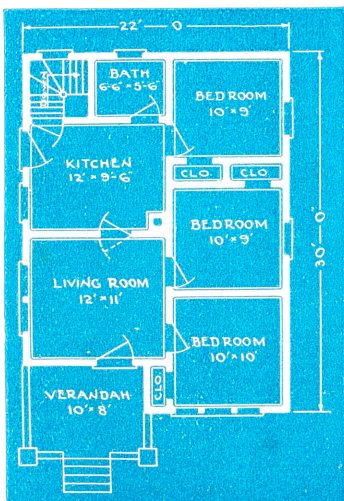

"WINDSOR" BUNGALOW "B"—

22' x 30'

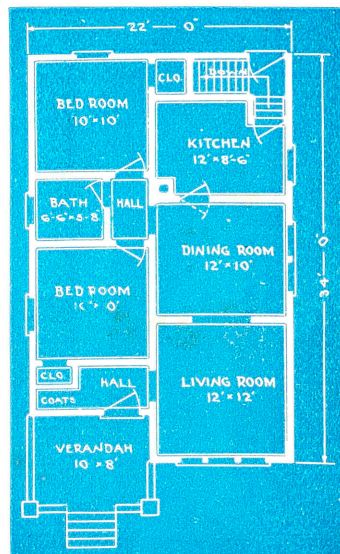

Three bedrooms are provided in this design. The living room and kitchen are both large and well lighted. The bathroom is located to permit its being used as a pantry, if desired. All bedrooms have closets. Bungalow "B" is a compact and convenient home.

The Linden

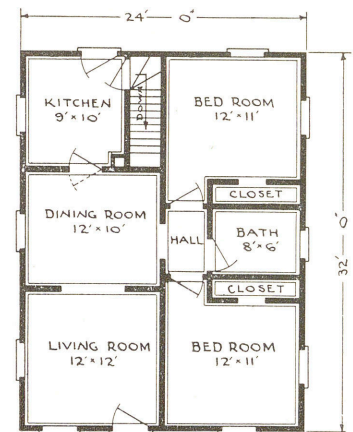

Three sizes—

LINDEN No. 3

LINDEN No. 4

LINDEN No. 2

THIS is a new design typifying the modern home, as arranged and built for today's requirements. Studying its cozy arrangement of the necessary rooms one wonders that only recently have homes been planned to give so much convenience, such sunny interiors, and at so little cost.

To ensure that everyone's requirements will be satisfied, *three* sizes are shown.

The LINDEN No. 4 is 24 x 30 feet in size. It provides a spacious living room, an extra large kitchen 14 x 12½ feet in size from which a pantry opens, having a glass door, or a solid panel door will be supplied, if preferred. At the rear of the kitchen is a room, with outside window, which may be used as a bathroom or pantry, whichever is required. Note the rear entrance at grade level, giving access to the kitchen and to the basement—a great convenience. And there are *three* bedrooms and clothes closets.

The LINDEN No. 2 is 24 x 32 feet in size, it provides a spacious living room, dining room, kitchen, two bedrooms each with clothes closet, and a bathroom opening from the central hall.

The LINDEN No. 3 is 24 x 34 feet, and provides the same accommodation as Plan No. 2 but has *three* bedrooms.

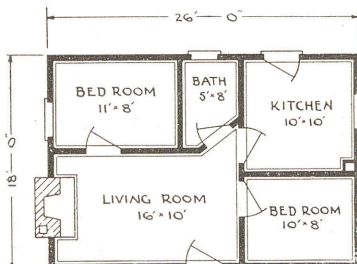

The verandah, as shown, is 12 x 8 feet. If a larger verandah is desired, selection may be made of the verandah shown on page 25 at the price quoted.

If the corner verandah piers, shown in stone in the illustration, are not desired, we will supply full length corner columns, extending down to the verandah floor, without additional charge.

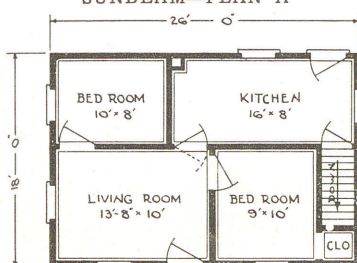

The Sunbeam

The plans are priced alike. The hood over the front door is included.

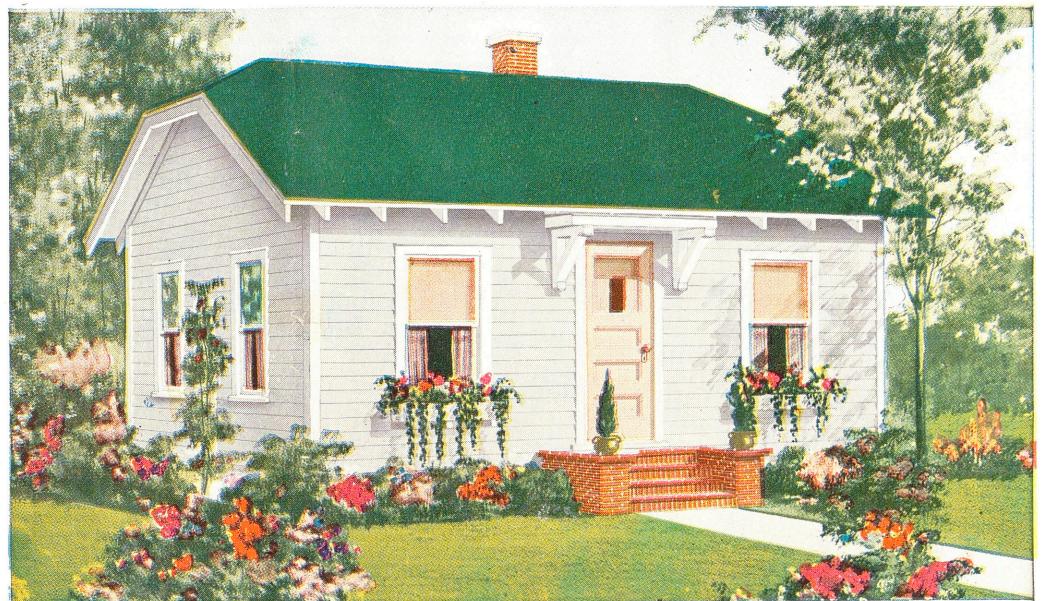

"For those who prefer, outside the front door, a stoop and steps of wood (instead of making these of brick, as illustrated, or concrete) we will include these, readi-cut, for \$19.00."

SUNBEAM—PLAN A

SUNBEAM—PLAN C

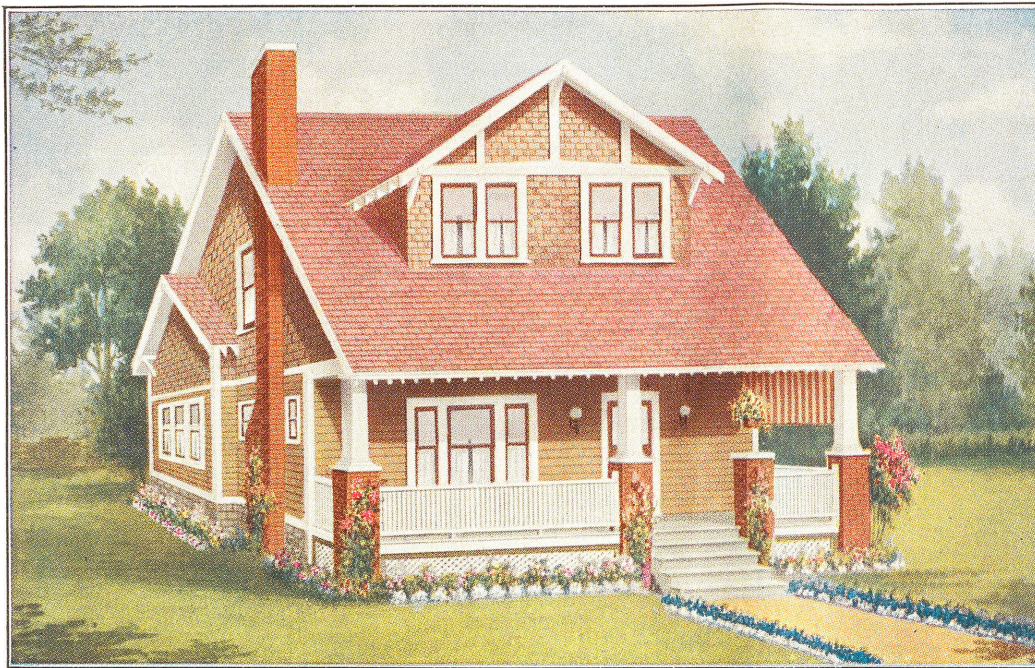

This is a prize-winner to gladden the hearts of those requiring a compact home of up-to-date appearance. It is surprising to find a house so complete and with so many conveniences, at so low a price.

Plan A is a remarkable design wherein two bedrooms are included with the big living room, kitchen

and bath. Entry can be had to a basement by adding the enclosed Cellar Entrance illustrated on page 18 or by a trap door and stair from kitchen.

Plan C is very popular. The kitchen is extra large, 16 feet long, big living room, two bedrooms, closet and cellar stairs.

New Brunswick

THE New Brunswick is one of our most popular homes, due principally to the fact that it is a splendid example of the "semi-bungalow"—the storey-and-a-half house with bungalow lines—and to its excellent floor plan.

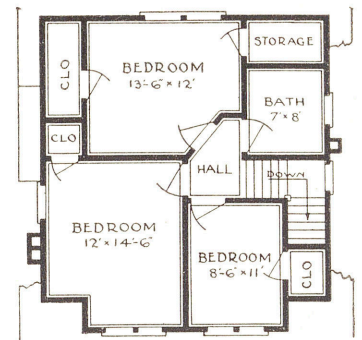

It contains a large, bright living room and dining room; a kitchen 12 feet square; a pantry, an inside cellar entrance, a front hall for privacy, access from kitchen to front door without going through dining

room; three bed-rooms in graduated sizes—all with closets; a large front verandah and a small rear porch and a bathroom over the kitchen.

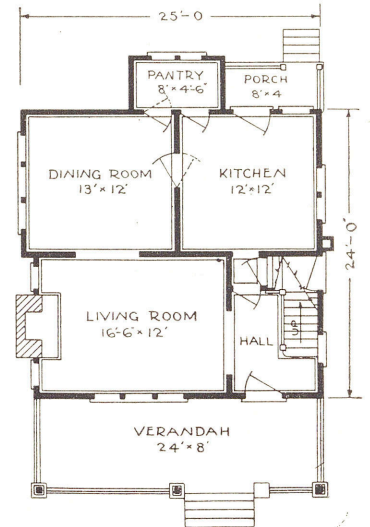

Note particularly—All bedrooms have full-height ceilings. The large verandah, size 24 ft. x 8 ft., and the rear porch are included in the quoted price.

The side entrance, at grade, is a feature appreciated by all, affording direct access from outdoors either to the kitchen or directly to the basement.

Hardwood flooring will be supplied instead of the standard Edge Grain Fir Flooring, if desired, at an additional cost, which will be quoted on request.

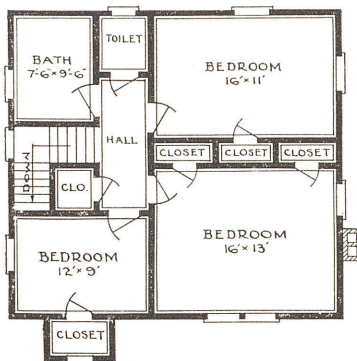

PLAN OF SECOND FLOOR

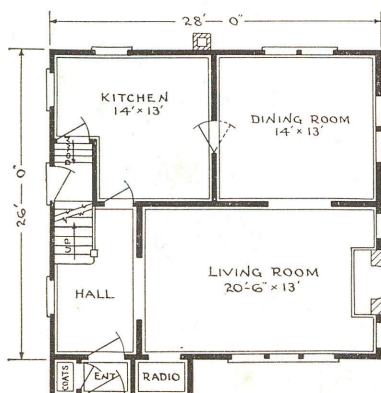

PLAN OF FIRST FLOOR

We will REVERSE the Plans of any Aladdin Home, without charge.

See Pages 16 and 17 for Specifications and Terms.

PLAN OF SECOND FLOOR

PLAN OF FIRST FLOOR

The Sovereign

THE exterior is different—and charming. Note the iron railings at the front stoop, which are supplied and the graceful sweeping roof.

Entering the New-Type front door with its circle top and heavy strap hinges we pass through the entrance hall, with Coat Room into the Main Hall. A wide framed opening, or plastered arch if preferred, leads to the Living Room.

A lovely room it is—Open fire-place in the end wall with high windows flanking on either side, and a Radio Room at the front.

Through a second framed opening (or plastered arch) we progress into the square Dining Room, so well lighted by mullion windows on two sides. A double-swing door leads to the big kitchen.

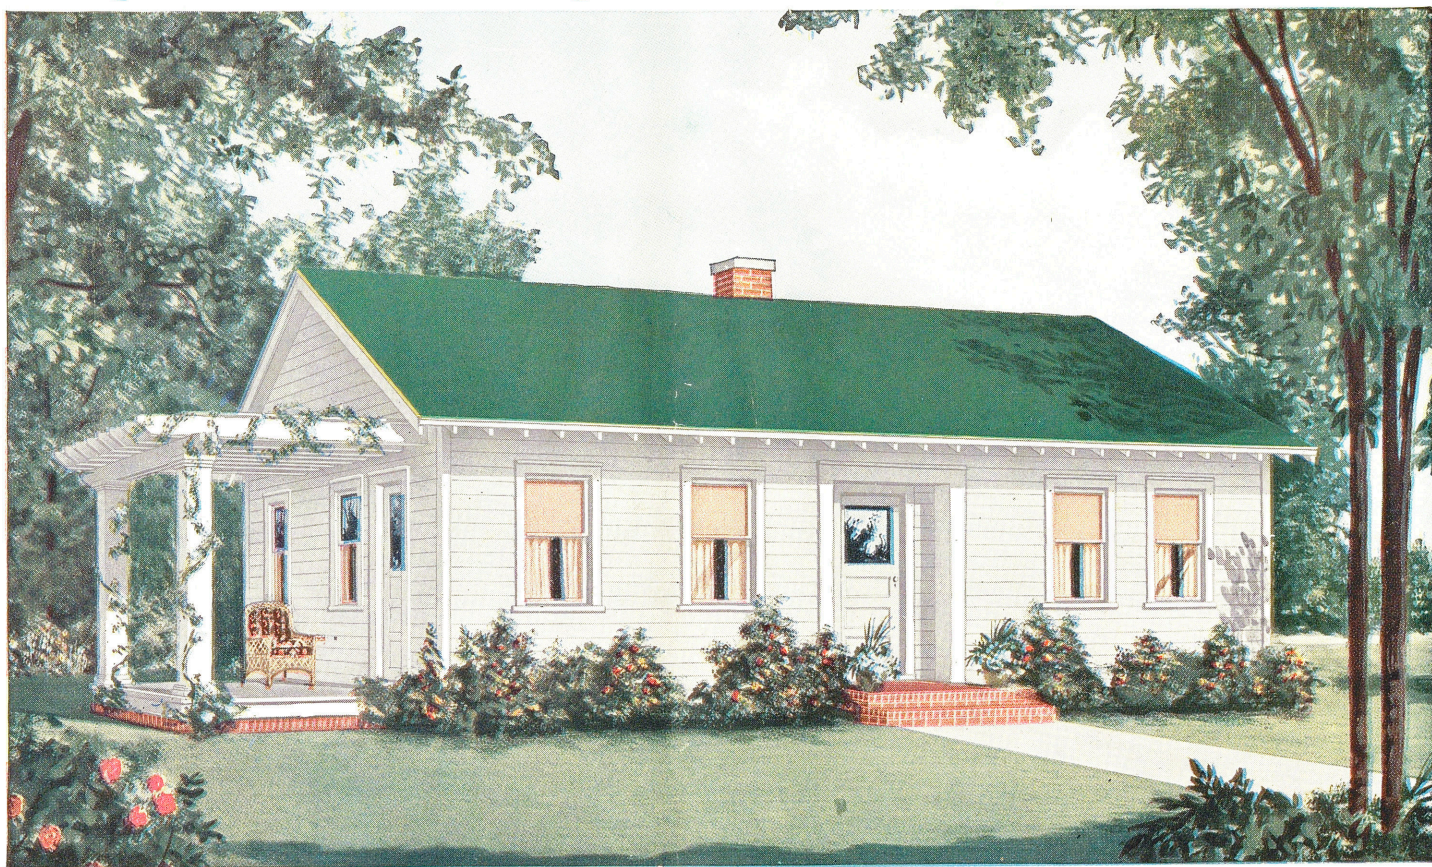

The second floor is roomy and well arranged.

The toilet is separate from the Bath Room, but adjacent to it, and both are located over the kitchen, which gives the most economical plumbing arrangement.

Note the attractive wide siding on the walls of the Sovereign. This siding is included with the house at the quoted price.

On request, we will quote wide siding for any Aladdin Home.

A Quaint Colonial Bungalow — 4 Fine Plans — Priced Alike

The Dorchester

VERY WELL LIGHTED ON ALL SIDES, CONVENIENTLY PROPORTIONED—A HOME IN EVERY SENSE

The "Dorchester" is a master design. Serviceability, comfort and beauty have been co-ordinated to give a delightful exterior and four fine floor arrangements.

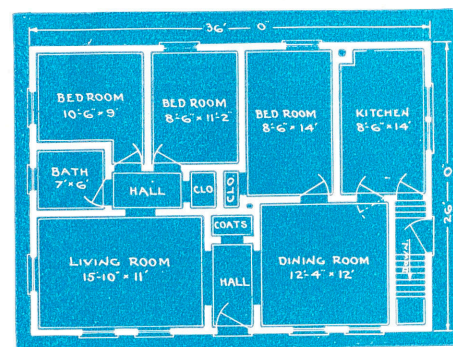

Floor Plan B corresponds exactly with the illustration while for the other plans the exterior is varied in minor points, such as window arrangement.

The verandah, which is quoted separately, presents an attractive feature which may be added, if desired. It is of the Pergola type but with covered roof to protect from rain and sun. The size is 12 feet by 10 feet six inches.

"For those who prefer, outside the front door, a stoop and steps of wood (instead of making these of brick as illustrated, or concrete) we will include these, readi-cut, for \$19.00.

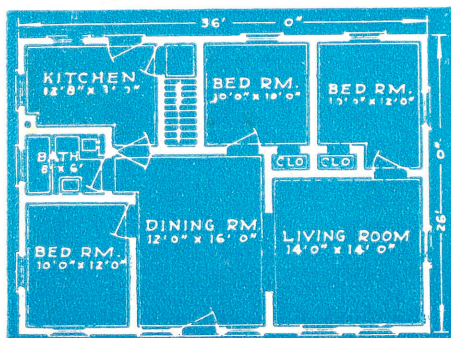

Hardwood flooring will be supplied instead of the standard Edge Grain Fir Flooring, if desired, at an additional cost, which will be quoted on request.

See Pages 16 and 17 for Specifications and Terms.

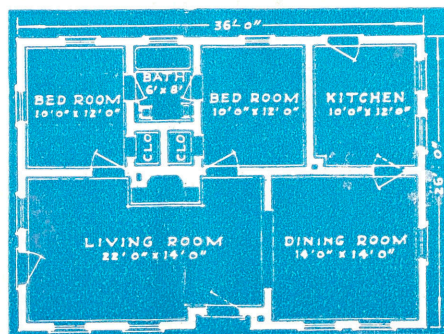

THE DORCHESTER—PLAN E

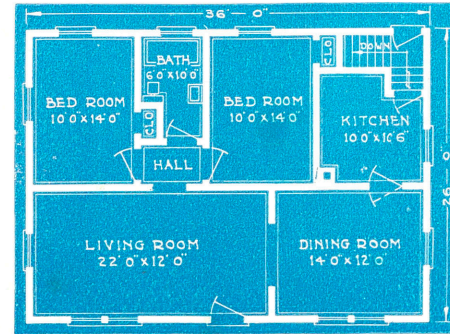

Write for FREE Wonder Folio of the Plan in which you are interested.

THE DORCHESTER—PLAN A

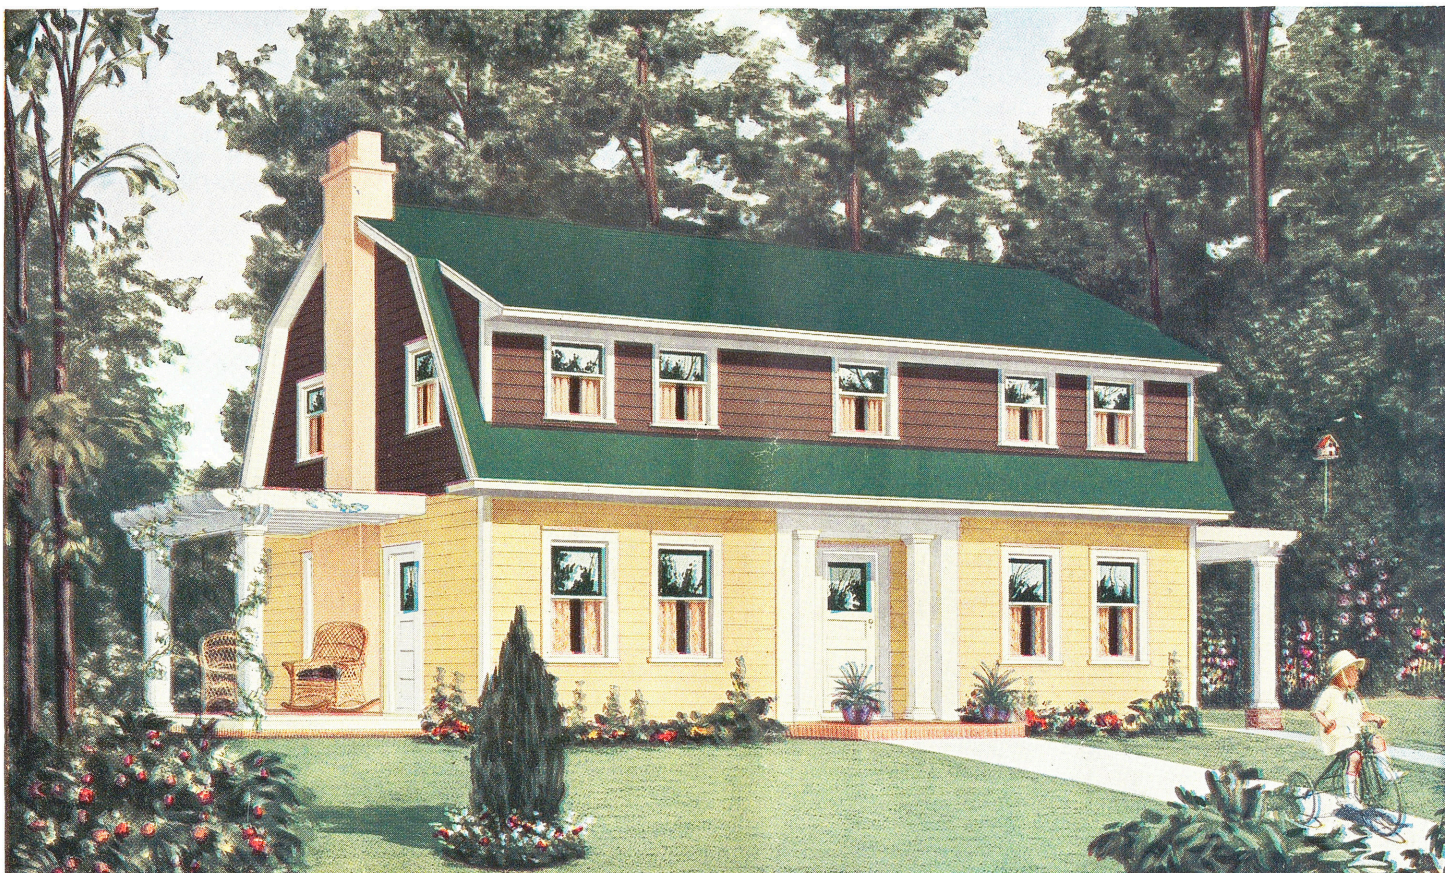

THE DORCHESTER—PLAN B

THE DORCHESTER—PLAN D

A Fine Dutch Colonial Type—A Big Home for Little Cost

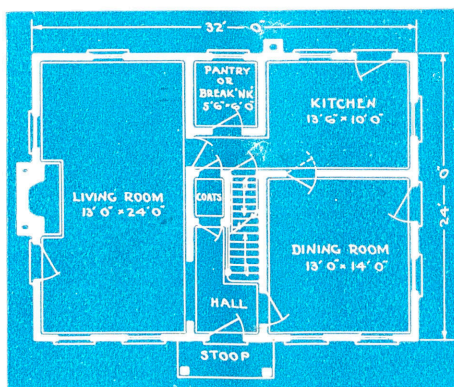

The Capitol

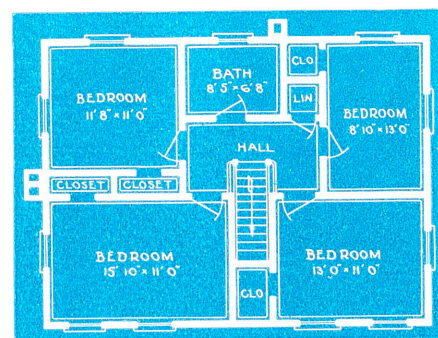

The Capitol is shown in two sizes, both having practically the same accommodation, the only difference being in the size of the rooms, and they are priced accordingly.

The covered pergola porch is 12 ft. x 10 ft. 6 in. and the porte cochere at the opposite side of the house, also covered, is 12 ft. x 10 ft. 6 in., providing a covered driveway, giving entrance protected from the weather.

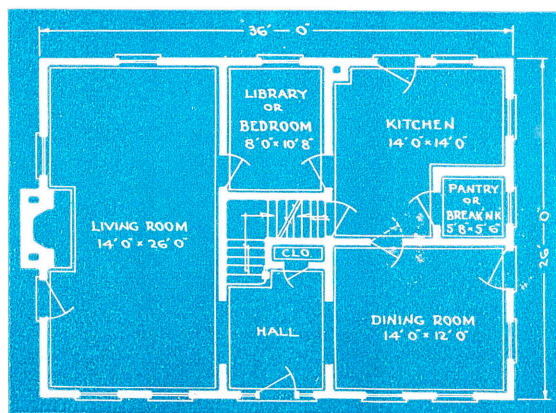

The pergola porch and porte cochere are not included in the price quoted for the Capitol, as in many cases it is not desirable, due to the size or location of the building site, to add them, but they will be supplied at low cost, as quoted.

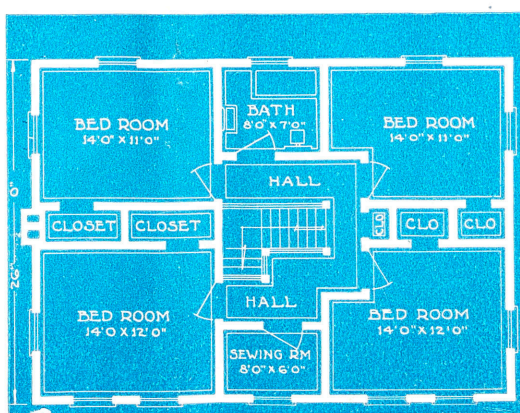

CAPITOL B—FIRST FLOOR

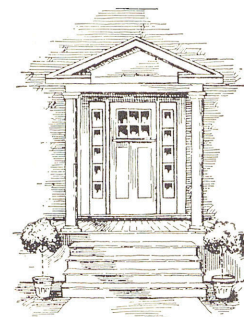

CAPITOL B—SECOND FLOOR

CAPITOL A—FIRST FLOOR

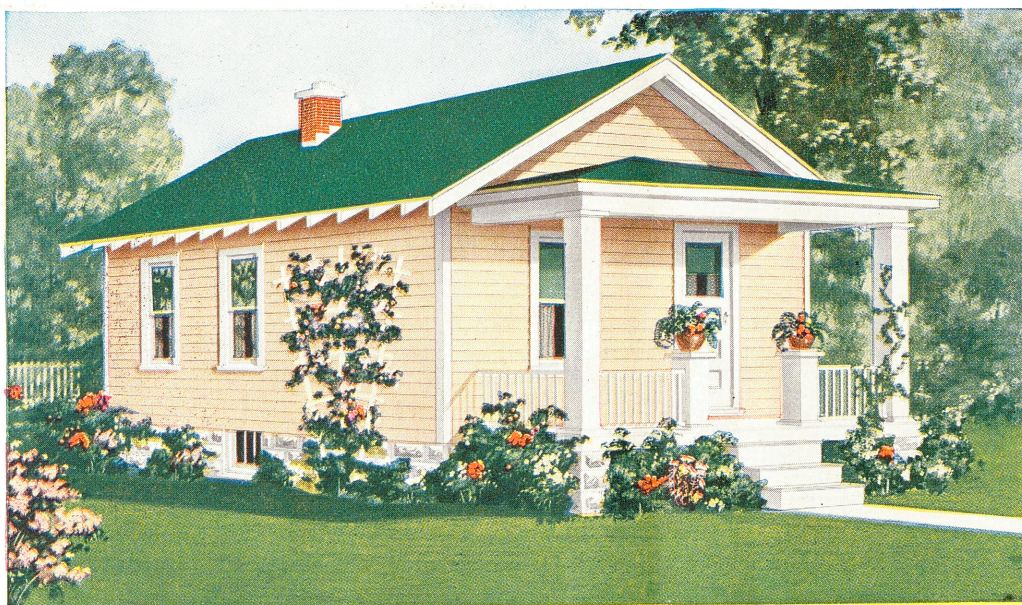

CAPITOL A—SECOND FLOOR

The front entrance of the Capitol B is illustrated in the sketch. This entrance is also furnished for the Capitol A without added cost and is a charming addition to the home.

A Real Gem—Two Sizes—Five Plans

The Columbia

THE savings after building a small home, will add more to your happiness than the luxuries of a big home.

Later successes and necessities may make possible a larger and more ambitious house, but the 'Columbia' is a *first* home—it conserves expenses, inspires thrift—and *saves money*. Four floor plans are shown of the Columbia and one of the Columbia Junior.

It is simply a matter of determining which one will best serve the requirements of *your* family.

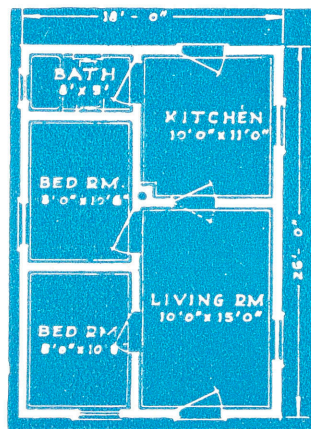

**ASK
for FREE
WONDER
FOLIO**

For a small family the "Columbia" is hard to equal. It breaks through the clouds of obstructions, high prices, middlemen's profits, architects' and contractors' fees and opens up the big opportunity to "Start Right Now", to start with less than you thought possible—a very modest amount.

Wise is the man who arrives at the momentous decision "to own his own home"—to give his family the comfort and satisfaction of "living in their own home".

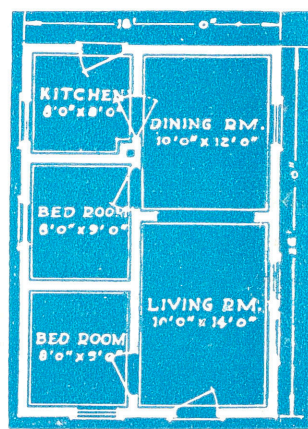

The verandah, size 14 x 7 feet, is priced separately. The Columbia may be ordered without the verandah, if desired.

We will REVERSE the Plans of any Aladdin Home, without charge.

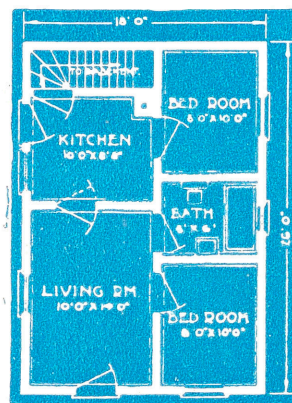

COLUMBIA C

The rooms in plan C are proportioned differently although of the same accommodations as shown in plan K, without the cellar stairs. Entry can be had to a basement by adding the enclosed Cellar Entrance illustrated at the top of page 18, or by a trap door and stair.

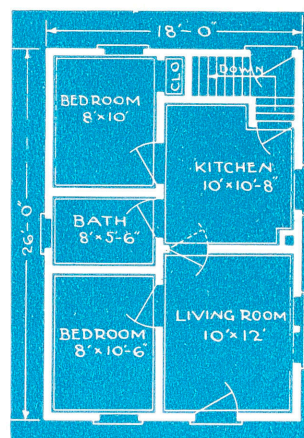

COLUMBIA D

Columbia D gives big living room and dining room, with two bedrooms and kitchen. This type is desirable for those who are unable to obtain water or sewerage for modern conveniences. Entry can be had to a basement by adding the enclosed Cellar Entrance illustrated at the top of page 18, or by a trap door and stair.

COLUMBIA J

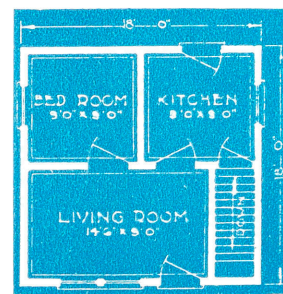

Columbia J is designed with inside cellar entrance and includes a two bedroom plan. It can be faced either way on your lot by transposing door and window in living room.

COLUMBIA K

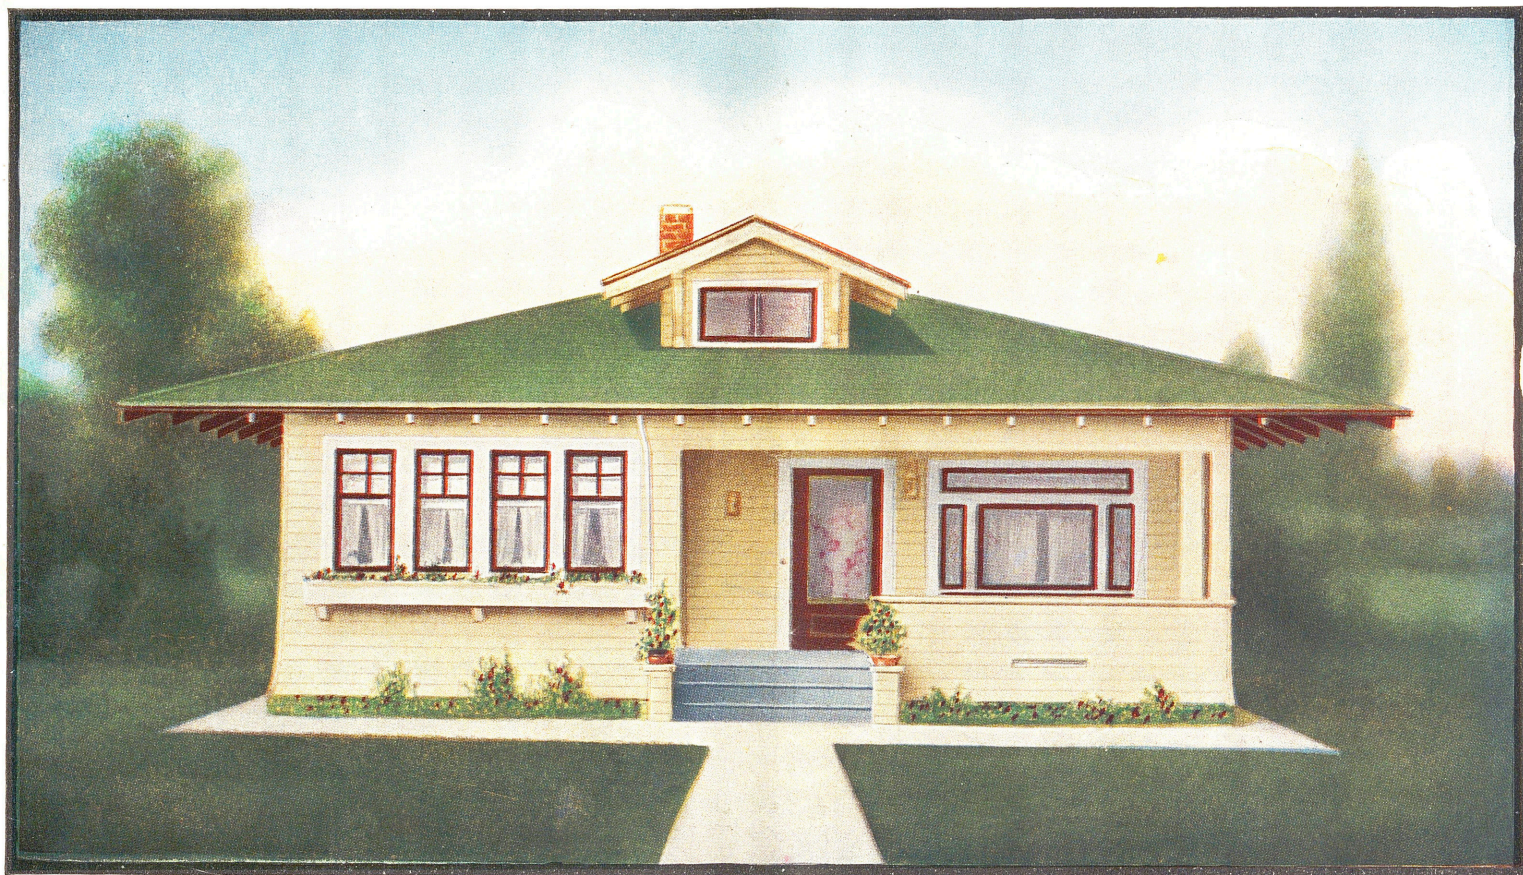

Plan K combines a large kitchen, an even larger living room and two fine bedrooms. The bathroom makes a fine pantry if a bathroom is not required. Note the grade entrance and cellar stairs.

COLUMBIA JUNIOR

The "Columbia Junior" provides a smaller home, size 18 feet square, at a lower price. The same verandah as illustrated on the Columbia, size 14 x 7 feet, may be ordered with the "Junior", or a 6 x 4 foot stoop with steps at \$19.00 and a hood over the steps at \$13.00 may be desired instead of the verandah.

This Attractive Bungalow—Unsurpassed for a Real Home

The Tacoma

THIS beautiful bungalow owes its unusually attractive appearance to its wide roof overhang, its numerous well proportioned and contrasting windows and the effective step rails and verandah battlement rail. The window flower box is also an artistic feature.

The verandah, 14 ft. x 8 ft., under the main roof, with battlement railing, readily screened in if desired, sheltered on two sides from disagreeable winds offers welcome and shelter to the arriving guest, and, supplied with porch chairs and hammock, is an

important feature of this bungalow in pleasant weather.

Floor Plan A has a living room, dining room, kitchen, two bedrooms and a bathroom, all good sized rooms, well lighted and conveniently arranged.

Floor Plan B has a large combination living room and dining room 14 ft. x 20 ft. and the kitchen is moved to the rear of the house.

In both plans the bathroom can be reached from either bedroom, without passing through living room or dining room.

Three Bedrooms can be provided in plan B if the bathroom is not required.

Hardwood flooring will be supplied, if desired, instead of our standard Edge Grain Fir flooring, at an added cost, which will be quoted on request.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

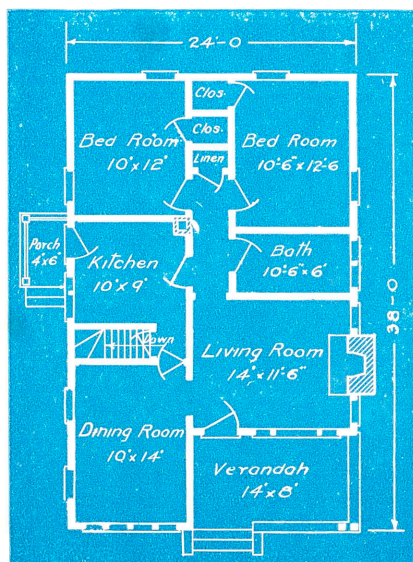

We will REVERSE the Plans of any Aladdin Home, without charge.

See Pages 16 and 17 for Specifications and Terms.

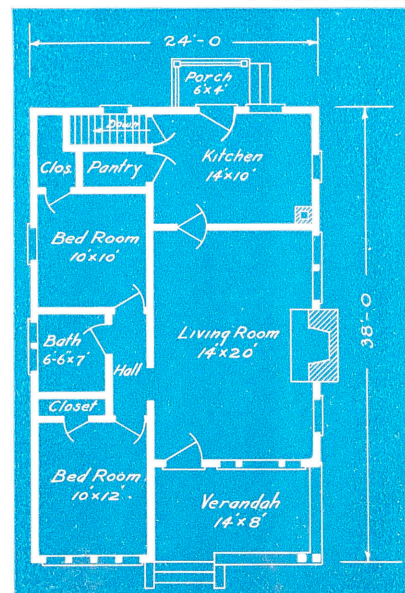

ALADDIN HOME-BUILDERS' SERVICE

We have, for each Aladdin Home, a Wonder Folio containing the most complete and detailed information which we would like to send to you. It will enable you to know just what the finished cost of your home is going to be, under your local labor conditions and rates of pay.

When you have chosen the home you prefer, it is important that you let us send a blueprint Foundation Plan, with details and quantities of materials required to build it, also instructions for laying out the building lines, making the excavation, putting in the walls and laying the cellar floor. It is possible that this work will be let to a contractor and it is important that the owner should know how the work should be done and what it will cost.

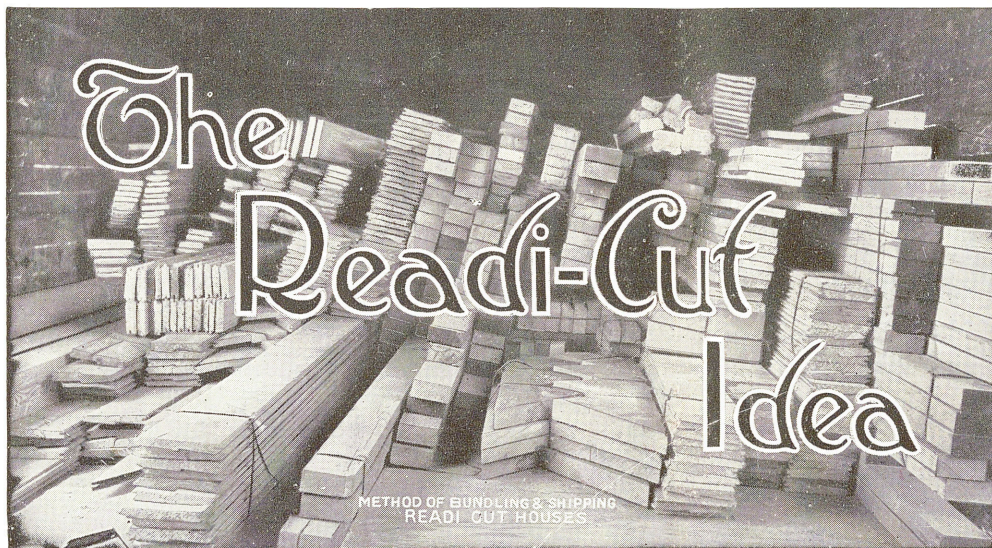

FLOOR PLAN A

FLOOR PLAN B

You Will Save One-Third on Your Finished Home

Where the Saving Comes In

First—We buy raw materials in large quantities, at the lowest prices obtained by big manufacturers.

Second—We buy for cash and cash commands a premium at all times.

Third—Our Mills are in the centre of lumber producing districts. Your lumber comes to you by the shortest route from the woods.

Fourth—In our mills we use high speed automatic machinery. Unskilled labor is quite good enough to put the major part of the material in place after it arrives on the building site.

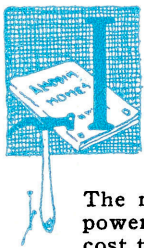

Fifth—We do in our Mills two-thirds of the actual labor.

Sixth—We cut in half the cost of the labor that is still necessary.

Seventh—We eliminate the waste pile. Around every completed house built by the old method there has accumulated a pile of waste material. This is due to four causes:

- (1) Careless designing.
- (2) Careless figuring of quantities.
- (3) Careless use of unsuitable lengths.
- (4) Careless errors in cutting.

The purchaser of an Aladdin Home buys and pays for exactly enough material to build his house, plus a small addition to guard him against delay due to any unfortunate accident on the job.

IN BUILDING by the old methods you would probably buy your window and door frames made-up—possibly you would have your main and basement stairs partly worked out—you would certainly buy your doors, columns, and newel posts finished, and you would have all your mouldings run at the mill. *That is—you would buy these items Readi-Cut, or partly so.*

The reason being that a mill equipped with modern power-driven machines can do better work at a lower cost than hand labor. Every bit of work that can be done by machines *should* be so done.

ALADDIN HOMES ARE COMPLETELY READI-CUT

Building an Aladdin Home you will make the same savings on your whole bill of material that you now plan to make on a few items.

It is the system that has made the great structural steel buildings possible—applied to frame construction.

Your complete home, from sills to ridge, will be turned out in our mills, Readi-Cut.

You will get all paint and hardware down to the smallest nail and hinge.

You will get all interior trim.

You will first receive foundation plans and instructions so that this work may be completed in advance of the shipment.

You will get a graphic set of plans on which is indicated the location of every piece of lumber in the house.

You will get a set of simply worded instructions which are so clear that the house is built with ease.

You get the complete house ready to be nailed together and occupied.

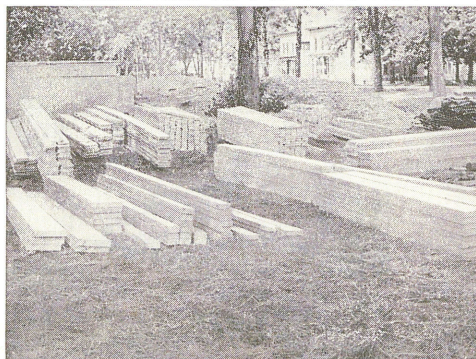

The work of building the house is two-thirds done before we ship the materials.

You are saved two-thirds of the work and the cost of the one-third that remains is cut in half.

Most of the work of placing the materials can be done by any man who can read and drive nails.

See *"Your Money Back Unless You Are Satisfied", our Guarantee on Page 31.*

Locating Each Piece Simplicity Itself

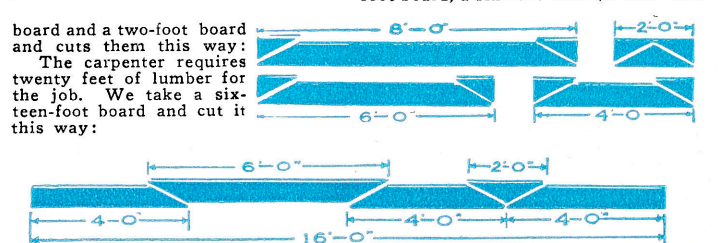

The Simple Plan of Laying Out Material on the Site

No difficulty whatever is experienced in locating the materials in the order required. By easily following the simple instructions, sent with every Aladdin home, for laying out the materials at the building site, it is only the matter of a moment to lay your hand on each piece as required, and to nail it into position. You save all the time figuring out, measuring and sawing each piece to make it ready for position. All this we do at our mill before shipping.

CUTTING THE "CUTTING COSTS"

We illustrate below one of the many minor economies which become possible in mills such as ours which are day after day repeating the same operations. It is natural that each workman should become an expert in his own particular duty, with the result that he discovers short cuts, and develops simple methods for the saving of time and material.

FOR EXAMPLE—TWENTY FEET OF LUMBER FROM A SIXTEEN-FOOT BOARD—HOW IT IS DONE

and get twenty feet of lumber at the cost of sixteen feet—and YOU get the saving.

We Absolutely Guarantee to Furnish Sufficient Material to Finish the House in Accordance with the Following Specifications.

THE MATERIALS WE USE

LUMBER—Every piece of lumber in an "Aladdin Home" has been carefully selected from thoroughly first-class stock, especially selected for quality. It is inspected by experienced men, and if not up to a high standard is not used. This is an extremely important point, and you should consider it carefully. Our facilities for buying high grades are unexcelled by any manufacturer in the country. This means much to the purchaser—to know that all the materials are the best, that they are well seasoned, sound, and of first quality throughout. All trim material is No. 1 stock and in common with Doors, Sash and Stairs is given a beautiful finish. You will have absolutely no cause for complaint of any of the materials supplied you. Can you say as much of those that can be purchased in your neighborhood?

HARDWARE—Our hardware comprises nails of all sizes and kinds required in doing a first-class workmanlike job—glass for windows and glass doors—galvanized iron flashings for valleys, chimneys, and window and door openings—window and door hardware in brush brass of suitable size and pattern.

PAINTS—For all our houses we supply the very best quality of ready-mixed paints or stains manufactured or sold in Canada—pure linseed oil—shellac—and where specified, the best quality of shingle stain.

PLASTER AND STUCCO—We supply wood lath for the interior but not the plaster materials, as we have found that more satisfactory results are obtained if the local plasterer supplies his own materials. Some owners prefer to use plaster board, or other wall finishes which can be included with the shipment if desired.

When the outside walls are to be stuccoed we supply lumber for sheathing, Aladdin Heavy Interwall Insulation and metal lath, but not the stucco materials, which are supplied and put on by the plasterer.

MASONRY—All excavation and masonry work must be done on the site. No money would be saved by our including stone, brick or concrete, for every section of the country produces these materials and prices vary but little. We furnish the foundation plans and will give you estimates, if desired, on the quantities of materials required. Fireplaces and chimneys can be placed wherever wanted in Aladdin homes.

The ALADDIN HOME at a Glance

An Aladdin Home is exactly the same house that would be erected by a builder in the old-fashioned way.

It is not "Sectional" or "Portable" and cannot be taken apart except as you would tear apart any other good house.

It is built from the same joists, studs, rafters, wall sheathing and other materials that a carpenter would use to build the house from the uncut material.

It is identical with the best frame, brick veneer or stucco construction.

Your saving lies in the elimination of waste and unnecessary profits and in the reduction of the amount of hand labor.

WE SELL

the complete materials, **READI-CUT** in our mills, for substantial, warm, comfortable, attractive homes. The materials come to the building site clearly marked and carefully sorted so that the work of erection goes forward with speed and precision.

GUARANTY

Read our complete "Money Back" guarantee on page 31.

YOU GET

Sills, cut to fit.

Joists, floor and ceiling, cut to fit.

Sub-flooring and paper, Main floor.

Rafters, all accurately cut to fit.

Studding, wall and partition, cut to fit.

Gable Studding mitred to slope of rafters.

Sheathing Lumber for outside wall, Shiplap cut to fit.

Siding, clear and knotless Cedar siding.

Lath, wood lath for interior.

Flooring, matched and bundled.

Shingles, XXXXX B.C. Cedar.

Porch Flooring, cut to fit and bundled.

Porch Columns, porch joists, hand-rail and balusters, cut to fit.

Steps for front and rear, cut to fit and bundled.

Outside Finishing Lumber, cut to length, bevelled and bundled.

Moulded Base Board and Quarter Round for interior walls.

Corner Base Blocks.

Bed Mould, Cove Mould, etc.

Skirting Board and Drip Cap for outside walls, except on some shingled houses.

Stairways for all two-storey houses, with the necessary newels, hand-rails and balusters, bundled, cut to fit.

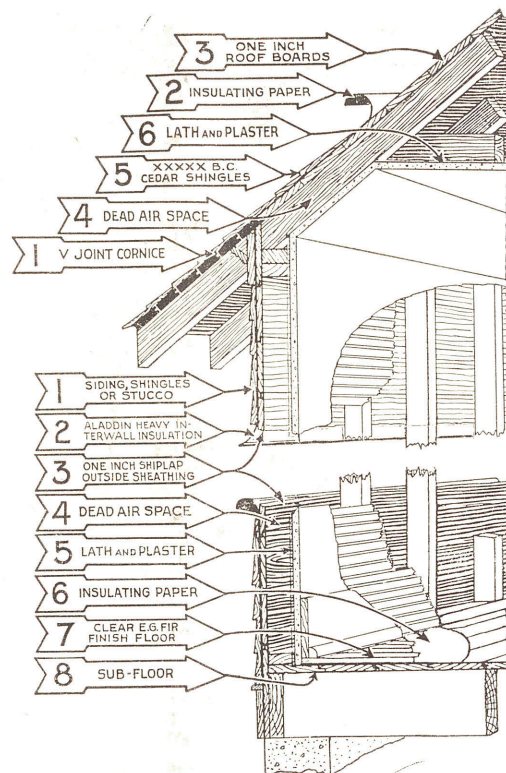

Doors and frame, and trim both sides, cut to fit and bundled.

Windows with sash complete, shipped glazed, frame and trim, cut to fit and bundled.

All Hardware, including mortise locks, knobs, hinges, window fittings, galvanized iron flashings, building paper and Aladdin Heavy Interwall Insulation.

Nails of proper size for the entire house. Galvanized nails for the XXXXX Cedar Shingles.

Paints, best ready mixed, for two coats for the woodwork of the outside walls, trim, verandah floor and steps, and for the woodwork of the interior trim.

OUR STANDARD CONSTRUCTION

We furnish sub-flooring for the Main floor and matched floors for both floors of all our homes, and our outside walls, as shown by accompanying cut, are the last word in building construction. A plate is laid on the sub-floor, and studding is set on this so that when the sheathing, Aladdin Heavy Inter-Wall Insulation and matched siding are placed on the outside of the studding, and the inside wall finish on the inside, the spaces in the wall between the studs are air tight chambers which insulate the building from extremes of hot and cold weather better than solid brick. This construction, known and approved by the Building Departments of the Cities, and the Insurance Companies as a "fire stop construction", prevents the circulation of air in the walls, and is ample to make our dwellings warm in the coldest climate.

Lath, Wood or Metal, supplied for outside walls when the house is to be finished with stucco.

Insulation, Aladdin Heavy Interwall Insulation over all exterior walls.

Tar Paper, under the XXXXX Cedar Roof Shingles.

SUMMER COTTAGES

If you are interested in a Summer Cottage see page 27

Foundations—When the house is to be placed on cedar posts or concrete piers we supply the necessary sills. When the house is to go on a masonry foundation, we supply a heavy centre sill only. We, of course, do not supply stone, concrete or brick for foundations, as they can commonly be purchased as cheaply in one locality as another. Do not start to put in your foundation without getting our blueprint Foundation Plan and our set of Instructions. The Instructions contain much valuable advice as to laying out of building lines the making of the excavation and the putting in of foundations of concrete, concrete blocks or bricks; also information and estimates of costs for concrete cellar floors, chimneys, fireplaces, etc.

Joists—Our joists are sized for height and cut to length; and are of a strength in accordance with the best engineering practice.

Sub-Flooring, for main floors, one inch shiplap to be laid diagonally on the floor joists, then heavy building paper, on the top of which the MATCHED finish flooring is laid.

Matched Flooring—Edge grained Fir, tongued and grooved.

If hardwood floors are desired, ask for quotation.

Studding—2" x 4", dressed to uniform size, placed on 16" centres. All walls and partitions have 2" x 4" sill piece and 4" x 4" cap. Headers are doubled over door and window openings. All studding is accurately cut to fit.

Exterior Wall Sheathing—The outside walls of all our dwellings are sheathed with 1" No. 1 matched shiplap dressed, cut to fit, which is covered with Aladdin Heavy Inter-Wall Insulation before the siding is put in place.

Rafters—2" x 4" and 2" x 6", all accurately cut to length, bevelled and notched.

Roof Sheathing—No. 1 dressed Hemlock or Fir, covered with tar felt. All roofs are close boarded.

Building Paper—Dense, tough fibre paper.

Shingles—XXXXX British Columbia Cedar. If Asphalt Slate Shingles are preferred they will be supplied at extra cost. See page 18.

Siding—First quality, clear and knotless bevel Cedar siding. Ask for quotation if the new type extra wide siding is preferred.

Porch Columns—Of size and detail illustrated in cuts.

Outside Finish—All No. 1 dressing stock, dressed four sides, and cut to length.

Window and Door Frames—Finest dressing stock.

Inside Wall Finish—Wood lath supplied for inside walls and partitions. Plaster Board, or any wall finish can be had if desired. Prices on Plaster Board will be furnished on request.

Doors—We supply two-panel, clear Fir doors throughout. All doors are morticed for lock sets. See illustration of doors and trim on page 19.

Interior Trim—Our interior trim is two-piece, a moulded casing and a heavy back band, finest dressing stock. The trim is cut to fit, ready to be nailed in place.

Moulded Base—We do not cut the base to fit, but we do better—we supply corner blocks, and anyone who has seen Base "coped" in at the corners will realize what an immense saving in time this means.

Finished Hardware—Our lock sets, hinges, window fittings, etc., are all of handsome Brush Brass.

Builders' Hardware—We supply nails of all necessary sizes in excess quantities, galvanized iron, valley and step flashings, and Aladdin Heavy Inter-Wall Sheathing, for insulation against heat and cold.

Glass and Paint.—We supply Star and Double Diamond glass for all windows and glass doors which are shipped glazed. We supply best quality ready mixed paint, linseed oil and shellac for two coats for the outside body of the house, outside trim, verandah floor and steps and verandah ceiling. For houses in Ontario, Quebec and the Maritime provinces we supply two coats of paint for interior doors, trim and base. For houses supplied to British Columbia and the Prairie provinces, we supply either two coats of paint or oil stain, shellac and varnish for the doors, trim and base.

TERMS

You may pay One-Quarter of the Purchase Price when you place your order and the Balance when the materials are delivered and you have had an opportunity to inspect them.

If you wish to send in the Full Purchase Price with your order you may deduct the Cash Discount of \$10.00.

If you are planning to build with mortgage loan money, one-quarter of the purchase price may be paid with the order and the balance when the loan money is available.

We pay the Railroad Freight on all houses (British Columbia excepted).

REFERENCES.—The Canadian Bank of Commerce or any Aladdin Home Owner.

Extra Features Obtainable for ALADDIN HOMES

STORM SASH AND STORM DOORS

Storm doors are fitted with a light of glass. Storm sash are one and three-eighths inches thick and are of the best quality and workmanship. We supply these sash either with a lower rail ventilator, or with patented hangers so that the sash can be opened outward. The latter type has the advantage that they are more easily put on from the inside of the house. In the case of a bungalow where all the windows are on the first floor, we would recommend the lower-rail ventilator.

Ask for price on storm doors and sash complete for the house in which you are interested.

SCREEN DOORS, SCREEN SASH AND VERANDAH SCREENS

Our screens are made from heavy stock; the wire netting is tightly stretched over the frame, securely fastened in place, and the edge covered with a neat half-round strip. In a house fitted with a set of Aladdin screens the problem of keeping out flies and mosquitoes is settled for a term of from ten to twenty years. These screens should not be confused with these cheap affairs which have to be renewed, if not every season, at least once in three years.

We will quote on application on a complete set of door, window or verandah screens for any house in our Catalogue. The price will in each case include all necessary hardware. For sliding sash windows, unless otherwise specified, we quote screens for lower sash only.

BASEMENT DOORS, STAIRS AND WINDOWS

Basement Door and Stairs.—Basement door and stairs are only included in the house at the price quoted when they are included in the floor plan.

Basement Windows.—Basement windows, complete with frame, glass and hardware will be included in shipment at price quoted. These sash have three lights, each 10 x 16 inches.

It is not necessary to forward the cellar frames before the house is shipped for by leaving the necessary wall openings, the frames can be set in after the foundation has been erected. Price, each\$3.50

VERANDAHS

Verandahs are quoted separately for those homes from which they can be omitted without interfering with the construction or symmetry of the house itself. Inset verandahs and those shown on the illustrations, but not quoted separately on the price list, are included in the listed price of the home.

SLIDING DOORS, MIRROR DOORS AND FRENCH DOORS

An extra charge is made where a trimmed opening is replaced by a pair of sliding doors. Price\$31.00

French doors, usually with 15 lights of glass, will be supplied at an extra charge. Price, glazed, including hardware\$25.00

A panel door fitted one side with a full length plate mirror will be supplied in place of any door for an additional cost. Price\$19.00

LUMBER FOR FORMS

It is not necessary to purchase additional lumber for building forms for concrete foundation walls. The lumber we supply for Aladdin Homes can readily be used for this purpose, and afterwards in the house itself.

FOUR-COLORED SHINGLES FOR ROOFS

If four-colored shingles for the roof, such as illustrated on the Tuxedo, page 2, are desired, instead of standard XXXXX Clear B. C. Cedar Shingles, which are regularly supplied, they will be furnished at an added cost which will be quoted upon request.

ASPHALT SLATE SHINGLES

If Asphalt Slate Shingles, or other roofing is preferred, instead of XXXXX Clear B. C. Cedar Shingles regularly supplied, it will be furnished at an additional cost, which will be quoted for any Aladdin House, upon request.

SHINGLE STAIN

Shingle stain for the roof is not included in our standard specifications, but will be supplied for any home at an added cost.

HARDWOOD FLOORS

Hardwood floors of a fine quality will be furnished for any of our homes, at an additional cost, which will be quoted upon request.

CLOSET DOORS

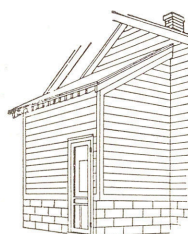

All doors shown on the plan as in illustration are included with the materials of the house.

On a few homes where openings are shown as in the illustration alongside, framed openings are provided. If desired, doors complete with hardware can be had at a price, each of\$6.00

WEIGHTS AND PULLEYS

If desired to hang the sliding sash with weights and pulleys, we will provide them and also the necessary box window frames, at an added cost which will be quoted for any Aladdin home on request.

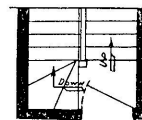

ENCLOSED CELLAR ENTRANCE

Cellar Entrance

An enclosed outside cellar entrance can be provided for any of our houses. Many customers prefer to have access to the cellar without the necessity of going through the house, and still do not want to be compelled to go out into the open air to get to the cellar. To such, this addition will appeal strongly. This addition, size 7 x 7 feet, is designed to afford a grade cellar entrance and can be attached to any Aladdin house. All material necessary for the complete addition is included, together with steps to kitchen and steps to basement. Shiplap is provided underneath the siding or shingles on the walls.

Price complete\$98.00

Cellar Entrance Floor Plan

TRAP DOOR AND CELLAR STAIR

A trap door and cellar stair can be placed in the kitchen of any home in which a cellar stairway is not provided, should you decide to put the house on a masonry foundation with cellar. The cost of the trap door and stair is small. Price\$10.00

KITCHEN CABINETS

The No. 3 Kitchen Cabinet is supplied as illustrated, in two separate sections. The upper section, 5 ft. in length, consists of a set of shelves each 10 inches wide for dishes, enclosed by glass doors. The lower section, also 5 ft. in length, 1 ft. 6 in. wide and 3 ft. high, consists of two cutlery drawers, two shelves for pots and pans enclosed by panelled doors, and a tilting flour bin.

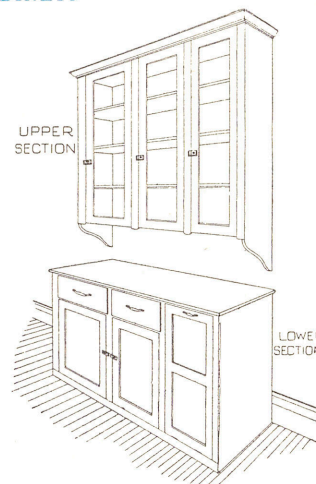

Upper Section, price\$23.00

Lower Section, price\$21.00

No. 2 Kitchen Cabinet is similar to No. 3 but narrower, it is also supplied in an upper and lower section. The upper section is 3 ft. 6 ins. wide with two glass doors. The lower section is 3 ft. 6 in. wide and has two shelves enclosed by panelled doors. The two sections are quoted separately. No. 2 Cabinet does not include flour bin.

Upper Section, price\$19.00

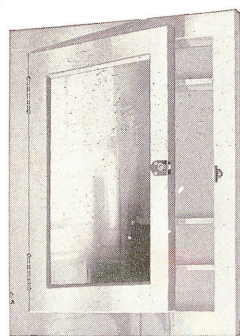

Lower Section, price\$18.00

No. 3 KITCHEN CABINET

MEDICINE CABINET

This Sanitary Inset Medicine Cabinet is designed to be built into the partition of the bathroom. The inside dimensions are: Width, 1 ft. 4 in.; height, 1 ft. 9 in.; depth, 4 in. It is fitted with three shelves and a plate mirror door. Complete with mirror and hardware. Price\$7.00

Medicine Cabinet

Here's an attractive little feature that may be added to either the front or rear entrance of any Aladdin house. It is of the rustic type with exposed rafters and attractive brackets. It affords excellent protection during inclement weather.

Hood, price\$13.00

Stoop, price\$19.00

GABLE ENTRANCE HOOD AND STOOP

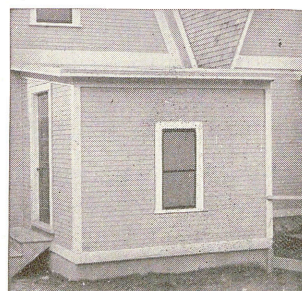

REAR ADDITIONS

Designed for use with any home

To make the designs illustrated more flexible, we are prepared to furnish an assortment of lean-to additions, which are built on to the rear of our houses, increasing the ground floor space, so that other use can be made of the space shown on the Floor Plan.

These Additions are furnished either with siding, or shingles, or for stucco, as desired, with shiplap and Aladdin Heavy Interwall Insulation. Price, size 10 ft. x 12 ft.\$186.00

ADDITION No. 1

EXTRA HEAVY WALL INSULATION FREE

Every Aladdin Home is specially INSULATED to keep IN the heat and keep OUT the cold. This is done by putting

ALADDIN

HEAVY INTER-WALL INSULATION over all exterior walls, *outside* the sheathing lumber and between it and the siding or stucco, or whatever wall finish is used.

IT SEALS THE HOME—TIGHT.

NO AIR OR DRAFTS CAN PENETRATE IT.

HEAT AND COLD CANNOT GO THROUGH IT. It is THICK, HEAVY, WARM insulation.

We supply this *extra* warm overcoat for your new home!

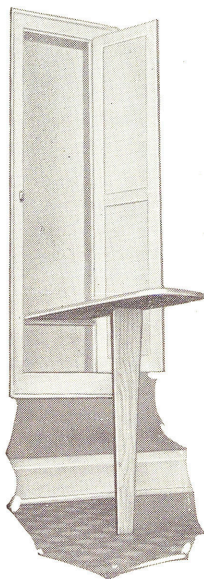

ASK US TO SEND YOU A FREE SAMPLE OF THIS REMARKABLE, HEAVY INSULATING MATERIAL.

We want YOU to test it out—just try to tear it or break it. You will realize how tough and warm it is.

Wrap up a block of ice in this insulating material and leave it in a warm room. The heat cannot penetrate through, and it seems as if it will never melt.

WE SPARE NO MATERIALS, OR EFFORTS TO ENSURE THAT YOUR HOME WILL BE SUPER-WARM AND SUPERIOR IN CONSTRUCTION.

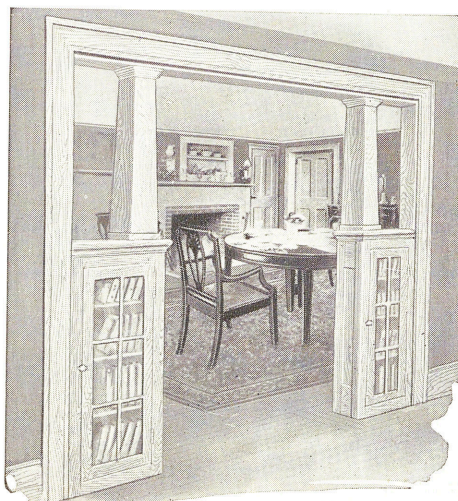

FOLDING IRONING BOARD FREE

No home is really complete without an Ironing Board which disappears into the kitchen wall when not in use.

So, EVERY Aladdin Home is equipped FREE with our FOLDING IRONING BOARD, as illustrated. This handsome fixture is inset, when building, in the most convenient position in the kitchen wall. The ironing board is hinged, and swings down, ready for use in an instant when the door of the fixture is opened. A space is provided at the bottom for the iron.

It is just another instance of the careful thoughtfulness for YOUR convenience and comfort supplied throughout by Aladdin.

COLONNADE WITH BOOKCASE AND CHINA CABINET

FINEST OF DOORS AND INTERIOR TRIM

We furnish the best grade of clear Fir doors.

The interior doors are two panel, as illustrated—the handsomest door made. The exterior doors are also Fir, of design as shown in the illustration of the home.

The interior trim is two piece,—a moulded casing and a heavy backband; the 8" baseboard is moulded to match, and all are run from high grade dressing stock.

The illustration shows this handsome interior trim and door, also the finishing hardware of distinctive modern pattern, supplied with all Aladdin Homes.

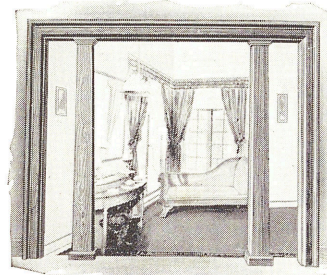

COLONNADE WITH BOOKCASE AND CHINA CABINET

The Colonnade, when built into a framed opening between living room and dining room or between living room and hall, is not only a very handsome fitting but is also very useful as the two cabinets are each fitted with glazed doors on both sides so that it is possible to use the living room side for books and the dining room side for china. The colonnade requires an opening at least seven feet wide and preferably eight feet wide. Price \$62.00

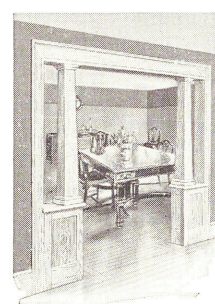

COLONNADES

COLONNADE No. 1 can be supplied in place of a framed opening between hall and living room or between living room and dining room in any home. The columns give an interesting and impressive effect.

COLONNADE No. 1

Price, \$11.00

COLONNADE No. 2

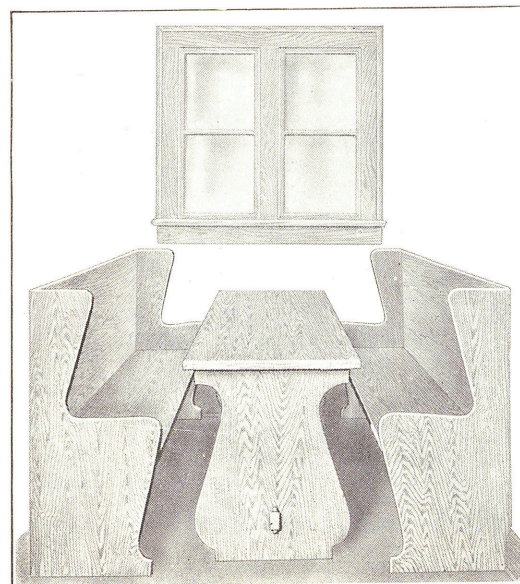

COLONNADE No. 2 consists of a pair of panelled pedestals surmounted by square taper columns with caps and bases. It is particularly effective in the opening between hall and living room. It can be had in place of any framed opening at a small additional cost.

Price \$19.00

BREAKFAST NOOK FURNITURE

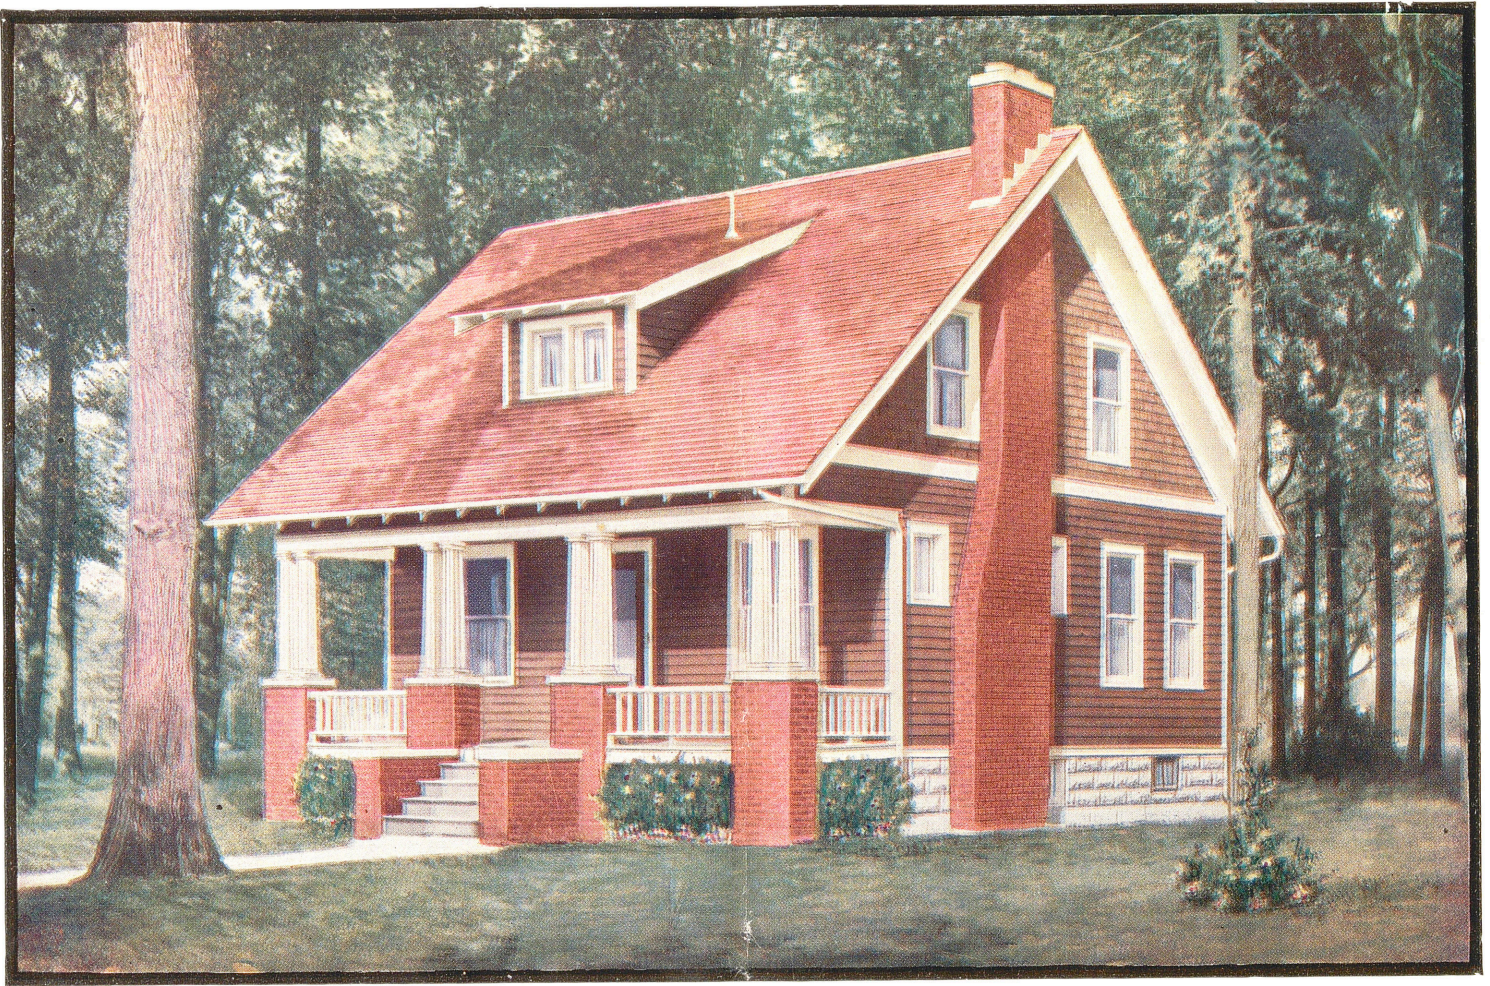

The furniture consists of a table and two benches of attractive design. They can be used in a corner of the kitchen, on the verandah or on a sun porch. Makes a delightfully cozy spot for breakfast or tea or any of the daily tasks which can be done sitting down. The table is 1'-8" wide, 4'-0" long and 2'-6" high. The benches are 1'-4" wide, 4'-6" long and 3'-3" high to top of back.

They are furnished in dressing stock and shipped knocked down. Price.....\$40.00

BREAKFAST NOOK

Here's a Beautiful Home—Its Cost is Remarkably Low

The Holmwood

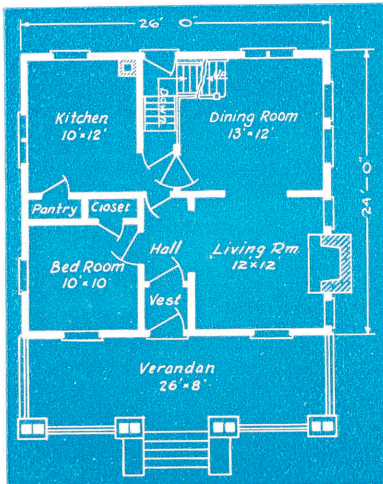

THE "HOLMWOOD" combines a number of very attractive features. It is the most economical type of home that it is possible to build as it is only one storey in height, the space under the high pitched roof being utilized for a very commodious second floor. It is the semi-bungalow type, an adaptation of the popular California bungalow to our Northern climate. Note how free the roof is from any thing in the nature of a snow trap.

The arrangement of the floor space is exceptionally good. The front door opens from a 26 ft. x 8 ft. verandah to a vestibule and hall from which the living room and dining room are entered through a wide framed opening. The entering guest has an immediate impression of spaciousness. To the left of the living room is a bedroom which may be used as a den or

sewing-room. The main stair rises from the rear of the dining room with the basement stair below it permitting a rear-grade entrance giving access to both cellar and kitchen. A pantry opens off the kitchen. Three quarters of the kitchen wall space is clear of doors and is available for the placing of stove, sink, table, and cabinet.

If hall and vestibule are not required they can be eliminated and space included in living room.

The second floor has three good bedrooms, each with a closet, and a bathroom conveniently located at the head of the stairs. The bathroom is directly over the kitchen so the plumbing charges will be moderate. The "Holmwood" is our designer's ideal of a beautiful home with an excellent floor plan at a minimum price.

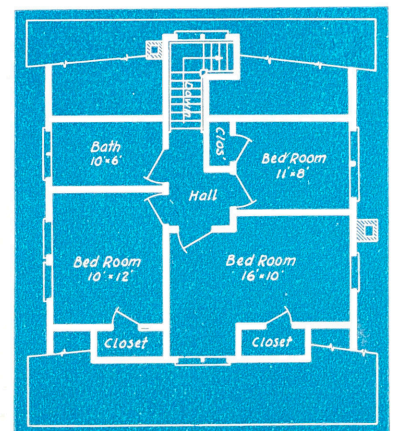

PLAN OF FIRST FLOOR

It is sometimes preferred to have the stairway of the Holmwood open from the main hall. We have a special plan so arranged which will be sent upon request.

PLAN OF SECOND FLOOR

We will REVERSE the Plans of any Aladdin Home, without charge.

So Many Have Chosen The GRANGE X—You'll Surely Like It

The Grange X

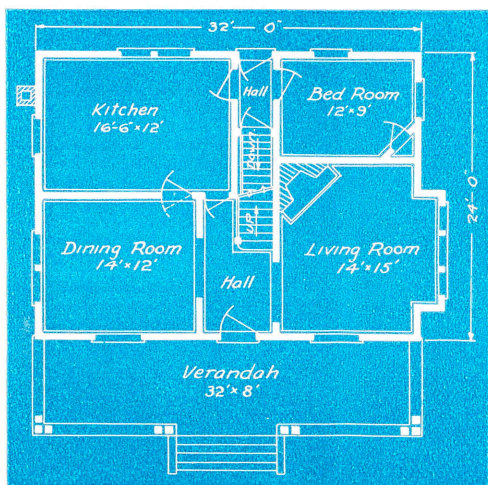

THIS design offers a happy solution of the problem of the man who wants a bungalow, but needs the roominess of a two-storey home. It is a design admired by everyone.

The interior arrangement makes it a very desirable town or farm home.

The three essential ground floor rooms, living room, dining room and kitchen, are all large and well lighted. If a

pantry is desired, it can readily be arranged at the left end of the kitchen. The front door is readily accessible from all rooms in the house.

Four large bedrooms and bathroom, each with its own closet, and the balcony from the front bedroom, make an especially good second floor plan of large capacity. If a den or farm office is required, it can be had by utilizing the first floor bedroom.

PLAN OF FIRST FLOOR

Generally, the foundation extends out underneath the bay window in the living room, which makes the four wooden brackets unnecessary.

If single light sash are preferred to the divided light sash for the upper half of windows, they can be furnished that way.

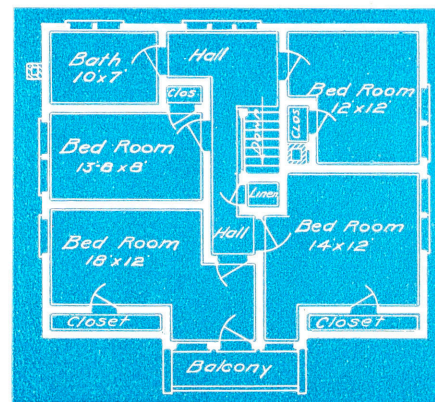

We furnish plans and instructions free with every *Aladdin* home purchased. These are not for sale, and are furnished only when a complete house is purchased.

Hardwood flooring will be supplied instead of the standard Edge Grain Fir Flooring, if desired, at an added cost,

which will be quoted on request.

We will REVERSE the Plans of any *Aladdin* Home, without charge.

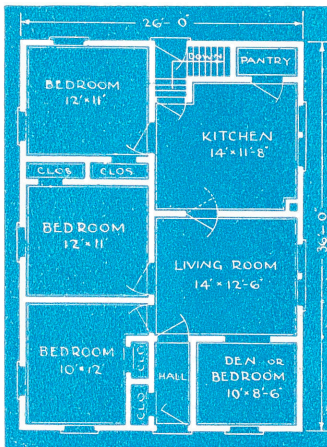

PLAN OF SECOND FLOOR

The Yale

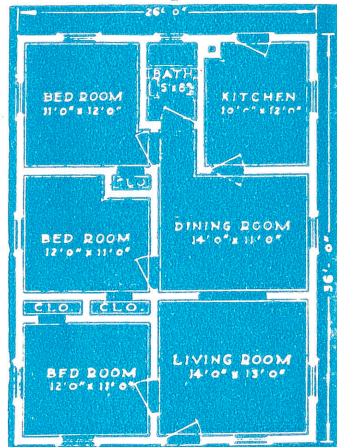

Dignified simplicity was the aim of our designer in creating the "Yale". Four different plans are shown. Each one has special merits and we are sure you will find one that exactly suits the needs of your family. When you have chosen the Floor Plan that is most satisfactory, write us for the Wonder Folio. This service is free and does not obligate you in any way.

The verandah, size 22 x 8 feet, is quoted separately, so that it may be ordered with the house, or added later, as desired. Verandah columns, extending down to the verandah floor will be furnished, if preferred, without additional cost.

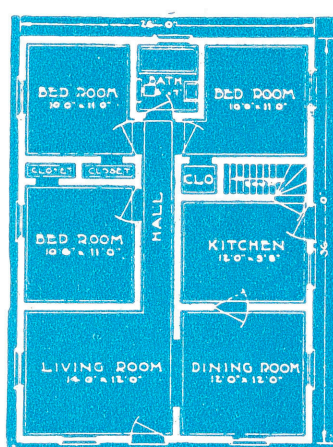

THE YALE—PLAN H

Imagine a large living room, with a den opening off it through a wide arch, a spacious kitchen with separate pantry, three big bedrooms each with closet, a vestibule and coat closet, inside the front door, and a grade entrance and basement stairs at the rear!

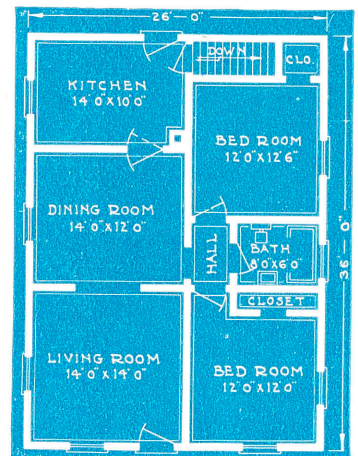

THE YALE—PLAN C

Complete conveniences for a family of six. The living room has unusual wall space, and opening through an arch to the dining room there is an impression of spaciousness which is the result of a depth of 24 feet. Note the three large bedrooms each, with closet.

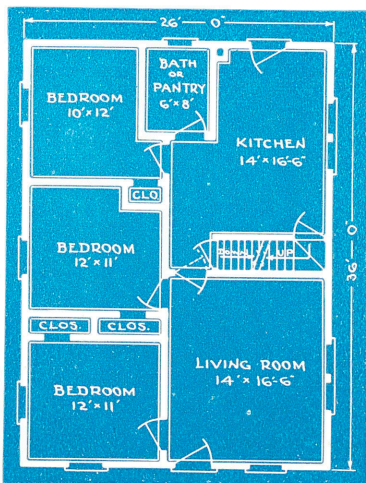

THE YALE—PLAN E

Here is a new type Yale which includes a central hall separating the rooms into two groups of three on each side. The bathroom is located at the end of this hall. A large living room, dining room, three bedrooms, kitchen, bath and closets with inside cellar entrance.

THE YALE—PLAN J

Within the compass of 26 x 36 feet there is included a generous sized living room and dining room, two bedrooms with fine closets, a large kitchen and good bathroom. The location and arrangement of the rooms are ideal.

FIRST FLOOR PLAN
THE YALE THIRTY

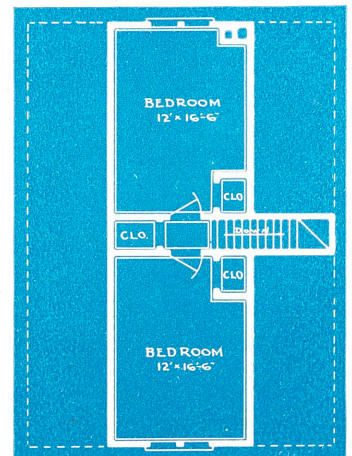

The Yale Thirty

has an upstairs — two additional bedrooms are available on the second floor.

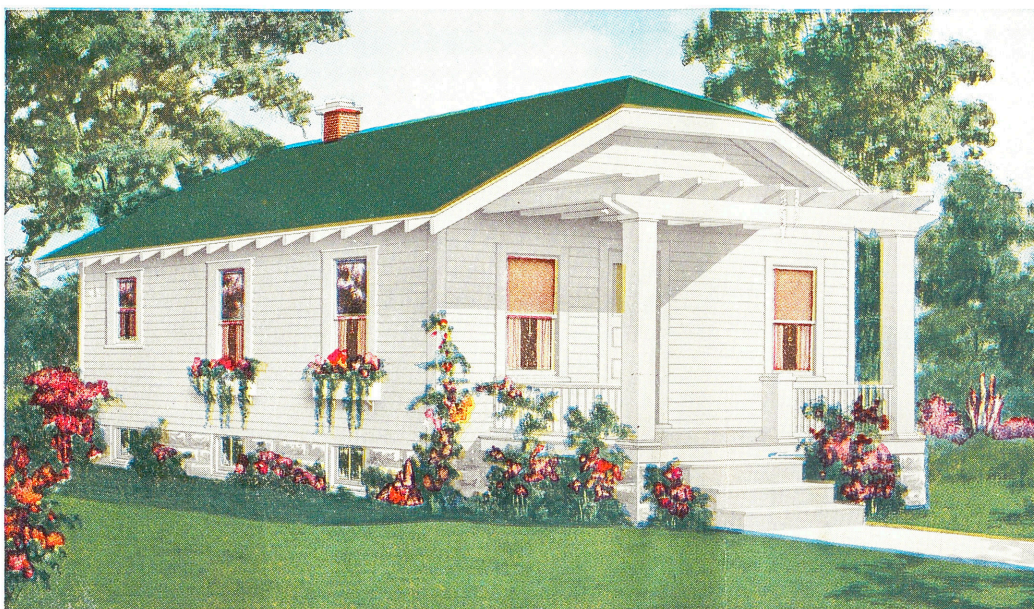

So often we have been asked to arrange a second floor for the "Yale", to provide additional accommodation upstairs, that we are now showing the "Yale Thirty". On the first floor there is a large living room and kitchen, three bedrooms each with closet, and a bathroom. On the second floor there are two bedrooms, each with closet, and a linen closet. Materials for finishing the second floor are quoted separately and this work can be done at a later date if you wish.

Please do not ask to have the Second Floor with any other floor plan of the "Yale". Owing to the position of the stairs, it is only possible to provide the upstairs with the Yale Thirty.

THE SPANISH RIVER PULP AND PAPER MILLS, LIMITED SAULT STE. MARIE, CANADA

Aladdin Homes Co., Ltd.,
Toronto, Canada

Dear Sirs:—

We would like to express our general satisfaction with the types of Aladdin houses erected for this Company at Espanola. Last year you constructed for us 37 houses at Espanola and from our experience with them we felt that by this type of construction we were able to get a uniformly good design, first class service, and prompt delivery, and that the material used in the construction of these houses is first class in every way; in view of our last year experience, we have this year placed an *additional order for 51 houses.

Yours truly,

SPANISH RIVER PULP AND PAPER MILLS, LIMITED

Per C. H. L. JONES, Manager.

*Subsequent orders brought the total up to 130 houses.

ALADDIN HOMES—BEST THAT MONEY CAN BUY

An Aladdin Home differs only in one particular from the very best house that the most capable builder erects. It is built of the same joists, studding, rafters, wall sheathing and siding, flooring, doors, windows, stairs and trim that are built into the best houses you have seen.

The only difference between an Aladdin Home and the best house constructed in the old-fashioned way is the *method* by which the finished result is accomplished, at much

lower cost. Aladdin Homes are BETTER than ninety per cent. of the houses regularly built in any community.

The low cost of Aladdin Homes is achieved mainly by so arranging all designs to cut without waste, cutting our materials in large quantities by the most modern machinery, and by using all raw materials in volume at the lowest possible price consistent with the high Aladdin standard.

TWENTY YEARS OF ALADDIN SUCCESS

Aladdin Homes—the Aladdin Read-Cut System—may be new to you, but it was planned and put in operation twenty years ago. Its merits and its wonderful simplicity were immediately recognized by the public. The result is that each year shows a big increase in the num-

ber of Aladdin Homes erected and in the large number of delighted Aladdin Home owners.

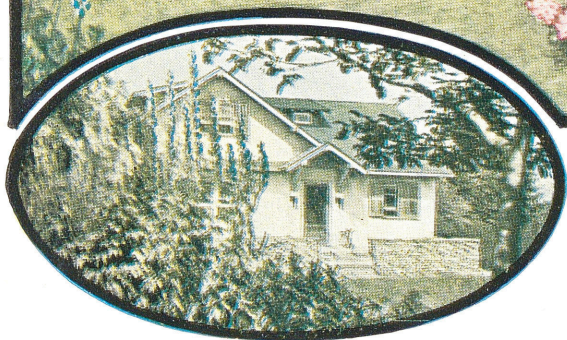

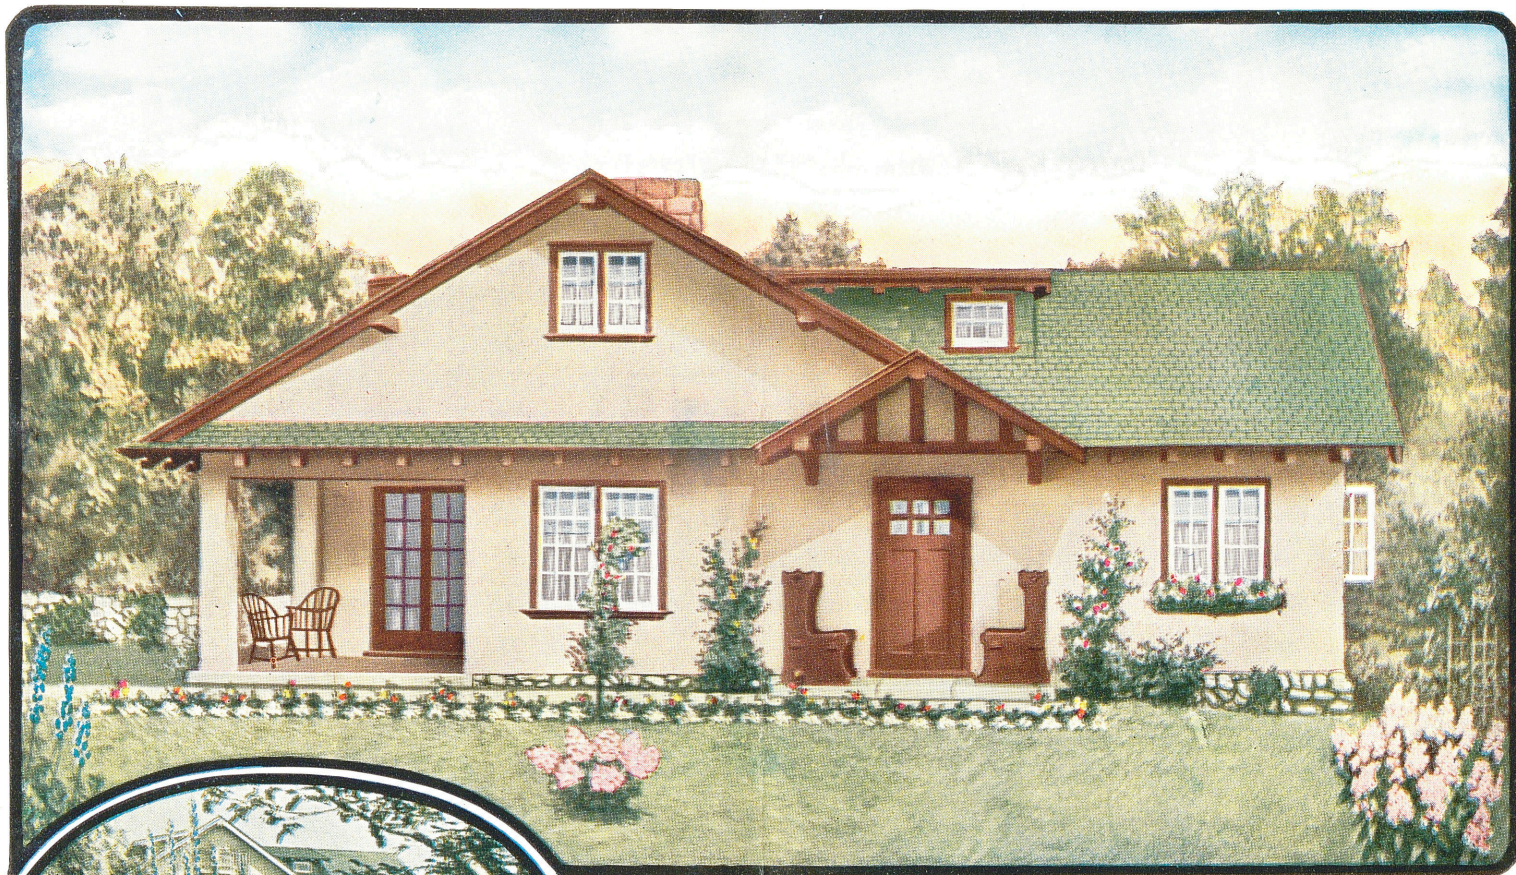

You know that this wonderful growth would not be possible unless real service was given—unless honest value, square business methods and integrity prevailed—unless Aladdin customers became Aladdin friends.

THE ALADDIN SYSTEM IS BUILT ON THIS PRINCIPLE

Modern power-driven machines can do better work at lower cost than hand labor. Then every bit of work that can be done by machines should be so done. The steel worker with a little hacksaw trying to cut and fit the steel girders of the modern skyscraper would be no more out of place than the modern carpenter cutting sills, joists and rafters. The skyscraper framework

is cut to fit by machines in the steel mills, marked and numbered, ready for erection. The lumber of the Aladdin house is cut to fit by machines in the Aladdin mills, marked and numbered ready for erection. The steel system is thirty years old—the Aladdin System is twenty years old.

The Victoria XVII

The Victoria XVII

(Stucco or Frame)

THE bungalow has come to stay. It is a type of architecture growing more popular with people of taste; in great favor on the Pacific Coast its charms and advantages are rapidly bringing it in demand in the East. The house is shown stuccoed, but where soft effects are desired the shingled wall is best. The floors of piazza and front porch are of concrete or flag stones.

The beautiful lines, the hooded entrance with its Colonial benches and door, the divided light windows and French doors in the dining room and side of the living room, make this one of the best types of the bungalow designer's art. Note the living room entered through the framed archway on the left of the hall. To the right is the massive fireplace at the rear of the splendid 14 ft. x 20 ft. room with its mullioned front windows and French doors leading to the piazza and framed archway to the dining room.

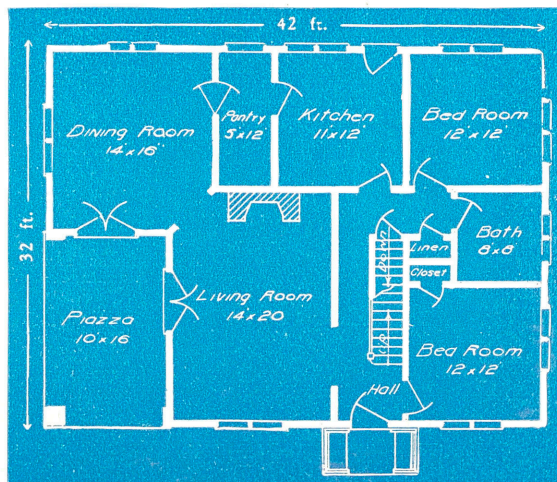

FOR SMALLER VICTORIA PLANS SEE
BOTTOM OF PAGE 25

**ASK

WONDER
FOLIO**

The Victoria makes a beautiful home with a splendid floor arrangement. On entering the front door an immediate impression of the size of the house is had from the fact that through the archway to the living room you can see out and through the glass doors to the piazza and dining room, a distance of about forty feet to the rear of the dining room.

An additional bathroom is sometimes required on the second floor. We have an alternative second floor plan that provides for this bathroom upstairs, in addition to the three bedrooms. If interested, send for this plan.

We will **REVERSE** the Plans of any Aladdin Home, without charge.

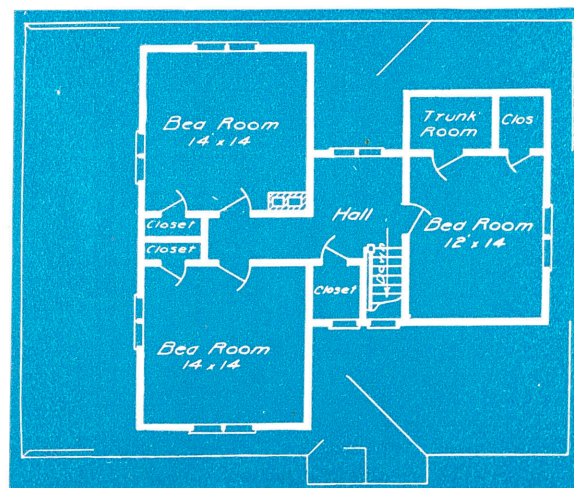

PLAN OF FIRST FLOOR

As an alternative, provision can be made for a wash room and toilet upstairs, by placing a partition and door across the rear of the upstairs hall. The cost of the necessary materials for this purpose is \$14.00.

This home is usually built on a basement foundation and in the catalogue illustration the front has been filled in to show but little of the front foundation wall.

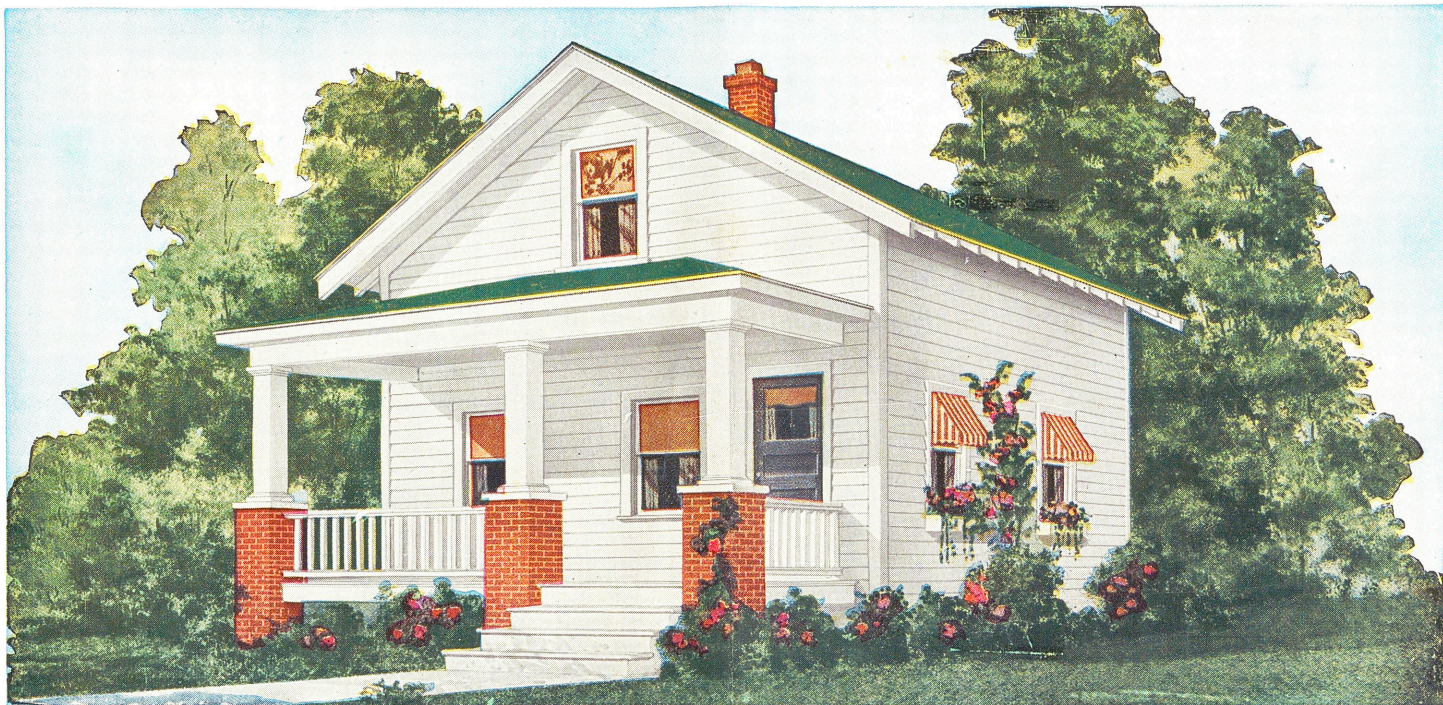

If desired, the veranda will be taken into the main body of the home and changed to a heated sun room, with windows on both sides, for which the added cost for the required materials, including floors, would be \$160.00.

Unless otherwise instructed, standard sliding sash windows with the upper sash divided into small panes, will be supplied for the Victoria.

PLAN OF SECOND FLOOR

Remarkable for Its Low First Cost

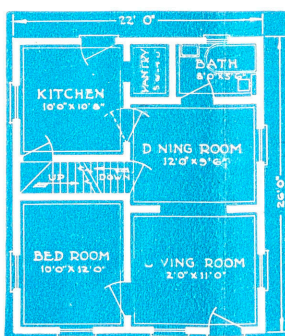

The Marigold

THE MARIGOLD offers a storey and a half home that can be built at the very lowest cost. The price quoted provides the home with the first floor finished in the same way as all our other houses are finished. The second floor is unfinished. The Marigold can be furnished in either of the first floor plans shown below. Regardless of which plan you select, it is possible for you to arrange for two extra bedrooms on the second floor. Our suggestion of a convenient and practical arrangement is shown opposite the first floor plans. When you purchase the home if you wish us to also include flooring and the other materials for finishing the second floor in accordance with our suggestion, we will be glad to do so at the additional price quoted.

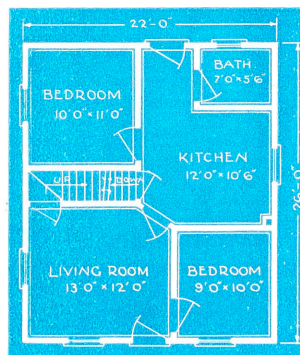

The verandah is 20 x 8 feet, spacious and attractive, setting off the house to advantage. It is quoted separately as it is sometimes desirable to build it later. If preferred, verandah columns extending down to the verandah floor will be supplied without additional cost.

See Pages 16 and 17 for Specifications and Terms.

SECOND FLOOR PLAN

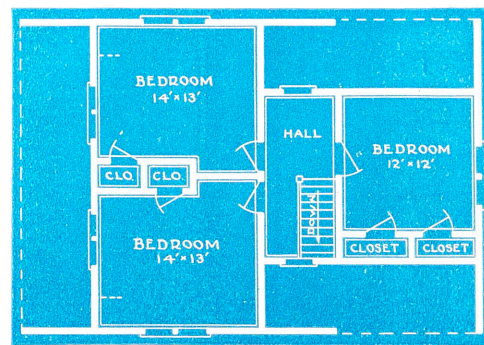

Victoria 109
PLAN OF FIRST FLOOR

THE VICTORIA 109

An exact reproduction of The Victoria XVII., but reduced in size to 38 x 26 feet, with a proportionate reduction in the size of the rooms, and at lower cost. Designed for the many who are in love with The Victoria but do not require such a large home.

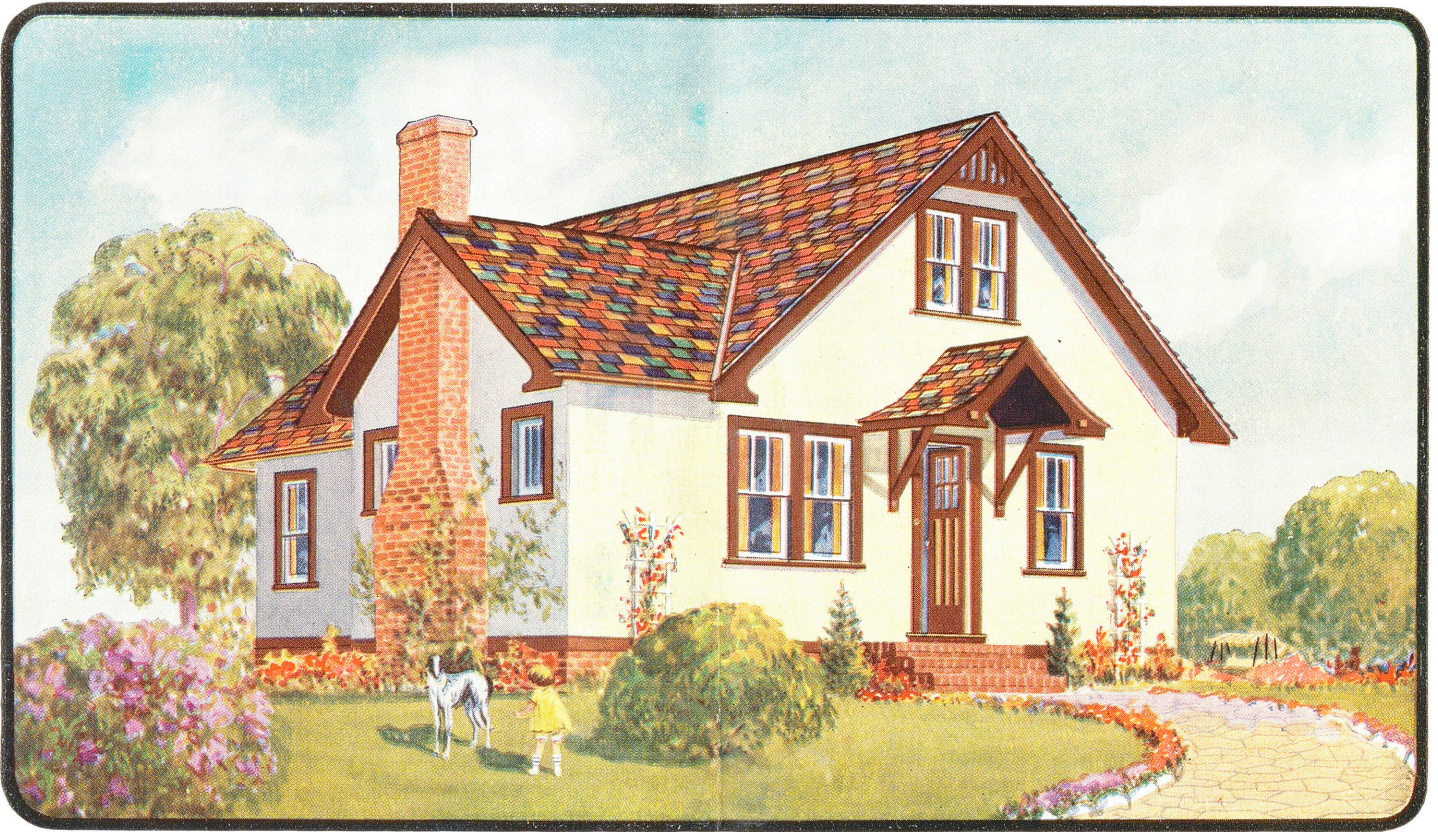

Provision can be made for a wash room and toilet upstairs by the placing for a partition and door across the rear of the upstairs hall. The cost of the necessary materials for this purpose is \$14.00.

If desired, the verandah will be taken into the main body of the home and changed to a heated sun room, with windows on both sides, for which the added cost for the required materials, including floors, would be \$120.00.

Victoria 109
PLAN OF SECOND FLOOR

An Aladdin Masterpiece—with a Wonderful Floor Plan

The Windermere

THERE isn't a small room in the "Windermere". Plenty of room *everywhere* and that's something seldom found in a home you can build at such a low cost as the "Windermere".

Have you noticed the attractive roof lines, the rose-trellises, the clever treatment of the peak in the gable end—every little detail perfect and harmonized to ensure an ensemble which even the most critical architect or artist will freely praise.

Just study the floor plan of this remarkable home. A vestibule at the front door gives access to the front hall, with spacious living room to the left and dining room to the right.

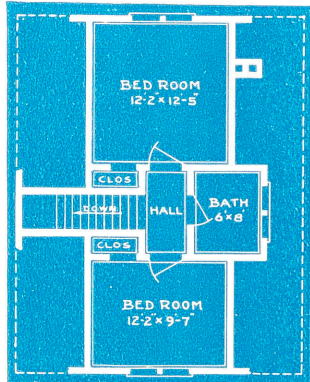

Three bedrooms, all of large size and each with a clothes closet, a kitchen, almost as large as the living room, completes this home which for compact arrangement and roominess cannot be equalled.

Although shown with stucco exterior walls, this home may be shingled or finished with siding, if preferred.

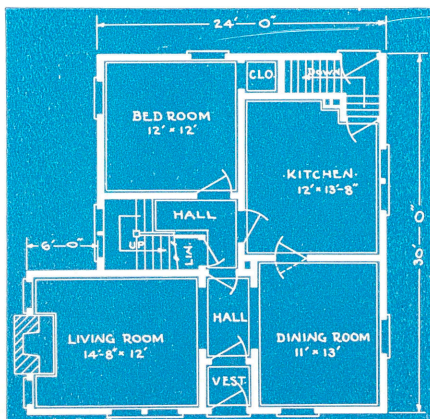

For those who prefer, outside the front door, a stoop and steps of wood (instead of making these of brick, as illustrated, or concrete) we will include these, ready-cut, for \$19.00.

Unless otherwise requested all Aladdin Homes are roofed with XXXXX Clear B. C. shingles. If the "Four Color" shingles shown in the illustration are wanted, they will be furnished at a small added cost which will be quoted on request.

See Pages 16 and 17 for Specifications and Terms.

A Home of Dream-like Perfection— The Bluebird — Two Sizes — Three Plans

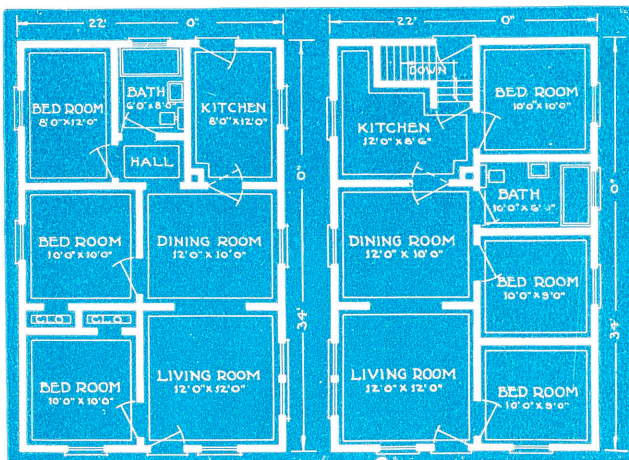

Bluebird 2 and 3

Bluebird Twenty

THE BLUEBIRD is a home of beautiful proportions, wonderfully convenient floor plan and well-balanced arrangement. To own it insures the fullest satisfaction and happiness—hence its name. It will fully measure up to your highest expectations, from the strength of its sturdy timbers to the charm and beauty of woodwork and finish. Three different floor plans are shown below.

Note particularly that the “Bluebird Twenty” is especially adapted for a narrow lot, as it is 20 feet wide, two feet less in width than No. 2 and No. 3, which are each 22 feet wide. It takes the same verandah, size 16 ft. x 8 ft., as the other Bluebird designs. The verandah is quoted separately. If desired, verandah columns extending to the verandah floor will be supplied without additional cost.

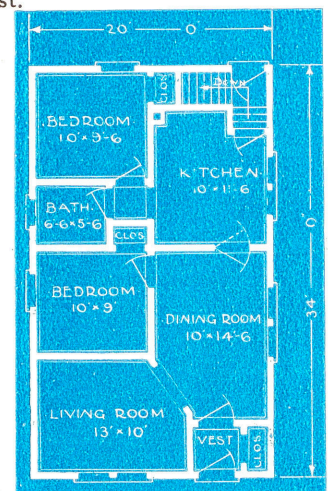

BLUEBIRD No. 2

BLUEBIRD No. 3

CAN WE SEND MEN TO ERECT OUR HOMES?

Yes, and good men, too! We maintain a staff of Aladdin Builders throughout Canada who are experienced in the building of our homes and if desired, we can arrange to provide the services of one of these men for the erection of your new home. With this experienced man, assisted by local help, you can be sure that your home will be erected with all possible speed and that the work will be well and efficiently done.

This, however, is not necessary as with the complete Plans and Instructions furnished and the materials carefully marked, any carpenter or builder can erect the home and thousands of Aladdin Homes have been so erected—many of them by the home owner himself without the services of a carpenter.

BLUEBIRD TWENTY

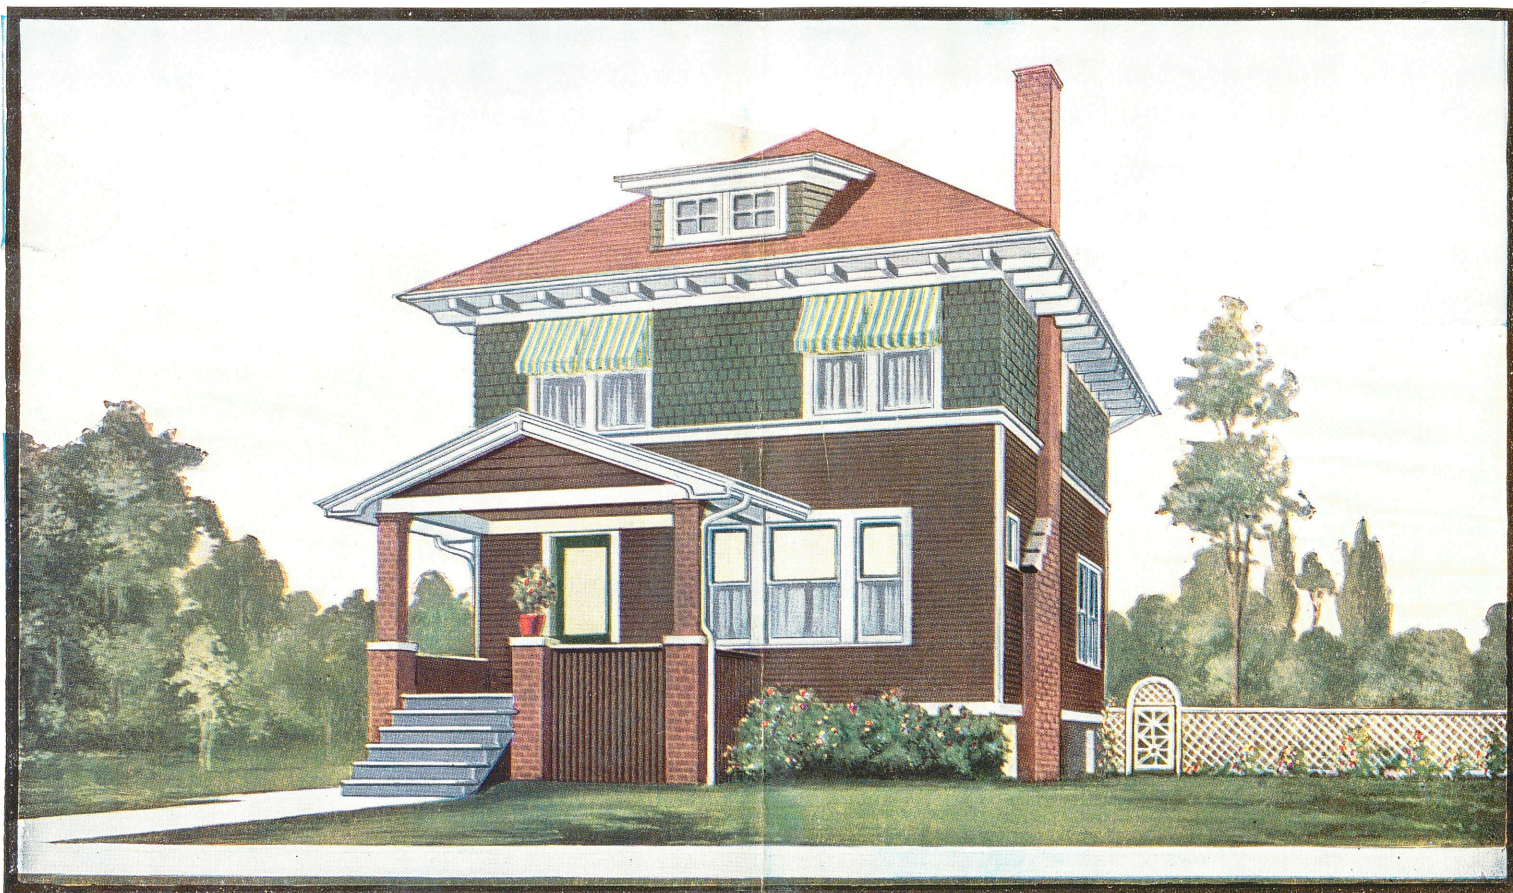

Summer Cottages

Summer Cottages

If you are planning to build a summer home, write us for a Summer Cottage Plan Book. It illustrates many delightful bungalows of from two to ten rooms. Aladdin summer cottages are built from thoroughly dry lumber. They can be erected in a few days and will give you and your family and friends, many happy years.

And Here's a Larger Home at Low Cost

The Edmonton B

“WE want a square house—siding below, shingles above—and with a cottage roof. We want a living room, a dining room and a large kitchen on the First Floor, and *FOUR* bedrooms and bath on the Second Floor.”

A surprising number of people outline their requirements of a Home in just these terms; you will note that we have emphasized the “four” bedrooms, as this is often an essential point. It is to meet this recognized need that we have catalogued the design Edmonton.

The railed balcony at the rear of the Second Floor is a feature that will be appreciated by every housewife.

At slight additional cost, the verandah can be run across the entire front of the house, if preferred. The verandah columns will be supplied, if desired, extending down to verandah floor without additional cost.

If interested in a smaller and less expensive Edmonton with the same rooms send for alternative plan, mentioning whether three or four bedrooms are desired.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

THE “CANADIAN LUMBERMAN” SAYS AND EVERY THINKING PERSON AGREES

“Year after year the price of carpenter labor has been advancing, thus making the cost of lumber higher when in position. Framing material will eventually have to come to the building trimmed to length, and we fail to understand why this fact is not more generally realized. *The piece stuff of the future will be furnished to the building ready for position. This thing of cutting and cutting with a handsaw at the building site until it fits is too costly.*”
—SO SAY WE ALL!

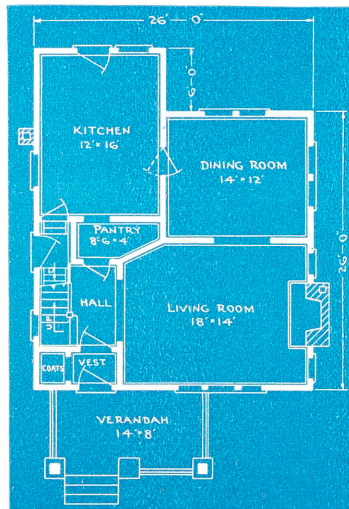

AN ALADDIN HOME SAVES YOU—

If your new Home is an *Aladdin* you are assured that it will have exceptionally attractive appearance, that it will be scientifically designed, substantially constructed and of first quality materials.

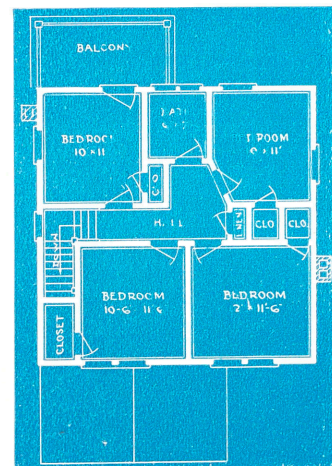

By eliminating architects’ fees, wholesalers’, jobbers’ and dealers’ profits, waste of material and costly hand labor, you will build at a big saving over the inefficient old-fashioned method.

Under the *Aladdin* Guarantee you are assured that your materials will be of *first quality* and that there will be no shortages. “*Aladdin*” signifies fair dealing, courteous treatment, prompt service and a guaranteed product.

We will REVERSE the Plans of any Ala’din Home, without charge.

SECOND FLOOR PLAN

A True California Bungalow

Shown in Two Sizes
AND THREE PLANS

POMONA No. 1 —

POMONA No. 2 —

The Pomona

THE POMONA is one of the finest examples of the California bungalow, and one of the few that can be built in a Northern climate, as it is compact for easy heating and has a roof with a good slope and no snow traps.

THE POMONA IS AVAILABLE IN TWO SIZES

The Pomona No. 1 and No. 2 are each 28 feet by 38 feet.

The Pomona No. 3 is 24 feet by 36 feet.

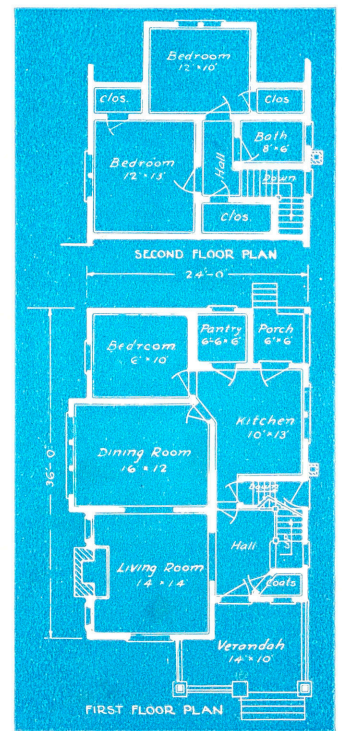

The lines of each are alike, and almost perfect.

The various decorative features such as brackets, belting course and half timbering give this bungalow added distinction.

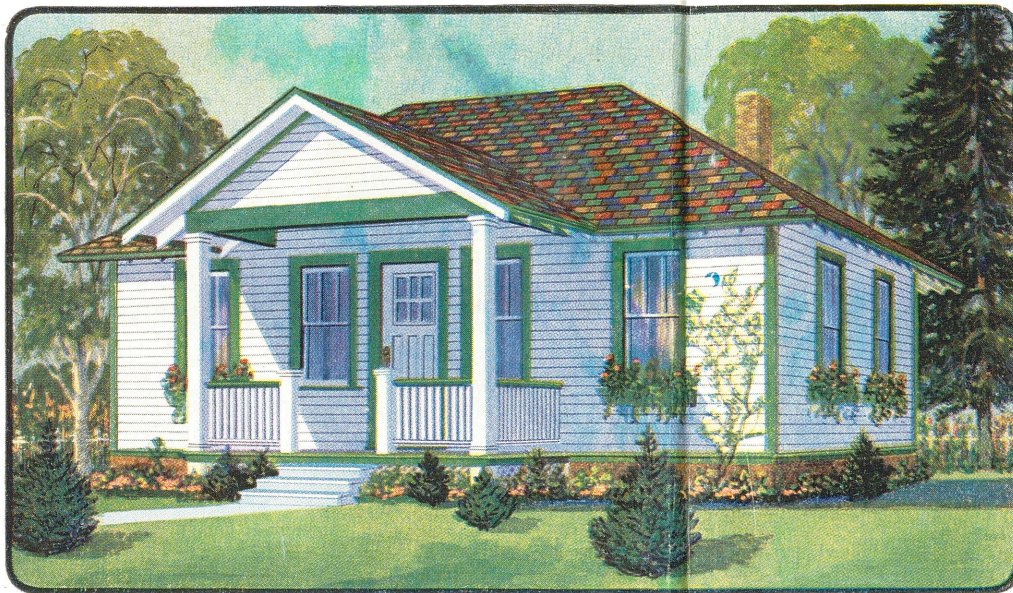

In each, a generous sized living room, dining room and kitchen are provided and an open stairway, well-lighted by the window at the top of it, leads to the second floor where two more bedrooms and a large linen closet are located.

The photograph of this home shows the walls finished with XXXXX Clear British Columbia Cedar Shingles. If you prefer siding we will supply it without extra cost.

The Verandah is Included at the Price Quoted.

POMONA No. 3 —

The Inglenook

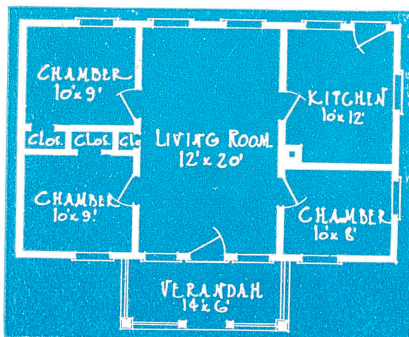

Size 32' x 20'

This design is born of the constantly increasing demand for an inexpensive bungalow with large rooms. It is as compact, well lighted and easily heated as any home you ever saw. See detailed Specifications on Page 17.

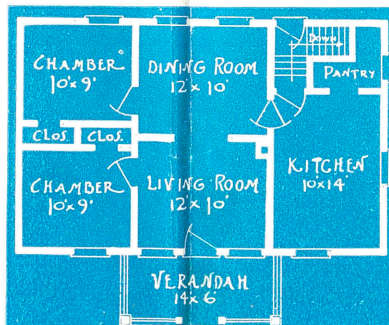

The verandah is quoted separately. We strongly recommend building it, however, with the house, as it adds so much to the general appearance and utility.

If desired, in Plan A, by taking the required space from the rear of the living room, a bathroom and grade cellar entrance will be provided at small additional cost, which will be quoted on request.

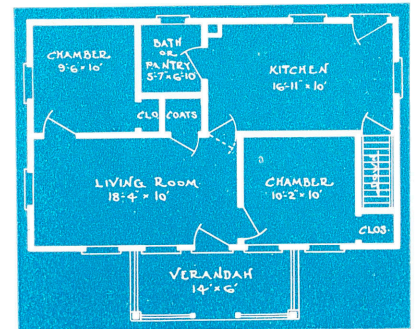

Unless otherwise requested, all Aladdin Homes are roofed with XXXXX Clear B. C. Cedar shingles. If the "Four Color" shingles shown in the illustration are wanted, they will be furnished at a small added cost which will be quoted on request.

FLOOR PLAN A

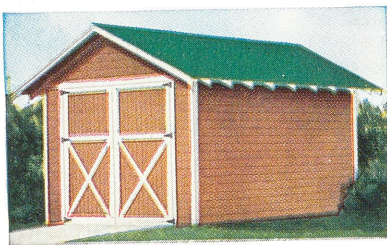

FLOOR PLAN B

FLOOR PLAN C

Garages Priced Remarkably Low

The four Aladdin Garages shown here cover the demand for 95% of all garages built, designed from our many years' experience in manufacturing garages. Aladdin Garages are staunchly built of sound materials. The lumber is all cut to fit, so that a couple of days' time will erect and FINISH one. At prices quoted, you will easily understand why we are selling so many of them with our houses.

THE FORD, 10' x 16'

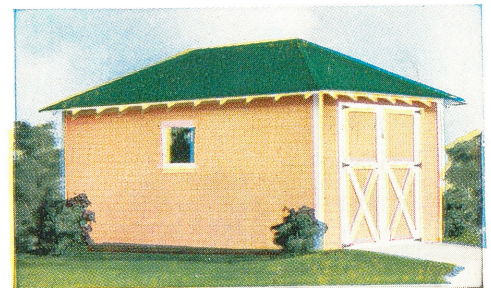

THE FORD, 10' x 18'

The Ford, illustrated at left, is made in two standard sizes, the 10 x 16 ft. size being designed for Ford cars. It is just large enough to admit a Ford touring car with the top either up or down. Size 10 x 16 ft. is complete with all material cut to fit, paints to match the colors of your house, hardware, locks, nails and roofing. Size 10 x 18 ft. is of the same construction.

THE CADILLAC

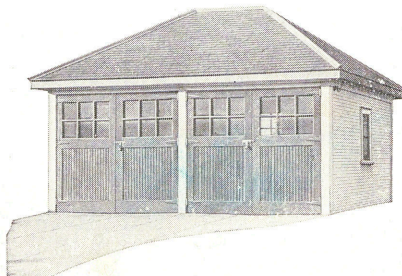

The Cadillac is an attractive two car garage with four swinging doors. It is size 18 x 18 ft., has plenty of room for two large cars. It is attractive in appearance and can be painted, if desired, to match the color scheme of house. Complete with glass, hardware and paint.

Specifications as follows: Sills 4" x 4"; Studding 2" x 4"; 24" centers; Drop siding for side walls; Rafters, 2" x 4", 24" on centers; Exposed Eaves, Roof Sheathing, inch lumber laid tight. Best quality Cedar shingles for roof. Hardware, nails and paint for two coats on exterior. Materials readi-cut and complete blue prints showing every step of erection. All garages shown are furnished without floors as practically all auto owners prefer to build floor of concrete or cinder.

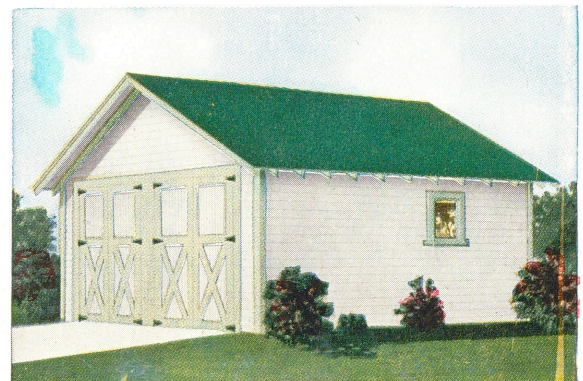

THE STUDEBAKER

The Studebaker, size 12 x 20 ft., will take the largest car on the market, with ample room at sides for working about the car, also storage space for supplies. It has swinging doors. It is of a splendid type and always looks well wherever it may be erected. Paint to match your house.

THE FRANKLIN

Distinctive and attractive, the Franklin, size 20 x 20 ft., two car garage will do credit to any surroundings. It is furnished with siding which can be painted to match color scheme of home. Four swinging doors are provided.

"SATISFACTION OR YOUR MONEY BACK" IS OUR GUARANTEE TO YOU

Wesley College,
Winnipeg, Man.
March 3rd, 1923.

Aladdin Homes Co., Ltd.,
Winnipeg Man.

Gentlemen:—

It is with pleasure that I write to tell you that the Aladdin Home which you supplied to me last summer and which I had built on Vernon Road, St. James, has given me the greatest satisfaction in every particular.

Mrs. Elliott and I are agreed that it is, without doubt, the warmest and most comfortable home we have ever had and you will be interested to know that throughout the past winter, which has been, at times, one of the most severe in Western Canada, we have always been warm and comfortable; in fact, it has been necessary at times to open several of the upstairs windows even on the coldest days.

I have had many favorable opinions passed by friends regarding my new home and no one has expressed any adverse criticism, so you may judge how entirely satisfactory it is.

It is gratifying to me to be able to write to you in this way on the completion of our transaction and after living in my new home several months, I wish to thank you for your helpful guidance and kindly co-operation.

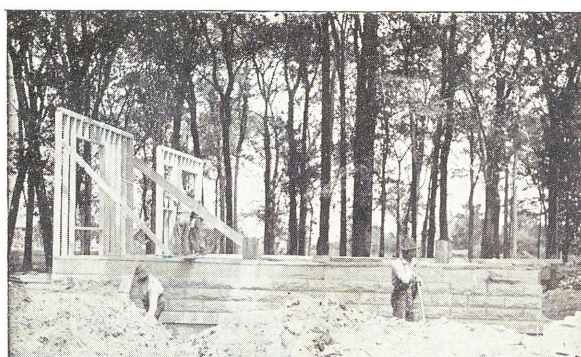

In appreciation,

Yours very truly,

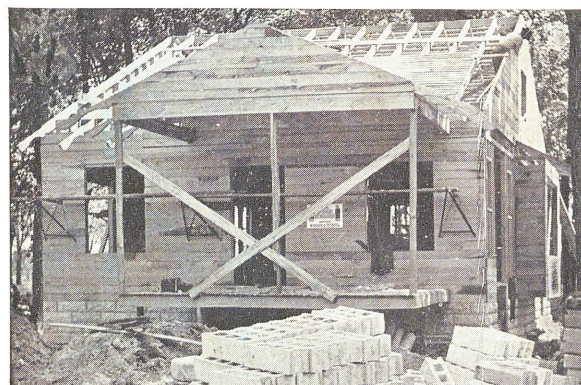

(Signed) James Elliott.

This is our guarantee to you — the soundest ever written. All materials are shipped subject to your inspection. If they are not exactly as specified in every particular, notify us promptly when we will cheerfully refund your money. Read also "THE MATERIALS WE USE" on Page 16.

HOW AN ALADDIN HOME LOOKS IN COURSE OF CONSTRUCTION

Starting Construction on First Day

Frame Work Up on Third Day

(THE POMONA)

An Aladdin home is exactly the same home that would be erected by a builder in the old-fashioned way.

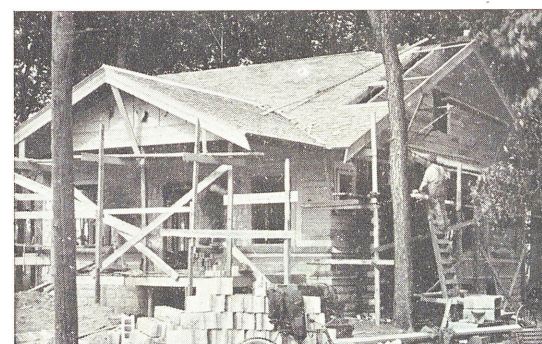

It is not Sectional or Portable and cannot be taken apart except as you would tear apart any good house.

It is built from the same joists, studs, rafters, wall sheathing, etc., that a carpenter would use to build the house from the uncut material.

It is identical with the best frame, brick veneer or stucco construction.

The saving lies in the elimination of waste and the reduction of hand labor.

We are sometimes asked if the builder of an Aladdin house will not lose as much time hunting out his materials and finding the right piece as he will save by the Read-Cut System. Of course this remark on the face of it is an admission that time is saved by the Aladdin System. However, any thought about time lost in hunting for pieces is immediately dispelled when you see the simple system of laying out materials that accompanies the instructions for every house, and when you understand that the length is marked on each piece of material, and that all pieces of the same length are interchangeable.

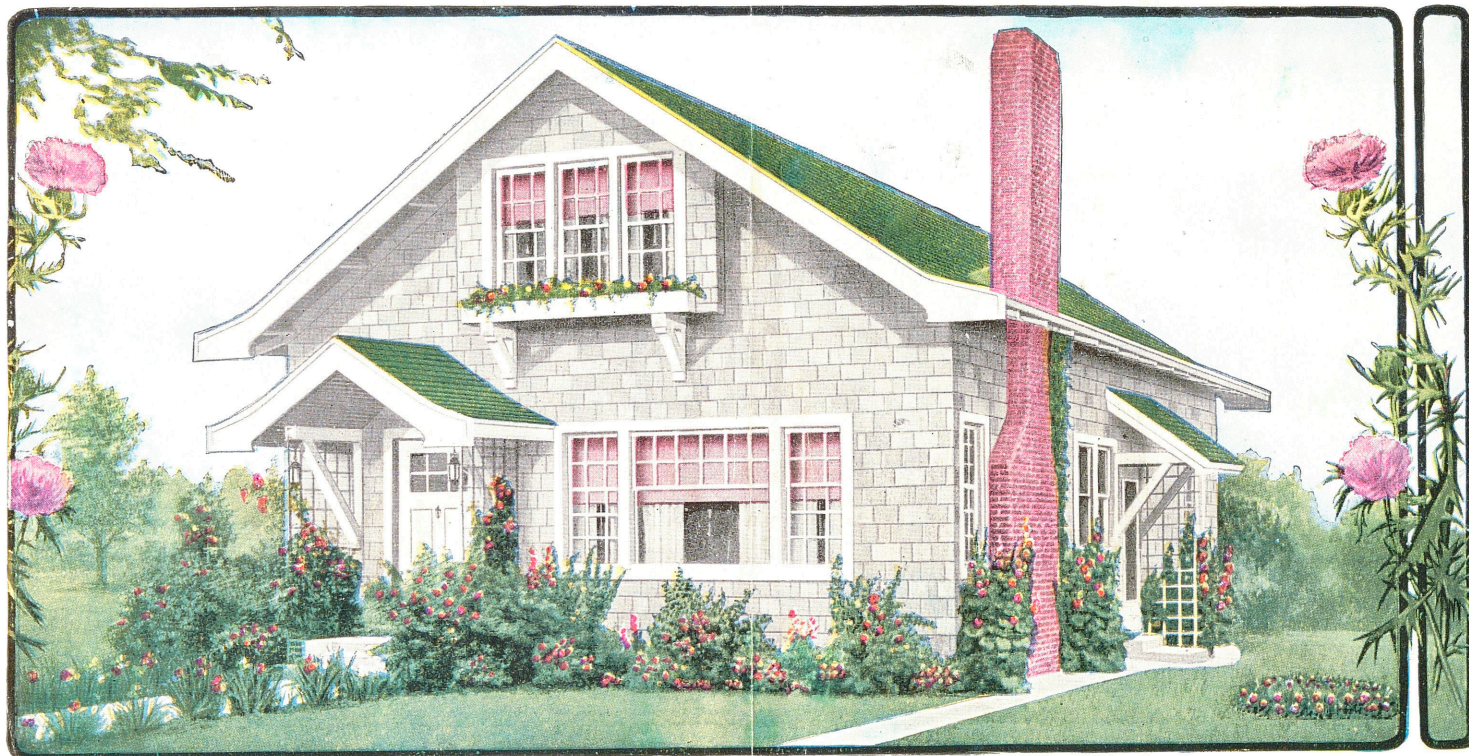

Progress of Work on Sixth Day

Exterior Finished on Eighteenth Day

Many Enthusiastic Owners Say This Home is Our Masterpiece

The Sunnyside

THE SUNNYSIDE! One of Aladdin's finest offerings. A home of brightness, happiness and cheer. Every line of this delightful home proclaims the character and refinement of its fortunate owner. The outside walls may be finished with shingles as illustrated or with siding or stucco if preferred.

The Sunnyside is available in two sizes. The Sunnyside "A" is 26 feet by 34 feet. The Sunnyside "B" is 22 feet by 30 feet. They are both designed on the same generous sweeping lines. In both, a framed opening invites you to a spacious dining room, the kitchen is arranged on modern step-saving lines, and the second floor contains three large, airy, well lighted and ventilated bedrooms. The bathroom, located as it is at the head of the stairway, is convenient to the whole house. Note the particularly large clothes closets and the linen closet!

In the Sunnyside "A" a well lighted and ventilated pantry is conveniently placed. This is just the right size for a Breakfast Nook, if preferred instead of pantry. The Sun Room opening from the dining room has one wall which is all windows, and a door to the lawn.

In the Sunnyside "B" practically everything is provided in its same relative position as in the "A" plan. The extra large front bedroom and the three spacious rooms downstairs give the greatest comfort. This plan is of course priced lower than plan "A".
