THE INDUSTRIAL SCHOOLS.

The attendance at the Victoria Industrial School for boys during 1904 was 260. Of these 118 attended during the whole year, 69 were sent from the Institution, and 73 were admitted. The Principal states that the boys are improving in conduct, and there is less trouble in their management than formerly.

The teachers in the school are doing efficient work, considering the fact that the pupils in all but the lowest class attended school only one-half of each year.

The attendance at the Alexandra Industrial School for girls during 1904 was 35. Of these 13 attended during the whole year, 13 were sent out during the year, and 9 were admitted.

The girls are attentive, and considering the circumstances, they do good work.

SCHOOL LIBRARIES.

There are thirty-two teachers' libraries in the schools. In some instances two schools are united for library purposes.

In addition to the thirty-two libraries there is a central library in which from 6 to 12 copies of educational books are kept for use by the teachers of all the schools.

The following books were added to the libraries in 1905 :—

Hodge's Nature Study.

How to Make a Flower Garden.

How to Make a School Garden.

Insect Life.

Every-Day English.

Five Works on Manual Training.

REPORT OF THE CLERK OF SUPPLIES.

I have the honor to submit the following report in regard to Text Books and Supplies furnished by the Board of Education for the year 1904.

There were 1795 P. S. Arithmetics, 514 P. S. Geographies, 1,282 P. S. Grammars, 17 H. S. Grammars, 780 P. S. Histories, 52 H. S. Histories, 247 Phonic Readers Part I, 3,480 Phonic Readers Part II, 1,630 Second Readers, 1,183 Third Readers, 1,217 Fourth Readers, 35 H. S. Readers, 3,461 Music Books, 1,737 Spellers, 105 Supplementary, Readers, 33 Shorthand Manuals, and 305 Library Books supplied to the schools. There were also 8,453 Text Books sent this year to be examined, of which 769 were rebound, 6,305 were condemned as unfit for use and were replaced with new ones, 950 were returned to stock not being required, and 429 were returned to the Schools to be used another term. 1,350 Text Books were paid for, and a considerable quantity of general supplies. 344 Text Books were confiscated by the Medical Health Officer having been in the possession of pupils who had contagious disease in their homes. In addition to these there were supplied the General School Supplies, Blank Books, etc., as shown in Table (B), also a large quantity of sewing material to the Domestic Science classes, and a large quantity of material for use in the Manual Training classes. The teachers and pupils generally exercise great care in the use of books and material supplied by the Board.

Since the addition of the High and Technical Schools, together with the Manual Training and Domestic Science Departments, the supply room is inadequate for the proper handling of the supplies, and if possible a larger room

should be secured in order to facilitate the work in this department with the despatch that is necessary.

See tables (A), (B), (C), (D), in the Appendix to the Annual Report, showing the quantity of Text Books, General Supplies, and Kindergarten Supplies on hand at the beginning of the year, the quantity purchased and delivered during the year, and the quantity on hand in December, 1904.

Respectfully submitted,

WILLIAM KERR,

Clerk of Supplies.

REPORT OF THE INSTRUCTOR IN MILITARY DRILL AND PHYSICAL EXERCISE.

I have the honor to submit the following report in Drill and Physical Exercise in connection with the Public Schools of the City of Toronto for the year 1904.

The drill in the several schools, I am pleased to report, is improving. The pupils show a great interest in and liking for the work.

The Annual Review and parade held on June 3rd, in connection with the annual decoration of the monuments, was the largest parade of the drill companies, there being on parade 1,762 all ranks.

Lieut.-Col. Galloway, D.S.A., conducted the annual efficiency inspection of the Cadet Battalion at the several schools. The following is a copy of his reports:—

A satisfactory report.

(Signed) B. H. VIDAL, Col.,

D. A. G.

I find that holding the inspection at the several schools is much better, as the pupils are not on parade as long as when it is a Battalion inspection.

I have the honor to recommend that a caretaker be appointed to look after the Arms and accoutrements, whose duty will be to keep them properly cleaned.

RIFLE PRACTICE.

I am pleased to report that rifle practice was continued by the Cadets during the months of January, February and March, and that the progress has been very satisfactory. The following are the average scores for each company, together with the names of the best shot in each company.

During the months of June and July a number of the Cadets were able to fire at the Rifle ranges at Long Branch, and I am happy to report that the Cadets were very much pleased.

I have the honor to report that I was able to enter a Cadet team at the Ontario Rifle Match, and in competition with teams from High Schools we won fourth place.

PHYSICAL EXERCISE (Girls).

The Physical Exercise in connection with the senior and junior classes (girls) under the present circumstances continues to be satisfactory. More time should be allowed teachers for this work. Pupils should receive instruction at least once each week.

I am very much indebted to the Principal and Assistants who so kindly assisted me by commanding the several Battalions on the day of the Annual Parade and inspection.

I have the honor to be, gentlemen,

Your obedient servant,

JOHN T. THOMPSON, Lt.-Col.
Instructor in Drill and Physical Exercise.

ROSEDALE SCHOOL

REPORT OF THE SUPERVISOR OF MUSIC.

I have the honor herewith to submit a report of the most interesting developments of my department, together with suggestions for improvement.

During the past year the most noticeable improvements were in Sight-Singing and Part-Singing. I also find more precision in the attack and a more unanimous release of the tone. Accentuation has also improved. There is now little swooping or slurring in singing the voluntaries pointed on the Modulator.

With the improvement in Sight-Singing comes the better rendering of the two-part exercises and songs. In all the grades taking two-part work the voices are classified. Before this classification was made it was not unusual to find some good soprano voices among the boys singing alto, and some good alto voices among the girls singing the upper part.

The Teachers are now convinced that the proper classification of the voices greatly facilitates the teaching of Part-Singing. All the fourth and third book classes, most of the Senior second book classes, some of the Junior second book classes, and one Senior first book class are singing two-part songs.

Forcing is promptly stopped in all the classes and the result is a free tone. Great care is being taken to train the children to sing sweetly and without strain. The children are trained to listen so as to secure the proper blend of the voices.

Efforts are being made to train the scholars to enunciate their words clearly and accurately, so as to be intelligible to a listener who did not have the words.

Suggestions for improvement :—

1. That all Teachers, who find themselves unable to properly teach the music of the grade, should attend the Voluntary Class.

2. That a copy of the Sunshine Songs No. 1 be supplied to each Junior Second and Senior First teacher.

3. That suitable hymns be sung at the Opening and Closing Exercises, and that for this purpose a copy of "Hymn Trios" for fourth book classes, and a copy of "Hymns for Day Schools" for the other grades be supplied to each school.

4. That a copy of "The Songs of the British Empire" in the Staff and a copy of the same in Tonic Sol Fa be supplied to each school.

Yours respectfully,

LLEW. REES.

REPORT OF SUPERVISOR OF DRAWING AND ART WORK.

I have the honor to submit the following report of the work in Drawing done in the Toronto Public Schools during the year.

The aim of the work has been to develop in the pupils habits of observation, to foster good taste in the selection and arrangement of objects for the work, to give power of expression in suitable mediums, and to cultivate creative imagination in pictorial and decorative work.

The results show steady improvement, especially in the color work, the progress in decorative design in the senior classes, being particularly noticeable. We hope later on, to correlate this department of the work more closely with manual training and domestic science, by designing decorations for the objects made in those classes.

The teachers co-operate heartily in the work attending grade meetings where the work is explained, many also attending a voluntary class held on Saturdays. With the exception of some of the classes where teachers have been recently appointed, the work is generally fairly up to grade, many classes doing excellent work.

The kindness of the Board of Education, in allowing me time to visit the St. Louis Exposition in the fall, gave me an opportunity of seeing art educational work from other countries and also of studying the art ideals of those countries as manifested in their fine arts and manufactures. I feel that the visit was very profitable and will bear fruit in the art development in the schools of Toronto.

During the year, the "Prang Text Books of Art Education" have been introduced into the classes as reference books, each school being provided with one set. The teachers find these books very helpful, the illustrations serving as good examples of composition and technique, not to be copied, but used as suggestions.

The progress made during the year has been very satisfactory.

Respectfully submitted,

JESSIE P. SEMPLE,

Supervisor of Drawing.

REPORT OF THE SUPERVISOR OF DOMESTIC SCIENCE.

I have the honor to submit the following report of the work done in the Educational Sewing and Domestic Science in the Toronto Public Schools.

Sewing is taught in the Senior Second, Junior Third and Senior Third Classes.

In the Senior Second Class the following stitches and their use are taught—Basting, Running Stitch, Back Stitch, Half-back stitch and Overcasting. These are taught on burlap canvas and then practiced on unbleached cotton. The articles made are needle cases and pencil cases.

In the Junior Third Class hemming and overhanding are taught, and the stitches taught in the Senior Second Grade are applied in the making of small handkerchiefs, laundry bags, aprons, caps, and in patching.

In the Senior Third Class further practice is given in the use of these stitches and the buttonhole stitch is taught. The girls in this grade are taught to draft the pattern of a small gored skirt.

The models finished this year are small table napkins and small skirts in which French seams, the putting in of a placket and the putting on of a band are taught.

The work done in this department has been very successful. Too much cannot be said in praise of the teachers of these grades for their untiring efforts to make this work succeed.

The grade meetings have been well attended and the teachers have so willingly and cheerfully done everything that has been asked them or even suggested to them that I have enjoyed my work in this department very much.

The only time given for sewing on the present timetable is between three-thirty and four o'clock twice a week. The teachers claim that this is not at all satisfactory and I am confident we should obtain much better results if we were allowed one hour once a week before three-thirty.

For the carrying on of our work in Domestic Science we have four class-rooms, each equipped for a class of twenty-four. There is one class room at each of the following Schools: Parkdale, King Edward, Wellesley and Winchester St. At each of these centres we have fifteen classes a week. These classes are well attended and the

girls are very enthusiastic about their work. A number of the teachers and a number of the parents have visited these centres during lesson periods and have pronounced themselves well pleased with the work done there.

The general impression is that at these class rooms, the girls are simply given a recipe, and taught how to make use of it, and that our object is to make of each girl a "good cook." While I do not wish to depreciate the value of such a training, I can readily see that if this were all that we were doing, this subject would have no place in the curriculum of public school work. Let me try to show that Domestic Science is not only an educational factor, but that it is the application, or the foundation of every other subject in our course of study, and Domestic Science cannot be properly taught without intimately co-relating it to these subjects.

We make use of arithmetic in the working out of recipes, in weighing, measuring and calculating expenses, and comparing them with certain incomes.

The study of yeasts, molds, bacteria, pasteurization and sterilization is surely a study of biology, and a knowledge of this will show the necessity of a proper care of the dish cloth, garbage pail, sink, etc.

The study of proper systems of ventilation, heating and plumbing means the application of certain well known laws in Physics.

Almost all kinds of cooking depend on certain chemical principles. We make use of the principles the girl already knows, and in teaching new principles we lay the foundation for more advanced work in this subject.

Digestion depends on certain chemical principles and so does the removal of stains, and general cleaning.

Our experiments in our kitchen laboratory are simply experiments in elementary chemistry.

The use of a food is always accompanied by a talk on the country in which it grows, the habits and customs of that country, the manufacture of the food product as we have it from the raw material, its route of transportation to us and its value to us as a strength or energy producing or muscle making agent.

The tabulating of the results of experiments or the notes written after such a lesson form splendid exercises in composition and writing.

From the above statements it may be easily seen that we have a very large field to cover and the present arrangements only give the girls of the Junior Fourth Grade one hour and a half a week for one year for this very important subject.

Now with three additional centres we should be able to give all the girls of both Junior and Senior Fourth Classes a two years' course.

The girls attending our classes this year are continually asking to be allowed to continue their work next year.

Our class rooms I have been told are the equal if not the superior to any in America, and I know the teachers of Domestic Science have done excellent work. All we ask is more class rooms and more Domestic Science teachers.

Respectfully submitted,

IDA M. HUNTER.

COMMERCIAL WORK AND PENMANSHIP.

I take pleasure in submitting my report of the work done in commercial work and penmanship during the past year.

The work is progressing very satisfactorily, and I am greatly encouraged by the hearty manner in which the teachers have taken hold of my methods of instruction. Black-board work has been emphasized in many classes, and the pupils have been encouraged to improve their writing on the black-board, thus lessening the amount of desk work and consequently protecting their physical welfare as well as adding freedom to their writing.

One of the most discouraging things we have to contend with is the present school desk. In many cases the seats are so tilted that the pupil's feet do not reach the floor, causing the body to lose its poise and resulting in a stooping posture, throwing the arms out of the proper position for writing.

The general black-board work of the teachers is improving. All writing upon the black-board should be according to approved forms, uniform, neat and legible, because children are great imitators, and are quite as apt to imitate bad as good forms.

The bookkeeping, shorthand and typewriting in the junior and senior fifth classes have been carefully and thoroughly taught by the respective teachers. A great deal of enthusiasm has been shown in most of the classes in these subjects, and excellent work has been produced as a result.

I fully appreciate the hearty co-operation of the teachers in my special work, and look forward to making the Toronto Public Schools celebrated for good penmanship.

Most respectfully submitted,

J. B. McKAY,

Supervisor of Writing and Commercial Work.

REPORT OF SUPERINTENDENT OF MANUAL TRAINING.

I have the honor to submit herewith my report of the work done in Manual Training in the Toronto Public Schools during the year 1904.

Under the direction of the teachers of the first, second, and third book classes, simple exercises in cutting, mounting, and construction, using paper and light card-board, have been given to the children. The articles made by the pupils included portfolios, envelopes, booklets, picture frames, sail-boats, boxes, toy furniture, and other objects related to the school, home, and play interests of the child. Many classes have successfully connected these exercises with Number and Language Work, Nature Study, etc., to the manifest advantage of both Manual Training and the other subjects of the curriculum. The teachers have used the motor and constructive tendencies of the child as a method or a device in presenting or supplementing the presentation of some lesson. For example in connection with the story and language lesson based on the poem "Hiawatha," the children make paper canoes and tents.

Portfolios and booklets were made to hold leaves and flowers, and boxes to hold seeds in Nature Study lessons. Appropriate envelopes were planned for monthly report cards, bank books, and for newspaper clippings in the study of current events. In first book classes, number work has been very advantageously taught in connection with paper-cutting and folding lessons. These classes have demonstrated that where Manual Training has been correlated in this manner with the regular knowledge and information lessons it fills an important place in modern educational practice.

The work under the direction of the Manual Instructors at the Centres has been more interesting than ever before as evidenced by the fact that an increasing number of boys spend much extra time before and after school at the work-bench. The regular course includes "A Pencil Sharpener" "A Towl Roller," "A Flower-pot Stand," "A Wall Bracket," and "A Box" for handkerchiefs, gloves, neckties or letter paper as the boy may wish. The more rapid workers are permitted to plan and make other objects, E.G. Pen-Racks, Desk Blotters, Book-Racks, etc.

Lessons in Mechanical Drawing always precede the work at the benches. Instruction is given in the selection and adaptability of various woods for certain purposes and in the use and care of tools. The latter has been found to be a very practical training in certain important habits such as carefulness, neatness, and honesty. The experiment of applying a simple decoration and stain to the final projects of the course has added much to the educational possibilities of the work as well as to the appearance of the finished object. The educational value of this department though thoroughly significant would be more easily appreciated if the accommodation in Toronto admitted of a two

years' course instead of one year as at present. In most of the cities of England, Germany, Sweden, and the United States the course is of either two or three years' duration with frequently two lessons each week instead of one as with us. It is sincerely to be hoped that the Board of Education will have the support this year of the Municipal Council in securing funds so that new Centres may be provided. This will not only make a two years' course possible, but will remove much of the inconvenience at present experienced by those pupils who live at a considerable distance from the Manual Training centre which they attend.

As a very large number of pupils leave our public schools for the manufacturing and commercial world, it will readily be seen that a trained eye and hand are not to be lightly valued. Though not insignificant this is however of secondary importance. Educational Hand-work now receives a place second to no other subject in the elementary curricula of the leading cities of Europe and America. This is because the most prominent educators recognize that the hand is the great avenue of approach to the brain. It is seen that the easiest and most natural way, as well as the most interesting to the child, of training his powers of perception, imagination, judgment, attention and concentration as well as of strengthening his ability to work independently is by a properly selected series of exercises in making objects from various materials. To develop the mental faculties and strengthen the moral fibre, to train not merely the hand but more particularly the head and heart is the aim of Manual Training. That it does this is the reason for its strong support by the greatest living schoolmen of the world.

Respectfully submitted,

W. L. RICHARDSON.

NOTE.—In 1900 the School Board decided to include all expenses except the cost of conducting Night Schools in the column headed "Total Cost of Maintaining the Schools." Formerly permanent improvements and rent of temporary buildings, interest on debenture debt with cost of exchange and commission on payment of same and sinking fund rates were not included. If the same basis were adopted in Toronto as is used universally in the United States the figure for 1904 for Toronto would read: Total cost of maintaining the schools \$307,706.37; cost per child on the basis of registered attendance \$17.02; cost per child on the basis of daily attendance \$25.63.
