Better Steel and Better Workmanship

account for the better service from
SIMONDS Dado Heads

Just one small thing to illustrate the greater care used in the manufacture of the Simonds Dado; the center holes are accurately ground to assure an exact fit on the mandrel.

Then, of course, they are made of *Simonds Steel*—as you know the best saw steel made, that gives them unequalled edge holding qualities.

SIMONDS CANADA SAW CO. LIMITED

St. Remi and Acorn Ave. 1550 Dundas St. West
Montreal, Que. Toronto, Ont.

554 Beatty St., Vancouver, B.C.

55 Water St., St. John, N.B.

Each outside cutter is a groover in itself. A single cutter will cut grooves $\frac{1}{8}$ inch wide and two cutters will cut grooves $\frac{1}{4}$ inch wide.

By using inside cutters, grooves measurable by sixteenths can be obtained beyond the $\frac{1}{8}$ and $\frac{1}{4}$ inch cuts made by the outside cutters.

This tool cuts a clean groove in any direction in the wood and is easily kept in order.

Inside cutters and rakers on the outside cutters should be filed slightly below the marker or cutting points on the outside cutters.

SIMONDS Dado Heads are arranged in sets, as follows:

- No. 1 Set, Cuts $\frac{1}{8}$ to $\frac{3}{8}$ by $\frac{1}{8}$ inch.
- No. 2 Set, Cuts $\frac{1}{8}$ to $\frac{3}{8}$ by $\frac{1}{8}$ inch.
- No. 3 Set, Cuts $\frac{1}{8}$ to $\frac{3}{4}$ by $\frac{1}{8}$ inch.
- No. 4 Set, Cuts $\frac{1}{8}$ to 1 by $\frac{1}{8}$ inch.
- No. 5 Set, Cuts $\frac{1}{8}$ to $1\frac{1}{2}$ by $\frac{1}{8}$ inch.
- No. 6 Set, Cuts $\frac{1}{8}$ to 2 by $\frac{1}{8}$ inch.
- No. 7 Set, Cuts $\frac{1}{8}$ to 3 inches wide
- No. 8 Set, Cuts $\frac{1}{8}$ to 4 inches wide
